A. Mission Description and Budget Item Justification

The Army Medical Command receives funding for research infrastructure management support requirements at select continental United States (CONUS) and outside the continental US (OCONUS) laboratories and trial sites. Research scientists at these laboratories conduct bio-surveillance and early-to-late-stage clinical research of investigational products such as biologics, drugs, and devices to treat/prevent polytrauma injuries. Research is conducted to obtain US Food and Drug Administration (FDA) licensure, a requirement for use of all medical products. The funding provides for the sustainment of significant technical expertise and knowledge independent of the number of assigned projects. This funding also provides for initial outfitting and transition (IO&T) cost requirements for replacement of research, development, test and evaluation (RDT&E) medical laboratories funded under multi-year military construction (MILCON) projects. These IO&T funds are designated as appropriations other than MILCON.

BA 2: *RDT&E*

R-1 ITEM NOMENCLATURE

PE 0606105HP: *Medical Program-Wide Activities*

Health Affairs (Force Health Protection & Readiness) receives funds to provide management support for research projects at Pacific Joint Information Technology Center (JITC).

For the Navy Bureau of Medicine and Surgery, this program element includes facility operational funding for the Medical Biological Defense research sub-function of the Naval Medical Research Center (NMRC) Biological Defense Research Directorate (BDRD). The program mission is mandated by the Joint Requirements Office-CBRN, capability baseline assessment chemical and biological passive defense. The primary function is Research on Countermeasures to Biological Threat Agents; Development of Assays to Detect Biological Threat Agents ; Bioforensic Analysis of Biological Threat Agents.

A. Mission Description and Budget Item Justification												
Funding supports the IO&T costs associated with MILCON for the US Army Medical Research Institute of Infectious Diseases (USAMRIID), Fort Detrick, MD.												
B. Accomplishments/Planned Programs (\$ in Millions)									FY 2012	FY 2013	FY 2014	
Title: USAMRIID IO&T (Army)									14.909	19.420	40.038	
FY 2012 Accomplishments: The US Army Medical Research Institute of Infectious Diseases (USAMRIID) IO&T costs for this period supported the replacement facility MILCON project that is funded under the Defense MILCON appropriation. Equipment purchased is designated as Category C (CAT C) government furnished and government installed (GFGI) equipment from other than MILCON appropriations. The transition funds supported the extraordinary operational costs incurred as a direct result of the MILCON project that are not part of normal operational USAMRIID costs. USAMRIID IO&T increased based on phased requirements and construction progress as the building approaches completion. The FY12 initial outfitting (IO) equipment purchased was from fiscal year equipment listings based on delivery lead time, building placement, installation, and bona-fide need criteria. Transition costs include personnel, travel, planning and acquisition support, and decommissioning support.												
FY 2013 Plans: The FY13 USAMRIID IO&T program reflects the phased requirements based on construction progress as the building nears completion. Initial Outfitting (IO) equipment to be purchased for FY13 is from fiscal year equipment listings based on delivery lead time, building placement, installation, and bona-fide need criteria. FY13 transition costs are the incremental fiscal year requirements for operations that support this multi-year MILCON project. Transition funds provide for personnel, travel, planning and acquisition support, commission and transition support, and decommissioning support for the old site.												
FY 2014 Plans: The FY14 USAMRIID IO&T program reflects the phased requirements based on construction progress as the building nears completion. IO equipment to be purchased for FY14 is from fiscal year equipment listings based on delivery lead time, building placement, installation, and bona-fide need criteria. FY14 transition costs are the incremental fiscal year requirements for operations that support this multi-year MILCON project. Funds will be used to provide for personnel, planning and acquisition support, movement support for materiel from the old to new or intermediate facility sites, old site equipment turn-in support, post-

A. Mission Description and Budget Item Justification												
Pacific-Based Joint Information Technology Center - Maui (JITC-Maui) (FHP&RP) provides management support for Pacific-JITC, established to rapidly research, test and develop Warfighter medical solutions and products, through pilot projects or prototypes that provide mission critical value and actionable information to the DoD, including Services, combatant commanders, and the Department of Veterans Affairs.												
B. Accomplishments/Planned Programs (\$ in Millions)									FY 2012	FY 2013	FY 2014	
Title: Pacific-Based Joint Information Technology Center - Maui (JITC-Maui) (FHP&RP)									7.393	7.952	8.109	
Description: Management support for research projects at Pacific Joint Information Technology Center (JITC).												
FY 2012 Accomplishments: The Pacific JITC managers have worked with the functional end users and TRICARE Management Activity sponsors mapping proposals and initiatives critical to the Warfighter, addressing medical research capability gaps, and Department requirements. JITC managers also maintained, utilized, and promoted use of the Pacific JITC Independent Verification and Validation (IV & V) lab by government entities including the testing and integration of Department Warfighter projects within the Sensitive Compartment Information Facility (SCIF) laboratory.												
FY 2013 Plans: The Pacific JITC managers work with the functional end users and TRICARE Management Activity sponsors to map proposals and initiatives critical to the Warfighter, address Joint Service capability gaps, and Department requirements.												
FY 2014 Plans: Pacific JITC will maintain, utilize, and promote use of Pacific JITC test and evaluation lab (IV & V) by government entities including the testing and integration of Department Warfighter projects within the SCIF laboratory. The Pacific JITC will continue to work with functional end users and TRICARE Management Activity sponsors to map proposals and initiatives critical to the Warfighter, address Joint Service capability gaps, and Department requirements.

