CONSOLIDATED TRANSLATION SURVEY

PREFACE

This survey is prepared monthly by the Foreign Documents Division, Office of Central Reference, CIA, from lists received through the cooperation of US government agencies and includes translations prepared by such agencies, private industry, universities, research institutions, and commercial translation organizations. It is a compilation of foreign documentary projects completed or started during the preceding month.

Translations are listed by area and subject category. Scientific projects are grouped as a section regardless of geographic area. Title in English, author, foreign language title of source of material, date of publication, and publication identification of the completed project are given when available. Tables of contents of journals translated cover-to-cover are reproduced from the current publications.

Projects in process, i.e., not completed as of the date of this survey, are noted with an asterisk (*), and, when available, a project-control or "in-process" number is noted in parentheses following the title. Certain details may be unavailable on such projects. New projects in process are not listed again until they are completed.

An index to authors of items in this issue is provided at the end of the survey.

REQUESTS FOR COPIES

Requests for copies of published projects should be made direct to the designated producing organization.

All requests for items prefixed by "CIA" should be addressed to Office of Central Reference, 2430 E Street, NW, Washington, D. C. 20505

RUSSIAN METALLURGY

English translation
of

МЕТАЛЛЫ

The journal covers ferrous and non-ferrous metallurgy, including ore beneficiation, extraction and refining, mechanical properties at ordinary and elevated temperatures, alloy compositions and structures, effects of impurities and methods of purification, methods of testing both for routine examination and for research investigations, etc. Increasing attention is being paid to metals and alloys with new properties, such as, very high strength, resistance to high temperatures, radiation and corrosion, superconductor and semiconductor materials.

CYBERNETICS

(No 6, 1965)

- USSR -

Following is a complete translation of the Russian-language periodical Kibernetika (Cybernetics), Kiev, No 6, November-December 1965, "Naukova Dumka", pages 1-103, plus inside front and rear covers. Names of authors and original page numbers accompany each article.

CONTENTS

	<u>Page</u>
Sidel'nikov, V.M. Statistical Properties of Transformations Accomplished by Finite Automata	1
A statistical course is connected to the input of a generalized automaton. The ratio between entropies at the input and output of the automaton is considered. In the second part of this work a formula interrelating the lengths of the output words of a one-to-one strongly connected automaton is derived.	
Spivak, M.A. Representation of Automaton Mapping by Regular Expressions Automaton mappings are considered as events in the alphabet of pairs of input and output signals. It is shown that an automaton mapping is a finite-automaton mapping when, and only when it is a regular event. Hence follows a new method of specifying finite-automaton mapping by means of regular expressions. Algorithms for automaton analysis and synthesis are described.	27
Borodinskiy, Yu. M. Experiments With Moore's Finite-State Automata	32
The article examines the Moore problem of the shortest experiment establishing the distinguishability of an arbitrary representative of the class of all strongly

connected Moore (n, m, p)-automata with pairwise distinguishable states from all the other representatives of this class.

- Nikitin, A.S.
Algorithm for an Economical Utilization of Memory 52
The author describes an algorithm for economical utilization of memory which can be used to both optimize the number of working registers in electronic digital computers the functioning of whose operating device is described in the operator-scheme language and the memory volume within a certain class of computer programs.
- Pukhov, G. Ye., Borkovskiy, B.A.
Dynamic Electronic Simulation of Mathematical Operations . . 59
As a continuation of the authors' previous investigations, the simulation of mathematical operations by means of a switchable amplifier and memory capacitors is examined.
- Borovskiy, B.A.
Method for Dynamic Simulation of Differential Equations . . 68
The article describes a method of constructing a variable-structure electronic circuit with one operating amplifier for the integration of differential equations.
- Mishutin, V.G.
On a Sufficient Sign of Convergence of the Balancing Process for Quasianalog Models 74
The article introduces a general definition of the positive definiteness of an operator in Hilbertian space. On the basis of this definition the author isolates a class of matrices for which the process of balancing in quasianalog models is a convergent process.
- Borkovskaya, V.N.
Simulation of a Simplex Method of Solution of a General Problem of Linear Programming by Means of Reversible Linear Converters 81
The author describes a method for simulating the general problem of linear programming that does not require the use of diodes and can be realized in a reversible linear converter whether AC or DC.
- Lozinskiy, L.S., Pogrebinskiy, S.B., Yarovitskiy, N.V.
Associative Search in Processing Non-Ordered Information . . 91
The article deals with the problem of the processing of disordered flows of information. An algorithm for processing a disordered flow of phrases in accordance with their attributes is presented and a complex of associative

