SECTION I (U) SIGNIFICANT ORGANIZATION OR UNIT ACTIVITIES

1. (U) General:

(11) 1 May 67 | (12) 14p.

a. The organizational structure of the 3d Battalion, 6th Artillery, 105mm SP, M108 consists of a headquarters and headquarters battery, service battery, and three firing batteries. (see inclosure 1).

b. During the period 26 February to 17 March, the battalion sponsored the 1st Battalion, 92d Artillery, newly arrived in the Republic of Vietnam.

c. During the period 12-14 April, the battalion was inspected by the USARV IG inspection team. As a result of this inspection, it was the consensus of the inspection team that the mission of the battalion was being accomplished in a highly effective manner within available resources and under existing conditions.

2. (U) Intelligence: Several observers were committed to aerial visual reconnaissance (VR) missions which resulted in sightings of numerous hamlets, trails, entrenchments, bridges, and suspected enemy personnel. Several of these locations have been used as harassing and interdiction targets by artillery units in the Pleiku area.

3. (U) Operations and training activities.

(18) OACSFOR

a. Operations:

(19) CT-UT-670259

(1) From 1 February until 5 April (64 days), the battalion was in direct support (DS) of Task Force 1st Squadron, 10th Cavalry, 4th Infantry Division and Task Force 1st Battalion, 69th Armor, 25th Infantry Division on Operation Sea Bouston. During the period 5-30 April (26 days), the battalion was in direct support of both of these task forces engaged in Operation Francis Marion.

(2) From 1 February to 20 March, Battery A occupied a position along route 509 west of Pleiku City with the mission of DS Task Force 1st Squadron, 10th Cavalry providing security of route 509. The battery fired harassing and interdiction missions, defensive concentrations, registrations, and destruction missions during this period. One destruction mission fired into a hidden village at grid YL95481 resulted in damage to two huts and the destruction of three others.

(3) Elements of the battalion were involved in some form of training every day of the reporting period, thus 90 days of training were conducted.

SECTION II (C) COMMANDER'S OBSERVATIONS AND RECOMMENDATIONS

Part I, Observations (Lessons Learned)

(C) Logistics:

Item: Truck, 2½ ton, M35A2.

Discussion: Bolts supporting the front engine mount to the engine support blades work loose, developing elongated holes, thereby causing the engine ejector pump to ride on the steering gear. This situation requires that the driver stop the truck every 10 miles when traveling over rough terrain, and tighten bolts supporting the front engine mount to the engine support blades.

Observation: The use of lock plates such as those found on the M113 Armored Personnel Carrier should be used to lock bolts supporting the front engine mount to the engine support blades.

Part II, Recommendations: None
