A. Mission Description and Budget Item Justification

The Global Command and Control System-Joint (GCCS-J) funds a Joint Command and Control (JC2) portfolio which includes: GCCS-J, Joint Planning and Execution Services (JPES), and JC2 Architecture.

The GCCS-J Program is the Department of Defense (DoD) Joint C2 system of record. It incorporates core planning and assessment tools required by Combatant Commanders and their subordinate Joint Task Force Commanders while meeting the readiness support requirements of the Services. GCCS-J is used by all nine Combatant Commands (COCOMs) at sites around the world, supporting joint and coalition operations. The Services rely heavily on GCCS-J components to reduce their command and control (C2) operational costs. It provides support for commanders and staffs as they conduct joint and multinational operations by providing a fused picture of the battle space within an integrated system that is supporting joint warfighter needs today. GCCS-J is currently focused on sustainment, synchronization, and modernization to meet emerging operational needs by modifying and enhancing elements or capabilities in order to implement new requirements, enhance functionality, increase efficiency and lower operating and deployment costs while taking advantage of the progress made by current operational systems and technologies. The GCCS-J program is also executing incremental modernization of C2 capabilities using the Joint Requirements Oversight Council (JROC) approved needs.

JPES is a portfolio of capabilities supporting joint policies, processes, procedures, and reporting structures. It is supported by communications and information technology used by the Joint Planning and Execution Community (JPEC). JPEC uses these capabilities to monitor the following activities: planning, execute mobilization, deployment, employment and sustainment, redeployment, and demobilization. At full maturity, the JPES capabilities will be integrated with other adaptive planning and execution systems to facilitate the rapid development and sustainment of plans and a seamless, dynamic transition to execution in a net-centric environment. One of the key capabilities residing within the JPES portfolio of sustaining the existing Joint Operational Planning and Execution System (JOPES) while modernization of JOPES is planned and implemented. The JPES portfolio also includes a core set of infrastructure services consisting of the JPES Framework (JFW) and a variety of mission applications to include Joint Force Projection (JFP), Joint Capabilities Requirements Manager (JCRM) and eventually the capabilities that will replace JOPES.

JC2 Architecture is a reference architecture that aligns closely to the DoD Information Enterprise Architecture. The JC2 Architecture describes architectural and operational concepts, technical constructs, and is a repository for valuable reference information relating to C2 standards and information security. It is the authoritative source of information and technical direction for the JC2 arena.

• Reprogrammings	-	-			
• SBIR/STTR Transfer	-	-			
• Other Adjustment	-0.474	-	-0.617	-	-0.617

Change Summary Explanation

The FY 2014 decrease of -\$0.474 was due to delayed delivery of Joint C2 Mission Operational Priorities and software architecture modernization initiatives to reduce the overall sustainment cost.

The FY 2016 decrease of -\$0.617 is due to reduced modernization efforts through programmatic, engineering support, and development contract reductions, reduced security upgrades for v4.2.0.9, and reduced Joint Staff J-3/J-6 Operational Priorities to sustainment levels.

A. Mission Description and Budget Item Justification

Global Command and Control System – Joint (GCCS-J) is DoD’s Joint Command and Control (JC2) system of record and provides the foundation for migration of service-unique C2 systems into a Joint, interoperable environment. The Defense Information System Agency’s (DISAs) portfolio includes funding to support GCCS-J, Joint Planning and Execution Services (JPES), and the development and sustainment of the JC2 Architecture. GCCS-J incorporates the core planning and assessment tools required by combatant commanders and their subordinate Joint Task Force Commanders while meeting the readiness support requirements of the Services. Adaptive Planning and Execution Joint Planning Services are being developed to modernize the adaptive planning functions in a net centric environment. DISA continues to provide support for the operational system to ensure continued access to information integration and decision-support capabilities that enable the exercise of authority and direction over assigned and attached forces, in a net-centric, collaborative information environment. Additionally, DISA provides critical C2 capabilities to the Commander-in-Chief, Secretary of Defense, National Military Command Center, Combatant Commands (COCOMs), Joint Force Commanders, and Service Component Commanders.

JPES is a set of capabilities that address components of the DOD’s Adaptive Planning Roadmap (13 December 2005) and Adaptive Planning Roadmap II (5 March 2008). JPES produces enhancements to the Joint Operations Planning and Execution System (JOPES), focused adaptive planning capabilities, and provides a set of core infrastructure services necessary to provide the warfighter a fully interoperable environment where functionality can be easily added as mission needs dictate.

The JC2 Architecture is a foundational element of JC2 capabilities for the Department. The JC2 Architecture provides a set of net-centric tenets associated with data, functional service and the C2 infrastructure that describes architectural and operational concepts, technical constructs, and is a repository for valuable reference information relating to C2 standards and information security. Each year, the DISA architecture team, annually, produces a transitional architecture that documents the current state of C2 capabilities, anticipated changes/enhancements either in progress or planned by the JC2 community.

