A. Mission Description and Budget Item Justification

This Program Element (PE) establishes the dedicated funding line to carry out the duties as described in Title 10 US Code, Section 139, the Weapons Systems Acquisition Reform Act of 2009. The Deputy Assistant Secretary of Defense for Systems Engineering (DASD(SE)) is the principal advisor to the Secretary of Defense, the Under Secretary of Defense for Acquisition, Technology and Logistics (USD(AT&L)) and the Assistant Secretary of Defense for Research and Engineering (ASD(R&E)) on systems engineering, development planning, and related technical fields in the Department of Defense. The DASD(SE) develops policies and guidance for (1) the use of systems engineering principles and best practices; (2) the use of systems and software engineering planning and contracting approaches to enhance reliability, availability, and maintainability on major defense acquisition programs (MDAPs); (3) the systems engineering plans (SEPs) for MDAPs including software, and systems engineering considerations in support of lifecycle management and sustainability; and (4) the inclusion of provisions relating to systems engineering and reliability in requests for proposals. The DASD(SE) reviews and approves the SEP for each MDAP and monitors and reviews the systems engineering and development planning activities of MDAPs and other defense acquisition programs as directed by the Secretary of Defense or the USD(AT&L). Based on the DASD(SE)'s continuous program engagement, the DASD(SE) advises and makes recommendations to the Secretary of Defense and the USD(AT&L) regarding systems engineering, development planning and the execution of these activities. As a member of the Defense Acquisition Board, the DASD(SE) provides independent assessments of defense acquisition program's systems engineering, development planning, technical execution, and risk. The DASD(SE) also provides input on the inclusion of systems engineering requirements as part of the Joint Requirements Oversight Council's process for joint military requirements, to include developing specific inputs relating to each capabilities development document.

The DASD(SE) issues guidance to, and consults with, the Services and Agencies with respect to systems engineering in the Department, providing advocacy, oversight, and guidance to elements of the acquisition workforce responsible for systems engineering, development planning, and lifecycle management and sustainability functions and developing policies and guidance for the integration of specialty engineering functions.

The DASD(SE) periodically reviews the organizations and capabilities of the military departments with respect to systems engineering, development planning, and lifecycle management and sustainability, and identifies needed changes or improvements to such organizations and capabilities. The DASD(SE) prepares and submits an annual report to Congress on systems engineering activities and effectiveness.

Appropriation/Budget Activity 0400: <i>Research, Development, Test & Evaluation, Defense-Wide I</i> BA 6: <i>RDT&E Management Support</i>	R-1 Program Element (Number/Name) PE 0605142D8Z / <i>Systems Engineering</i>
--	--

This PE includes efforts by the office of the DASD(SE) in implementing the Department's Trusted Defense System Strategy. Specifically, the PE will develop and mature the critical sub discipline of systems engineering - system security engineering and the Comprehensive Program Protection Planning process that implements a risk-based approach to protection of critical technology, components and information in acquisition programs. This includes study and maturation of policy, guidance and SSE discipline fundamentals such as engineering methods, tools and best practices. These activities will be promulgated in defense acquisition as a fundamental element of DASD(SE) systems engineering and technical reviews.

B. Program Change Summary (\$ in Millions)	<u>FY 2013</u>	<u>FY 2014</u>	<u>FY 2015 Base</u>	<u>FY 2015 OCO</u>	<u>FY 2015 Total</u>
Previous President's Budget	43.195	44.237	52.067	-	52.067
Current President's Budget	38.882	39.606	44.246	-	44.246
Total Adjustments	-4.313	-4.631	-7.821	-	-7.821
• Congressional General Reductions	-	-			
• Congressional Directed Reductions	-3.023	-4.400			
• Congressional Rescissions	-0.116	-			
• Congressional Adds	-	-			
• Congressional Directed Transfers	-	-			
• Reprogrammings	-	-			
• SBIR/STTR Transfer	-1.174	-			
• Strategic Efficiency Savings	-	-	-7.821	-	-7.821
• FFRDC	-	-0.231	-	-	-

Change Summary Explanation

The reduction is a strategic efficiency approach to reduce funding and staffing. As a result, we provide a better alignment of funding and provide support to a smaller military force.

The FY 2015 OCO Request will be submitted at a later date.

