A. Mission Description and Budget Item Justification

Funding is required for the software development of a prototype capability to streamline the assembly, transmission, routing, processing, and tracking of the large volume of contractor submissions received annually by the federal government which will become CSP (Contractor Submission Portal) as well to design the technical architecture to operate in DoD Azure Cloud.

- Lead the software development and testing of the CSP prototype in DoD Azure cloud leveraging cloud based technologies and capabilities
- Deploy the CSP prototype in DoD Azure Cloud environment accessible to the public
- Conduct unit, system, user acceptance, and other software testing in order to ensure functionality meets all requirements
- Develop the SoS (System of System) design requirements and translate business requirements into technical requirements
- Collaborate with the Government in the development of mock-ups and demonstrations
- Develop and test the refined SoS prototype
- Produce SoS Planning module and the assignment module Intranet Functional and Technical Design
