INTRODUCTION

This book contains summaries of basic manpower statistics -- active duty military, civilian, reserve components and retired.

The purpose is to present totals for the Department of Defense, but in most cases the figures for the Army, Navy, Marine Corps and Air Force are also shown.

Some pages are "time series" showing the trends over a period of years while others present the picture for the most recent date that figures were available at time of publication.

The page designation in the upper right corner is the page reference code of the Directorate for Statistical Services and should be used in requesting additional or more recent data of the type shown.

PERSONNEL SUMMARY

Department of Defense "strength" is generally considered as the sum of active duty military personnel and civilian personnel -- more than 3,800,000 persons at the end of December 1963.

In addition, our Personnel Summary shows reservists who are not on active duty and those training in schools and colleges.

Not shown here are approximately 400,000 retired military personnel and some 4,000,000 dependents of active duty military personnel. Nor do these figures include the thousands of civilian employees of private industry engaged in defense work.

TOTAL MILITARY AND CIVILIAN PERSONNEL

The table at the right shows the trend in Department of Defense personnel over the past 25 years in war and in peace.

Civilian personnel figures shown here consist of direct hire employees only so that the totals will be comparable over the entire period. (Information on the number of indirect hire personnel is not available prior to 1953 -- see page 57.)

DEFENSE ORGANIZATIONAL COMPONENTS

The adjoining table shows the present organizational structure of the Department of Defense together with the numbers of personnel assigned to each organizational component.

In the Department of Defense Reorganization Act of 1958, the Secretary of Defense was authorized, whenever he determines it will be advantageous to the Government in terms of effectiveness, economy or efficiency, to provide for the carrying out of any supply or service activity common to more than one military department by a single agency or such other organizational entities as he deems appropriate. This authority was applied to the broad fields of atomic energy, communications, supply, etc. through the establishment of separate agencies within the Department of Defense but outside of the three military departments. Many of the personnel working in these fields previously assigned to the military departments were transferred to these new agencies.

WASHINGTON D. C. AREA AND PENTAGON

Economic and other considerations frequently require a knowledge of the numbers of military and civilian personnel stationed in the Washington D.C. Metropolitan Area which includes adjacent counties and cities in Maryland and Virginia.

Approximately one-third of the personnel in the Washington D.C. Area are in "headquarters" or departmental service activities. The remainder are engaged in field activities located in the area. The latter include Fort Belvoir, Fort Meyer, Naval Ordnance Laboratory, Bolling Air Force Base, Andrews Air Force Base, Walter Reed Medical Center and Bethesda Medical Center.

Past strengths in the Washington D. C. Area are presented on page 12. A 16 percent reduction in personnel located in the area has occurred during the past ten years. Numbers have declined in both the departmental and field services.

The number of people working in the Pentagon Building (page 13) has remained fairly constant over the years, although there has been a significant decrease from the high occupancy of the World War II and the Korean War periods.

The utilization of space in the Pentagon compares favorably with that of other large office buildings averaging about 100 square feet per person. Notwithstanding this, not all of the Department of Defense "headquarters" or departmental service personnel can be officed in the Pentagon. Over the years it has been necessary to utilize varying amounts of space in other local buildings to house Department of Defense personnel.

DOD PERSONNEL BY STATE

The following 3 pages show the duty location of Department of Defense personnel by state. Census population estimates are also given.

The percentages shown provide comparative data indicating (a) the ratio of Defense personnel to state total population, and (b) the relative distribution of Defense personnel by state.

Of the 50 states, California has the largest number of Defense personnel (362,055), while Alaska has the greatest proportion of Defense personnel to total population (15.3 percent).

Hawaii has the next largest proportion of Defense personnel, who account for 8.6 percent of that State's total population.

ACTIVE DUTY MILITARY PERSONNEL

The table on the right shows the "ups and downs" of the military forces over the past forty-seven years. Low and peak strengths are identified.

Monthly strengths for the past eighteen months appear on page 20. Since August 1962, following the release from active duty of reserves recalled during the Berlin build-up, active duty military strength has been fairly constant.