A. Mission Description and Budget Item Justification

This project (142) supports the execution of the missions of the Deputy Assistant Secretary of Defense for Systems Engineering (DASD(SE)) to: (1) provide flexible engineering policy, guidance, and workforce development requirements for the Department of Defense (DoD) acquisition workforce; (2) foster an acquisition environment of collaboration, teamwork, and joint ownership of program success through a proactive program oversight process, ensuring appropriate levels of systems engineering discipline are applied through all phases of the acquisition life cycle; and (3) engage all stakeholders across government, industry, and academia to collectively advance systems engineering practice and achieve acquisition excellence. The outcome of this effort is to ensure systems engineering principles and disciplines are fully accepted and assimilated into the DoD acquisition workforce positioning the DoD for acquisition excellence and leading to a stronger national defense.

Activities include the following functions:

Program Support

- Work with program managers to prepare systems engineering plans (SEPs) to document the technical management approach.
- Conduct periodic program engagements in support of technical reviews to confirm programs are executed in accordance with the SEP.
- Review all aspects of the systems engineering process for major defense acquisition programs (MDAPs) to ensure they are adequate to support fielding and the achievement of cost and performance goals including reliability, sustainment, and other considerations.
- Participate in Systems Engineering Integrated Project Teams (IPTs), Systems Engineering Working Integrated Project Teams (WIPTs), and Systems Engineering technical reviews, especially Preliminary Design Reviews and Critical Design Reviews.
- Work with DoD Service program managers, their staffs, and other organizations, technical authorities, and oversight organizations to develop and implement technical management programs for MDAPs.
- Conceive plans and lead program support reviews and assessments of MDAP weapons systems and other programs (e.g., Major Automated Information Systems (MAIS)) to shape technical planning and management to ensure program success.
- Conduct other technical reviews as requested, e.g., Nunn-McCurdy certification reviews, Non-Advocate Reviews, focused technical assessments, and software readiness reviews to identify and mitigate program risk.

Mission Assurance

- Establish engineering policy, guidance, and workforce development to drive the development of fully capable and supportable weapons systems.
- Oversee Component implementation of engineering initiatives and conduct independent assessments.

UNCLASSIFIED

Exhibit R-2A, RDT&E Project Justification: PB 2015 Office of Secretary Of Defense			Date: March 2014		
Appropriation/Budget Activity 0400 / 6		R-1 Program Element (Number/Name) PE 0605142D8Z / Systems Engineering	Project (Number/Name) P142 / Systems Engineering		
• Develop education and training materials for instructing, maintaining, and enhancing the defense acquisition workforce. Activities include: (1) developing guidance to enhance Systems Planning, Research, Development and Engineering (SPRDE) and Production Quality and Manufacturing (PQM) acquisition career planning and progression; and (2) monitoring, and facilitating Defense Acquisition University (DAU) updates to the systems engineering, quality and software engineering courses, to ensure the curriculum represents the education and training requirements necessary to be a viable team member in the acquisition process. • Drive an overall improvement in weapon system reliability through improved reliability engineering, reliability growth management, and reliability monitoring in program development contracting, execution and sustainment. • Prepare and submit annual reports to Congress on the Department’s capabilities and effectiveness in systems engineering and development planning.					
System Analysis • Foster program protection planning methodology, system security engineering discipline, industry standards, and engagement with acquisition programs to support risk assessment and vulnerability mitigation. • Guide Service and other component organizations in the development planning process to ensure proposed MDAP programs are executable within acceptable levels of risk. • Resolve long-term major systems engineering challenges such as systems of systems (SoS) systems engineering, systems engineering Complexity Analysis, and systems engineering based technical trade off analysis and pre-program formulation stages. • Provide necessary modeling and simulation policy and guidance, clarify the application of distributed simulation standards and work with the DoD modeling and simulation community to identify and promulgate required capabilities and competencies needed to support acquisition modeling and simulations.					
B. Accomplishments/Planned Programs (\$ in Millions)			FY 2013	FY 2014	FY 2015
Title: Systems Engineering Initiatives			34.326	30.324	34.715
Description: The DASD(SE) provides objective assessments of program risk to support knowledge-based decision making by DoD leaders regarding DoD MDAPs and MAISs.					
FY 2013 Accomplishments: Strategic Thrust: Major Program Support • Conducted deep-dive systems engineering reviews of MDAPs and special interest programs. • Expanded conduct of SE and execution risk assessments. • Continued expansion of systems integration and development planning risk assessments. • Continued monitoring of programs, provided SE oversight to include all MDAPs, MAIS, and special interest programs. • Conducted systemic analysis and process management. • Expanded root cause analysis conducted during and after Program Support Reviews (PSRs). • Expanded detailed performance measurements and analysis. • Provided decision-quality information and recommendations to Defense Acquisition Boards (DABS), In Progress Reviews (IPRs), Defense Space Acquisition Boards (DSABs) and Information Technology Advisory Boards (ITABs). • Reviewed MDAP Request for Proposals for critical engineering requirements.					

