(Combat) for the Period ending (31 Oct 69) RC: 1150R-65)
(R2) (U)

SET DISTRIBUTION

1. (C) Operations: Significant Activities:

a. Mission: The portion of the 210th Aviation Battalion Mission to provide fixed wing light cargo transport and limited troop movement to MAC VNAI has been discontinued.

b. Organization:

(1) Reorganization of the following assigned companies under Department of the Army standardized MICE's, was completed during the reporting period. This action was under the provision of USARPAC GO 329, dated 24 April 1969, which was received by this headquarters during the reporting period.

Headquarters and Headquarters Company

54th Aviation Company (Utility Airplane)

74th Aviation Company (Utility Airplane)

134th Aviation Company (Utility Airplane)

(2) The following units were attached within the 210th Aviation Battalion during the reporting period.

(a) Detachment 10, 5th Weather Squadron attached to Headquarters and Headquarters Company. Per USARV GO 3076, dated 11 August 1969.

(b) Detachment 3, 5th Weather Squadron attached to 73rd Aviation Company, Per USARV GO 3076, dated 11 August 1969.

(c) 1st Cav Division ASTA Platoon, attached to 73rd Aviation Company Per USARV GO 3503, dated 16 September 1969.

15 November 1969

SUBJECT: Operational Reports - Lessons Learned 210th Aviation Battalion (Combat) for the period ending (31 Oct 69) (C) (R) (U) (J)

(d) 1st Infantry Division AFTA Platoon, attached to 23rd Aviation Company per JS RV GO 3503, dated 16 September 1969.

c. Command and Staff: The following significant changes occurred in the 210th Aviation Battalion command staff structure during reporting period. The current command and staff structure is as shown in Incl 1.

COMMAND

(1) On 25 August 1969, LTC Floyd E. Petty, 456-30-2651, assumed command of the 210th Aviation Battalion (Combat) replacing LTC Carl C. Johnson, 294-12-8384.

(2) On 25 August 1969, CPT Richard E. De Castro, 155-32-1567, became the 210th Aviation Battalion (Combat) Safety Officer, replacing CPT Marvin E. Humphrey, 444-24-2272.

(3) On 19 September 1969, CPT Eugene Leso, 170-44-0527, became the 210th Aviation Battalion (Combat) Chaplain replacing CPT Joseph A. Furfey, 135-22-6749.

(4) On 6 October 1969, CPT Warren M. Sandlin, 428-50-1032, became the 210th Aviation Battalion (Combat) S-4, replacing CPT William E. Pedigo, 405-50-5302.

(5) On 6 October 1969, 1LT Arpad A. Szurgyi, 039-36-6309, became the 210th Aviation Battalion (Combat) S-1, replacing CPT William E. Barnhill, 251-62-3409.

(6) On 22 October 1969, 1LT Lawrence L. Derks, 327-40-5201, became the 210th Aviation Battalion (Combat) Signal Officer, replacing CPT Keith H. Johnston, 525-72-9929.

UNIT COMMANDERS

(7) On 20 September 1969, MAJ Robert B. Holt, 233-46-9947, assumed command of the 73rd Avn Co (3A) replacing MAJ James R. Talbert, 558-16-7966.

(8) On 6 October 1969, MAJ Oscar B. Thoreson, 503-34-8880, assumed command of the 25th Avn Co (Corps) replacing MAJ Richard G. Webl, 815-30-8730.

(9) On 10 October 1969, MAJ Albert E. Hervey, 453-62-3119, assumed command of the 74th Avn Co (UA), replacing MAJ Wade W. La Due, 345-24-2105.

(10) On 26 October 1969, CPT Robert C. Mc Williams, 429-72-1954, assumed command of Headquarters and Headquarters Company, replacing CPT James R. McCormack, 459-58-8786.

e. Aircraft Status: (See Incl 2)

f. Operational Results: (See Incl 3)

g. Personnel Management: (See Incl 4)

h. Intelligence and Security: The following activities regarding security clearances were conducted during the reporting period.

(1) Top Secret Clearance Validated: 19

(2) Secret Clearances Validated: 93

(3) Secret Clearances Granted: 17

(4) Confidential Clearances Granted: 5

(5) NAC Initiated: 4

i. Operations:

(1) During the reporting period companies of the 210th Aviation Battalion (Combat) provided operational support as follows:

(a) 25th Aviation Company provided Staff and Command transport for H1, II Field Force, affiliated units, and CORDS.