and periodic memory devices realizing this algorithm in real time scale is described.

Brodi, S.M.

Investigation of a Queueing System by Means of SemiMarkov Processes 106

The article isolates the recurrence relations for the Laplace transformation of the residence time of a class of SemiMarkovian processes in a fixed set of states. These recurrence relations make it possible to derive certain steady-state characteristics of various queue systems.

Knopov, P.S.

On the Estimation of the Spectrum of a Homogeneous and Isotropic Gaussian Field 116

The article examines the problem of constructing the estimates of the spectral density and spectral function of a homogeneous and isotropic random field. It is shown that these estimates will be asymptotically unbiased and valid.

Dem'yanov, V.F.

On the Minimization of Functions on Convex Bounded Sets . . . 131

The work examines a series of algorithms for the solution of the problem of the minimization of functions in the presence of convex constraints. These algorithms may be effectively applied when the operation of projecting a point onto a domain can be accomplished without special difficulty.

Leonov, V.V.

On the Numerical Solution of a Class of Optimum-Value Problems by L.S. Pontryagin's Method 156

The article examines a computational scheme based on the method of L.S. Pontryagin for a class of optimum problems. It proves the existence theorems and uniqueness of a system integrodifferential equations whose solution is equivalent to the solution of the optimum problem. This system has singularity.

Liptser, R.S.

On the Control of a Wiener Process According to Incomplete Data 170

The work examines a problem of controlling the drift of the diffusion process observed against a background of "white" noise.

Rvachyov, V.L., Stoyan, Yu. G.

On the Problem of Non-Intersection of Geometric Figures of Special Form 178

(Continued)

Available From JPRS 35904

KIBERNETIKA
No 6, 1965

The author proposes a method of composing inequalities representing the conditions for the intersection of geometric figures whose contour follows arcs of circles and segments of straight lines. The apparatus of R-functions is utilized in writing the conditions for the intersection of elements of the figure contours.

Firsov, V.V.

On the Isometric Embedding of a Graph in a Boolean Cube . . . 199

The article examines the problem of the isometric embedding of an arbitrary graph into a Boolean cube of sufficiently large dimensionality; this problem arises in mathematical linguistics. A sufficient condition for this embeddability is presented. It is shown, however, that there exist graphs not embeddable into the Boolean cube, even in the presence of an arbitrary monotonic transformation of the metric.

Kalinin'sh, Ya. Ya.

Number of Ways of Coloring the Elements of a Tree and a MultiTree 204

The note elucidates the numerical characteristics of the multitree which affect the number of methods of correctly coloring its ribs with a specified number of colors. An explicit formula is presented.

