IN REPLY REFER TO

4) (18 Oct 68) FOR OT RD 683208

28 October 1968

SUBJECT: Operational Report - Lessons Learned, Headquarters, 307th  
Combat Aviation Battalion, Period Ending 31 July 1968 (U)

SEE DIS. SECTION  
This document contains information affecting the National  
Defense of the United States within the meaning of the  
Espionage Laws, Title, 18, U. S. C., Section 795 and 794.  
Its transmission or the revelation of its contents in any  
manner to an unauthorized person is prohibited by law.

1. Subject report is forwarded for review and evaluation in accordance  
with paragraph 5b, AR 525-15. Evaluations and corrective actions should  
be reported to ACSFOR OT RD, Operational Reports Branch, within 90 days  
of receipt of covering letter.

2. Information contained in this report is provided to insure that the  
Army realizes current benefits from lessons learned during recent opera-  
tions.

3. To insure that the information provided through the Lessons Learned  
Program is readily available on a continuous basis, a cumulative Lessons  
Learned Index containing alphabetical listings of items appearing in the  
reports is compiled and distributed periodically. Recipients of the  
attached report are encouraged to recommend items from it for inclusion  
in the Index by completing and returning the self-addressed form provided  
at the end of this report.

BY ORDER OF THE SECRETARY OF THE ARMY:

*Kenneth G. Wickham*

KENNETH G. WICKHAM  
Major General, USA

HEADQUARTERS, 307TH COMBAT AVIATION (PHANTOM) BATTALION  
APO San Francisco 96296

3  
AVBN-P

15 August 1968

SUBJECT: Operational Report of the 307th Combat Aviation (Phantom)  
Battalion for Period Ending 31 July 1968, RCS CSFCR-65 (RI)

## 1. SECTION I OPERATIONS: SIGNIFICANT ACTIVITIES

a. (U) Mission: There has been no change in the battalion's missions or area of operation.

b. (U) Organization: There were no changes in the primary subordinate units assigned to the battalion. There was an addition of three Quartermaster Detachments and the reassignment of a Signal (Avionics) Detachment from Battalion resources. This resulted in changes in the following subordinate unit organizations.

(1) (U) The Headquarters and Headquarters Company, 307th Combat Aviation Battalion with the 5th, 52nd, 53rd and 62nd Quartermaster Detachments attached, stationed at Soc Trang, RVN (APO San Francisco 96296)

(2) (U) The 221st Reconnaissance Airplane Company (O-1) stationed at Soc Trang, RVN (APO San Francisco 96296)

(See Complete Organization and Stationing Chart, Incl 1)

### c. Command Group Personnel:

(1) (U) The battalion had several key personnel changes in the command group and among the subordinate units. The composition of the battalion staff has stabilized. The influx of personnel throughout the battalion has generally reduced the personnel turbulence which was caused by having to shift personnel to man key positions. There are no significant peak rotational humps foreseen in officer and warrant officer categories; however, there are peaks in enlisted strength which will be resolved in the coming quarter with an infusion program.

(2) (C) Composition of the Battalion Command Group:

2. Operational Support and Events:

(1) (U) The reporting period has been one of relative quiet in the Delta. Enemy initiated incidents fell during the month of May and June to pre-Tet levels. The month of July saw a slight increase over May and June, but still the trend was downward. The battalion posture was offensive in nature during this period. Maximum use of the reconnaissance and surveillance capabilities were made with the battalion assets in an attempt to find and fix the enemy.

(2) (U) On 13 July 1968, the command of the battalion passed from LTC Charles F. Hutchins to LTC Charles N. Allgood. The ceremony took place at Soc Trang Army Airfield, RVN, and was attended by Col Eugene B. Conrad, the Deputy Commander, 1st Aviation Brigade and Col Worthington M. Mahone, Commanding Officer of the 164th Cbt Avn Gp.

(3) (C) The major consolidated battalion offensive effort continued under the title of "Delta Falcon." This was a continuation of the day and night interdiction mission of the enemy infiltration and commo-liaison routes from Cambodia initiated at the beginning of March 1968. The assignment of 7/1 Air Cavalry Squadron (-) at Vinh Long in June 1968 enabled the battalion to be released from this mission of a true air cavalry type mission. The phase-in of the squadron was accomplished by placing a troop under the supervision of the 307th CAB for approximately a month until the Squadron was operational. The 307th CAB still supports this concept during the hours of darkness by teaming two Mohawks from the battalion with a heavy fire team of Cobras (3 AH-1G's) from the air cav squadron on a mission basis.