CONFIDENTIAL

AVMCA-C

15 November 1969

SUBJECT: Operational Reports - Lessons Learned 210th Aviation Battalion (Combat) for the period ending (31 Oct 69)RCS CSFOR-65)(R2)(U)

(b) 54th Aviation Company provided general aerial transport service for JUSPAC, Hq, USARV, 1st Log Command, and 1st Aviation Brigade, to include: passenger and cargo transport, psychological warfare aerial support, and recently have established an aerial topographic photographic mission in support of the USARV Engineer Mapping and Intelligence Branch.

(c) 73rd Aviation Company provided aerial surveillance support as directed by G-2, II Field Force to include visual reconnaissance, aerial photography and target detection by providing general support to II Field Forces and direct support to the assigned divisions.

(d) 74th Aviation Company provided general aerial reconnaissance support to 25th Infantry Division, 23rd and 27th Artillery Groups, 5th and 18th ARVN Divisions, and CMAAC to include visual reconnaissance and directing artillery and naval gun fire.

(e) 134th Aviation Company provides general aerial reconnaissance support to 1st Infantry Division, 199th Infantry Brigade, 25th ARVN Division, 5th Special Forces Group and CMAAC, to include visual reconnaissance and directing artillery and naval gun fire.

j. Logistics: Aircraft availability (See Incl 5).

k. Aviation Safety:

	<u>FIXED WING</u>	<u>ROTARY WING</u>	<u>TOTAL</u>
(1) Major Accidents	6	0	6
(2) Combat Damage	0	0	0
(3) Minor Accidents	0	0	0
(4) Precautionary Landings	24	1	25
(5) Incidents	6	1	7

(6) Battalion accident rate during period: 19.7

l. Signal:

(1) The battalion including all assigned companies, established a secure FM command net.

(2) The 74th and 134th Aviation Companies completed the installation of secure voice equipment (KY-28) in all assigned O-1 aircraft.

m. Installation Development:

CONFIDENTIAL

AVBAC4-CC

15 November 1969

SUBJECT: Operational Reports - Lessons Learned 210th Aviation Battalion
(Combat) for the period ending (31 Oct 69) AOC 33FOR-65)(R2)(J)

- (1) 2100 yards of the LTN AAF berm has been upgraded.
 - (2) A request has been submitted for the remainder of the berm to be upgraded and for the installation of a low intensity lighting system.
 - (3) A project has been initiated to install drop bars at the gates in order to better control traffic.
 - (4) New revetments around the EM and NCO billets have been completed and the revetments around the officers billets are partially completed.
 - (5) Personnel bunkers in Officer, and EM billets area have been reconstructed.
 - (6) Twenty aircraft revetments have been completed.
- n. Medical: The following services were provided for LTN by the 197th Med Det.

- (1) Flight Physicals: 126
- (2) Immunizations: 1662
- (3) Medical Evacuations: 146

2. (C) Lessons Learned: Commander's Observations, Evaluations and Recommendations:

a. Personnel:

- (1) Assignment of Personnel in Proper MOS's
- (a) Observation: We have experienced extreme shortages in the following MOS's.
 - 71P Flight Operations Coordinator
 - 93H ATC Tower Operator
 - 63C General Vehicle Repairman
 - 94B Cook
 - 71H Personnel Specialist
 - 05C Radio Teletype Operator
 - 316 Tactical Commo Chief

CONFIDENTIAL

CONFIDENTIAL

AVBACA-CC

15 November 1969

SUBJECT: Operational Reports - Lessons Learned 210th Aviation Battalion
(Combat) for the period ending (31 Oct 69)RCS CSFOR-65)(R2)(U)

However, we have received overages in these MOS's:

35R20 Avionics Radar Equip Repairman

67H20 OV-1 Airplane Mech

67G20 U-8/U-21 Airplane Mech

In the last quarterly period we have not had any TO&E changes which have caused the shortages and overages experienced. This situation has caused us to cross train individuals in a more technical MOS for utilization in a more basic MOS. Example 35R20 used as a 94B.

(b) Evaluation: Critical shortages in some MOS's and overages in others have caused us to cross train individuals to fill these positions. This miss utilization of personnel has greatly reduced the effectiveness of our units in completing mission requirements.

(c) Recommendations: That the various personnel activities take all necessary action in order to preclude shortages in one field and overages in others.

b. Intelligence: None

c. Operations:

(1) Light observation aircraft, fixed wing.

(a) Observation: The continuing need for a fixed wing, light observation aircraft has been established and a follow on aircraft is required.