The table on page 21 shows the average active duty military strength by fiscal year from 1941 through 1963. Direct military personnel costs from year to year have reflected these variations in average strength as well as increases in pay and allowances.

MILITARY PERSONNEL BY TYPE

The adjoining table shows, for recent months, the numbers of officers, enlisted personnel and officer candidates comprising total active duty military strength. Both commissioned and warrant officers are included in the "officers" series.

Variations in the number of officers, and in the proportion of officers to total military strength, are indicated on page 24. The proportion of officers increased following the Korean War as total strength was reduced and more complex and technical weapons were adopted by combat elements.

MILITARY GRADE STRUCTURE

The distribution of military personnel by grade is tabulated on the following page.

The numbers of officers in the grades of Major - Lt. Commander and above are limited by law, and there is an administrative limitation on the percent of officers to total military strength. Enlisted grades E-8 and E-9 were authorized by legislation enacted in 1958 which places restrictions on the numbers who may be advanced to these new grades.

The table on page 27 indicates the grade titles corresponding to the various enlisted pay grades. Grade titles were revised in implementation of the new pay grade structure provided for in the 1958 amendments to the Career Compensation Act.

a/ For rank and precedence, within the Army, specialist grades fall between Corporal and Private First Class. Among the Services, however, rank and precedence are determined by pay grade.

b/ In general, titles for Petty Officers are according to "Rating" (Naval Skill) such as Boatswain, Gunner's Mate, Yeoman, Storekeeper, etc. Personnel in pay grades E-3, E-2 and E-1 are not considered as possessing Ratings. The titles listed denote the "Rate" or pay grade.

c/ The "Acting" ranks serve to prevent loss of titles and insignia which would otherwise result from change-over to the new grade structure and will disappear as they are vacated through promotions and attrition.

d/ E-3 pay grade also includes Airman, Construction Man, Dental Man, Fireman, Hospital Man and Stewardman.

e/ E-1 and E-2 pay grades also include Recruits and Apprentices in 6 Rates listed in footnote d/.

DEPLOYMENT OF MILITARY PERSONNEL

Substantial numbers of military personnel are stationed outside the United States.

More than 600,000 military personnel have shore-based assignments outside the United States, and, in addition, 127,000 Naval personnel are assigned to fleet units and other afloat and mobile activities including nearly 16,000 such personnel temporarily based ashore.

Personnel stationed in Alaska and Hawaii are now in the United States, and are therefore excluded from the above numbers.

MAJOR UNITS

This tabulation shows changes in the number of our larger combat units and elements in recent years.

Not shown by these data is the substantial increase in firepower and in combat potential developed within each unit since the Korean War.

P10.1

AGES OF MILITARY PERSONNEL

The essentially youthful nature of our military forces is highlighted by the data on the opposite page.

Most enlisted volunteers enter active service during their late "teens" with about one-fourth (currently) signing up for a second tour of duty. Officers first enter active duty at ages about four years older, and inductees (currently) at around 22-23 years of age. These first tour personnel make up about one-half of total forces and account for the low median 24.3 years of age on 30 June 1963.

The increasing numbers of men in ages over 27 reflect the continuing development of a career-motivated military force.

On page 34, the percentage of total male military personnel in each age group is shown.

EDUCATIONAL LEVEL OF MILITARY PERSONNEL

The table on page 36 shows the percentages of officer and enlisted personnel who have completed various steps of formal high school and college training.

The military services provide the opportunity and encourage their personnel to continue academic study. There are after-hour study programs open to all, and also programs designed to give selected individuals further education in connection with their military career development.

During the past ten years the proportion of officers who are college graduates, and the proportion of enlisted who are high school graduates, has increased substantially (page 37). The changes are due mainly to greater selectivity in procurement and retention which have been dictated, to a great extent, by technological change and the resulting higher technical skill requirements.

MILITARY DEPENDENTS AND MARITAL STATUS

Military dependents outnumber our military personnel in total, and there is wide variation in the average number of dependents per military person among the military services and between officers and enlisted personnel.

