NPG REPORT NO. 1075

Ballistic Test of Cool Propellants EX-6985 and EX-7006

PART A

SYNOPSIS

1. This is the seventeenth partial report on Task Assignment NPG-Re2d-64-1-53, the "Development of a Cool Propellant for the 3"/50 Caliber Gun", and the final report on the "Ballistic Test of Cool Propellants, EX-6985 and EX-7006."
2. From the results of the subject tests, it is concluded that:
 - a. EX-6985 with the XC-D22/250 primer and 0.4 lb. of SPDN-4438 placed at the bottom of the case with the balance of the charge consisting of EX-6985 on top of SPDN-4438 is considered to be a satisfactory replacement for EX-6735.
 - b. EX-7006 with the Mk 42 primer plus 150 grams of NPFB-223 in a pyralin container placed around the forward end of the primer is a satisfactory replacement for EX-6649.
 - c. EX-6985 and EX-7006 are ballistically satisfactory for the continuation of the rapid fire erosion studies in the 3"/50 caliber gun except as noted in sub-paragraph (h) of paragraph 8.

Ballistic Test of Cool Propellants EX-6985 and EX-7006

PART B

INTRODUCTION

1. AUTHORITY:

The tests reported herein were conducted under Task Assignments NPG-Re2d-62-1-53 and NPG-Re2d-64-1-53 as authorized by references (a) and (b).

2. REFERENCES:

- a. BUORD Conf ltr Re2d-CNB:aph NP9 Ser 42305 of 21 July 1952
- b. BUORD Conf ltr Re2d-CNB:bac NP9 Ser 42307 of 21 July 1952
- c. BUORD Conf ltr Re2d-CNB:df NP9 Ser 41584 of 2 July 1952

- e. NPG Report No. 770 (Conf) of 9 June 1951
- f. NPG Report No. 503 (Conf) of 14 Mar 1950
- g. Description Sheets of Manufacture and Closed Bomb Data (Conf)

3. BACKGROUND:

References (a) and (b) established the general task assignments for the Development of Cool Propellants for the 3"/70 and 3"/50 caliber guns, respectively.

Reference (c) requested that EX-6985 be fired for ballistic assessment in the 3"/50 caliber gun and described it as a cool NH powder made to replace EX-6735 (reference (e)) for continuation of the erosion trials in the 3"/50 caliber gun.

Reference (d) described EX-7006 as a cool picrite powder made to replace EX-6649 (reference (f)) and requested ballistic tests of the subject powder in the 3"/50 caliber gun to determine its suitability for use in a special erosion program under preparation for the 3"/50 caliber gun.

4. OBJECT OF TEST:

The subject tests were conducted to determine whether EX-6985 and EX-7006 are satisfactory replacements for EX-6735 and EX-6649, respectively, in the continuation of erosion trials in the 3"/50 caliber gun.

c. Date Commenced Test	31 July 1952
d. Tests Completed	17 September 1952

PART C

DETAILS OF TESTS

6. DESCRIPTION OF ITEMS UNDER TEST:

a. EX-6985 and EX-7006 are cool composition propellants whose calculated flame temperatures are 1816°K and 1949°K, respectively, and whose nominal compositions, as given in reference (p), are as follows:

<u>Composition</u>	<u>EX-6985</u>	<u>EX-7006</u>
Nitrocellulose (13.20%N)	74.69%	20.26%
Dinitrotoluene	13.51	-
Dibutylphthalate	10.80	9.20
Diphenylamine	1.00	-
Nitroglycerin	-	8.25
Nitroguanidine	-	60.57
Centralite	-	1.72

b. Grain Geometry and Closed Bomb Data:

<u>Sample</u>	<u>Length</u> <u>(in.)</u>	<u>Diam.</u> <u>(in.)</u>	<u>Av. Web</u> <u>(in.)</u>	<u>No. of</u> <u>Perfs.</u>	<u>R.Q.</u> <u>(%)</u>	<u>R.F.</u> <u>(%)</u>
EX-6985	0.4300	0.1368	0.0247	7	94.8(a)	98.6(a)
"	"	"	"	7	133.3(b)	95.7(b)
EX-7006	0.3110	0.1210	0.0205	7	111.0(b)	95.8(b)
"	"	"	"	7	96.0(c)	98.5(c)

(a) Based on EX-6735 as 100% at 90°F.

(b) Based on EX-6586 as 100% at 90°F.

(c) Based on EX-6649 as 100% at 90°F.

NFG REPORT NO. 1075

Ballistic Test of Cool Propellants EX-6985 and EX-7006

7. PROCEDURE:

EX-6985 and EX-7006 were fired for ballistic assessment in several 3"/50 caliber guns under conditions similar to those reported in references (e) and (f). Muzzle velocities, maximum pressures (copper crusher), and ejection times were recorded. All rounds were assembled at PPD (Production Packing Dept). Pressure-time records were obtained for the various conditions tested.

