This bibliography contains journal references covering the years from about 1928 to October 1956. A few earlier references will be noted from time to time. Main sources of references were: Biological Abstracts, Current List of Medical Literature, Excerpta Medica (Section IV), Quarterly Cumulative Index Medicus and the Index Catalogue of the Surgeon-General's Office.

References listed in this bibliography have been located through the bibliographic tools available in this library, and we do not claim this to be a complete bibliography on the subject.

When abstracts were located they have been cited. It is hoped that there are no serious errors either in classification or by way of omissions.

References marked with an asterisk (*) are those which are available for loan in the Fort Detrick Technical Library. This bibliography is being kept up-to-date by a file of current references which is available in the library.
