SPECIAL LIMITATIONS ON ASTIA DISTRIBUTION

ASTIA may distribute this report to requesting agencies subject to their security agreement, approved fields of interest, and the following:

☒ UNLIMITED—To all agencies of the Department of Defense and their contractors.

☐ LIMITED—To U. S. Military organizations only.

This report may be distributed to nonmilitary agencies not approved above subject to Boeing approval of each request.

NOTE: the LIMITED category may be checked only because of actual or potential patent, proprietary, ethical, or similar implications.

CCP 758, Minuteman Engineering/Contract Change Proposal titled, "Interface and Space Control Program"

INTRODUCTION

PURPOSE

The purpose of the Compatibility Index is as follows:

1. Provide lists of compatible configurations of H & D Weapon System end items. As such it will support end item allocation by the Minuteman Production Board.
2. Provide a working tool between AFBSD Exhibit 60-60, Minuteman Weapon System Operational Configuration Index, and AFBM 60-59, WS-133A Master Equipment Schedules and Allocation Document.
3. Provide a ready index of interchangeable end items of equipment.

SCOPE

End items of equipment are identified herein by a control number (Figure 'A' or MRCN), item name, part number and used in facility or missile. The particular area location at VAFB or within an operational wing at which the end item of equipment is used is further defined by Prime Level Code (PLC).

SUMMARY

D2-14191 is divided into six sections as outlined in Section I, page 2. The following paragraphs describe the data presented in each section.

SECTION I

The general information presented in Section I is self-explanatory.

SECTION II

Table I, Figure A Number/MRCN Grouping Index, is a numerical list of basic configuration control number groups showing the Associate Contractor responsible for each group and the type of equipment identified by each group.

Table 2, Figure A Number/MRCN Item Name, is a tabulation of end item names for all Figure A numbers or MRCNs listed in this document. End item names are obtained from D2-13253, Minuteman Operational Weapon System, Official Nomenclature Approval Status.

End items which have data tabulated herein have their specific used in facility indicated in Table 2 as follows:

LF	(Launch Facility)
LCF	(Launch Control Facility)
IC	(Intersite Cable)
SMSB	(Strategic Missile Support Base)
Missile	

End items which do not have data tabulated herein are indicated in Table 2 by . These particular end items are either standard items not exclusive to the Minuteman program or Minuteman items which have compatibility features considered to be minor.

SECTION III

The Missile Line Unit/Serial Number Chart is a tabulation of Plant 77 production line missile numbers versus Air Force missile serial numbers. This listing is presented herein for information purposes only.

SECTION IV

The Facility Configuration Number Assignment Chart lists the configuration numbers used in Section V to identify LF, LCF and SMSB facility configurations. The facilities to which the configuration numbers are assigned are identified herein by wing, base, facility number and PLC.

The Missile Configuration Number Assignment Chart lists the configuration numbers used in Section V to identify missile configurations. The missiles or groups of missiles to which the configuration numbers are assigned are identified herein.

SECTION IV (Continued)

The Compatible Facility/Missile Configuration Chart lists those facilities and missiles that are compatible with one another. Each facility is identified by configuration number and PLC, whereas, the missiles are identified by configuration number only.

SECTION V

Data compiled herein is recorded in five separate sections by used in facility or missile. End items of equipment are identified by control number (Figure A or MRCN), part number and usage location. Usage location is defined by Prime Level Code (PLC). Configuration numbers are listed to associate end item part numbers with various missile or facility configurations. End items which operate together in a common facility or missile are referred to as compatible end items per that facility or missile and are identified by the same configuration number.

Occasionally several part numbers combine to equal a whole end item. Such a combination is indicated by the symbol (+) added as a suffix to the part number entries. Optional and/or interchangeable end item part status is indicated by the entry of an additional part number (s) without a Prime Level Code change.

SECTION VI

This section lists those end items with a usage location outside the scope of the facility configuration numbers presently assigned in Section IV. Included in the list are end items which may have a different part number at each installation or end items which may not appear at every site. End items are identified by control number, part number and usage location, however, configuration numbers are not listed as in Section V.

DEFINITIONS/ABBREVIATIONS

BASELINE PART NUMBER

Basic part number plus whatever dash number has been assigned to identify the end item configuration for the first delivered production article.

FIGURE A NUMBER

A control number assigned to identify an end item of equipment.

MRCN

Minuteman Requirement Control Number - A number assigned to identify those end items of equipment which do not have a Figure A number, such as airborne equipment.

FIGURE A/MRCN POINT NUMBERS

The Malmstrom (Wing I) Weapon System Figure A's/MRCN's are considered to be the basic configuration. Malmstrom Figure A's which require redesign for the Vandenberg application are identified by the original Malmstrom Figure A number with the digit .1 added to reflect a unique Figure A for Vandenberg. Similarly, if a Malmstrom Figure A requires redesign for Wings II, III, IV or V, the digits .2, .3, .4 or .5 respectively are added to the basic Malmstrom numbers to reflect the unique Wing requirement. New Boeing Figure A's developed for Wings II, III, IV or V also reflect the addition of the .2, .3, .4 or .5 digits.