(b) Evaluation: It has become apparent that the O-1 'Birdog' aircraft is playing an extremely important role in Southeast Asia. It has repeatedly demonstrated that it cannot be replaced by rotary wing observation aircraft. Advantages of the O-1 aircraft over other types aircraft include; dependability, operating capabilities, good instrumentation for night flight, high availability, low cost of acquisition, maintenance and operations, good endurance, one pilot crew requirement, good visibility for both seats, and adequate communications for most operations.

(c) Recommendations: That a new and better aircraft be developed to supplement and eventually replace the O-1. This aircraft should be a similar type and have the same advantages as the O-1. In addition, improvements should include additional cockpit space, complete instrumentation for instrument flight, light weight electronics, maximum sound suppression, better passenger/cargo carrying capability, and retractable tri-cycle gear.

CONFIDENTIAL

AVB CA-CC

15 November 1969

SUBJECT: Operational Reports - Lessons Learned 110th Aviation Battalion
(Combat) for the period ending (31 Oct 69) ACG CEFOR-65)(R2)(U)

(2) Utility aircraft (fixed wing)

(a) Observation: The need has been established for a single on multi-engine, utility, fixed wing aircraft.

(b) Evaluation: It has been established by the Ula in Vietnam and Thailand that a continued requirement exists for fixed wing utility aircraft. Some examples of the advantages of fixed wing utility aircraft are; lower cost of acquisition, maintenance and operation in comparison to that required for rotary wing aircraft, the capability of longer operation, higher ranges speed, better availability, and lower cost per ton/passenger mile. Examples of current utilization are; limited troop and cargo transport, command-staff transport, and aerial photographic platform.

(c) Recommendations: That an advanced and more efficient aircraft be developed and acquired to supplement and eventually replace the present aircraft. This new aircraft should include such improvements as; adequate cockpit space, complete instrumentation for weather flight, light weight electronics, suitable sound suppression and maximum passenger/cargo carrying capability. It should retain the short improved field capability of the Ula, the limited crew requirements and the limited maintenance required for operation.

d. Organizations: None

e. Training: None

f. Logistics: None

g. Communications: None

h. Material: None

i. Other:

(1) Observation: The Battalion Commander has the additional responsibility of Installation Coordinator of LTN AAF. At the present time the installation consists of sixteen individual units and is a major aviation facility. a problem exists in that installation coordinators duties require a major portion of the battalion staffs time.

(2) Evaluation: As a result of the dual role, the manpower and equipment resources of the Battalion Headquarters are over taxed, thereby reducing the efficiency of both the Battalion Headquarters and the Installation Coordinator functions. Especially critical is the lack of personnel and essential equipment necessary to provide adequate security for the installation.

SUBJECT: Operational Report - Lessons Learned of 210th Aviation
Battalion (Combat) for Period Ending 31 October 1969
(RCS CSFOR-65)(R2)(U)

DA, HEADQUARTERS, 12TH AVIATION GROUP (COMBAT), APO 96266 24 November 1969

TO: Commanding General, 11 Field Force Vietnam, APO 96266

1. (U) In accordance with AR 525-15, the Operational Report - lessons learned of 210th Aviation Battalion (Combat) for the Period ending 31 October 1969 is forwarded.

2. (C) Reference Section 1, Operations: Significant Activities.

a. Page 3, para 1d(1). Unit Strength, Warrant Officers for the 184th should be amended to read "19" instead of "22".

b. Page 4, para 1i(1)(a). "CORDS" signifies "Military Assistance Command Civil Operations and Revolutionary Development Support (MACCORDS)".

c. Page 5, para 1i(1)(d) and (e). "CMAC" signifies Capital Military Assistance Command.

d. Page 5, para 1k(1). Major Fixed Wing Accidents should read "5" and total should be "5". The sixth accident reported was reported in the previous ORII.

e. Page 5, para 1k(6). Corrected battalion accident rate during period is 18.7.

f. Page 5, para 1l(2). The installed secure voice equipment in assigned O-1 aircraft is not being fully utilized due to the lack of ground based secure equipment in supported units.

g. Page 6, para 1m(1). "ITN AAF" signifies Long Thanh North Army Airfield.

h. Page 6, para 1n. "ITN" signifies Long Thanh North.

3. (C) Section 2, Lessons Learned.

a. Page 6, para 2a. Personnel.

(1) 71P - internal changes will be made within the 12th Avn Gp (cbt) to bring the level of fill of the battalion (64%) more in line with the Group level.