(4) (C) With the release of the assets of the battalion from the Delta Falcon mission, the battalion shifted emphasis from the Cambodian

border area to the Ca Mau peninsula. During the early part of June, Operation Phantom III was initiated. This concept was essentially the same as Delta Falcon; however, no assets were immediately available for follow-up ground action. The primary mission was to interdict and harass the supply routes and commo-liaison routes originating in lower An Xuyen Sector and proceeding northward. The operation is conducted in random selected areas and unscheduled dates.

(5) (U) The O-1 units have continued to provide the eyes down at user level in the IV Corps. The assignment of the O-1's (Incl 3) at province and ARVN Division headquarters has materially aided the American advisors in their attempt to evaluate and procure intelligence of immediate value. Though the fragmentation of the O-1 company has created a command and control problem not common to an aviation company, it is felt the results and rapport obtained in support of the ground forces is worth the extra effort expended to overcome the problem.

(6) (C) The battalion Mohawk company contributes heavily to the IV Corps intelligence effort in a highly professional fashion. The OV-1 coverage of the Delta averages 75% coverage nightly. Targets detected are immediately called in to the province TOC's over which the aircraft are flying. All of the information is forwarded to the IV Corps G-2 Air during missions through the data processing station located at Can Tho. The evaluation of imagery and photos is also processed at Can Tho following missions and forwarded immediately to the G-2 Air.

(7) (C) The following statistics show the effort expended in support of the Corps surveillance plan:

SORTIES FLOWN FROM 1 MAY TO 31 JULY 1968

<u>Type</u> <u>Acft</u>	<u>VR</u>	<u>Photo</u>	<u>IR</u>	<u>SLAR</u>
O-1	9315	57		
OV-1	<u>176</u>	<u>148</u>	<u>907</u>	<u>492</u>
	9491	205	907	492

(8) (C) The 235th Armed Helicopter Company, still the Army's only separate, non-divisional type, completely armed helicopter company, is acquitting itself in a most admirable manner. The availability rate of the AH-1G is fast increasing as a result of the build up of a proper ASI/III. The AH-1G continues to be able to perform all missions

8

SUBJECT: Operational Report of the 307th Combat Aviation (Phantom) Battalion for Period Ending 31 July 1968, RCS CSFOR-65 (RI)

previously performed by UH1-B/C gunships; however, the ability to move in and conduct primary reconnaissance missions in a manner typified by the older gunships has resulted in a disproportionate share of combat damage. Shifting the emphasis to the attack role of the AH-1G and capitalizing on its stand off attack capability appears to hold good promise for even more satisfactory results. There still appears to be a need for a gunship which can remain down low supporting the ground forces, yet not becoming as vulnerable or susceptible to major combat damage.

(9) (U) The battalion has accomplished all assigned combat and direct combat support missions assigned during the reporting period. There is no doubt the battalion has contributed to the stabilization effort of IV Corps and can continue to operate in an effective and satisfactory fashion. Statistics generated in support of its mission are in Incl 2.

2. SECTION II LESSONS LEARNED: COMMANDERS OBSERVATIONS, EVALUATIONS AND RECOMMENDATIONS.

a. Personnel: None.

b. Operations:

(1) (C) Transponder Equipment for O-1 Aircraft.

(a) OBSERVATION. The O-1 aircraft do not always paint a positive target for area radar control agencies.

(b) EVALUATION. The O-1 aircraft operate on the majority of missions day and night as single aircraft. The missions for the most part cover isolated areas far removed from friendly positions. The Army flight following agencies offer radio flight following only; however, the Air Force area radar can offer positive control when it becomes necessary to fly through IFR conditions or when flying over extremely isolated and remote areas. On many occasions the area radar service has to be terminated when being vectored around weather or when the skin paint of the O-1 target becomes lost due to its relative small size. There exists a definite need to have transponders installed on the O-1 aircraft for flight following purposes and as an added advantage the identification of friendly aircraft under combat conditions.

