The Naval Biological Laboratory, a research facility in the School of Public Health, operates under a contract between the Regents of the University of California (Berkeley) and the Office of Naval Research. Naval Medical Research Unit No. 1 of the Bureau of Medicine and Surgery, Department of the Navy, actively collaborates with the Laboratory. Research is concerned with fundamental investigations in the general areas of aerobiology and experimental pathology of infectious diseases as they apply to public health and to medical problems of the Navy.

PUBLICATIONS
of the
Naval Biological Laboratory, School of Public Health
University of California
and
Naval Medical Research Unit #1
Berkeley, California

1942

1. The effects of certain detergents on influenza viruses (Types A and B).
U. S. Naval Medical Bull., 1942, 40:622-631
2. Immunization with inactive virus of influenza B: Comparison of antibody response with that produced by infection.
Public Health Reports, 1942, 57:445-451
3. The inactivation of influenza viruses by the human skin.
U. S. Naval Medical Bull., 1942, 40:839-846
4. A method for the removal of bacterial contaminants from suspensions of influenza virus.
Science, 1942, 96:543-544
5. A quantitative micropipette for intranasal inoculation of mice with virus suspensions.
J. Lab. Clin. Med., 1942, 27:1197-1198
6. Organization for studies on epidemic influenza.
U. S. Naval Medical Bull., 1942, 40:378-388

1943

7. Airborne infections: A review.
War Medicine, 1943, 4:1-30
8. Attempts to protect against influenza virus with various sulfonamides, acridines and antibiotics.
Science, 1943, 98:348-349

9. Bacteriophage.

Albert P. Krueger

In Dictionary of Biochemistry, Malicoff,
Philosophical Library, New York, 1943, p. 57-66

10. Distribution of influenzal antibodies among vaccinated and unvaccinated naval personnel.

U. S. Naval Medical Bull., 1943, 41:426-431

11. The inactivation by human skin of influenza virus in the presence of saliva.

U. S. Naval Medical Bull., 1943, 41:692-697

12. A simplified propylene glycol dispenser for field use.

Science, 1943, 97:208

13. The use of the red blood cell agglutination test in the study of influenza.

U. S. Naval Medical Bull., 1943, 41:114-128

1944

14. The diagnosis of influenza and catarrhal fever, acute.

U. S. Naval Medical Bull., 1944, 42:27-33

15. The effect of temperature, humidity and glycol vapor on the viability of air-borne bacteria.

Am. J. Hyg., 1944, 40:239-250

16. Experimental human influenza.

Am. J. Med. Sci., 1944, 207:306-314

17. The inhalatory route for prophylaxis and treatment of experimental influenza. I. The distribution of inhaled material.

Am. J. Med. Sci., 1944, 207:40-60

18. Laboratory and field studies of glycols and floor-oiling in the control of air-borne bacteria.

U. S. Naval Medical Bull., 1944, 42:1288-1308

19. The tidal air of laboratory animals.

Science, 1944, 99:542

20. Use of gelatin in the influenza red cell agglutination test.
Science, 1944, 99:520

1945

21. Studies on the pH and Eh of normal and influenza-infected eggs.
J. Gen. Physiol., 1945, 28:585-604

1946

22. An improved method for quantitative impregnation of textiles with germicidal emulsifiable oils.
Science, 1946, 104:60-61
23. Studies on the primary isolation of influenza viruses.
U.S. Naval Medical Bull., 1946, 46:369-374

1947

24. Effect of penicillin on the reaction between phage and staphylococci.
A. P. Krueger, T. Cohn and N. Noble
Proc. Soc. Exptl. Biol. Med., 1947, 66:204-205
25. The relation of the oil treatment of floors and bedding to the control of respiratory diseases among naval personnel.
I. L. Shechmeister and Francis S. Greenspan
Am. J. Hyg., 1947, 46:376-407