About 82 percent of officer personnel are married in contrast to a 47 percent figure for enlisted personnel.

WOMEN IN THE ARMED FORCES

The military medical services have enrolled nurses for many years.

It is now firmly established that there is a need and place for other women -- WACs, WAVEs, Women Marines and WAFs -- as an effective adjunct of the supporting forces.

Their continued employment by the armed forces provides a cadre for mobilization when manpower would be at a premium.

ENLISTED PROCUREMENT (1)

The table at the right shows enlisted gains by source during the first five months of FY 1964.

Most enlisted requirements are met by volunteers for military service. Inductions were relatively high during the first five months of FY 1964 due to replacement needs caused by heavy inductions two years before during the Berlin build-up in the fall of 1961.

REENLISTMENT RATES

Of enlisted personnel separated from active duty during a given period who are eligible to reenlist, what percentage actually reenlist? The measure which answers this question is designated the "reenlistment rate". This rate is tabulated on the opposite page for FY 1950 and subsequent years.

Reenlistment rates have improved considerably since the FY 1954 low point. Some of the year to year variations in over-all rates are due to variations in the proportions of "First Term" and "Career" Regulars. Separate rates for these categories are listed on page 52. "First Termers" are those who have served an initial active duty tour as a Regular. "Career" Regulars are those who have served two or more tours of active duty.

Reenlistment rates for "First Term" Regulars in the various occupational groups (page 53) were near the average rate for all occupational groups in FY 1963, with the exceptions that the rates continue low for the Electronics group, and continue high for the Services group of occupations (motor vehicle operators, food services, military police, etc.).

- ^{a/} Data prior to World War I are based upon incomplete records in many cases. Casualty data are confined to dead and wounded personnel and therefore exclude personnel captured or missing in action who were subsequently returned to military control. U.S. Coast Guard data are excluded.
- ^{b/} Authoritative statistics for the Confederate Forces are not available. Estimates of the number who served range from 600,000 to 1,500,000. The Final Report of the Provost Marshal General, 1863-1866, indicated 133,821 Confederate deaths (74,524 battle and 59,297 other) based upon incomplete returns. In addition, an estimated 26,000-31,000 Confederate personnel died in Union prisons.
- ^{c/} Data are for the period 1 December 1941 through 31 December 1946 when hostilities were officially terminated by Presidential Proclamation, but few battle deaths or wounds not mortal were incurred after the Japanese acceptance of Allied peace terms on 14 August 1945. Numbers serving from 1 December 1941 - 31 August 1945 were: Total - 14,903,213; Army - 10,420,000; Navy - 3,883,520; and Marine Corps - 599,693.
- ^{d/} Tentative final data based upon information available as of 30 September 1954, at which time 24 persons were still carried as missing in action.
- ^{e/} Number serving covers the period 21 April - 13 August 1898, while dead and wounded data are for the period 1 May - 31 August 1898. Active hostilities ceased on 13 August 1898, but ratifications of the treaty of peace were not exchanged between the United States and Spain until 11 April 1899.
- ^{f/} Includes Air Service. Battle deaths and wounds not mortal include casualties suffered by American forces in Northern Russia to 25 August 1919 and in Siberia to 1 April 1920. Other deaths cover the period 1 April 1917 - 31 December 1918.
- ^{g/} Includes Army Air Forces.
- ^{h/} Battle deaths and wounds not mortal include casualties incurred in October 1941 due to hostile action.
- ^{i/} Marine Corps data for World War II, the Spanish-American War and prior wars represent the number of individuals wounded, whereas all other data in this column represent the total number (incidence) of wounds.
- ^{j/} Not known, but estimates range from 184,000 to 250,000.
- ^{k/} As reported by the Commissioner of Pensions in his Annual Report for Fiscal Year 1903.
- Dashes (-) indicate that information is not available.

CIVILIAN PERSONNEL - TOTAL

Most of the civilian personnel of the Department of Defense are hired directly by the military departments, the Defense agencies, or the Office of the Secretary of Defense and Joint Chiefs of Staff Organization as employees of the United States Government, and are designated as direct hire civilians. Some foreign nationals are employed in this manner in overseas areas in addition to U. S. citizens.

