^{##} The FY 2014 OCO Request will be submitted at a later date

Note

*The FY 2012 total includes a request of \$2.000 million in OCO funding.

A. Mission Description and Budget Item Justification

The Global Command and Control System-Joint (GCCS-J) funds a Joint Command and Control (JC2) portfolio which includes: GCCS-J, Joint Planning and Execution Services (JPES), and JC2 Architecture.

GCCS-J is the Department of Defense (DoD) JC2 system of record that provides critical joint warfighting C2 capabilities by presenting an integrated, near real-time picture of the battle space for planning and executing joint military and multinational operations. GCCS-J is focused on meeting emerging operational needs through sustainment and synchronization support to operational baselines (Global and Joint Operations Planning and Execution System). GCCS-J is used by all nine Combatant Commands at sites around the world, supporting joint and coalition operations. The Services rely heavily on GCCS-J components to reduce their command and control (C2) operational costs. Efforts are focused on completing the evolution of the current operational system into a modern C2 system capable of supporting joint needs across the Department.

JPES is a portfolio of capabilities supporting joint policies, processes, procedures, and reporting structures. It is supported by communications and information technology used by the Joint Planning and Execution Community (JPEC). JPEC uses these capabilities to monitor the following activities: planning, execute mobilization, deployment, employment and sustainment, redeployment, and demobilization. At full maturity, the JPES capabilities will be integrated with other adaptive planning and execution systems to facilitate the rapid development and sustainment of plans and a seamless, dynamic transition to execution in a net-centric environment. The JPES portfolio of capabilities consists of a core set of infrastructure services referred to as the JPES Framework and a variety of mission applications to include Joint Force Projection and the Joint Capabilities Requirements Manager and eventually the capabilities that support the modernization of the JOPES Information Technology (IT) system.

JC2 Architecture is a reference architecture that aligns closely to the DoD Information Enterprise Architecture. The JC2 Architecture describes architectural and operational concepts, technical constructs, and is a repository for valuable reference information relating to C2 standards and information security. It is the authoritative source of information and technical direction for the JC2 arena.

B. Program Change Summary (\$ in Millions)	FY 2012	FY 2013	FY 2014 Base	FY 2014 OCO	FY 2014 Total
Previous President's Budget	56.680	36.575	23.694	-	23.694
Current President's Budget	47.345	36.575	34.288	-	34.288
Total Adjustments	-9.335	0.000	10.594	-	10.594
• Congressional General Reductions	-	-			
• Congressional Directed Reductions	-	-			
• Congressional Rescissions	-	-			
• Congressional Adds	-	-			
• Congressional Directed Transfers	-	-			
• Reprogrammings	-7.900	-			
• SBIR/STTR Transfer	-	-			
• Other Adjustment	-1.435	-	10.594	-	10.594

Change Summary Explanation

The FY 2012 decrease of -\$9.335 was due to terminating two Joint Planning and Execution Services (JPES) applications (Integrated Gaming System (IGS) and Rapid TPFDD Builder (RTB)).

The FY 2014 increase of +\$10.594 is due to a re-alignment from GCSS-J and MNIS for the Joint Operations Planning and Execution System (JOPES) modernization efforts and an increase in GCCS-J development to find and implement replacements for outdated legacy software tools.

^{##} The FY 2014 OCO Request will be submitted at a later date

A. Mission Description and Budget Item Justification

Global Command and Control System – Joint (GCCS-J) is DoD's Joint Command and Control (JC2) system of record and provides the foundation for migration of service-unique C2 systems into a Joint, interoperable environment. The Defense Information System Agency's (DISAs) portfolio includes funding to support GCCS-J, Joint Planning and Execution Services (JPES), and the development and sustainment of the JC2 Architecture. GCCS-J incorporates the core planning and assessment tools required by combatant commanders and their subordinate Joint Task Force Commanders while meeting the readiness support requirements of the Services. Adaptive Planning and Execution Joint Planning Services are being developed to modernize the adaptive planning functions in a net centric environment. DISA continues to provide support for the operational system to ensure continued access to information integration and decision-support capabilities that enable the exercise of authority and direction over assigned and attached forces, in a net-centric, collaborative information environment. Additionally, DISA provides critical C2 capabilities to the Commander-in-Chief, Secretary of Defense, National Military Command Center, Combatant Commands (COCOMs), Joint Force Commanders, and Service Component Commanders.

JPES is a set of capabilities that address components of the DOD's Adaptive Planning Roadmap (13 December 2005) and Adaptive Planning Roadmap II (5 March 2008). JPES produces enhancements to the Joint Operations Planning and Execution System (JOPES), focused adaptive planning capabilities, and provides a set of core infrastructure services necessary to provide the warfighter a fully interoperable environment where functionality can be easily added as mission needs dictate.

