LESSONS LEARNED: COMMANDER'S OBSERVATIONS,
EVALUATIONS, AND RECOMMENDATIONS

1. (U) Personnel and Administration. NONE

SUBJECT: Operational Report for Quarterly Period Ending 30 April 1968,
Report Control Symbol CSFOR-65 (U)

2. (U) Operations. NONE
3. (U) Training and Organization. NONE
4. (U) Intelligence:

ITEM: Utilization of 1:100,000 Maps

(1) OBSERVATION: The battalion aerial observers are now using 1:100,000 maps of the III CTZ area.

(2) EVALUATION: The standard 1:50,000 map proved too large to effectively be utilized in the back seat of an O1 aircraft. The battalion aerial observers were supplied with a 1:100,000 map on a trial basis. Their reports indicated that they found it easier to locate themselves when covering large areas for visual reconnaissance. The use of these maps presented no problem in plotting targets for artillery adjustment.

(3) RECOMMENDATION: That units be encouraged to include 1:100,000 maps in their basic loads for use by aerial observers.

5. (U) Logistics:

ITEM: Requisitioning Through Supply Channels

(1) OBSERVATION: In the counterinsurgency environment of Vietnam an aggressive logistics program is a necessity.

(2) EVALUATION: It has been noted that it is not sufficient to simply submit requisitions and follow-ups and then wait for the supplies to come in, because the wait will be often longer than is desirable or necessary. With the vast quantities of supplies that are being shipped into Vietnam daily, supply depots have a continuous problem maintaining accurate stock records. The direct support supply activities also frequently lose track of items. Common discrepancies include the stock record card showing a zero balance on hand of an item that is, in fact, on hand (sometimes in large quantities) in the yard or warehouse, the stock card indicating that an item is on hand but it cannot be located, and, on many occasions, timely and accurate status not being received as a result of requisitions and follow-ups.

(3) RECOMMENDATION: (a) When discrepancies are found in depot or DSU supply activities it may be necessary to show the stock control and warehouse personnel that they do, in fact, have a particular item and to locate the item for them.

(b) When accurate status is not received on a critically needed item, it is best to hand-carry the requisition through depot supply to ascertain whether or not the item is available. It may sometimes be necessary to locate a required item in other than the normal supply support channels and assist in transferring the item to the normal channels.

30 April 1968

SUBJECT: Operational Report for Quarterly Period Ending 30 April 1968,
Report Control Symbol: CSFOR-65 (U)

(c) Another action channel is available through the submission of the Periodic Logistics report. This report keeps the higher commander informed of those critically needed items that are still due-in, and it affords them the opportunity to assist. However, this will not suffice without aggressive action on the part of battery and battalion supply personnel.

(d) The chief recommendation is not to sit back and wait for supplies to come in. All possible sources must be sought out aggressively, and, at times, the support agencies must be assisted in locating the required supplies.

6. Other:

Communications

ITEM: Antenna RC-292

(1) OBSERVATION: The use of antenna RC-292 for field operations in Vietnam.

(2) EVALUATION: In the past, battalion headquarters has found it necessary to operate simultaneously from both a field position and base camp. It was found that there were not sufficient antennas RC-292 available to insure adequate radio communications at both positions. Three additional antennas RC-292 are needed to insure adequate radio communications at all times.

(3) RECOMMENDATION: Additional antennas RC-292 should be authorized to insure adequate radio communications.

1. (U) The Quarterly Operational Report, Lessons Learned, from the 7th Battalion, 9th Artillery, is considered adequate.
2. (C) Reference Section II, para 4(3), Maps for Aerial Observers, the 54th Artillery Group concurs. Arrangements have been made by S2, 54th Artillery Group to draw and issue these maps to battalions.
3. (C) Reference Section II, para 5, Depot or DSU Supply Activity. The 54th Artillery Group concurs with the exceptions as noted. This headquarters has established a program to insure aggressive follow up on requisitions.
 - a. Allowing unit personnel access to warehouse and stock control facilities is impractical and would further disrupt the operational capability of the DSU's.
 - b. Current supply procedures allow for hand carry of requisitions for critical supply items. The 7th Bn, 9th Artillery supply personnel have been apprised of this procedure.
4. (C) Reference Section II, para 6(3), Communications. The 54th Artillery Group concurs. Units will be instructed to submit MTOE's for additional RC 292's as necessary.