1948

26. The formation of phage in cell-free preparations.
A. P. Krueger, T. Cohn, P. N. Smith
and C. D. McGuire
U.S. Naval Medical Bull., 1948, 48:510-512
27. Observations on the effect of penicillin on the reaction between phage and staphylococci.
A. P. Krueger, T. Cohn, P. N. Smith and
C. D. McGuire
J. Gen. Physiol., 1948, 31:477-488

1949

28. The effect of sodium chloride on phage formation by staphylococci at elevated temperatures.
J. Fong and A. P. Krueger
J. Gen. Physiol., 1949, 32:279-289
29. Relationship of catalase activity to virulence in Pasteurella pestis.
M. Rockenmacher
Proc. Soc. Exptl. Biol. Med., 1949, 71:99-101
30. Studies on phage production in cell-free filtrates.
C. D. McGuire and A. P. Krueger
Sympos. on Viruses, Am. Chem. Soc. Mtg., 1949
31. Techniques to study air-borne infections.
A. P. Krueger
ONR Research Reviews, March, 1949, 1-7
32. Thermolability of the bacterium-phage complex.
A. P. Krueger and J. Fong
Proc. Soc. Exptl. Biol. Med., 1949, 70:213-214

1950

33. Detection of rough dissociants of Pasteurella pestis with tetrazolium chloride.
H. B. Levine and E. D. Garber
J. Bacteriol., 1950, 60:508
34. The influence of insulin on the rate of glucose oxidation by Pasteurella pestis.
H. B. Levine
J. Gen. Physiol., 1950, 34:161-166
35. A mouth swabbing technique for the laboratory mouse.
C. A. Ostrom and F. C. Hauth
Science, 1950, 112:721-722
36. A new mutation with asymmetrical expression in the mouse.
E. D. Garber and F. C. Hauth
Genetics, 1950, 41:122-124

37. The production of "giant" cells of Pasteurella pestis by treatment with camphor
W. D. Won
J. Bacteriol., 1950, 60:102-103
38. Studies on the experimental epidemiology of respiratory infections. I. An apparatus for the quantitative study of air-borne respiratory infections.
W. R. Leif and A. P. Krueger
J. Infectious Diseases, 1950, 87:103-116
39. Studies on the experimental epidemiology of respiratory infections. II. Observations on the behavior of aerosols of Streptococcus zooepidemicus.
I. L. Shechmeister and L. J. Goldberg
J. Infectious Diseases, 87:117-127
40. Studies on the experimental epidemiology of respiratory infections. III. Certain aspects of the behavior of type A influenza virus as an air-borne cloud.
I. L. Shechmeister
J. Infectious Diseases, 1950, 87:128-132
41. Studies on the experimental epidemiology of respiratory infections. IV. A particle size analyzer applied to the measurement of viable air-borne bacteria.
L. J. Goldberg
J. Infectious Diseases, 1950, 87:133-141
42. The use of a radioactive isotope in determining the retention and initial distribution of air-borne bacteria in the mouse.
L. J. Goldberg and W. R. Leif
Science, 1950, 112:299-300

1951

43. Response of mice to certain avirulent bacteria after exposure to sublethal total body X-irradiation.
I. L. Shechmeister and V. P. Bond
Proc. Soc. Exptl. Biol. Med., 1951, 77:77-80
44. A solid medium for detecting colonial variants of Pasteurella pestis.
E. D. Garber, H. Wolechow and Priscilla Smith
J. Bacteriol., 1951, 61:523

45. Studies on the experimental epidemiology of respiratory infections. V. Evaluation of factors related to slit sampling of air-borne bacteria.

L. J. Goldberg and I. L. Shechmeister
J. Infectious Diseases, 1951, 88:243-247

1952

46. "Bald", a second allele of hairless in the house mouse.

E. D. Garber
J. Heredity, 1952, 43:45-46

47. "Bent-tail", a dominant, sex-linked mutation in the mouse.