8. RESULTS AND DISCUSSION:

The results of the subject tests are given in detail in the Appendices and are summarized below:

a. Ballistic Tests of EX-6985 and EX-7006:

Gun: 3"/50 Caliber

<u>Mk - Mod</u>	<u>No.</u>	<u>ESR</u>	<u>D_o</u>
22 4	13092 (Worn)	2145.9	3W052
22 5	20385 (New)	183.0	3W002
21 0	5917 (Worn)	3217.4	3W096
22 3	19923 (New)	152.7	3W004

Projectile: Mk 33 (13.00 lbs.) Epsom Salt Loaded

Cartridge Case: Mk 9, Steel, Rubber Crimped

Primer: Mk 42 and XC-D22/250 (as indicated)

Lead Foil: 45 grams per charge with EX-6985
30 grams per charge with EX-7006

Wad and Spacer: Cardboard, NCF Dwg. No. 132664,
Pc. Nos. 13 and 4

Powder Temp.: 90°F

NPG REPORT NO. 1075

Ballistic Test of Cool Propellants EX-6985 and EX-7006

b. Charge determination:

Gun data are the same as in sub-paragraph (a) above.

Master Powder: SPCG-10135 (4.16 lbs.)

<u>Powder</u>	<u>Gun</u>	<u>Velocity (f/s)</u>	<u>Charge (lbs.)*</u>	<u>Pressure (t.s.i.)</u>
EX-6985(a)	13092 (Worn)	2700	4.91	14.9
EX-6985(a)	20385 (New)	2700	4.84	14.8
Mean of new and worn guns (a)		2700	4.88	14.9
EX-7006	20385 (New)	2700	4.96	19.9
EX-7006	5917 (Worn)	2700	4.91	20.2
EX-7006(b)	5917 (Worn)	2700	5.31	15.0
EX-7006(b)	19923 (New)	2700	5.23	15.7
EX-7006(c)	5917 (Worn)	2700	4.60	17.8
EX-7006(c)	5917 (Worn)	2700	4.53	18.8
EX-7006(d)	19923 (New)	2700	4.66	16.6
EX-7006(d)	5917 (Worn)	2700	4.80	16.0
Mean of new and worn guns (d)		2700	4.73	16.3

* All charges obtained by the Matched Powder Method

- (a) 0.4 lbs. of SPDN-4438 on bottom of case. Balance of charge consists of EX-6985 on top of SPDN-4438.
- (b) Mk 42 primer plus 2 empty pyralin containers end on end around primer.
- (c) Mk 42 primer plus 150 grams of NPFB-223 in pyralin container around bottom of primer.
- (d) Mk 42 primer plus 150 grams of NPFB-223 in pyralin container around top of primer.

c. Satisfactory ballistic uniformity was obtained when EX-6985 was fired with the XC-D22/250 primer plus 0.4 lb. of SPDN-4438 and when EX-7006 was fired with the Mk 42 primer plus 150 grams of NPFB-223 in a pyralin container around the forward end of the primer.

d. Although the pressure-time records obtained were not of desired smoothness, in view of the excellent ballistic performance obtained under the above conditions, the subject powders are considered satisfactory for use in the continuation of the rapid fire erosion studies in the 3"/50 caliber gun.

CONFIDENTIAL

NPG REPORT NO. 1075

Ballistic Test of Cool Propellants EX-6985 and EX-7006

e. Appendix (B) shows the pressure-time records obtained with EX-6985 and EX-7006 with the various ignition systems tested. Ignoring the high frequency oscillations attributable to the pressure-time gage, EX-7006 with the Mk 42 primer plus two (2) empty pyralin containers placed end on end around the primer gave the smoothest pressure-time curves.

f. EX-6985 with the XC-D22/250 primer gave slightly less carbon deposition than EX-6735, as reported in reference (e). While EX-6985, plus the scavenger powder SPDN-4438 (0.4 lb.) completely eliminated the carbon deposition, the amount of black smoke remained the same as with EX-6985 without the scavenger.

g. Comparative results of EX-6735 and EX-6649 along with their replacement powders EX-6985 and EX-7006 are as follows:

<u>Powder</u>	<u>Velocity (f/s)</u>	<u>Charge (lbs.)</u>	<u>Pressure (t.s.i.)</u>
EX-6735(a)	2700	4.89	15.0
EX-6985(a)	2700	4.88	14.9
EX-6649(b)	2700	4.68	16.2
EX-7006(b)	2700	4.73	16.3

- (a) 0.4 lbs. of SPDN-4438 on bottom of case. Balance of charge consists of EX-6985 on top of SPDN-4438.
- (b) Mk 42 primer plus 150 grams of NPF8-223 in a pyralin container around forward end of the primer.

h. EX-6985, as noted in sub-paragraph (g) above, shows a final pressure of 14.9 t.s.i. (based on new and worn gun firings). This pressure, while 0.1 t.s.i. below the minimum allowable for the 3"/50 caliber gun, matches so closely the ballistics obtained in reference (e) that it is considered a satisfactory replacement for EX-6735.

CONFIDENTIAL

NPG REPORT NO. 1075

Ballistic Test of Cool Propellants EX-6985 and EX-7006

PART D

CONCLUSIONS

9. From the results of the subject tests, it is concluded that:

a. EX-6985 with the XC-D22/250 primer and 0.4 lb. of SPDN-4438 placed at the bottom of the case with the balance of the charge consisting of EX-6985 on top of SPDN-4438 is considered to be a satisfactory replacement for EX-6735.

b. EX-7006 with the Mk 42 primer plus 150 grams of NPFB-223 in a pyralin container placed around the forward end of the primer is a satisfactory replacement for EX-6649.

c. EX-6985 and EX-7006 are ballistically satisfactory for the continuation of the rapid fire erosion studies in the 3"/50 caliber gun except as noted in sub-paragraph (h) of paragraph 8 above.