(c) RECOMMENDATION. That a retrofit program be initiated to install the latest, lightweight version of a transponder in the O-1 aircraft.

9  
AVBN-P

15 August 1968

SUBJECT: Operational Report of the 307th Combat Aviation (Phantom)  
Battalion for Period Ending 31 July 1968, RC3 CSFOR-65 (RT)

(2) (C) Aviation Assets Used to Maintain Contact During Hours of Darkness.

(a) OBSERVATION. The OV-1 sensing equipment can detect the withdrawal of enemy forces from the battle area after contact has been broken during the hours of darkness.

(b) EVALUATION. Utilizing the OV-1 and teaming with AH-1G's, contact with the enemy during retrograde movements can be maintained. It has been noted that ground forces making contact with the Viet Cong have habitually been extracted during the hours just prior to darkness. After sunset the Viet Cong apparently board sampans and depart the immediate area. By using the "Snake Hunt" concept, contact can be maintained; destruction of the enemy and a slow-down of his movement will result.

(c) RECOMMENDATION: That this concept be tested and given full dissemination as soon as practicable.

(3) (C) Use of the Proximity Fuze (XM-429) Against Selected Targets.

(a) OBSERVATION. Warheads fuzed with the (XM-429) proximity fuze are more lethal against sampans moving on water than the (M-423) point detonating fuzed warheads.

(b) EVALUATION. The attack helicopters of this battalion have flown numerous sorties on interdiction missions against water borne transportation. The use of the (M-423) point detonating fuzed rockets is effective primarily as an area fire weapon, and their use against single sampans has resulted in a waste of ammunition. The introduction of the (XM-429) proximity fuze has greatly increased the effect of the rockets and the shrapnel effect compared to the older fuze, which explodes only when it hits the water or sampan.

(c) RECOMMENDATION: That the proximity fuze be used against individual type targets such as sampans which require a strike to neutralize. That mission commanders specify the type ammunition mix required to support their particular mission during pre-mission briefings.

c. Training: None.

d. Intelligence: None.

e. (C) Logistics: Malfunction of the KS-61 System With MK122A-1 Flash Cartridges.

CONFIDENTIAL

AVBN-P

15 August 1968

SUBJECT: Operational Report of the 307th Combat Aviation (Phantom)  
Battalion for Period Ending 31 July 1968, RCS CSFOR-65 (RI)

(1) OBSERVATION. Difficulty has been experienced in night photography using the KS-61 camera system and the MK122A-1 photo flash cartridges.

(2) EVALUATION. This unit has had difficulty procuring usable imagery from night photography. Frames were either overlapped with others or large blank spaces occurred between frames. Checks of the film drive system produced negligible results. The unit received a rebuilt OV-1A, and checks were made of this system using a stobe light at night. This system worked correctly, and good imagery was obtained. It was determined that on aircraft that had been in RVN over six months, the photo flash detection system was deteriorated and would not detect the flash correctly. An EIR has been submitted.

(3) RECOMMENDATION. That a cover be fabricated and placed over the cell detector to prevent deterioration during the day and when the system is not in use. That a system check be adopted using a strobe light at night halfway between the call and tail of the aircraft to see if the detection system will activate itself.

f. (C) Organization: Lack of Organizational Signal Avionics Personnel.

(1) OBSERVATION. O-1 companies deployed in Vietnam are void of organizational signal avionics personnel (MOS 35K).

(2) EVALUATION. O-1 companies presently deployed in Vietnam are constituted by combining portions of several TOE's under a General Order. In some instances this order includes a signal avionics detachment (TOE 11 500D), in others none is authorized. The companies are not authorized organizational signal avionics personnel (MOS 35L). This is also true of the avionics detachment which is manned to perform "bench" repair of components (MOS 35L). Actually the detachment does perform organizational maintenance since they are normally the only signal personnel available. This situation does not exist in the Assault Helicopter Company (TOE 1-77G) where two organizational signal avionics personnel (MOS 35K) are included in the company headquarters. This situation becomes critical in units without avionics detachments or when assigned avionics detachments are detached.

(3) RECOMMENDATION. That MTOE's presently under study for Reconnaissance Airplane Companies include a minimum of two organizational avionics repairmen (MOS 35K) in their organizations.

g. (U) Other (Safety): Securing Smoke Grenades in the Cockpit.