E. D. Garber
Proc. Nat. Acad. Sci., 1952, 38:876-879

48. A dominant, sex-linked mutation in the house-mouse.

E. D. Garber
Science, 1952, 116:89

49. The effects of X-irradiation on a naturally occurring endemic infection.

V. P. Bond, I. L. Shechmeister, M. N. Swift and
M. C. Fishler
J. Infectious Diseases, 1952, 91:26-32

50. Flash in photomicrography

R. E. Bevis and W. F. Hetrick
Science, 1952, 115:550

51. History of a naval medical research program.

A. P. Krueger
The Military Surgeon, 1952, 110:405-418

52. Studies on the nutrition and physiology of Pasteurella pestis.
I. A chemically defined culture medium for Pasteurelia pestis.

M. Rockenmacher, H. A. James and S. S. Elberg
J. Bacteriol., 1952, 63:785-794

53. The susceptibility of irradiated mice to infection as a function of post-irradiation time.

I. L. Shechmeister, V. P. Bond and M. N. Swift
J. Immunol., 1952, 68:87-95

54. The virulence of biochemical mutants of Klebsiella pneumoniae.

E. D. Garber, Adeline J. Hackett and R. Franklin
Proc. Nat. Acad. Sci., 1952, 38:693-697

1953

55. An acrylic spray used as a substitute for cover glasses.

J. P. Ransom
Stain Technol., 1953, 28:279-280

56. Experimental studies with vesicular exanthema of swine.

S. H. Madin and J. Traum
Vet. Med., 1953, 48:395-400

57. Experimental studies with vesicular exanthema of swine.
Part II. Studies on stability.

S. H. Madin and J. Traum
Vet. Med., 1953, 48:443-450

58. "Fuzzy", a dominant mutation in the guinea pig.

E. D. Garber
J. Heredity, 1953, 44:(6)

59. Genetic studies on the development of streptomycin resistance
in Pasteurella pestis.

E. D. Garber, Kathryn Noble and N. Carouso
J. Bacteriol., 1953, 65:485-489

60. Studies on Coccidioides immitis: Morphology and sporulation
capacity of forty-seven strains.

Lorraine Friedman, D. Pappagianis, R. J. Berman
and C. E. Smith
J. Lab. Clin. Med., 1953, 42:438-444

61. Use of potassium cyanide in the Giemsa stain.

D. M. Eisler and R. E. Bevis
A.M.A. Arch. Pathol., 1953, 56:647-649

1954

62. Growth of Mallcomyces pseudomallei in simple chemically
defined media.

H. B. Levine, J. H. Dowling, M. Evenson
and O. G. Lien, Jr.
J. Bacteriol., 1954, 67:350-352

63. The oxidative dissimilation of serine by Pasteurella pestis.
H. B. Levine, R. Weimberg, J. H. Dowling,
M. Evenson, M. Rockenmacher and H. Wolochow
J. Bacteriol., 1954, 67:369-376
64. Preliminary studies on the prophylactic value of type "A"
vesicular exanthema immune serum.
S. H. Madin
J. Am. Vet. Med. Assoc., 1954, 125:47-49
65. Studies on the experimental epidemiology of respiratory in-
fection. VI. The relationship between dose of microorganisms
and subsequent infection or death of a host.
L. J. Goldberg, H.M.S. Watkins, M. S. Dolmatz and
N. A. Schlamm
J. Infectious Diseases, 1954, 94:9-21
66. Chronic pneumonic plague in Macaca mulatta.
J. P. Ransom and A. P. Krueger
Am. J. Trop. Med. Hyg., 1954, 3:1040-1054
67. In vitro cultivation and cytopathogenicity of vesicular
exanthema virus.
Mary E. McClain, Stewart H. Madin and Paul C.
Andriese
Proc. Soc. Exptl. Biol. Med., 1954, 86:771-774
68. Stability of vesicular stomatitis virus at varying hydrogen
ion concentrations.
Jacob Fong and S. H. Madin
Proc. Soc. Exptl. Biol. Med , 1954, 86:676-678