Activation of the Amide Group by Acylation III. Hydroxyacyl Insertion in the N-Hydroxyacyllactam Series - V. K. Antonov, A. M. Shkrob, and M. M. Shemyakin	1385	1380
Activation of the Amide Group by N-Acylation IV. Formation and Conversion of Aromatic Cyclois - A. M. Shkrob, Yu. I. Krylova, V. K. Antonov, and M. M. Shemyakin	1394	1389
Investigations in the Field of Depsipeptides XLII. Structure and Complete Synthesis of Sporidesmolides I and II - M. M. Shemyakin, Yu. A. Ovchinnikov, V. T. Ivanov, A. A. Kiryushkin, and K. Kh. Kha'ilulina	1403	1399
Heterogeneous Fluorination with Elemental Fluorine V. Fluorination of Silver and Potassium Thiocyanates - M. A. Englin, S. P. Makarov, S. S. Dubov, and A. Ya. Yakubovich	1415	1412
Heterogeneous Fluorination with Elemental Fluorine VI. Fluorination of Cyanuric Chloride - M. A. Englin, S. P. Makarov, S. S. Dubov, and A. Ya. Yakubovich	1419	1416
Electron Transfer in Nitroso Addition Reactions I. The Mechanism of Disproportionation of Trifluoronitrosomethane - V. A. Ginsburg, A. N. Medvedev, M. F. Lebedeva, S. S. Dubov, and A. Ya. Yakubovich	1422	1418
Alkylbenzotrifluorides II. Polymethylbenzotrifluorides - L. M. Yagupol'skii and G. I. Matyushecheva	1426	1422
Fluorine-Containing Divinylbenzenes - E. M. Panov, R. S. Sorokina, and K. A. Kocheshkov	1430	1426
Investigations in the Pyrimidine Series IV. Some Fluoro-Substituted Oxo- and Hydroxypyrimidines - V. G. Nemets, B. A. Ivin, and V. I. Siesarev	1433	1429
Hydrocarbons of the Barane Series - V. I. Stanko, V. V. Kopylov, and A. I. Klimova	1437	1433
Synth. of Certain p-Tolyl Derivatives of Polonium - V. D. Nefedov, S. Zhuravlev, M. A. Toropova, S. A. Grachev, and A. V. Levchenko	1440	1436
Kinetics and Mechanism of the Liquid-Phase Oxidation of Diisopropylmercury - Yu. A. Aleksandrov, O. N. Drushkov, S. F. Zhit'sov, and G. A. Razuraev	1444	1440
Reaction of α -Mercurated Carbonyl Compounds with Ketene Dimer - M. A. Kasarkova, I. F. Lutsenko, and A. N. Nesmeyanov	1450	1447
Study of the Reactivity of Organophosphorus Carbonyl-Containing Compounds I. Polarographic Investigation of Phosphorylated Aldehydes in Aqueous Solutions - A. I. Razuinov, G. A. Savicheva, and G. E. Budnikov	1456	1434
Vinyl Esters of Phosphorus Acids VI. Vinyl Chlorophosphates - Yu. G. Gololobov, T. F. Dmitrieva, Yu. M. Zinov'ev, and L. Z. Soborovskii	1462	1460
Interaction of Aryldichlorophosphines with Cyclic Oxides X. On the Thermal Isomerization of Di-(β -Chloroethyl) Esters of Arylphosphinous Acids - F. L. Gelfer and I. A. Rogacheva	1466	1463

Dear Ms. Schoen:

In February of this year, DTIC provided the CIA Declassification Center with a referral list of CIA documents held in the DTIC library. This referral was a follow on to the list of National Intelligence Surveys provided earlier in the year.

We have completed a declassification review of the "Non-NIS" referral list and include the results of that review as Enclosure 1. Of the 220 documents identified in our declassification database, only three are classified. These three are in the Release in Part category and may be released to the public once specified portions of the documents are removed. Sanitization instructions for these documents are included with Enclosure 1.

In addition to the documents addressed in Enclosure 1, 14 other documents were unable to be identified. DTIC then provided the CDC with hard copies of these documents in April 2004 for declassification review. The results of this review are provided as Enclosure 2.

We at CIA greatly appreciate your cooperation in this matter. Should you have any questions concerning this letter and for coordination of any further developments, please contact Donald Black of this office at (703) 613-1415.

Sincerely,

A handwritten signature in dark ink, appearing to read "Sergio N. Alcivar".