8

CONFIDENTIAL

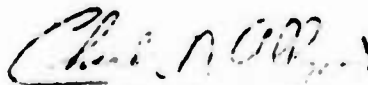

11  
AVBN-P

15 August 1968

SUBJECT: Operational Report of the 307th Combat Aviation (Phantom)  
Battalion for Period Ending 31 July 1968, RCS CSFOR-65 (RI)

(1) OBSERVATION. As a result of a fatal accident caused by a smoke grenade dropped in the aircraft cockpit, it was found that in many aircraft these grenades were secured merely by suspending them by their safety clip to the guard or bar protecting the instrument switches. Should the cotter pin become disengaged from the grenade, the safety clip would release and the grenade would ignite.

(2) EVALUATION. It was found that smoke grenades would fit securely into octagonal shaped rocket fin covers. Cutting these down to a size of 6" and installing them in the aircraft provided a secure and safe means of carrying smoke grenades and eliminated any danger should the cotter key become dislodged. The grenade safety clip will remain securely held in place in the container even if the cotter key is accidentally removed.

SEE DISTRIBUTION

1. The attached 307th CAB ORLL for the period ending 31 July 1968 has been evaluated by this headquarters as required by USARV Reg 525-15.

2. Section II, Lessons Learned: Commanders Observations Evaluations and Recommendations.

a. Transponder Equipment for O-1 Aircraft. Non-concur with recommendation to install transponders in O-1 aircraft.

b. Although a transponder would be a most desirable accessory in the O-1 aircraft, it is not an essential piece of equipment. The space weight and power provisions are not available in the O-1 and a transponder modification kit would further complicate an already marginal gross weight condition. The principle behind the transponder is sound, however impractical for a visual reconnaissance aircraft which normally operates habitually over a small region with continuous flight following with a local ground unit or Army flight following facility. Since the aircraft was neither originally designed or equipped for IFR flight, any attempt to upgrade the system would only lead to additional weight and performance penalties. Adequate radio flight following facilities are available on a continuous basis and search radars are available to assist in emergencies.

3. With the exception listed in paragraph 2 above, concur with the commander's observations, evaluations and recommendations.

Army, Washington, D.C. 20310

1. (U) This headquarters has reviewed this report, considers it to be  
adequate, and concurs with the contents as indorsed except as follows:

Paragraph 1g(8), page 5. The 307th Combat Aviation Battalion is in  
error by stating that the 235th Armed Helicopter Company is still the  
Army's only separate armed helicopter company. There are in fact two  
additional armed helicopter companies now assigned to the 1st Aviation  
Brigade.

2. (U) The following additional comment is considered pertinent:

Paragraph 2f(3), page 8. The standardized MTOE (1-257P) for all PAC  
units submitted in late 1967 by this headquarters did not include MOS 35X.  
This HQ is evaluating the problem to determine if avionics repairmen are  
required in all O-1 units assigned. If a requirement exists for MOS 35X  
in all O-1 Companies, a change to the standardized MTOE will be initiated.

The following items are recommended for inclusion in the Lessons Learned Index:

ITEM 1

\* SUBJECT TITLE \_\_\_\_\_

\*\* FOR OT RD # \_\_\_\_\_

\*\*\*PAGE # \_\_\_\_\_

ITEM 2

SUBJECT TITLE \_\_\_\_\_

FOR OT RD # \_\_\_\_\_

PAGE # \_\_\_\_\_

ITEM 3

SUBJECT TITLE \_\_\_\_\_

FOR OT RD # \_\_\_\_\_

PAGE # \_\_\_\_\_

ITEM 4

SUBJECT TITLE \_\_\_\_\_

FOR OT RD # \_\_\_\_\_

PAGE # \_\_\_\_\_

ITEM 5

SUBJECT TITLE \_\_\_\_\_

FOR OT RD # \_\_\_\_\_

PAGE # \_\_\_\_\_

\* Subject Title: A short (one sentence or phrase) description of the item of interest.

\*\* FOR OT RD # : Appears in the Reply Reference line of the Letter of Transmittal. This number must be accurately stated.

\*\*\*Page # : That page on which the item of interest is located.
