[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012

^{##} The FY 2014 OCO Request will be submitted at a later date

A. Mission Description and Budget Item Justification

The Integrated Electronic Health Record (iEHR) (a follow on to originally proposed Electronic Health Record Way Ahead) is designed to provide a comprehensive, longitudinal, electronic health record that is available anytime and anywhere for the lifetime of the patient. The overarching goal of the program is to create an authoritative source of health information for the estimated 18 million DoD and VA beneficiaries. The iEHR will deliver a highly flexible, reliable, secure, maintainable and sustainable system. Successful fielding of iEHR will result in enhanced quality of care / patient safety, reduced costs, and improved data visibility. Comprehensive and current health information collected from multiple sources will be readily accessible by DoD and VA providers at Theater, DoD and VA facilities. This readily accessible health information will be directly leveraged to optimize medical care, monitor force health, manage health risks, and to enhance individual performance. It is envisioned that iEHR will eventually replace/sunset existing legacy systems, such as DoD's AHLTA and CHCS, and VA's Veterans Health Information Systems and Technology Architecture (VistA) and Computerized Patient Record System (CPRS).

The iEHR program shall be an integrated, multi-increment effort with the Department of Defense and Department of Veterans Affairs. It shall be bound by a common architecture, common data model, and common presentation layer. iEHR will also include a mix of Commercial Off - The Shelf (COTS), Government Off the Shelf (GOTS) and Open Source capabilities, in addition to reuse of enduring unique capabilities. In October, 2011, the DoD/VA Interagency Program Office (IPO) was chartered, to include program management and execution of iEHR. With the active participation of clinical staff from both Departments, the iEHR program will harmonize healthcare delivery processes and products. The DoD/VA Interagency Clinical Informatics Board (ICIB) and the IPO have jointly prioritized 54 clinical capabilities and grouped them into six planning increments based on functional priority, technical feasibility, and financial viability. To date, iEHR Increments 1 and 2 have been authorized for execution.

iEHR RDT&E is reported under the program element 0605013 through FY 2013 inclusive, but will be reported under new program element 0605023 for FY 2014 and out.

Title: Integrated Electronic Health Record (iEHR) (Tri-Service)										0.000	0.000	64.100
Description: iEHR Increment 1 combines risk reduction and proof of concept activities. It will: (1) deliver two user-facing capabilities, Single Sign-On (SSO) and Context Management (CM); (2) conduct a pilot to inform a path forward to allow the practitioner to record (i.e., write-back) patient data to the electronic record in the authoritative data store, and; (3) include

supporting activities such as virtualization, a regionalization pilot, establishment of an iEHR Development Test Center/ Environment (DTC/DTE) configuration, and critical Clinical Data Repository (CDR) upgrades. iEHR Increment 2 focuses on architecture, design, infrastructure, and initial clinical capabilities. It will deliver: (1) infrastructure and core services to support clinical capability insertion into the new iEHR baseline (Service Oriented Architecture (SOA) Suite/ Enterprise Service Bus (ESB), Identity Management, Portal Framework, Access Control); (2) new clinical care graphical user interface; (3) Laboratory, Immunization, and Pharmacy clinical capabilities and; (4) Pharmacy “fixes” at the James A. Lovell Federal Health Care Center (JAL FHCC). In support of an Initial Operating Capability (IOC) in September 2014, iEHR Increment 2 Laboratory and Immunization clinical capabilities (e.g., orders and results management) will be deployed to the Hampton Roads and San Antonio DoD and VA treatment facilities, with Pharmacy “fixes” deployed at JAL FHCC, North Chicago, IL. Full deployment of Increment 2 scheduled to occur by Fiscal Year (FY) 2016 to nine regional data centers (two in the initial deployment, seven additional in the full deployment). Laboratory, Immunization, and Pharmacy clinical capabilities will be operationalized at nine VA facilities, nine DoD facilities, and at least one associated satellite facility per region. FY 2014 Plans: iEHR Increment 2 will deliver: (1) infrastructure and core services to support clinical capability insertion into the new iEHR baseline (Service Oriented Architecture (SOA) Suite/ Enterprise Service Bus (ESB), Identity Management, Portal Framework, Access Control); (2) new clinical care graphical user interface; (3) Laboratory, Immunization, and Pharmacy clinical capabilities and; (4) Pharmacy “fixes” at the James A. Lovell Federal Health Care Center (JALFHCC). -Complete following Increment 2 activities: -- Capability development -- Baseline integration and testing -- Capability deployment, installation and checkout of IOC sites -- Security Accreditation -- Operational Assessment -- Obtain Milestone C deployment decision -- IOT&E In support of an Initial Operating Capability (IOC) in September 2014, iEHR Increment 2 Laboratory and Immunization clinical capabilities (e.g., orders and results management) will be deployed to the Hampton Roads and San Antonio DoD and VA treatment facilities, with Pharmacy “fixes” deployed at JALFHCC North Chicago.

Remarks											
D. Acquisition Strategy											
Evaluate and use the most appropriate business, technical, contract and support strategies and acquisition approach to minimize costs, reduce program risks, and remain within schedule while meeting program objectives. Strategy is revised as required as a result of periodic program reviews or major decisions.											
E. Performance Metrics											
Each program establishes performance measurements which are usually included in the MHS IT Annual Performance Plan. Program cost, schedule and performance are measured periodically using a systematic approach. The results of these measurements are presented to management on a regular basis in various as part of the Integrated Product and Process Development (IPPD) process, In Process Reviews (IPRs), or other reviews to determine program effectiveness and provide new direction as needed to ensure the efficient use of resources. Performance metrics for specific major projects may be viewed at the OMB Federal IT Dashboard website.