CONFIDENTIAL

**DOWNGRADED AT 3 YEAR INTERVALS;
DECLASSIFIED AFTER 12 YEARS.
DOD DIR 5200.10**

CONFIDENTIAL

AVHACA-SC (15 Nov 69)

SUBJECT: Operational Report - Lessons Learned of 210th Aviation
Battalion (Combat) for Period Ending 31 October 1969
(RCS CSFOR-65)(R2)(U)

(2) 93H - this MOS is very short in all battalions of the 12th
Avn Gp (Cbt).

(3) 63C - as of 31 October, the 210th Aviation Battalion (Combat)
had an overstrength of five personnel in this MOS.

(4) 94B - there are 40 authorized and 31 assigned equally dis-
tributed throughout the Group.

(5) 71H - there are 21 authorized in the 210th. 25 were assigned
at the end of September and 19 were assigned at the end of October.

(6) 05C - this MOS is in short supply, but has been supplemented
by 05B causing an overall shortage of four personnel.

(7) 31G - this MOS is critical within Group but not in the 210th
Avn Bn (Cbt) which has 5 of the 6 authorized personnel assigned.

b. Page 8, para 2i. A problem exists when the majority of units
and personnel on an installation are aviation or aviation support
only. The organization of the units and the nature and timing of their
mission workload precludes the ready availability of security guards
and other defensive personnel. Higher headquarters should plan to
provide necessary security to aviation and aviation support units,
particularly as additional US combat troops are withdrawn from the
vicinity of airfields.

TO: Commanding General, United States Army Vietnam, AFM 3000-05, APO 96375
Commander-in-Chief, United States Army Pacific, AFM 3000-05, APO 96307

FROM: Assistant Chief of Staff for Force Development, Department of the Army, Washington, D.C. 20310

1. (U) This headquarters has reviewed subject report and concurs with the contents as indorsed.
2. (C) The following additional comments are considered pertinent:

a. Paragraph 2a(1), page 6, discusses MOS shortages reported by the 210th Aviation Battalion (Combat). The Brigade is critically short in MOSs 05C (Radio Teletype Operators) and 31G (Tactical Communications Chief), the present fill level being 69% for MOS 05C and 56% for MOS 31G. MOSs 71P (Flight Operations Coordinator) and 94B (Cook) are not critically short within the Brigade. The 12th Aviation Group (Combat) is overstrength in both MOSs 71H (Personnel Specialist) and 63C (General Vehicle Repairman), the present fill level being 133% for MOS 63C and 114% for MOS 71H. The shortage of MOS 93H (Air Traffic Control Tower operator) is only apparent, since the 210th Battalion's airfields are operated by Aviation Support Detachments of the 165th Aviation Group (Combat). The 12th Aviation Group (Combat) receives its pro rata share of all enlisted personnel by MOS and the 210th Aviation Battalion (Combat) should receive its proportionate share from the 12th Aviation Group (Combat).

b. Paragraph 2i, page 8, discusses the requirement for security forces at Long Thanh North AAF. A recognized requirement exists for a 33 man security force at Long Thanh North AAF. However, this requirement was not satisfied in the approval of TDA P5WDG39900, Augmentation 1st Aviation Brigade, Department of the Army, 24 June 1969. Due to the USARV-wide reduction in forces, approval of additional spaces at this time

TO: Commander in Chief, United States Army, Pacific, ATTN: GPOP-DT,
APO 96558

1. This headquarters has reviewed the Operational Report-Lessons Learned for the quarterly period ending 31 October 1969 from Headquarters, 210th Aviation Battalion (Combat) and comments of indorsing headquarters.

2. Comments follow:

a. Reference item concerning "Light Observation Aircraft, Fixed Wing", page 7, paragraph 2c(1); concur. However, this recommendation should be forwarded to the US Army Combat Developments Command for consideration.

b. Reference item concerning "Utility Aircraft (fixed wing)", page 8, paragraph 2c(2); concur. However, this recommendation should be forwarded to the US Army Combat Developments Command for consideration.

c. Reference item concerning "Other", page 8, paragraph 2i; 1st Indorsement, paragraph 3b; and 3d Indorsement, paragraph 2b; concur with 3d Indorsement. Due to the USARV wide reduction in forces, it is doubtful that units involved will be receiving additional spaces for personnel or additional equipment for defense and security of key installations. It is essential that Installation Coordinators identify these problem areas such as airfield security which require priority and to utilize resources accordingly. USARV Regulation 10-4, dated 10 July 1969, states specifically the responsibilities of coordinators at all levels.