UNCLASSIFIED

Appropriation/Budget Activity 0400 / 6		R-1 Program Element (Number/Name) PE 0605142D8Z / <i>Systems Engineering</i>		Project (Number/Name) P142 / <i>Systems Engineering</i>	
B. Accomplishments/Planned Programs (\$ in Millions)			FY 2013	FY 2014	FY 2015
Strategic Thrust: Systems Engineering Capabilities Assessment • Conducted analysis of Military Departments systems engineering self-assessments; conducted analysis of DoD's SE capability. • Authored annual systems engineering Report to Congress. • Developed and strengthened component SE organization and capabilities. Strategic Thrust: Engineering and Policy • Developed and updated core SE policy, guidance and standards, including a complete update to Chapter Four of the Defense Acquisition Guidebook on Systems Engineering; reviewed all acquisition policy for SE implications. • Workforce development: Functional Lead for SPRDE, PQM and assisted software engineering. Strategic Thrust: Early Systems Engineering and Development Planning • Developed policy and guidance for development planning and early SE; oversaw its implementation and execution within Services. • Performed early acquisition risk assessment, including pre-Milestone A (pre-MS A) engagement with Joint Requirements Oversight Council processes. • Supported Services and COCOMs in pre-MS A formulation. • Supported requirements analyses and analysis of alternatives. • Supported initial capabilities document definition and development. • Led systems engineering research, systems of systems research and collaboration across Services to identify areas of improvement; developed and established best practices. • Oversaw the Systems Engineering Research University Affiliated Research Center (UARC) and conducted University-based research into SE processes and techniques. FY 2014 Plans: Strategic Thrust: Program Support Continue to: • Conduct deep-dive systems engineering reviews of major defense acquisition programs (MDAPs) and special interest programs. • Expand conduct of SE and execution risk assessments. • Expand systems integration and development planning risk assessments. • Continue monitoring of programs, provide SE oversight to include all MDAPs, Major Automated Information Systems (MAIS), and special interest programs. • Conduct systemic analysis and process management. • Expand root cause analysis conducted during and after Program Support Reviews (PSRs). • Expand detailed performance measurements and analysis.

A. Mission Description and Budget Item Justification

The Department of Defense (DoD) must address cyber security and supply chain risks to DoD networks, weapons systems and information stored and processed on both DoD and Defense Industrial Base (DIB) unclassified networks that support DoD programs. Increased reliance on the internet as a vehicle for sharing information, globalization of the supply chain, and advanced persistent threats (APTs) that can evade commercially available security tools and defeat generic security best practices, drive the need for better and smarter program protection planning and execution. Comprehensive Program Protection Planning links high level policies and practical expertise to specific acquisition practices, systems engineering activities, and risk reduction activities. Through this initiative the Department will pilot activities with the DIB to reduce risks in sharing and storing critical program information, better understand and mitigate supply chain risks, improve program protection planning, and improve and streamline program protection engineering. Activities carried out support implementation of DoD Directive 5200.44 Trusted Systems and Networks with the use of proven mitigation techniques and tools, the ongoing refinement of risk management processes, and creation of needed technology.

