A. Mission Description and Budget Item Justification

Global Combat Support System - Joint (GCSS-J), is a key enabler for achieving Focused Logistics and is essential during peace, contingency, crisis, and war in support of the joint warfighter across the full range of military operations. GCSS-J, the Logistics System of Record, provides a Joint Logistics Common Operational Picture to ensure the right personnel, equipment, supplies, and support are in the right place at the right time and in the right quantities to mobilize, move, and sustain all elements of operating forces within a theater or operational area.

GCSS-J gathers data from authoritative sources to provide a fused, integrated, near real-time, multidimensional view of combat support and combat service support across joint capability areas. These efforts provide situational awareness of the battlespace and logistics pipeline (e.g., supply, deployment and distribution, engineering, etc.). Using GCSS-J, the joint logistics warfighter no longer needs to log into multiple legacy systems and manually gather data to compile reports. GCSS-J provides real time actionable information in the form of watchboards (e.g., fuels and munitions watchboards) and near real time information in the form of reports and mapping visualizations.

<u>Change Summary Explanation</u> The FY 2012 decrease of -\$\$.629 was allocated to higher priority C2 developmental requirements. The FY 2014 decrease of -\$8.298 reduces the overall pace and scope of GCSS development efforts to meet Joint Staff logistics operational needs. These funds were realigned within the DISA Command and Control (C2) portfolio to meet higher priority C2 developmental needs.

A. Mission Description and Budget Item Justification

The Global Combat Support System-Joint (GCSS-J) is a key enabler for achieving Focused Logistics and is essential during peace, contingency, crisis, and war in support of the joint warfighter across the full range of military operations. GCSS-J the Logistics System of Record, provides a Joint Logistics Common Operational Picture to ensure the right personnel, equipment, supplies, and support are in the right place at the right time and in the right quantities to mobilize, move, and sustain all elements of operating forces within a theater or operational area.

GCSS-J gathers data from authoritative sources to provide fused, integrated, near real-time multidimensional view of combat support and combat service support across joint capability areas. These efforts provide situational awareness of the battlespace and logistics pipeline (e.g., Supply, Deployment and Distribution, Engineering, etc.). Using GCSS-J, the joint logistics warfighter no longer needs to log into multiple legacy systems and manually gather data to compile reports. GCSS-J provides real-time in the form of reports and mapping visualizations.

B. Accomplishments/Planned Programs (\$ in Millions)

Title: Global Combat Support System-Joint	FY 2012	FY 2013	FY 2014
Description: GCSS-J is a key enabler for achieving Focused Logistics and is essential during peace, contingency, crisis, and war in support of the joint warfighter across the full range of military operations. GCSS-J, the Logistics System of Record, provides a Joint Logistics Common Operational Picture to ensure the right personnel, equipment, supplies, and support are in the right place at the right time and in the right quantities to mobilize, move, and sustain all elements of operating forces within a theater or operational area.	19.208	19.670	12.083
FY 2012 Accomplishments: Deployed two capability releases including the architectural transition to improve system performance, reduce the footprint, and increase scalability. Developed new capabilities for the non-secure internet protocol router network (NIPRNet) including Fuels and Munitions (supports the National Level Ammunition Capability) WatchBoards (i.e., to provide the status and visibility of inventories world-wide along with the ability to display the status on a map), and the ability to display Truck Tracks (e.g., allows users to