In a few foreign countries, however, substantial numbers of foreign nationals supporting military activities are technically employees of the host government (or an agency of that government) and are assigned to work with U.S. Forces under contracts or agreements with that government on a reimbursable cost or other predetermined basis. These foreign nationals are designated as indirect hire civilians.

Both categories of civilian personnel must be counted to provide a complete picture of the DOD civilian work force. Figures on the number of indirect hire civilians, however, are unavailable prior to 31 January 1953.

Defense civilian employment has been reduced by more than one-third since January 1953.

CIVILIAN PERSONNEL BY COUNTRY

More than 250,000 Department of Defense civilian personnel are employed in foreign countries, but only 21,500 of these are U.S. citizens.

The 9,000 U.S. citizens employed in U.S. territories include persons who are U.S. citizens by virtue of citizenship in a U.S. territory, as well as U.S. citizens from the States.

CIVILIAN PERSONNEL - DIRECT HIRE (1)

There have been wide fluctuations in the number of direct hire civilians employed by the Department of Defense in the past 25 years.

Beginning in January 1953, the definition of direct hire civilians was revised to include approximately 100,000 native Koreans and Ryukyans who had not been included before that time. As a result, recent data on direct hire civilians are not strictly comparable with the older data.

These data comprise civilians paid from appropriated funds. They exclude civilian employees of military nonappropriated fund agencies such as post exchanges and commissaries.

CIVILIAN PERSONNEL - DIRECT HIRE (2)

It is frequently useful to distinguish between two broad groups of direct hire civilians, namely, salaried personnel and wage board personnel. The distinction is based on method of salary or wage determination.

Salaried personnel consist primarily of employees occupying positions subject to the Classification Act of 1949 as amended, plus those few employees whose compensation is established by acts other than the Classification Act, by executive order or by administrative determination.

Wage board personnel consist of employees whose compensation is determined by wage boards or similar administrative authority serving the same purpose, and is adjusted periodically in accordance with local prevailing wage rates.

In general, salaried personnel comprise technical, scientific, administrative, supervisory and clerical workers and for this reason are sometimes designated "white collar" employees. Wage board personnel, on the other hand, are usually craftsmen, production or maintenance workers and are therefore designated "blue collar" employees.

TOTAL FEDERAL GOVERNMENT AND DOD DIRECT HIRE CIVILIANS

The Department of Defense accounts for about 42 percent of all direct hire civilians in the Executive Branch of the Federal Government. This proportion has declined during the past ten years, during which time total federal employment has remained fairly constant while DOD employment has shown a substantial reduction.

RESERVE COMPONENTS SUMMARY

The table on the opposite page summarizes the current status of our Reservists -- members of Department of Defense reserve components.

Members of the Ready Reserve are subject to active duty in time of national emergency proclaimed by the President, as well as in time of war or national emergency declared by Congress. The Ready Reserve includes Reservists on active duty who were counted as part of active military strength in preceding tables. Ready Reservists not on active duty participate, to the extent required and subject to the availability of funds, in drills or training periods regularly scheduled throughout the year, in two weeks annual active duty training, and/or in various school and special active duty training programs.

Members of the Standby Reserve can be ordered involuntarily to active duty only as the result of Congressional action, and after the Director of Selective Service has determined their availability for active duty. They are not required to actively participate in reserve training.

The Retired Reserve consists of members of the reserve components who qualify for retirement through length of service, disability, etc., and who are formally placed on reserve retired lists.

RESERVE COMPONENTS SUMMARY - TIME SERIES (1)

This tabulation shows the trends in numbers of personnel assigned to the reserve categories established by the Armed Forces Reserve Act of 1952.

Although these categories became effective on 1 January 1953, complete reports by reserve category were unavailable prior to 31 March 1954.

Screening of the Ready Reserve is continuous to assure current availability of all members.