B. Accomplishments/Planned Programs (\$ in Millions)

	FY 2014	FY 2015	FY 2016
Title: Development and Strategic Planning	15.970	16.215	11.229
Description: Develop, publish, and “execute” a GCCS-J migration and modernization strategy that achieves the following GCCS-J Modernization objectives in accordance with Joint C2 Mission “operational” priorities and the DoD’s JC2 Reference Architecture: • Continue to decompose applicable existing applications into services • Limit local deployment and move as much to the enterprise as possible • Continue to expose data and scale services to support an enterprise implementation

B. Accomplishments/Planned Programs (\$ in Millions)		FY 2014	FY 2015	FY 2016
- Continue to evolve more economical hardware and software architecture without impact to the operational user or Family of Systems (FoS)/interface partners - Reduce overall sustainment cost through use of more cost effective and appropriate Commercial-off-the-Shelf (COTS) and Hardware (HW) products - Evolve to use of agile development practices - Consolidation of clients and tools FY 2014 Accomplishments: Continued integration, testing, fielding and technical refreshment activities in support of the COCOMs. Transitioned local global enclaves to reusable enterprise deployments. Continued the testing and integration necessary to maintain interoperability between GCCS-J and the FoS. Continued migration to open source software based on capability usage feedback from the community on remaining components. FY 2015 Plans: Continue development and testing activities for GCCS-J releases to implement enterprise deployment improvements. Deployment of enterprise capabilities will achieve and maintain information security at a lower cost. The increase of +\$0.245 from FY 2014 to FY 2015 is due to the replacement of legacy software tools. FY 2016 Plans: Continue to update and execute the GCCS-J Modernization planning guidance based on lessons learned, operational priorities, and updated DoD guidance, and in support of the Joint C2 Analysis of Alternatives (AoA) goals of reducing cost, providing additional capability to the warfighter and sustaining existing C2 capabilities. The decrease of -\$4.986 from FY 2015 to FY 2016 is due to transition of GCCS-J baselines from development to sustainment.				
Title: Joint Planning and Execution Services (JPES) Description: JPES is a collection of capabilities supporting joint policies, processes, procedures, and reporting structures, that are supported by communications and information technology used by the JPEC. JPEC uses these capabilities to monitor, plan, and execute: mobilization, deployment, employment, sustainment, redeployment, and demobilization activities associated with joint operations. FY 2014 Accomplishments: Completed development of the Joint Operation Planning and Execution System (JOPES) Implementation Plan for JOPES Modernization. Began work towards implementing the requirements to achieve Mission Assurance Category (MAC) I security		11.844	17.578	10.274

accreditation status and used by additional APEX systems requiring a MAC I interface to APEX data. JPES Framework (JFW) provided an enhanced business rule engine and a workflow capability enabling the orchestration of APEX services provided by multiple APEX developers. Access to additional APEX data via JFW was achieved as prioritized by the APEX Technical Integrator. The first set of capabilities resulting from JOPES Modernization initiatives was developed and fielded. FY 2015 Plans: Primary effort is to support the JOPES Modernization Implementation Plan. There will be further development of JPES applications to complete the integration of Joint Capabilities Requirements Manager (JCRM) and PFG with JFW and continue to evolve JFW Certified Data center Operations Manager (CDOM) to incorporate JPEC and GFM data objects. Migrate applications to JFW, and continue developing new widgets to support the JPE and GFM communities. The increase of +5.734 from FY 2014 to FY 2015 continues JOPES Modernization development to replace the legacy system which reaches end of life during 2017. FY 2016 Plans: Continue improvements/expansion of JFW services to include replacement for newsgroups, workflow Management service, administration services for monitoring and management of austere environments. Widgets will continue to be developed to replace existing JOPES functionality and JCRM and PFG will be modernized. The decrease of -\$7.304 from FY 2015 to FY 2016 is due to offloading or deprecating external system interfaces from legacy JOPES to the modernized infrastructure which reduces testing and interoperability lifecycle costs.

Orders issued under competitively awarded contracts. Acquisition Strategies are structured to retain contractors capable of satisfying cost, schedule, and performance objectives. Contract awards incorporate provisions requiring contractors to establish and manage specific earned value data. This strategy mitigates risk by requiring monthly Contract Performance Reviews (CPRs) and utilizing award fee contracts where appropriate to incentivize performance. Both GCCS-J and JPES apply formal acquisition rigor to include reporting requirements, as appropriate, by acquisition program designation. <u>E. Performance Metrics</u> Activity: Effectively communicate with external command and control systems FY 2014 (Actual): 100% successful test of new critical system interfaces, as well as continued 100% successful test of critical current system interfaces. Met. FY 2015 (Planned): 100% successful test of new critical system interfaces, as well as continued 100% successful test of critical current system interfaces. FY2016 (Estimated): 100% successful test of new critical system interfaces, as well as continued 100% successful test of critical current system interfaces. Activity: Fuse select C2 capabilities into a comprehensive, interoperable system eliminating the need for inflexible, duplicative, stovepipe C2 systems. FY 2014 (Actual): Successful fielding of GCCS-J Global Release 4.3 to designated Critical Sites. Met FY 2015 (Planned): Successful fielding of GCCS-J Global Release 5.0 to designated Critical Sites FY2016 (Estimated): Successful fielding of GCCS-J Global Release 6.0 to designated Critical Sites Activity: Development of Widgets and Plug-Ins to replace current (deprecated) functionality and/or add new functionality driven by the Joint Staff RPSP. FY 2014 (Actual): N/A FY 2015 (Planned): Develop, test, and release JC2CUI widgets and Agile Client plug-ins quarterly. FY15 Estimated: 100% FY 2016 (Estimated): Develop, test, and release JC2CUI widgets and Agile Client plug-ins quarterly. FY16 Estimated: 100% Activity: Modernize GCCS-J infrastructure components to reduce overall sustainment costs (COTS & HW), increase scalability and performance through shift to enterprise deployment. Reduce release cycles through agile development and deployment. FY 2014 (Actual): N/A FY 2015 (Estimated): N/A
