A. Mission Description and Budget Item Justification

Through the Combined Enterprise Regional Information Exchange System (CENTRIXS) and Pegasus (formally GRIFFIN), the Multinational Information Sharing (MNIS) Program enables secure sharing of operational and intelligence information and enhances collaboration between United States forces, trusted allies and other multinational partners. This effort also increases overall combat effectiveness by leveraging capabilities and information from all partners and reducing the possibility of fratricide. These coalition information sharing systems are in direct support of the Department of Defense's (DoD's) strategic goals to "Win our Nation's Wars" and "Deter conflict and promote security". The MNIS program supports five Combatant Commands (COCOMs) with connectivity in 89 nations, the North America Treaty Organization, 11 Bilateral agreements and 150 sites with over 80,000 users worldwide. MNIS also evaluates new technologies and develops tactics, techniques and procedures to facilitate the integration of emerging technologies and capabilities into operational multinational information sharing capability. The integration of new technology for CENTRIXS and Pegasus is accomplished through research, integration, and testing using the Combined Federated Battle Laboratory Network.

A planned improvement to the CENTRIXS coalition network, Common Mission Network Transport (CMNT), will provide distinct and permanent transport capabilities; enabling network operation centers to priority command and control information more efficiently. CMNT supports DoD instruction 8110.1 guidance for integrating CENTRIXS and other operational networks into existing DoD general service communications infrastructure as a separate network servicing all DoD MNIS requirements. This capability provides a common transport for encrypted traffic. CMNT will be the established encrypted network to facilitate the movement of virtual private network traffic between segments.

The MNIS emerging capability, Unclassified Information Sharing Services (UISS), extends US information sharing capabilities to mission partners providing enterprise-level solutions that allow COCOMs to share unclassified information with US Government agencies and non-traditional partners such as, host nations, intergovernmental organizations, and nongovernmental organizations. The employment concept for the UISS is to implement enterprise Web-based, "non-mil" platform, available to as broad a community as needed to support mission operations, with worldwide, 24 hour-a-day, seven day-a-week access, to any user with an Internet connection, including web-enabled mobile personal devices. Using an Internet-based capability and an integrated suite of commercial-off-the-shelf collaboration tools the UISS capability will enable unclassified information exchanges and ad-hoc communications for shared communities of interest and issue-specific groups among and across organizations and individuals.

• Other Adjustment	0.544	-	-1.699	-	-1.699

Change Summary Explanation

The FY 2012 increase of +\$0.544 supported research, initial planning and analysis for the UISS enterprise cloud capabilities for over 35,000 users worldwide. Research and analysis was conducted for Unclassified Information Sharing Service Information Assurance architecture to support initial accreditation and testing for Initial Operational Capability.

The FY 2014 decrease of -\$1.699 is due to realignments within the DISA Command and Control (C2) Portfolio to other higher priority C2 operational requirements.

^{##} The FY 2014 OCO Request will be submitted at a later date

A. Mission Description and Budget Item Justification

The Multinational Information Sharing (MNIS) Program is a portfolio of four coalition information sharing capabilities designed to enable and improve sharing of operational and intelligence information among US forces and multinational partners.

1) Combined Enterprise Regional Information Exchange System (CENTRIXS), supports intelligence and classified operations at the Secret Releasable level. There are multiple, cryptographically-isolated CENTRIXS enclaves serving various communities of interest (COI) that support multinational efforts including Overseas Contingency Operations and counter-narcotics operations. CENTRIXS is regionally focused and combatant command (COCOM) centric. The MNIS Program Management Office provides selected centralized services from two Defense Enterprise Computing Centers for five of the 40+ CENTRIXS networks/COIs, and engineering support for standardized solutions.

2) Pegasus, (formerly GRIFFIN)/Improved Connectivity Initiative (ICI), connects the national Command and Control (C2) systems of Combined Communications Electronics Board (CCEB) Nations including Australia, Canada, New Zealand, United Kingdom and the United States, using commercial-off-the-shelf security appliances and cross domain solutions that facilitate situational awareness and operational planning/execution. Pegasus has a strategic focus and is member nation centric.

3) The Combined Federated Battle Laboratory Network (CFBLNet) provides a controlled coalition Research, Development, Trials and Assessment coalition information sharing "sandbox" for the US, CCEB Nations, North Atlantic Treaty Organization (NATO), and other mission essential nations. This sandbox is used to evaluate new technologies and to develop tactics, techniques and procedures that facilitate the transition of promising technologies and capabilities into operational multinational information sharing capability enhancements. CFBLNet's direct customers are the CCEB nations' military operational and intelligence entities led by their US counterparts at the COCOM and Agency levels. It is being used for the Coalition Warrior Interoperability Demonstrations, NATO missile defense initiatives, and by the Intelligence, Surveillance and Reconnaissance community to test capabilities prior to deployment.

4) The Unclassified Information Sharing Service (UISS), extends US information sharing capabilities to mission partners , enterprise-level solutions that allow COCOMs to share unclassified information with other US Government agencies, host nations, inter-governmental organizations, non-governmental organizations, and other partners.

