A BIBLIOGRAPHY ON AEROSONICS

Alan Powell
T. J. B. Smith

Aerosonics Laboratory
Department of Engineering
University of California
Los Angeles 24, California

FOREWORD

The research described in this report, *A Bibliography on Aerosonics*, by Alan Powell and T. J. B. Smith, was carried out under the technical direction of Alan Powell and is part of the continuing program in Fluid Motion and Sound.

This project is conducted under the sponsorship of the Fluid Dynamics Branch, Mathematical Sciences Division, Office of Naval Research. Submitted in partial fulfillment of Contract Number Nonr-233(62), Authority Number NR 062-299-1-28-60.

A handwritten signature in black ink, appearing to read "J. M. English". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

J. M. English
Director - Research

University of California
Department of Engineering
Los Angeles, California

INTRODUCTION

This bibliography, which has been compiled primarily to meet the requirements of research being undertaken at the Aeronautics Laboratory of the University of California at Los Angeles, consists mainly of references to open literature relating to those sections of acoustics which are particularly associated with fluid motion and thermal action. Any bibliography such as this can only approach completeness in a narrow sense, since its scope must be limited in some way. The criterion of selection used here has primarily been one of relevance to the central subject area; consequently a few items are included which are extremely relevant but display no direct acoustical connotations, and on the other hand many aspects of acoustics which are not closely related to the areas of specialization have been omitted. The references are followed by a simple indexing system in order to provide rapid location of information relating to any of eighteen subdivisions of the main subject and it is hoped that this will greatly add to the convenience of the bibliography, which contains about two thousand entries.

It is inevitable that there will be oversights and omissions of some references. The help of users (and of authors) will be welcomed in repairing defects, since it is intended to produce supplementary issues to this volume, in order to keep its content up-to-date and to correct any errata and omissions. The compilers will be very grateful for any comments which may lead to an improvement in format or ease of use in any later editions.

"The Vibration of Air in a Duct with a Subsonic Mean Flow"
Aero. Quart., 12, 34-40, 1961
- 61125/Wr - Francis M. Wiener
"Sound Propagation Over Ocean Waters in Fog"
J.A.S.A., 33, 1200-1205, 1961
- 61126/Ws - J. E. Ff. Williams
A Note on the Approximation in the Simple Source Theories of Aerodynamic Noise
ARC 22497, 1961
- 61127/Wh - William W. Willmarth
Statistical Properties of the Pressure Field in a Turbulent Boundary Layer
WADC TR 59-676, 109-127, 1961
- 61128/Wi - H. U. Wisniowski
"Radial Grids with Water Injection for Suppressing Noise of Jet Engines"
Can. Aero. J., 7, 25-32, 1961
- 61129/ZR - Joseph Zemanek, Jr. & Isadore Rudnick
"Attenuation and Dispersion of Elastic Waves in a Cylindrical Bar"
J.A.S.A., 33, 1283-1287, 1961

INDEX

The following index chart is intended as a guide to the major sub-divisions into which the references contained in this bibliography fall. Each numbered vertical column corresponds to a particular subject listed below, and the presence of a cypher in any of these columns indicates that the reference, whose number is given in the first column, is mainly of a theoretical (T) or experimental (E) nature, or a review (R). Any reference covering more than one aspect of the subject is indicated by the appropriate combination of these three letters, or is included under several sub-headings, or both.

- | | |
|---|--|
| 1. Aerodynamic sound (General). | 10. Propellers and rotors. |
| 2. Analogies. | 11. Rocket noise. |
| 3. Experimental techniques and methods. | 12. Resonance and oscillation. |
| 4. Structural excitation by flows and sound; fatigue. | 13. Sonic boom and shock waves. |
| 5. Flow past bodies. | 14. Sound propagation, scattering, transmission, attenuation and reflection. |
| 6. Fluid instability, acoustic streaming. | 15. Structural dynamics. |
| 7. Jet flows and wakes; turbulence. | 16. Thermoacoustics. |
| 8. Jet noise suppression devices. | 17. Wave dynamics. |
| 9. Noise (General). | 18. Hydrodynamics |

T – theoretical

E – experimental

R – review

San Diego 52, California
Attn: Mr. C. Miller
Mr. G. Coleman

1 Commanding Officer and Director
U.S. Navy Underwater Sound Lab.
Fort Trumbull, New London,
Connecticut

1 Air Force Office of Scientific Res.
Mechanics Division
Washington 25, D.C.

2 Commander
Naval Ordnance Laboratory
White Oak, Maryland
Attn: Desk DA (Assoc. Tech. Dir. Aeroball.)
HL (Library Div.)

1 Commanding Officer
U.S. Naval Underwater Ord. Sta.
Newport, Rhode Island

1 Commander
Air Force Cambridge Res. Center
230 Albany Street
Cambridge 39, Massachusetts
Attn: Geophysical Research Libr.

1 Commanding Officer
Office of Ordnance Research
Box CM, Duke Station
Durham, North Carolina

1 Office of Technical Services
Department of Commerce
Washington 25, D.C.

5 Director of Research
Nat'l Aero. and Space Admn.
1512 H Street, N.W.
Washington 25, D.C.

1 Director
Langley Research Center
Nat'l Aero. and Space Admn.
Langley Field, Virginia

1 Director
Ames Research Center
Nat'l Aero. and Space Admn.
Moffett Field, California

10 Armed Services Tech. Info. Agency
Document Service Center
Arlington Hall Station
Arlington 12, Virginia

1 Institute of Mathematical Sciences
New York University
25 Waverly Place
New York 3, New York
Attn: Dr. R. H. Kraichnan

2 The Johns Hopkins University
Baltimore 18, Maryland
Attn: Mech. Engr. Dept.
Prof. S. Corrsin
Aerodynamics Dept.
Prof. F. H. Clauser

1 Director
Ordnance Research Laboratory
Pennsylvania State University
University Park, Pennsylvania
Attn: Dr. E. Skudrzyk

2 Harvard University
Cambridge 38, Massachusetts
Attn: Engr. and Appl. Phys. Div.
Prof. H. W. Emmons
Lyman Laboratory
Prof. F. V. Hunt

1 Institute of Aerophysics
University of Toronto
Toronto 5, Canada
Attn: Dr. H. S. Ribner

1 Dept. of Mechanics and Materials
University of Minnesota
Minneapolis 14, Minnesota
Attn: Prof. B. J. Lazan

1 Electric Boat Division
General Dynamics Corporation
Groton, Connecticut
Attn: Mr. R. D. Collier

1 Geiger and Hamme
P.O. Box 512
Ann Arbor, Michigan
Attn: Mr. R. N. Hamme

1 Director
Lewis Research Center
Nat'l Aero. and Space Admn.
Cleveland 11, Ohio
Attn: Mr. Newell Sanders

2 National Bureau of Standards
Washington 25, D.C.
Attn: Fluid Mechanics Sec.
Dr. G. B. Schubauer
Sound Section
Dr. R. K. Cook

Massachusetts Inst. of Tech.
Cambridge 39, Massachusetts
Attn: Physics Dept.
Prof. K. U. Ingard
Prof. P. M. Morse
Math Dept.
Prof. C. C. Lin
Mech. Engr. Dept.
Prof. S. H. Crandall