The JC2 Architecture is a foundational element of JC2 capabilities for the Department. The JC2 Architecture provides a set of net-centric tenets associated with data, functional service and the C2 infrastructure that describes architectural and operational concepts, technical constructs, and is a repository for valuable reference information relating to C2 standards and information security. Each year, the DISA architecture team, annually, produces a transitional architecture that documents the current state of C2 capabilities, anticipated changes/enhancements either in progress or planned by the JC2 community.

B. Accomplishments/Planned Programs (\$ in Millions)

	FY 2012	FY 2013	FY 2014
Title: Development and Strategic Planning	21.364	18.406	22.444
Description: Developed migration and modernization initiatives to move Net-centric Joint C2 capabilities from local enclaves to reusable enterprise software deployments. Executed modernization activities to improve the JC2 Common User Interface, Cross Domain Services, and Enterprise COP initiatives. Severed from Global baseline and implemented agile develop process with direct user participation. Synchronized two common client frameworks and eliminated duplicative client functions. Continued

integrating, testing and fielding technical refresh activities in support of the GCCS-J baselines (Global and JOPES) required to maintain the security posture of the system and provided critical operational support for the COCOMs. Continued support for interoperability between GCCS-J and the FoS to ensure access of JC2 data by the COCOMs, external interfaces and Services. Conducted initial migration of the first subset of essential GCCS-J (Global) functionality through increased use of open source software to reduce overall sustainment costs to GCCS-J, FoS and other service partners, and customers. Reduced fielding timeframes (five weeks to two weeks). Completed modernization assessment and developed preliminary technical design to support modernization. FY 2012 Accomplishments: Developed migration and modernization initiatives to move Net-centric Joint C2 capabilities from local enclaves to reusable enterprise software deployments. Executed modernization activities to improve the JC2 Common User Interface, Cross Domain Services, and Enterprise COP initiatives. Synchronized two common client frameworks and eliminated duplicative client functions. Continued integrating, testing and fielding technical refresh activities in support of the GCCS-J baselines (Global and JOPES) required to maintain the security posture of the system and provided critical operational support for the COCOMs. Continued support for interoperability between GCCS-J and the FoS to ensure access of JC2 data by the COCOMs, external interfaces and Services. Conducted initial migration of the first subset of essential GCCS-J (Global) functionality through increased use of open source software to reduce overall sustainment costs to GCCS-J, FoS and other service partners, and customers. Reduced fielding timeframes (five weeks to two weeks). Completed modernization assessment and developed preliminary technical design to support modernization. Integrated the Global Force management Data Initiative (GFM DI) into the GCCS baseline software capability to support creating authoritative data sources for all authorized DoD force structure data. FY 2013 Plans: Continue integrating, testing and fielding technical refreshment activities in support of the COCOMs. Continue transitioning local global enclaves to reusable enterprise deployments and testing/ integration activities necessary to maintain interoperability between GCCS-J and the FoS. The decrease of -\$2.958 from FY 2012 to FY 2013 is due to a funding transfer to Operations and Maintenance to maintain and sustain system reliability at a mission acceptable level. FY 2014 Plans: Will continue integrating, testing, fielding and technical refreshment activities in support of the COCOMs. Will continue transitioning local global enclaves to reusable enterprise deployments. Will continue the testing and integration necessary to

