A. Mission Description and Budget Item Justification												
This project supports the development and demonstration and Non-Developmental Item (NDI) Commercial Off The Shelf (COTS) evaluation of combat feeding equipment to enhance soldier efficiency and survivability, and to reduce food service logistics requirements for all four services. The project supports multi-fuel, rapidly deployable field food service equipment initiatives and engineering and manufacturing development to improve equipment, enhance safety in food service, and decrease fuel and water requirements. This project develops critical enablers that support the Joint Future Capabilities and Joint Expeditionary mindset, by maintaining readiness through fielding and integrating new equipment; by enhancing the field soldier's well-being; and providing soldier usable equipment. They also reduce sustainment requirements, related Combat Support/Combat Service Support (CS/CSS) demands on lift, the combat zone footprint, and costs for logistical support.												
This PE/Project supports Field Feeding programs for all the services.

Description: Develop a fully integrated refrigeration system for the Assault Kitchen to allow the AK to support UGR-A ration feeding, and menu supplements. FY 2012 Accomplishments: A limited user demonstration of a Level of Effort (LOE) 1 configuration is planned. Results from any testing will be evaluated before addition to the AK Technical Manual. Requirements for the follow-on LOE 2 will be defined. The selection and evaluation of LOE 2 components will be initiated. FY 2013 Plans: Complete all testing and evaluation of the enhanced Assault Kitchen configuration with refrigeration and sanitation components added to provide full Unitized Group Ration A (UGR-A) capability at and below company level. Integrate new components into Assault Kitchen for production and fielding.				
Title: Multi-Functional Secondary Packaging Articles: Description: Integrate alternative secondary packaging technologies into current ration packaging systems so as to reduce cost and waste generation, while maintaining required field performance. Production and insertion of new packaging technologies into individual, assault/special purpose and group ration systems. Provide lighter weight, lower cost, recyclable MRE and Unitized Group Ration shipping containers. FY 2013 Plans: Producibility (ration assembly) and transportation studies will be performed for the new containers in comparison to the existing containers. Field testing and user acceptability/ disposability studies will be conducted. Documentation will be prepared for transition of the container specifications into continuous ration improvement projects.		0.000	0.094 0	0.000
Title: Transition of Advanced Appliances for Field Kitchens Description: Perform Engineering and Manufacturing Development (EMD) on appliance and burner technologies transitioned from technology efforts to develop advanced appliances based on JP-8 combustion. Conduct Shipboard testing of Automated Shipboard Dishwashing System (ASDS)																												
Transition ASDS to USN for Procurement																												
Conduct field test of UGR-A capability for Assault Kitchen (AK)																												
Transition UGR-A capability for AK to procurement																												
Transition Multi-Functional Secondary Packing to DLA-TS																												
Conduct DT/OT on Ice Maker Prototype																												
Transition Ice Maker to Procurement																												
Perform shelf life studies utilizing improved modeling algorithms																												
Perform field tests for user evaluation of novel processing technologies																												
Complete all TDP Changes for BEAR Kitchen Enhancements