1955

69. The detection of tubercle bacilli in mouth wash specimens by
the use of membrane filter cultures.
David E. Rogers, George M. Cooke and Charles E. Meyers
Am. Rev. Tuberc. Pulmonary Diseases, 1955, 71:371-381
70. Vesicular exanthema of swine.
Stewart H. Madin and Jacob Traum
Bacteriol. Rev., 1955, 19:6-21

71. Toxin produced by Malleomyces pseudomallei.
Clara Nigg, Robert J. Heckly and Margaret Colling
Proc. Soc. Exptl. Biol. Med., 1955, 89:17-20
72. Nystatin (Mycostatin) therapy in experimental coccidioidomycosis.
Lee E. Gordon, Charles E. Smith and Donald S. Wedin
Am. Rev. Tuberc. Pulmonary Diseases, 1955, 72:64-70
73. Rapid and precise measurement of moisture in biological materials.
Robert J. Heckly
Science, 1955, 122: 760-761
74. Experimental studies on vesicular stomatitis virus.
I. Factors influencing infectivity titrations in the chick embryo.
Mary E. McClain and Stewart H. Madin
J. Infectious Diseases, 1955, 97:280-286
75. The assay of virulence of coccidioides in white mice
L. Friedman, C. E. Smith and L. E. Gordon
J. Infectious Diseases, 1955, 97:311-316
76. In vitro inhibition of Coccidioides immitis by antihistaminics.
D. Pappagianis and G. Kobayashi
In Therapy of Fungus Diseases (An International Symposium)
1955, Little, Brown and Co., Boston-Toronto, 316-320

1956

77. The inhibitory effect of peptone on the sporulation of three strains of Coccidioides immitis.
Lorraine Friedman and Demosthenes Pappagianis
Am. Rev. Tuberc. Pulmonary Diseases, 1956, 74:147-148
78. Enhancement of virulence of Malleomyces pseudomallei.
Clara Nigg, John Ruch, Eva Scott and Kathryn Noble
J. Bacteriol., 1956, 71:530-541
79. Relationship of the in vivo form of Coccidioides immitis to virulence.
D. Pappagianis, C. E. Smith and G. S. Kobayashi
J. Infectious Diseases, 1956, 98:312-319

80. Determination of respiratory LD₅₀ from number of primary lesions as illustrated by melioidosis.
Arthur M. Dannenberg, Jr., and Eva M. Scott
Proc. Soc. Exptl. Biol. Med., 1956, 92:571-575
81. Vaccination of mice against Coccidioides immitis.
Lorraine Friedman and Charles E. Smith
Am. Rev. Tuberc. Pulmonary Diseases, 1956, 74:245-248
82. Isolation of the infectious bovine rhinotracheitis virus.
Stewart H. Madin, Charles J. York and Delbert G. McKercher
Science, 1956, 124:721-722
83. Survival of Coccidioides immitis under controlled conditions of temperature and humidity.
Lorraine Friedman, Charles E. Smith, D. Pappagianis and R. J. Berman
Am. J. Pub. Health, 1956, 46:1317-1324
84. Hexose oxidation by an enzyme system of Malleomyces pseudo-mallei.
J. H. Dowling and H. B. Levine
J. Bacteriol., 1956, 72:555-560
85. Preliminary studies on the prophylactic and therapeutic values of type B vesicular exanthema immune serum.
Stewart H. Madin
J. Am. Vet. Med. Assoc., 1956, 129:368-370
86. The virulence and infectivity of twenty-seven strains of Coccidioides immitis.
Lorraine Friedman, C. E. Smith, W. G. Roessler and R. J. Berman
Am. J. Hyg., 1956, 64:198-210

1957

87. Studies on the experimental epidemiology of respiratory infections. VII. Apparatus for the exposure of monkeys to infectious aerosols.
H. Wolochow, M. Chatigny and R. S. Speck
J. Infectious Diseases, 1957, 100:48-57