B. Accomplishments/Planned Programs (\$ in Millions)		FY 2012	FY 2013
Title: Multinational Information Sharing		6.766	6.214
Description: Through the CENTRIXS and Pegasus (formally GRIFFIN), the MNIS Program enables secure sharing of operational and intelligence information and enhances collaboration among US forces, most trusted allies and additional multinational partners. Initiated a capability to support enhancements for the UISS-All Partners Access (APAN). UISS-APAN migrates existing systems supporting coalition sharing to an enterprise solution hosted on a DISA Defense Enterprise Computing Center. UISS-APAN capability will satisfy COCOM needs for tools and technology to support collaboration with non-traditional partners for humanitarian missions.			6.524
FY 2012 Accomplishments: CENTRIXS CMNT: Initial implementation of CMNT capabilities and established a business model for use of the CMNT across coalition networks. Pegasus/ICI: Supported testing, certification and accreditation of Web Services for all CCEB Nations and completed file publishing to all CCEB Nations. CFBLNet: Conducted EMPIRE CHALLENGE 11/12 Exercises to support Intelligence, Surveillance, and Reconnaissance, missile defense, and NATO force interoperability testing. Continued to evaluate emerging capabilities and technologies supportive of coalition information sharing needs. Linked the Coalition Warfare Development Facility at China Lake, CA to the Maritime Integration and Support Centre at Portsmouth West GBR. This connection facilitates collaborative planning and the exchange of information for Joint Strike Fighter Mission Planning and other applications. UISS-APAN: Completed Initial Operation Capability, the standup and the transition of users to UISS-APAN enterprise from their current stove-pipe systems and System Integration Testing.			
FY 2013 Plans: CENTRIXS CMNT: Deploy CMNT Pegasus/ICI: Continue to improve Pegasus E-mail with all CCEB Nations and expand and enhance chat services to all CCEB Nations. CFBLNet: Continue to evaluate emerging capabilities and technologies supportive of coalition information sharing needs. Continue to define, create and test a simultaneous distributed Synthetic Environment capability for American, British, Canadian, and Australian exercises to identify operational gaps and ways to decrease or eliminate those gaps.

APPROPRIATION/BUDGET ACTIVITY 0400: Research, Development, Test & Evaluation, Defense-Wide BA 7: Operational Systems Development				R-1 ITEM NOMENCLATURE PE 0301144K: Joint/Allied Coalition Information Sharing			PROJECT NND: Multinational Information sharing				
B. Accomplishments/Planned Programs (\$ in Millions)							FY 2012	FY 2013	FY 2014		
UISS-APAN: Design and develop an implementation strategy for Continuity of Operations (COOP) support. Design and develop capability improvements to increase user capacity. The decrease of -\$0.552 from FY 2012 to FY 2013 is due to reduced requirements for integration and testing configurations for CMNT capabilities due to Phase 1 implementations and completing site installation in FY 2012. FY 2014 Plans: CENTRIXS CMNT: Will enhance CMNT capabilities based on user experiences and changing operational needs. Pegasus/ICI: Will continue to improve Pegasus E-mail with all CCEB Nations and to expand and enhance chat services to all CCEB Nations. CFBLNet: Will continue to evaluate emerging capabilities and technologies supportive of coalition information sharing needs. Will continue to define, create and test a simultaneous distributed Synthetic Environment capability for American, British, Canadian, and Australian exercises to identify operational gaps and ways to decrease or eliminate those gaps. UISS-APAN: Will continue to design and develop capability improvements to increase user capacity. The increase +\$0.310 from FY 2013 to FY 2014 will support UISS systems engineering, testing, and integration for enterprise cloud computing and hosting capabilities.

D. Acquisition Strategy											
Performance-based contracts are primarily used for this support. MNIS maximizes the use of competitive awards and uses various contract types, employs large and small contractors, and is focused to achieve agency socio-economic goals and incorporate DoD acquisition reform initiatives. MNIS evaluates performance by conducting thorough Post-award Contract Reviews, monthly Contract Performance Reviews, and monthly In-Process Reviews.

E. Performance Metrics

Measure:

-Functional and/or Security Test & Evaluation test cases.

Performance Metric:

-System will provide for 99.99% data integrity for authorized users sharing information cross COI
-Maintain 99.99% confidentiality for users, by Nation between COI's.
-Direct traffic with 99.99% accuracy for chat, email, VOIP, file transfer, data storage and web service.

Methodology:

-Assessment Plan
-Sample ≥ 10K transactions (Email, chat & file storage/transfer)
-Conduct selected ST&E test cases

Measure:

-Security

Performance Metric:

-Deny 98.5% of unauthorized user attempts

Methodology:

-Assessment Plan
-DISA Field Security Operations will conduct penetration testing

Measure:

-Security

Performance Metric:

-Audit log must capture 99.99% of any unauthorized user activity.

Methodology:

-Assessment Plan
-Conduct audit log reviews in conjunction
-FSO penetration tests.