Example:

Figure A Number	Area Location
xxxx	Malmstrom AFB (Wing I)
xxxx.1	Vandenberg AFB (VAFB)
xxxx.2	Ellsworth AFB (Wing II)
xxxx.3	Minot AFB (Wing III)
xxxx.4	Whiteman AFB (Wing IV)
xxxx.5	Warren AFB (Wing V)

SMSB

Strategic Missile Support Base

PLC

Prime Level Code - An alpha-numeric coding system used to define the effectivity of an end item of equipment to its particular location within an operational Wing or at Vandenberg. The PLC breaks the location of equipment down to Wing, Flight and Sub-Flight. The code normally consists of five (5) digits separated by dashes as follows:

01 - G - Q2*
| | |
| | | Sub-Flight Code***
| | |
| | | Flight Codes**
| | |
| | | Wing Code

* If this breakdown were -01, it would indicate the Launch Control Facility within the (G) Flight since the Launch Facilities are numbered numerically -02 through -11.

** The 15 flights of each of the first four wings are represented alphabetically by A through O. The 20 flights of Wing V are represented by A through T. Z is reserved for the Strategic Missile Support Base Areas.

*** The last two digits of the Strategic Missile Support Base codes will be alpha-numeric from -A0 through -Z9 as distinguished from the numeric -01 through -11 used for Launch Facility and Launch Control Facility.

The general facility arrangement at Vandenberg is not consistent with the facility arrangements at operational bases. In order to resolve this inconsistency exceptions to the five (5) digit code assignment illustrated above are necessary to identify the Launch Facilities and Launch Control Facilities at VAFB.

The Launch Facilities at VAFB are designated as follows:

00-02
00-03
00-04
00-05
00-06
00-07
00-08
| |
| | Sub-Flight Code*
| |
| | Wing Code

The Launch Control Facilities are designated as follows:

00-01A	HLCF #1
00-01B	SLCF #2
00-01C	SLCF #1
00-01D	Trainer LCF
00-01E	HLCF #2

Since there are no flights indicated at VAFB,
the specific LCF's will replace the Flight Code*

Wing Code

* Launch Facility and Launch Control Facility code designations will be assigned in consecutive sequence as additional Facilities are authorized.

Prime Level Code assignments for Operational Wing and VAFB are as follows:

Vandenberg AFB	00-x-xx	(VAFB)
Malmstrom AFB	01-x-xx	(Wing I)
Ellsworth AFB	02-x-xx	(Wing II)
Minot AFB	03-x-xx	(Wing III)
Whiteman AFB	04-x-xx	(Wing IV)
Warren AFB	05-x-xx	(Wing V)

Specific Strategic Missile Support Base Prime Level Code assignments are as follows:

A. SMSB	xx-Z-00
B. Munitions Facility	xx-Z-A0 thru xx-Z-A9
1. Contractor Support Area (CSA)	xx-Z-A9
C. Electronic Maint. Facility Assy.	xx-Z-B0
1. Electronic Maint. Shop	xx-Z-B1
2. Encoder/Decoder Shop	xx-Z-B2
3. Electronic Mat'l Control	xx-Z-B3
4. Test Equip. Repair Shop	xx-Z-B4
5. Unassigned	xx-Z-B5 thru xx-Z-B9

D. Elec/Mech Facility Assy.	xx-Z-C0
1. Electrical Shop	xx-Z-C1
2. Mechanical Shop	xx-Z-C2
3. Refrigerator Shop	xx-Z-C3
4. Elec/Mech Mat'l Control	xx-Z-C4
5. Communication Maint. Shop	xx-Z-C5
6. Unassigned	xx-Z-C6 thru xx-Z-C9
E. Maint. Control Facility	xx-Z-D0
1. Unassigned	xx-Z-D1 thru xx-Z-D9
F. AFW Supply/Warehouse Facility Bldg. Equip. Assy.	xx-Z-E0
1. Unassigned	xx-Z-E1 thru xx-Z-E9
G. Missile Transfer Bldg. Equip. Assy.	xx-Z-F0
1. Unassigned	xx-Z-F1 thru xx-Z-F9
H. Transient Missile Holding Facility	xx-Z-G0
1. Unassigned	xx-Z-G1 thru xx-Z-G9
I. Railhead Facility Equip. Assy.	xx-Z-H0
1. Unassigned	xx-Z-H1 thru xx-Z-H9
J. Support Vehicle Parking Area Assy.	xx-Z-J0
1. Unassigned	xx-Z-J1 thru xx-Z-J9
K. Support Vehicle Maint. Facility Assy.	xx-Z-K0
1. Unassigned	xx-Z-K1 thru xx-Z-K9
L. Destruct Pkg. Instl. Facility Assy. (VAFB only)	xx-Z-L0 thru xx-Z-L3
1. Unassigned	xx-Z-L4 thru xx-Z-L9

M. Missile Storage Facility Assy. (VAFB only)	xx-Z-M0 thru xx-Z-M4
1. Unassigned	xx-Z-M5 thru xx-Z-M9
N. Proof Load Test Facility Equip. Assy.	xx-Z-N0
1. Unassigned	xx-Z-N1 thru xx-Z-N9
O. Unassigned Facilities	xx-Z-P0 thru xx-Z-Z0
1. Unassigned Sub-Facilities	xx-Z-P1 thru xx-Z-Z9