88. Studies on the experimental epidemiology of respiratory infections. VIII. Experimental pneumonic plague in Macacus rhesus.
R. S. Speck and H. Wolochow
J. Infectious Diseases, 1957, 100:58-69
89. Staining of bacterial colonies on the millipore filter to improve contrast.
G. M. Cooke, Eleanor Duffy and H. Wolochow
Stain Technol., 1957, 32:63-66
90. The comparison of four strains of Coccidioides immitis with diverse histories.
Lorraine Friedman and C. E. Smith
Mycopathol. et Mycol. Appl., 1957, 8:47-53
91. Glucose catabolism in Malleomyces pseudomallei.
Ann H. Bokman, H. B. Levine and Monica Lusby
J. Bacteriol., 1957, 73:649-654
92. Infectious bovine rhinotracheitis -- a newly recognized virus disease of cattle.
D. G. McKercher, J. E. Moulton, S. H. Madin and J. W. Kendrick
Am. J. Vet. Research, 1957, 18:246-256
93. The development of pneumonic plague in mice and the effect of paralysis of respiratory cilia upon the course of infection.
P. N. Smith, Joan McCamish, Jane Seely and G. M. Cooke
J. Infectious Diseases, 1957, 100:215-222
94. Studies on detection of human exposure to certain bacterial aerosols by oropharyngeal sampling, rapid identification of organisms, and pathogenesis of pneumonic plague.
C. E. Meyers, H. Wolochow, and P. N. Smith
A Decade of Basic and Applied Science in the Navy.
A symposium sponsored by the Office of Naval Research as part of its decennial year, March 19-20, 1957, Washington, D. C. 134-152
95. The in vitro cultivation of tissues of domestic and laboratory animals.
S. H. Madin, P. C. Andriese and Norman B. Darby
Am. J. Vet. Research, 1957, 18:932-941

96. Preparation and property of a complement-fixing antigen from mycelia of Coccidioides immitis.

D. Pappagianis, C. E. Smith, M. T. Saito and
G. S. Kobayashi
Proc. Symposium on Coccidioidomycosis, Public Health
Service Publication No. 575, 1957, 57-63.

1958

97. Melioidosis: Pathogenesis and immunity in mice and hamsters.
I. Studies with virulent strains of Malleomyces pseudomallei.

Arthur M. Dannenberg, Jr., and Eva M. Scott
J. Exptl. Med., 1958, 107:153-166

98. Electrolytically controlled device for dispensing liquids.

Robert J. Heckly
Science, 1958, 127:233-234

99. An electronic relay colony counter for virulent organisms.

W. R. Leif and H. Wolochow
Am. J. Med. Technol., 1958, 24:6-7

100. New medium for the cultivation of Pasteurella tularensis.

William D. Won
J. Bacteriol., 1958, 75:237-239

101. Mechanical aids in the biological laboratory.

F. C. Hauth and F. X. Ziegler
Med. Tech. Bull., 1958, 9:125-126

102. Isolation of a bacteriophage specific for a Lactobacillus casei from human oral material.

Charles E. Meyers, Eugene L. Walter and Lynn B. Green
J. Dental Research, 1958, 37:175-178

103. The membrane filter technique for estimating numbers of viable bacteria: Some observed limitations with certain species.

H. Wolochow
Appl. Microbiol., 1958, 6:201-206

104. Studies on the experimental epidemiology of respiratory disease.
IX. Recovery of airborne bacteria from the oral cavity of humans: The effect of dosage on recovery.

