**Note**

Starting in FY 2022 the Office of the Chief Management Officer (CMO) will be disestablished and funding and man-power resources realigned to the DA&M.

**A. Mission Description and Budget Item Justification**

To produce and sustain a Business Enterprise Architecture (BEA) to guide business transformation and business system investment actions for the DoD. The requirement to produce and maintain a BEA is codified in NDAA 2012, USC Title 10, Section 2222 with amplifying guidance from OMB. The proposed program provides improved capabilities to access and use the BEA information including descriptions of business processes and associated information assets; required capabilities and associated performance requirements; and governing laws, regulations and policies (LRPs).

**Remarks**

-Partial completion of this performance metric is primarily the result of challenges in meeting the DoD's Cybersecurity Risk management Framework requirements necessary to transition capabilities from our contractor development site and updated capabilities to the EKR shared services environment which is an accredited DoD computing environment. The discover functionality is operating in the contractor's development environment and is in the process of transitioning to final hosting within the EKR computing environment to complete discovery capabilities via web services.

-DoD CIO Memorandum of 3 May 2018 directed migration of all 4th Estate applications and systems to milCloud 2.0 by end of FY 2020. However, due to the DSD memorandum dated 24 January 2020 directing a complete review of the 4th Estate the transition was delayed until late 2021/early 2022.

-The Business Enterprise Architecture is related to NDS Strategic Approach number three "Reform the Department for Greater Performance and Affordability" regarding Streamline rapid, iterative approaches from development to fielding.
