The FY 2015 OCO Request will be submitted at a later date.

A. Mission Description and Budget Item Justification

The Applied Research for the Advancement of Science and Technology (S&T) Priorities program element (PE) will enable the early launch of S&T applied research projects to shape Components' investments. The PE is oriented toward the design, development, and improvement of prototypes and new processes to meet general mission area requirements, and to translate promising research into solutions for military needs. Efforts are situated within the seven DoD S&T priorities and focus areas and will include studies, feasibility evaluations, and non-system specific technology efforts. Investigations conducted in this PE will facilitate concept exploration efforts and studies of alternative concepts. Efforts are formulated and managed by teams of subject matter experts drawn from the Office of the Secretary of Defense, the Military Services, and Defense Agencies. The PE will also provide necessary administrative support to the Priority Steering Councils and S&T Focus Areas.

<u>B. Program Change Summary (\$ in Millions)</u>	<u>FY 2013</u>	<u>FY 2014</u>	<u>FY 2015 Base</u>	<u>FY 2015 OCO</u>	<u>FY 2015 Total</u>
Previous President's Budget	-	45.000	38.800	-	38.800
Current President's Budget	-	37.984	41.965	-	41.965
Total Adjustments	-	-7.016	3.165	-	3.165
• Congressional General Reductions	-	-7.000			
• Congressional Directed Reductions	-	-			
• Congressional Rescissions	-	-			
• Congressional Adds	-	-			
• Congressional Directed Transfers	-	-			
• Reprogrammings	-	-			
• SBIR/STTR Transfer	-	-			
• FFRDC Adjustment	-	-0.016	-	-	-
• DoD Higher Priorities	-	-	3.165	-	3.165

Change Summary Explanation

Program increase is to support the higher priorities of agency operations.

# The FY 2015 OCO Request will be submitted at a later date.												
A. Mission Description and Budget Item Justification												
The Applied Research for the Advancement of Science and Technology (S&T) Priorities program element (PE) will enable the early launch of S&T applied research projects to shape the Components' investments. The PE is oriented toward the design, development, and improvement of prototypes and new processes to meet general mission area requirements, and to translate promising research into solutions for military needs. Efforts are situated within the seven DoD S&T priorities and focus areas and will include studies, feasibility evaluations, and non-system specific technology efforts. Investigations conducted in this PE will facilitate concept exploration efforts and studies of alternative concepts. Efforts are formulated and managed by teams of subject matter experts drawn from the Office of the Secretary of Defense, the Military Services, and Defense Agencies. The PE will also provide necessary administrative support to the Priority Steering Councils and S&T Focus Areas.												
B. Accomplishments/Planned Programs (\$ in Millions)									FY 2013	FY 2014	FY 2015	
Title: Applied Research for the Advancement of S&T Priorities									-	29.000	32.039	
Description: The S&T priorities include: Electronic Warfare (EW), Human Systems, Counter Weapons of Mass Destruction (CWMD), Engineered Resilient Systems (ERS), Data to Decisions (D2D), Autonomy, and Cybersecurity.												
FY 2014 Plans: Conduct concept exploration efforts that focus on the seven S&T priority areas. Challenge areas within the priorities include:												
Electronic Warfare: - Spatial and spectral parameters - Integrated, network-enabled EW systems - Electronic protection measures												
Human Systems: - System interfaces - Social and cultural understanding - Personnel and training - Protection and sustainment

B. Accomplishments/Planned Programs (\$ in Millions)			FY 2013	FY 2014	FY 2015
Continue to conduct concept exploration efforts that focus on the S&T priority areas. In FY 2015, the challenge areas within the priorities include:					
Counter Weapons of Mass Destruction:					
- Systems integration - Activity recognition - Advanced signature detection and tracking - Advanced radiation detection					
Engineered Resilient Systems:					
- Systems analysis methods and tools - Early concept engineering techniques - Advanced architecture and design analysis techniques - New approaches to analysis and testing - Methods and tools for more robust designs - Advanced algorithms					
Data to Decisions:					
- Enhanced images - Temporal and text analytics - Better software architectures - Improved algorithms for data fusion - Improved understanding of user interactions					
Autonomy:					
- Machine reasoning and intelligence - Human/autonomous systems interaction and collaboration - Scalable Teaing of Autonomous systems - Testing and Evaluation and Verification and Validation					
Cyber:					
- Mission assurance and effectiveness - Operating securely in an insecure world

B. Accomplishments/Planned Programs (\$ in Millions)		FY 2013	FY 2014
- Reinventing cyber technology foundations			
Title: S&T Focus Areas Description: The S&T Focus Areas task facilitates cooperation and collaboration among Components and optimizes development of selected S&T efforts across the DoD enterprise. Select technology areas are examined and projects are initiated to address gaps or opportunities. FY 2014 focus areas are: Advanced Materials; Energy and Power; Weapons; Command, Control, and Communications and Networks; Intelligence, Surveillance, and Reconnaissance; Counter-Improvised Explosive Devices; and Biomedical. FY 2014 Plans: Candidate projects for S&T Focus Areas include: exceptional materials properties and processing routes through electromagnetic field - materials coupling; active informatics photonic materials; development of models and architecture for digital curation; nano-scale battery architectures; and 3-dimensional (3D) stereochemistry through multitasking polymer catalysts; garbage and waste mining – creation of material stock for mobile manufacturing. FY 2015 Plans: Candidate projects for S&T Focus Areas include: exceptional materials properties and processing routes through electromagnetic field - materials coupling; active informatics photonic materials; development of models and architecture for digital curation; nano-scale battery architectures; and 3-dimensional (3D) stereochemistry through multitasking polymer catalysts; garbage and waste mining – creation of material stock for mobile manufacturing.		-	8.984