C. A. Ostrom, H. Wolochow and H. A. James
J. Infectious Diseases, 1958, 102:251-257

105. Plaque morphology and pathogenicity of vesicular exanthema virus.
Mary E. McClain, Adeline J. Hackett and S. H. Madin
Science, 1958, 127:1391-1392
106. An intracellular mortality-enhancing material from Malleomyces pseudomallei.
Monica Lusby and H. B. Levine
J. Immunol., 1958, 80:446-453
107. A particle-sizing method for aerosols and fine powders.
Robert L. Dimmick, Melvin T. Hatch and James Ng
A.M.A. Arch. Ind. Health, 1958, 18:23-29
108. Colonial morphology and virulence of Pasteurella pestis.
Daniel M. Eisler, Gayle Kubik and Herbert Preston
J. Bacteriol., 1958, 76:41-47
109. Lyophilization of Pasteurella pestis.
R. J. Heckly, A. W. Anderson and M. Rockenmacher
Appl. Microbiol., 1958, 6:255-261
110. Automatic water changer and agitator for use in dialysis.
Jack K. Mullen
Med. Tech. Bull., 1958, 9:150-152
111. Production of extracellular polysaccharide in cultures of Coccidioides immitis.
D. Pappagianis and George S. Kobayashi
Mycologia, 1958, L:229-238
112. Established kidney cell lines of normal adult bovine and ovine origin.
S. H. Madin and N. B. Darby, Jr.
Proc. Soc. Exptl. Biol. Med., 1958, 98:574-576
113. Fish hydrolyzate media for Pasteurella pestis.
William D. Won and Oliver G. Lien, Jr.
Am. J. Hyg., 1958, 66:81-84
114. The use of a rotating drum for the study of aerosols over extended periods of time.
L. J. Goldberg, H.M.S. Watkins, E. E. Boerke and M. A. Chatigny
Am. J. Hyg., 1958, 68:85-93

115. Studies of the oral flora in experimental airborne infection: Klebsiella pneumoniae as an indicator organism.
C. A. Ostrom
J. Infectious Diseases, 1958, 103:12-18
116. Toxins of Pseudomonas pseudomallei. I. Production in vitro.
Margaret Colling, Clara Nigg and Robert J. Heckly
J. Bacteriol., 1958, 76:422-426
117. Toxins of Pseudomonas pseudomallei. II. Characterization.
Robert J. Heckly and Clara Nigg
J. Bacteriol., 1958, 76:427-436
118. Chemotherapy of experimental melioidosis in mice.
M. M. Hezebicks and Clara Nigg
Antibiotics & Chemotherapy, 1958, 8:543-560
119. Immunization with an induced avirulent auxotrophic mutant of Pseudomonas pseudomallei.
H. B. Levine and R. L. Maurer
J. Immunol., 1958, 81:433-438
120. Hemagglutination and hemagglutination inhibition by normal serum with a canary pox virus strain.
Dolores F. Gerber and H.M.S. Watkins
J. Immunol., 1958, 81:439-444
121. Melioidosis: Pathogenesis and immunity in mice and hamsters. II. Studies with avirulent strains of Malleomyces pseudomallei.
Arthur M. Dammenberg, Jr., and Eva M. Scott
Am. J. Pathol., 1958, 34:1099-1121
122. Dissociation in Pasteurella pestis: Immunological comparisons of smooth and nonsmooth variants.
Daniel M. Eisler, Gayle Kubik and Herbert Preston
J. Bacteriol., 1958, 76:589-596
123. Dissociation in Pasteurella pestis: Interrelations of smooth and nonsmooth variants.
Daniel M. Eisler, Gayle Kubik and Herbert Preston
J. Bacteriol., 1958, 76:597-606
124. Dark field illuminator for Petri dish photography.
John N. Schutz
J. Biol. Phot. Assoc., 1958, 24:159-164

125. Vesicular exanthema.

Stewart H. Madin

In Diseases of swine, 1958, Iowa State College Press,
p. 169-189

1959

126. Pumping as a means for the mechanical rupture of microorganisms mixed with glass beads.

Carl Lamanna, M. A. Chatigny and E. H. Colledge
J. Bacteriol., 1959, 77:104-109

127. Pneumonic plague in mice. The effect of polyvinylpyrrolidone.

Philip N. Smith
Am. J. Hyg., 1959, 69:21-24

128. Fluorescent labels for antibody proteins. Application to bacterial identification.

H. Wolochow
J. Bacteriol., 1959, 77:164-166

129. Pneumonic plague in mice: Gross and histopathology in untreated and passively immunized animals.

P. N. Smith
J. Infectious Diseases, 1959, 104:78-84

130. Pneumonic plague in mice: Modification of the infection by antibody against specific components of Pasteurella pestis.

