EXPLANATION

The organization for weather in headquarters of the Army Air Forces during World War II was unlike the usual staff section in that it included large units performing research, compiling climatic information and intelligence, preparing translations, and making operational forecasts. As a result several thousand technical documents on weather and climate were prepared there in this period. Many of these documents were published and given considerable dissemination but no complete list even of these was ever published. References to them still appear in the literature and there are frequent inquiries about them. Many more documents were not reproduced nor generally disseminated but are available in the files of Air Weather Service. The files are regrettably no longer complete. Of the material on hand or known to exist, a selection is catalogued here. The selection was made to eliminate very trivial items and climatological reports lacking in any original contribution or special historic value.

It is indicated in the lists where certain reports issued during 1942-45 were redesignated later (1946-51) as Air Weather Service Technical Reports or Special Studies. Only the copies of these items that were thereafter issued from Air Weather Service stocks or from the Armed Services Technical Information Agency are marked with the redesignated numbers. Some of these redesignations have now been rescinded.

Lists of Army Air Forces Manuals and War Department TM's, FM's and TB's on meteorology and meteorologically-used equipment are given in an Appendix because these were documents published by the headquarters even though they were mostly prepared by field activities.

No stock of any of these items is available, except for a few of those redesignated as AWS Technical Reports. Items for which an ATI or AD number is cited can be obtained by military activities and their contractors from the Armed Services Technical Information Agency, Arlington Hall Station, Arlington 12, Virginia. Non-military activities can purchase photostat or microfilm copies of the ASTIA items through the Office of Technical Services, Department of Commerce, Washington D.C. The OTS can sell similar copies of many of the other AAF Weather Division Reports which were printed and generally distributed. Many of the reproduced items are on file in the library of the U.S. Weather Bureau, Washington, D.C., as well as in libraries of various university meteorology departments and foreign weather services.

Items on file in Headquarters Air Weather Service are followed by an asterisk.

Weather Division: Numbered Reports: The series of serially numbered reports identified as "Weather Division Reports" included:

- (a) Documents prepared in the Directorate of Weather, the predecessor organization to the Weather Division.
- (b) Documents prepared by the US Weather Bureau and civilian organizations for the Directorate of Weather or the Weather Division under Contract.
- (c) Documents prepared in the Weather Division.
- (d) Documents prepared in the Weather Central Division of Headquarters Army Air Forces Weather Service during July 1945 - June 1946.

The majority of the documents were never published but existed in no more than a few typescript, photograph, or photostat copies, because they were intended to answer only an individual request. Some of those considered of wider interest were published.

The assignment of serial numbers was begun in April 1943 when the Weather Division was created. The first numbers were assigned retroactively to documents already issued by the Directorate of Weather, and therefore these numbers did not appear on the original editions of these issues.

Weather Division (Cont'd)

The following list of the Weather Division Reports eliminates many of the numbers, those of a very trivial nature, or mere quoting of climatic data and descriptions from other readily available publications. It does include all the reports which were published and all which contain original treatments or have special historical interest, as well as all translations and reprints of papers of other agencies. The numbers from 991 on were issued by the Weather Central Division of Hqs AAF Weather Service and are listed in AWS Bibl 18/1.

Items followed by "(M)" are not on file in Headquarters Air Weather Service but are on microfilm in the AWS Climatic Center, Washington D. C.

270. "Wing Icing Conditions Throughout the World," prepared by Statistics Division, U.S. Weather Bureau, under the direction of Weather Information Branch, September 1943, 40 pp. (Lithopr) * (Redesignated AWS SS-8, Rescinded Apr 60)
273. "Amplification of the Concept of Symmetry in Pressure Curves" (Eine Erweiterung des Begriff es der Symmetrie der Luftdruckkurven), by E. Wahl, Meteorologische Zeitschrift, Vol. 56, No. 12, December 1939, pp. 445-452. Translated by Climatology Division, December 1943, 26 pp. (Typescr) figs. (ATI-120332) *
274. "Symmetries and Periods of Temporal Course of the Barometric Mean Temperature on the Lower Half of the Troposphere" (Symmetrien und Perioden im zeitlichen Verlauf der barometrischen Mitteltemperatur der unteren Troposphärenhalfte), by E. Wahl, Meteorologische Zeitschrift, Vol. 57, No. 1, 1940, pp. 1-5. Transl. by Climatology Division, December 1942, 15 pp. (Typescr) (ATI-137165) *
275. "Investigations of the Morphology of Atmospheric Pressure Curves" (Untersuchungen über die Morphologie von Luftdruckkurven), by K. Stumpff, Meteorologische Zeitschrift, Vol. 55, No. 7, July 1938, pp. 237-250. Transl. by Climatology Division, December 1942, 32 pp. (Typescr) figs. (ATI-113151) *
276. "Symmetry Point and Weather Map Symmetry" (Symmetriepunkt und Wetterkartensymmetrie), by F. Model, Veröffentlichungen des Geophysikalischen Instituts der Universität Leipzig, Second Series, Spezialarbeiten aus den Geophysikalischen Institut und Observatorium, Vol. XI, Part 2, 1938. Transl. by Climatology Division, December 1942, 98 pp. (Typescr) figs. (ATI-110394) *
300. "Sky Brightness and Illumination Data for Scandinavia, European Russian and the Arctic," prepared for the Directorate of Weather, in cooperation with the Statistics Division, U.S. Weather Bureau, W.B.S.R. 196, February 1943, 22 pp. (Typescr) plus fig. * (Redesignated AWS TR 105-21, July 1946, Rescinded 1949)
305. "Maps: Weather Regions." (No record)
309. "Weather Charts of the Army Air Forces," prepared by Climatological Division, March 1943, 25 pp. (Lithopr) *
310. "The Strategic Aspects of the Climate of the Iberian Peninsula." Special Series No. 5, Printed by Univ. of Chicago for Weather Information Branch, 1943. (Lithopr)
311. "The State of the Sea Along the Coast of Spanish Morocco." (Typescr) (M)