B. Accomplishments/Planned Programs (\$ in Millions)

	FY 2013	FY 2014	FY 2015
Title: Program Protection	4.556	4.300	4.531
FY 2013 Accomplishments: • Provided support to Acquisition Category (ACAT) I programs to conduct broad program protection planning. - Conducted criticality analyses. - Developed Program Protection Plans, and tracked progress to verify protection of critical program capabilities. - Reviewed ACAT I Program Protection Plans and provided recommendations for their approval to Under Secretary of Defense for Acquisition, Technology, and Logistics. • Conducted outreach to further the implementation and understanding of system security engineering requirements and practices (courseware, guidance dissemination, mentoring of Service teams, training, and outreach). • Collaborated in developing Defense Federal Acquisition Regulation Supplement (DFARS) or Federal Acquisition Regulation (FAR) language to implement information security on DoD contracts for protection of defense program information. Developed and implemented process for adjudicating public comments. Provided acquisition support to DIB Cyber Security program.

# The FY 2015 OCO Request will be submitted at a later date.												
A. Mission Description and Budget Item Justification												
The Systems Engineering Research Center (SERC) is a University Affiliated Research Center (UARC) established in 2008. As a UARC, the SERC is a strategic resource to further systems research and increase its impact on the Department's ability to meet its mission. Greatly improved systems engineering is essential to the president's strategy for the Department to field systems that are agile, affordably sustainable, flexible, and ready for a full range of contingencies in the face of declining budgets and a shrinking workforce. The SERC consists of a network of eighteen research universities from across the US that work collaboratively to bring the best talent in the nation to bear on DoD's systems engineering research problems.												
In prior years, DASD/SE has resourced the SERC at \$1.000 million per year from P142.												
The additional funding, beginning in FY 2014, will increase the Department's engagement with SERC, supporting additional research on topics of strategic importance to DoD.												
This new project code, established within the Systems Engineering Program Element: (1) provides core funding for the SERC; (2) provides adequate stable resources for the SERC research agenda; and (3) enables the SERC to take full advantage of the university collaborators, enabling them to address DoD needs much more effectively.												
B. Accomplishments/Planned Programs (\$ in Millions)									FY 2013	FY 2014	FY 2015	
Title: Systems Engineering Research Center									-	4.982	5.000	
Description: The Systems Engineering Research Center (SERC) is a DoD University Affiliated Research Center which conducts University-based research that directly supports DoD's Strategic Plan through development of new systems engineering methods, processes and tools.												
FY 2014 Plans: Funding will provide enhanced engineering methods, processes and tools (MPTs) that make significant improvements in four areas:

Appropriation/Budget Activity 0400 / 6	R-1 Program Element (Number/Name) PE 0605142D8Z / <i>Systems Engineering</i>	Project (Number/Name) P241 / <i>Systems Engineering Research Center</i>	
B. Accomplishments/Planned Programs (\$ in Millions)		FY 2013	FY 2014
(1) Systems Engineering Transformation: transform systems engineering within the defense enterprise by developing new engineering and estimation methods to address complexity in modern systems and enable affordable development of flexible systems responsive to changing threats and missions; (2) Enterprises and Systems of Systems: build and transform enterprises and systems of systems using new systems engineering methods with fewer unintended consequences and unforeseen risks; (3) Trusted Systems: secure defense systems from cyber and other threats through systemic security approaches that complement incomplete current perimeter/network defense methods; and (4) Human Capital Development: speed the professional development of strong systems engineers and technical leaders in the Department and the Defense Industrial Base. FY 2015 Plans: Continue to enhance engineering methods, processes and tools (MPTs) to improve in the following areas: (1) Systems Engineering Transformation: transform systems engineering within the defense enterprise by developing new engineering and estimation methods to address complexity in modern systems and enable affordable development of flexible systems responsive to changing threats and missions; (2) Enterprises and Systems of Systems: build and transform enterprises and systems of systems using new systems engineering methods with fewer unintended consequences and unforeseen risks; (3) Trusted Systems: secure defense systems from cyber and other threats through systemic security approaches that complement incomplete current perimeter/network defense methods; and (4) Human Capital Development: speed the professional development of strong systems engineers and technical leaders in the Department and the Defense Industrial Base.

<u>D. Acquisition Strategy</u> N/A <u>E. Performance Metrics</u> Develop and extend fundamental knowledge, advanced methods, processes and tools and cutting edge techniques for systems engineering of complex designs of relevance to the DoD mission. • Generation and execution of relevant and appropriate SERC Research tasks. • Promulgation of advanced SE approaches through research publications, presentations and monographs.
