A. Mission Description and Budget Item Justification

Global Combat Support System - Marine Corps (GCSS-MC) Global Force Management Data Initiative (GFM-DI). Global Combat Support System-Marine Corps (GCSS-MC) is the physical implementation of the enterprise Information Technology (IT) architecture designed to support both improved and enhanced Marine Air Ground Task Force (MAGTF) Combat Support Services (CSS) functions and MAGTF Commander and Combatant Commanders/Joint Task Force (CC/JTF) combat support information requirements. The initial program includes all transactional CSS systems related to Supply Chain Management (SCM) and Enterprise Asset Management (EAM) functionality enabled with Service Management functions. The primary goal of the GFM-DI initiative is to support the capture of force structure authorization data, such as IUID data from the GCSS-MC system, and facilitate the accessibility of this data via web services.

Title: Golobal Combat Support System - Marine Corps (GCSS-MC)										0.392	0.000	0.000
Articles:										0		
FY 2012 Accomplishments:												
FY12 activities included the internal program planning to support the award of the GCSS LCM Warehouse Management System data requirements analysis work effort.												
Accomplishments/Planned Programs Subtotals										0.392	0.000	0.000
C. Other Program Funding Summary (\$ in Millions)												
N/A												
Remarks												
D. Acquisition Strategy												
The GFM-DI initiative support will be integrated into the GCSS-MC/LCM OEF Pilot fielding requirements analysis and program planning scheduled to commence in FY12. The OEF Pilot fielding will expand the retail supply functionality of Increment 1 by implementing select wholesale and retail warehouse management and automated information technologies, such as RFID and bar code scanning, and the study of IUID will be incorporated into the OEF Pilot analysis.
