# The FY 2015 OCO Request will be submitted at a later date.

**A. Mission Description and Budget Item Justification**

The National Military Command System (NMCS), operated by the Chairman of the Joint Chiefs of Staff, provides the President, Secretary of Defense, and other national senior leaders the ability to maintain situational and operational awareness and command and control of military forces in all crisis and/or national emergency contingencies. DISA's NMCS engineering program meets the NMCS systems engineer responsibilities, per Department of Defense Directive (DoDD) S-5100.44 and Chairman of the Joint Chiefs of Staff Instruction 3280.01B, to provide the Joint Staff with operationally efficient and cost-effective engineering solutions to ensure that components and facilities satisfy operational requirements including emergency messaging, situational awareness, crisis action, and information management.

The NMCS engineering program is vital in supporting the government's ability to safeguard national security and respond to contingencies globally and/or nuclear war. NMCS engineering focuses on implementing collaborative tools into current and crisis operations areas, integrating adequate back-up storage and recovery of voice, video and data across the continental United States to support key leaders, transitioning nuclear command and control to Internet Protocol based networks, migrating data and voice network to next generation satellites, implementing modern crypto-logical devices, and utilizing wireless networking to support warning systems and situational awareness. In addition, NMCS engineering continues to maintain the NMCS Reference Guide required by DoDD S-5100.44 and to develop engineering and test plans for the installation of hardware and software systems utilized within the NMCS.

Mission Description and Budget Item Justification                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |             |         |         |              |                                                                                                  |               |         |         |                                                                |                  |                  |            |
| The National Military Command System (NMCS), operated by the Chairman of the Joint Chiefs of Staff, provides the President, Secretary of Defense, and other national senior leaders the ability to maintain situational and operational awareness and command and control of military forces in all crisis and/or national emergency contingencies. DISA's NMCS engineering program meets the NMCS systems engineer responsibilities, per Department of Defense Directive (DoDD) S-5100.44 and Chairman of the Joint Chiefs of Staff Instruction 3280.01B, to provide the Joint Staff with operationally efficient and cost-effective engineering solutions to ensure that components and facilities satisfy operational requirements including emergency messaging, situational awareness, crisis action, and information management.                                                                                                                                            |             |         |         |              |                                                                                                  |               |         |         |                                                                |                  |                  |            |
| The NMCS engineering program is vital in supporting the government's ability to safeguard national security and respond to contingencies globally and/or nuclear war. NMCS engineering focuses on implementation of collaborative tools into current and crisis operations areas, the integration of adequate back-up storage and recovery of voice, video and data across the continental United States to support key leaders, transition of nuclear command and control to Internet Protocol (IP)-based networks, migration of data and voice network to next generation satellites, implementation of modern crypto-logical devices, and the utilization of wireless networking to support warning systems and situational awareness. In addition, NMCS engineering continues to maintain the NMCS Reference Guide (NRG) required by DoDD S-5100.44 and to develop engineering and test plans for the installation of hardware and software systems utilized within the NMCS. |             |         |         |              |                                                                                                  |               |         |         |                                                                |                  |                  |            |
| B. Accomplishments/Planned Programs (\$ in Millions)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |             |         |         |              |                                                                                                  |               |         |         | FY 2013                                                        | FY 2014          | FY 2015          |            |
| Title: NMCS Systems Engineering                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |             |         |         |              |                                                                                                  |               |         |         | 0.595                                                          | 0.512            | 0.924            |            |
| FY 2013 Accomplishments:<br>Maintained the NRG and the Primary Command Center (PCC) Toolkit. Developed and maintained the Online Companion Reference for the Chairman of the Joint Chiefs of Staff Instruction 3280.01M. Additional efforts included providing technical evaluations for implementing Nuclear Command and Control over IP and modernizing the High-altitude Electromagnetic Pulse (HEMP) communications network. In FY 2013, the National and Nuclear Crypto-logical Modernization efforts continued. Conducted inspections of HEMP network sites.                                                                                                                                                                                                                                                                                                                                                                                                                |             |         |         |              |                                                                                                  |               |         |         |                                                                |                  |                  |            |
| FY 2014 Plans:<br>Continue to maintain the NRG, PCC Toolkit, and the Online Companion Reference for the Chairman of the Joint Chiefs of Staff Instruction 3280.01M. Will implement a new missile warning system across the PCC's and modernize and consolidate NMCS systems. Conduct inspections of HEMP network sites.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |             |         |         |              |                                                                                                  |               |         |         |                                                                |                  |                  |            |

| <p>The decrease of -\$0.083 from FY 2013 to FY 2014 is due to maintainance of the PCC dashboard.</p> <p><b>FY 2015 Plans:</b><br/>Will maintain the PCC Toolkit and the Online Companion Reference. Modernize and integrate NMCS capabilities (e.g., transmission platforms, data interfaces, security and graphical user interfaces). Will also integrate NMCS with other senior leadership and continuity command, control and communication (C3) systems that constitute the National Leadership Command Capability (NLCC). These efforts also support the Joint Systems Engineering and Integration Office (JSEIO) mission and improve situational monitoring systems across the PCCs.</p> <p>The increase of +\$0.412 from FY 2014 to FY 2015 will significantly expand the engineering efforts to integrate NMCS systems into the NLCC.</p> |                |                |                |

**Remarks**

**D. Acquisition Strategy**

Full and open competition resulted in a contract with Raytheon, Arlington, VA.

**E. Performance Metrics**

The NMCS Engineering Branch conducts regularly scheduled In-progress Program Reviews (IPRs) and Configuration Control Board (CCB) meetings to monitor status of engineering projects/tasks. Each current project/task is evaluated in terms of how well the technical work is progressing and how allocated resources are being utilized. Adjustments to resources, schedules, and technical directions are made, as required. Future projects/tasks are also discussed, thereby ensuring an integrated approach is maintained across all related project/task areas. To further increase the utility of the IPR/CCB structure, the Joint Staff customer participates in the project/task reviews. The result of this approach is a truly integrated effort of NMCS Engineering, contractor, and Joint Staff working together to achieve common program goals. Suitable products are delivered within allocated resources and delivered on schedule 90% of the time.

The NMCS met performances metrics in 2013 by delivering suitable products on schedule and within allocated resources 100% of the time.
