**Note**

Project EL2 / Army Field Feeding Equipment is a new start in FY25

**A. Mission Description and Budget Item Justification**

Projects under this Program Element (PE) support the development, demonstration and Non-Developmental Item (NDI) Commercial Off The Shelf (COTS) evaluation of combat feeding equipment to enhance soldier efficiency, improve soldier survivability, and reduce food service logistics requirements for all four services. These Projects support multi-fuel, rapidly deployable field food service equipment initiatives. Efforts also support the Engineering and Manufacturing Development (EMD) phase of programs to improve equipment, enhance safety in food service, and decrease fuel and water requirements. The Projects develop critical enablers that support the Joint Future Capabilities and Joint Expeditionary mindset, by maintaining readiness through integrating new equipment, enhancing the field soldier's well-being, and providing soldiers usable equipment. The Projects also reduce sustainment requirements, related Combat Support/Combat Service Support (CS/CSS) demands on lift, the combat zone footprint, and costs for logistical support.

Projects under this PE support Field Feeding programs for all the services.

**A. Mission Description and Budget Item Justification**

This Project enables system development and demonstration of Joint Service combat rations and field feeding equipment/systems designed to improve warfighter performance and reduce the logistics burden of subsistence support. Efforts funded in this Project support all four Services, the Special Operations Command, and the Defense Logistics Agency (DLA). The Army serves as the Executive Agent for this Department of Defense (DoD) program, with oversight and coordination provided by the DoD Combat Feeding Research and Engineering Board (CFREB) as required by DoD Directive (DoDD) 3235.02E. Centralized execution of the DoD Combat Feeding Research and Engineering Program (CFREP) with Joint Service review and approval eliminates unnecessary duplication of efforts across the Services and maximizes use of common materiel solutions.

Work in this Project is performed by the United States Army Futures Command (AFC), U.S. Army Combat Capabilities Development Command (DEVCOM) Soldier Center (SC), Natick, MA.

**B. Accomplishments/Planned Programs (\$ in Millions)**

	FY 2023	FY 2024	FY 2025
<b>Title:</b> Joint Service Combat Ration System Development	1.238	1.186	0.939
<p><b>Description:</b> This effort integrates and demonstrates mature Joint Service combat ration systems that enable warfighter maneuver, readiness and effectiveness during highly mobile, dispersed operations. Prototypes are transitioned from APE 0603747A Project 610 to develop individual and group combat rations with improved capabilities including improved warfighter physical and cognitive performance through optimized nutrition and reduced logistics burden through weight and cube reduction. This effort completes operational test and evaluation (OT&amp;E) to confirm system level performance, and develops ration specifications for transition to Defense Logistics Agency - Troop Support (DLA - Troop Support) for procurement.</p> <p><b>FY 2024 Plans:</b> For existing operational ration platforms (Meal, Ready-to-Eat; Close Combat Assault Ration; Unitized Group Rations - A/M/ Heat&amp;Serve, Expeditionary Group Ration), will integrate prototype components/technologies into menu systems and ration assembly processes to improve quality, optimize nutritional content, decrease weight/cube/cost and/or improve modularity and field utility; will continue to conduct OT&amp;E on ration systems to validate system level performance; will present recommendations to the Joint Services for Milestone C approval; will finalize procurement documents and initiate transition to DLA-Troop Support; will obtain US Army, Surgeon General approval of revised menus; will execute production testing with industry to</p>

**Note**

Army Field Feeding Equipment is a new start within the Combat Feeding, Clothing, and Equipment program in FY 2025.

**A. Mission Description and Budget Item Justification**

This Project supports the development, demonstration and Non-Developmental Item (NDI) Commercial Off The Shelf (COTS) evaluation of combat feeding equipment to enhance Soldier efficiency, improve Soldier survivability, and reduce food service logistics requirements for the Army. The Project supports rapidly deployable, organically maintained and provisioned field food service equipment initiatives. Efforts also support the Engineering and Manufacturing Development (EMD) phase of programs to improve equipment, enhance safety in food service, reduce environmental impact, and decrease fuel and water requirements. The Projects develop critical enablers that support the Army's Strategic Planning Guidance by developing and integrating critical expeditionary capabilities that maintain readiness, providing effective solutions that reduce the resource and operational energy footprint, providing modernized deployable kitchen equipment for Army 2030, and enhancing the field Soldier's well-being. This project reduces sustainment requirements, related Combat Support/ Combat Service Support (CS/CSS) demands on lift, the combat zone footprint, and costs for logistical support.

This PE/Project supports Field Feeding programs for the Army.

**B. Accomplishments/Planned Programs (\$ in Millions)**

	<b>FY 2023</b>	<b>FY 2024</b>	<b>FY 2025</b>
<b>Title:</b> MTRCS RU Replacement	-	-	1.103
<b>Description:</b> Provides the next generation refrigeration unit for the Multi-temperature Refrigerated Container System (MTRCS). The MTRCS maintains rations and or/blood at refrigerated or frozen temperatures in ambient temperatures ranging from -25F to 120F. The MTRCS has the capacity to feed 800 soldiers 2 meals a day for 3 days at which point it is replaced in the field by another fully loaded MTRCS. A new EPA compliant refrigeration unit (RU) is required to replace the legacy RU which is no longer being produced.			
<b>FY 2025 Plans:</b>

<b>B. Accomplishments/Planned Programs (\$ in Millions)</b>		<b>FY 2023</b>	<b>FY 2024</b>	<b>FY 2025</b>
Complete market research and develop a prototype refrigeration unit that meets the Army's performance requirements for tactical refrigeration. Develop collaborative test plan and implement comprehensive technical testing of prototype.  <b>FY 2024 to FY 2025 Increase/Decrease Statement:</b> FY25 is a new start for this MTRCS RU replacement effort.				
<b>Title:</b> AK Integration with JLTV  <b>Description:</b> Mitigates safety issues that have developed from the fielding of the Army's Joint Light Tactical Vehicle (JLTV). The Assault Kitchen (AK) provides heat on the move capability to feed remote company sized units in environments from -25F to 120F all over the world. The AK uses the Army's Unitized Group Ration Heat and Serve to provide hot meals to up to 250 soldiers upon arrival onsite (500 daily). The AK is housed in a light tactical trailer that is incompatible with the new JLTV and requires that the AK components be integrated into the trailer that is compatible with the JLTV.  <b>FY 2025 Plans:</b> Integrate AK components into testable JLTV and trailer combination. Execute initial in-house testing and formal test program at government facility. Initiate required logistics documentation changes based on design.  <b>FY 2024 to FY 2025 Increase/Decrease Statement:</b> FY25 is a new start for this AK Integration effort.		-	-	0.600