B. Accomplishments/Planned Programs (\$ in Millions)								FY 2012	FY 2013	FY 2014	
trace the identity, status, and location of cargo world-wide from origin to destination) visually on a map. Completed the initial development for Google Earth mapping visualizations.											
FY 2013 Plans: Expand the intra-theatre distribution capability (e.g., expenditures of munitions during contingencies); develop watchboards for remaining classes of supply (e.g., food and equipment), upgrade the Joint Engineering Planning and Execution System capability and begin requirements analysis for humanitarian support.											
The increase of +\$.462 from FY 2012 to FY 2013 restores some C2 logistics requirements..											
FY 2014 Plans: GCSS-J will continue to meet the functional priorities of the joint logistics community, as documented by Combatant Command 129 requirements and approved by Joint Staff (J4). The Program will leverage the Joint Command and Control Common User Interface (JC2CUI) Ozone Widget Framework (OWF) to develop widgets to support Combatant Commands. The focus will be to provide widgets and new capability development using integrated data sources via web services which will provide a fused, integrated, near real-time view of combat support and combat service support throughout the battlespace and the logistics pipeline through interoperability and connectivity of information system.											
The decrease -\$7.587 from FY 2013 to FY 2014 reduces the overall pace and scope of development efforts of the GCSS program while leveraging efficiencies across the DISA Command and Control (C2) portfolio in support of OSD CIO guidance on IT efficiencies. The GCSS-J program will continue to focus on satisfying the most pressing Joint Staff logistics operational needs. Funding will be realigned within the DISA Command and Control portfolio for higher C2 developmental requirements.

<u>D. Acquisition Strategy</u> The GCSS-J Program Management Office (PMO) uses various contract types, employs large and small contractors, and is focused on achieving agency socio-economic goals and incorporating DoD acquisition reform initiatives in purchasing. The PMO maximizes the use of performance-based contracts and requires contractors to establish and manage specific earned value data to mitigate risk and monitor deviations from cost, schedule, and performance objectives. The PMO evaluates performance by conducting thorough Post-award Contract Reviews, monthly Contract Performance Reviews, and bi-monthly In-Process Reviews. The PMO uses a Statement of Objectives (SOO) for development efforts rather than the traditional Statement of Work, as it provides potential offerors flexibility to develop cost-effective solutions and the opportunity to propose innovative alternatives to meet GCSS-J requirements. By stating the requirements in a SOO, the contractor can produce a technical solution methodology to deliver leading edge technology to the warfighter. <u>E. Performance Metrics</u> GCSS-J fields capabilities based on functional priorities of the Combatant Command 129 Requirements as approved and prioritized by the functional sponsor, Joint Staff J4. These requirements and goals are translated into releases with specific capabilities, which have established cost, schedule, and performance parameters approved by the DISA's Component Acquisition Executive/Milestone Decision Authority. Metrics and requirements are routinely gathered by the GCSS-J PMO. The metrics from the strategic server sites are analyzed by the PMO to ensure that operational mission threads continue to be met and if system enhancement/capabilities are of benefiting the user. Future capabilities include tools that allow GCSS-J to refine and enhance the type of performance metrics that can be gathered and analyzed. These tools become increasingly important as GCSS-J continues to integrate additional data sources and external applications, which allows GCSS-J to continue to transition to a Service Oriented Architecture and directly supports DoD's net-centric vision of exposing and consuming web services. As GCSS-J usage increases and new capabilities are fielded, performance metrics will ensure that the system is meeting user requirements. Mission and Business Results and Strategic National and Theater Defense - FY 2012 The Key Performance Parameters (KPPs), found in the GCSS-J Acquisition Program Baseline, define baseline measures for the effectiveness of mission performance; the threshold is 95%. Data will be gathered from the First Look Site during development and from surveys once the capability is deployed. The baseline measure was met. - FY 2013 (Estimated) The KPPs, found in the GCSS-J Acquisition Program Baseline, define baseline measures for the effectiveness of mission performance; the threshold is 95%. Data will be gathered from the First Look Site during development and from surveys once the capability is deployed. Data not yet available. - FY 2014 (Estimated) The KPPs, found in the GCSS-J Acquisition Program Baseline, define baseline measures for the effectiveness of mission performance; the threshold is 95%. Data will be gathered from the First Look Site during development and from surveys once the capability is deployed. Data not yet available. Customer Results and Customer Satisfaction