Following legislation establishing a ceiling on the number of Ready Reserves, effective 30 June 1957, the number of Ready Reserves not on active duty was maintained at slightly in excess of 2,400,000 until the spring of 1961. Since that time the number has declined rapidly with only 1,700,000 currently in this first-line category of reserves.

RESERVE COMPONENTS SUMMARY - TIME SERIES (2)

This table shows the growth of the reserve components since World War II.

The number of officers has declined as many of those who earned commissions during the war have dropped out. Over-age-in-grade, physical disability, and failure to participate are some of the causes for loss of commissions. In addition, numbers of active duty reserve officers have accepted regular commissions under the provisions of the Regular Officer Augmentation Act of 1956.

Following the Korean War, the number of enlisted reserves increased substantially. The source of most of these reserve gains was (a) separations from the active forces of men with reserve service obligations, and (b) the 3-6 month active duty training programs which permit non-prior service men to meet their military service obligation through participation in the Ready Reserve programs. The number of enlisted reserves has been declining during the past four years mainly due to the excess of obligors completing their obligated tours over the number of obligors entering the reserve.

RESERVES ON ACTIVE DUTY

The adjoining table shows the number of reservists, by component, who are serving with the active forces. They are included in the total active duty strengths shown in preceding tables. All of these reservists are in the Ready Reserve.

Some reservists undergo prescribed tours -- currently 4 months or more -- of active duty for training. They are not included in this table or counted as part of the total active duty strength.

Note that there are six Department of Defense reserve components, including the National Guard (Army) and the Air National Guard (Air Force).

Continuously, since WW II, there have been large numbers of reservists serving on active duty. Data on page 80 show the numbers serving in the active forces from each reserve component.

The number of reservists on active duty increased substantially during the fall of 1961 with the Berlin build-up, then declined in August 1962 as many were released from active duty, and again increased slightly in October 1962 with the call-up (Air Force Reserve) for the Cuban crisis.

RESERVES NOT ON ACTIVE DUTY

The table on the next page excludes reservists on active duty. These numbers measure the strength of reserve forces which can be mobilized in an emergency to supplement and replace active military forces.

The number of reservists not on active duty shrank during the Korean War as large numbers joined the active forces (page 83). Their numbers increased substantially after that time assisted by the compulsory reserve service provisions of the Armed Forces Reserve Act of 1952, as amended, and the Universal Military Training and Service Act, as amended.

All members of the Army National Guard and Air National Guard are included in the Ready Reserve; the size of these components is restricted mainly by annual appropriations for paid drill and active duty training. The other four reserve components contain Standby and Retired Reserves, and their strengths increased to a peak about four years ago, since which time there have been substantial declines in strengths.

RESERVES IN PAID STATUS

Nearly one million Reservists are currently receiving pay for participation in reserve training programs.

These numbers are significant in determining reserve component personnel costs.

Paid status personnel are in the Ready Reserve category.

Personnel in paid status fall into several pay groups related to the various reserve training programs:

<u>Pay Group</u>	<u>Annual Number of Paid Periods of Inactive Duty Training</u>	<u>Annual Paid Active Duty for Training</u>
A	48	15 days
B	24	15 days
C	12	15 days
D	0	15 days
E	0	30 days
F	0	4 months minimum initial active duty training

ACTIVE DUTY BASIC TRAINING

One of the methods for young men to discharge their military obligation is to join a reserve component and take an initial tour of active duty for training (see pages 92 and 93). This tour is followed by a period of obligatory membership in the Ready or Standby Reserve.

After a slow start this program attracted large numbers of recruits who chose this method of fulfilling their required military service.

The officers in the 3-6 month program are ROTC graduates who were excess to active force requirements when commissioned, and who, as a result, were not ordered to active duty for two year tours.

RESERVE OFFICER TRAINING IN COLLEGES

The military services rely on ROTC programs in colleges and universities as a source of officer procurement.

The Army also sponsors military training in some high schools and other "junior" schools.

RETIRED MILITARY PERSONNEL

During the past ten years the number of military personnel on the retired payroll has more than doubled.

The sharp increases are the consequence of large numbers who entered military service during WWII now qualifying for annuities.