A. Mission Description and Budget Item Justification												
CONUS Laboratory Infrastructure Support (Army) funding provides management support requirements for research infrastructure at select laboratories and research sites that conduct basic to late-stage clinical research and evaluation of investigational products, such as biologics, drugs, and devices to treat/prevent polytrauma injuries, through collaborative effort with the military health system’s medical treatment facilities. These products are required to be licensed through the US FDA regulatory process prior to general use in humans. The funds sustain significant expertise and knowledge independent of the number of assigned projects.												
B. Accomplishments/Planned Programs (\$ in Millions)									FY 2012	FY 2013	FY 2014	
Title: CONUS Laboratory Support Clinical Infrastructure (Army)									3.830	13.854	3.000	
Description: Management support for research infrastructure at select laboratories and research sites that conduct basic to late-stage clinical research and evaluation of investigational products, such as biologics, drugs, and devices to treat/prevent polytrauma injuries, through collaborative effort with the military health system’s medical treatment facilities.												
FY 2012 Accomplishments:												
The Clinical Trial Infrastructure funding supported development of capabilities at Military Treatment Facilities (MTFs) to conduct regulated clinical studies and US FDA regulated clinical trials. Initial funding was used to establish start-up and roll-out capabilities for clinical trial needs at MTF clinical trial sites. Establishment of relevant MTFs to conduct clinical trials is a joint effort between the RDT&E and Clinical Investigation Program (CIP) communities. Clinical research infrastructure funding is being apportioned among the three Services, and the Joint Task Force National Capital Region Medical Command. Multiple MTF sites were selected with priority given to those facilities having relevant patient populations to conduct essential clinical trials. Essential DHP clinical trials include such areas as blast/polytrauma, restorative/regenerative medicine, clinical and rehabilitative medicine, military infectious diseases, hyperbaric oxygen research, reconstructive and regenerative medicine, injury prevention, wound healing, combat trauma research, military-related psychological health issues, suicide prevention and treatment, substance abuse, traumatic brain injury and psychological health, including post-traumatic stress disorder and medical product development. Anticipated products include materiel solutions such as biologics, drugs, and devices as well as medical knowledge products

such as clinical practice guidelines. Successful establishment of a sufficient infrastructure will result in close coordination and cooperation between the RDT&E community, CIP, MTF and Defense Centers of Excellence communities.			
FY 2013 Plans: In FY13, the Clinical Trial Infrastructure funding is providing for the maintenance and expansion of the clinical research infrastructure needed at MTFs having relevant patient populations to conduct essential RDT&E clinical trials. The clinical research infrastructure funding will be apportioned among the three Services, the Uniformed Services University of the Health Sciences and the Joint Task Force National Capital Region Medical Command.			
FY 2014 Plans: In FY14, established Clinical Trial Infrastructure will support the conduct of MTF-based RDT&E clinical trials in areas such as Traumatic Brain Injury, and Psychological Health and Rehabilitation. Support will be provided to collect data on research metrics. Research will be conducted at MTFs across the three Services, the Uniformed Services University of the Health Sciences and the Joint Task Force National Capital Region Medical Command.

^{##} The FY 2014 OCO Request will be submitted at a later date												
A. Mission Description and Budget Item Justification												
For the Navy Bureau of Medicine and Surgery, this program element (PE) includes RDT&E,HP funds for the Medical Biological Defense research sub-function of the Naval Medical Research Center (NMRC) Biological Defense Research Directorate (BDRD) that relocated to Fort Detrick, Maryland under the Base Re-Alignment and Closure (BRAC) Commission 2005. Consequently, there are significant increases in the operational costs by virtue of being at Fort Detrick, a highly secure National Interagency Biodefense Campus (NIBC). Uninterrupted utilities to all buildings on NIBC are provided by a Central Utility Plant (CUP) whose capacity all partners on the NIBC are required to buy into. The annual projected costs are distributed amongst the partners based on square feet and number of occupants of the building. The NIBC campus is a fenced physical location with Entry Control Points (ECP). The partners on the campus are required to pay for the guard force manning their ECP. BDRD's ECP is ECP5 and the projected costs for the guard force.

Title: NMRC Biological Defense Research Directorate (BDRD) (Navy)									0.000	4.223	4.351	
Description: Biological Defense Research is a completely reimbursable program. The program is sustained by competitive acquisition of research funding. The research dollars can not pay for the increased operational costs of the program. The complete reimbursable nature of the program requires additional sustained core funding for its operational costs.												
FY 2012 Accomplishments: A significant amount of this funding will be used for increased costs related to the Central Utility Plant, Entry Control Point Security Force and other operational costs for maintenance, refuse, and custodial												
FY 2013 Plans: A significant amount of this funding will be used for increased costs related to the Central Utility Plant, Entry Control Point Security Force and other operational costs for maintenance, refuse, and custodial.												
FY 2014 Plans: Continue to provide funding for the Central Utility Plant, Entry Control Points Security Force and operational costs for maintenance, refuse, and custodial.
