[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012												
^{##} The FY 2014 OCO Request will be submitted at a later date												
Note												
Since FY2011 was the last year of RDT&E funding for Project 644811, Wideband Gapfiller, reporting for this project has terminated.												
In FY2014, Project 644870, Command and Control System - Consolidated (CCS-C), efforts were transferred to PE 0605433F, Wideband Global SATCOM (Space), Project 657102, CCS-C, in order to transition to Budget Activity 5.												
A. Mission Description and Budget Item Justification												
The Military Satellite Communications (MILSATCOM) Command and Control System-Consolidated (CCS-C) system provides integrated launch and on-orbit command and control (C2) functionality, and backup operations at Schriever AFB and Vandenberg AFB, for MILSATCOM satellites as the legacy capability provided by the Air Force Satellite Control Network (PE 0305110F) has phased out according to plan. CCS-C uses modified commercial off the shelf hardware/software to control all emerging and legacy MILSATCOM systems including Milstar, Defense Satellite Communications System (DSCS), Wideband Global SATCOM (WGS) and Advanced Extremely High Frequency (AEHF) satellites.												
The CCS-C project 644870 funds software and database development for WGS Block I and II satellites, and AEHF satellites 1 through 3. The WGS and AEHF procurement program elements will fund the mission unique software and databases for the WGS Block II Follow-On satellties and the AEHF 4-6 satellites, respectively. CCS-C will also evolve the system architecture to provide increased performance for additional satellites; to comply with DoD, Air Force, and AFSPC-directed standards for Information Assurance, Satellite Control Standardization, and Net-Readiness; and to add space situational awareness and new C2 training system capabilities.												
In FY14, due to a change in Budget Activity from 4 to 5, funds transfer to PE 0605433F, Project 657102.												
Funding is in Budget Activity 4, Advanced Component Development and Prototypes, as it supports component development and prototyping for MILSATCOM satellites.

Change Summary Explanation						
FY14: Other Adjustment row: -\$13.948M, due to a change in Budget Activity from 4 to 5, funds have been transferred to PE 0605433F, Project 657102.						
C. Accomplishments/Planned Programs (\$ in Millions)				FY 2012	FY 2013	FY 2014
Title: CCS-C development				12.077	12.027	0.000
Description: Develop and acquire satellite-specific software to support handover of on-orbit operations of WGS satellites and launch, early-orbit, and on-orbit operations of AEHF satellites.						
FY 2012 Accomplishments: Funded development to support WGS Block II satellites. Completed development of software for replacement of WGS Flight Dynamics System with modified CCS-C orbit analysis software. Conducted launch and early orbit operations for AEHF SV-2. Initiated development for the FY13 launch of AEHF SV-3.						
FY 2013 Plans: Funds the development completion to support launch of WGS SV-5 and SV-6. Complete development and conduct launch and early orbit operations for AEHF SV-3. Initiate CCS-C architecture evolution.						
FY 2014 Plans: In FY14, funds transfer to PE 0605433F, Project 657102.						
Accomplishments/Planned Programs Subtotals				12.077	12.027	0.000

Remarks											
E. Acquisition Strategy											
Competitive contracts with cost plus award fee options were awarded in February 2001 to two teams to demonstrate capabilities for the concept demonstration phase. A downselect to a single team was awarded in March 2002 to develop the system for the development phase. The initial CCS-C contract was extended through 2012 to provide launch readiness support to ongoing WGS and AEHF satellite development. A follow-on competitive FPIF contract began performance in January 2013 to sustain and provide post-production development for the current CCS-C system for telemetry, tracking and commanding (TT&C) of current and future MILSATCOM satellites.											
F. Performance Metrics											
Please refer to the Performance Base Budget Overview Book for information on how Air Force resources are applied and how those resources are contributing to Air Force performance goals and most importantly, how they contribute to our mission.