Exhibit R-2A, RDT&E Project Justification: PB 2014 Defense Information Systems Agency		DATE: April 2013	
APPROPRIATION/BUDGET ACTIVITY 0400: <i>Research, Development, Test & Evaluation, Defense-Wide</i> BA 7: <i>Operational Systems Development</i>	R-1 ITEM NOMENCLATURE PE 0303150K: <i>Global Command and Control System</i>	PROJECT CC01: <i>Global Command and Control System-Joint (GCCS-J)</i>	
B. Accomplishments/Planned Programs (\$ in Millions)		FY 2012	FY 2013
maintain interoperability between GCCS-J and the FoS. Will continue migrating to open source software based on capability usage feedback from the community on remaining components.			
The increase of +\$4.038 from FY 2013 to FY 2014 will replace legacy software tools and enable DISA to provide a greater level of enterprise service to the C2 community with reduced life-cycle sustainment costs.			
Title: Joint Planning and Execution Services (JPES)		25.981	18.169
Description: JPES is a collection of capabilities supporting joint policies, processes, procedures, and reporting structures, that are supported by communications and information technology used by the JPEC. JPEC uses these capabilities to monitor, plan, and execute: mobilization, deployment, employment, sustainment, redeployment, and demobilization activities associated with joint operations.			11.844
FY 2012 Accomplishments: Further developed the JPES Framework (JFW) to expose execution data to support development initiatives throughout the Adaptive Planning and Execution (APEX) community. The JFW permissions manager was extended to support direct public-key infrastructure authentication enabling this unique identifier for access control decisions. The JCRM application began transitioning from the Joint Staff to DISA with DISA successfully standing up the JCRM Testing & Integration Suite at the Fort Meade lab, and the JCRM Training Suite at the Defense Enterprise Computing Center-Oklahoma.			
FY 2013 Plans: Continue testing and integrating JFW, JFP, and JCRM. Complete the transition of JCRM to DISA. JFW will interface with other APEX capabilities (e.g. Global Adaptive Planning Collaborative Integration Environment (GAP-CIE), TRANSCOM capabilities, or other APEX capabilities as prioritized by the APEX Technical Integrator). Initiate the JOPES Implementation plan for modernization.			
The decrease of -\$7.812 from FY 2012 to FY 2013 is due to OSD directing that the Integrated Gaming System (IGS) and the Rapid Force Flow Data Analysis Tool (RFFDAT) formally known as the Rapid TPFDD Builder (RTB) development activities be discontinued. The funding for these two efforts was realigned to higher Agency and Department priorities.			
FY 2014 Plans: Will complete the requirements to achieve Mission Assurance Category (MAC) I security accreditation status and can be used by additional APEX systems requiring a MAC I interface to APEX data. JFW will provide an enhanced business rule engine and a workflow capability enabling the orchestration of APEX services provided by multiple APEX developers. Access to additional APEX data via JFW will be achieved as prioritized by the APEX Technical Integrator. The first set of capabilities resulting from JOPES Modernization initiatives will be developed and fielded.

Remarks												
D. Acquisition Strategy												
All development, integration, and migration efforts within the portfolio are primarily supported through Cost Reimbursable Task Orders issued under competitively awarded contracts. Use of performance-based contract awards is maximized while use of Time and Material contracts is minimized to those providing programmatic support versus software development, integration, or testing. Acquisition Strategies are structured to retain contractors capable of satisfying cost, schedule, and performance objectives. Contract awards incorporate provisions requiring contractors to establish and manage specific earned value data. This strategy mitigates risk by requiring monthly Contract Performance Reviews (CPRs) and utilizing award fee contracts where appropriate to incentivize performance. Both GCCS-J and JPES apply formal acquisition rigor to include reporting requirements, as appropriate, by acquisition program designation.												
E. Performance Metrics												
Portfolio Activities												
Activity: Effectively communicate with external command and control systems												
FY 2012 (Results) 100% successful test of new critical system interfaces, as well as continued 100% successful test of critical current system interfaces.												
FY 2013 (Planned) 100% successful test of new critical system interfaces, as well as continued 100% successful test of critical current system interfaces.												
FY 2014 (Estimated) 100% successful test of new critical system interfaces, as well as continued 100% successful test of critical current system interfaces.

Activity: Fuse select C2 capabilities into a comprehensive, interoperable system eliminating the need for inflexible, duplicative, stovepipe C2 systems FY 2012 (Results) GCCS-J executed modernization activities which resulted in significant progress for the JC2 Community via the JC2 Common User Interface (JC2CUI), Cross Domain Services (CDS), Agile Client and Enterprise COP initiatives. This progress included the evolution towards client consolidation, synchronizing enabling frameworks and infrastructure and the eliminating duplicative functions resulting in a reduction of direct sustainment for reinvestment in C2 capability modernization. FY 2013 (Planned) Continue planned migration to Net-centric JC2 capabilities while reducing sustainment costs for reinvestment in modernization with the transition from using local Global enclaves to reusable enterprise deployments. FY 2014 (Estimated) Will continue planned migration to Net-centric Joint C2 capabilities while reducing sustainment costs for reinvestment in modernization with the transition from use of local Global enclaves to reusable enterprise deployments. Activity: The availability of the Strategic Server Enclaves enable enhanced capabilities to the user community FY 2012 (Results) Expanded the infrastructure in Afghanistan overlaying content delivery nodes to move information close to the edge and the capabilities of critical video services linking North Atlantic Treaty Organization, International Security Assistance Force and US domains for required C2 senior leaders. FY 2013 (Planned) A release of emerging warfighter requirements to Strategic Server Enclaves. FY 2014 (Estimated) A release of emerging warfighter requirements to Strategic Server Enclaves.