P. N. Smith
J. Infectious Diseases, 1959, 104:85-91

131. Effect of excess nitrite on tests for indole and the cholera red reaction.

W. E. Beam, Jr.
J. Bacteriol., 1959, 77:328-330

132. The use of enzymes to aid filtration of oropharyngeal washes through membrane filter.

H. Wolochow, L. J. Wiley, C. A. Ostrom and H. A. James
Am. Rev. Tuberc. Pulmon. Diseases, 1959, 79:541.

133. Experimental subcutaneous coccidioidal infection in the mouse.

Demosthenes Pappagianis, Charles E. Smith, Robert
J. Berman and George S. Kobayashi
J. Invest. Dermatol., 1959, 32:589-598

134. Parameters of gaseous ion effects on the mammalian trachea.
A. Duration of effects. B. Minimal effective ion densities.
Albert P. Krueger and Richard F. Smith
J. Gen. Physiol., 1959, 42:959-969
135. An enzymatic basis for the acceleration of ciliary activity
by negative air ions.
A. P. Krueger and Richard F. Smith
Nature, 1959, 183:1332-1333
136. Purification of animal viruses with $Zn(OH)_2$.
Nelson Newton and Robert E. Bevis
Virology, 1959, 8:344-351
137. Jet disperser for compacted powders in the one- to ten-micron
range.
Robert L. Dimmick
A.M.A. Arch. Ind. Health, 1959, 20:8-14
138. Determination of gluconolactone, galactonolactone, and their
free acids by the hydroxamate method.
Oliver G. Lien, Jr.
Anal. Chem., 1959, 31:1363-1366
139. Activity of type A botulinal toxin and hemagglutinin exposed
to proteolytic enzyme.
Ernest A. Meyer and Carl Lamanna
J. Bacteriol., 1959, 78:175-180
140. Effects of air ions on trachea of primates.
A. P. Krueger, R. F. Smith and J. W. Millar
Proc. Soc. Exptl. Biol. Med., 1959, 101:506-507
141. A mold for production of agar diffusion plates.
R. L. Miller and Robert J. Heckly
J. Lab. Clin. Med., 1959, 54:333-334
142. The most poisonous poison.
Carl Lamanna
Science, 1959, 130:763-772
143. The physiological significance of positive and negative
ionization of the atmosphere.
Albert Paul Krueger and Richard Fernald Smith
Roy. Soc. Health J., 1959, 79:642-648

144. An apparatus for continuous counter-current dialysis.
Robert J. Heckly
Biochim. Biophys. Acta, 1959, 35:548-549
145. Further studies of gaseous ion action on trachea.
A. P. Krueger, R. F. Smith, G. J. Hildebrand and
C. E. Meyers
Proc. Soc. Exptl. Biol. Med., 1959, 102:355-357
146. Mortality enhancing polypeptide constituents from Pseudomonas pseudomallei.
H. B. Levine, O. G. Lien and R. L. Maurer
J. Immunol., 1959, 83:468-477
147. Shadowless photographic backgrounds with sheet plastics.
John N. Schutz
Med. Tech. Bull., 1959, Nov-Dec., 257-258
148. Failure to transfer delayed tuberculin sensitivity from human to animal species.
Felix T. Rapaport and Jack W. Millar
Proc. Soc. Exptl. Biol. Med., 1959, 102:714-717
149. Biological characteristics of two plaque variants of vesicular exanthema of swine virus, type E₅₄.
Mary E. McClain and Adeline J. Hackett
Virology, 1959, 9:577-597
150. Tissue culture in veterinary medical research.
S. H. Madin
In Advances in veterinary science, Vol. V., 1959,
Academic Press, Inc., New York, p. 329-417

1960

151. Separating serum from blood. (A new method).
Ernest A. Meyer
Am. Med. Technol. J., February, 1960, 16-17
152. Photographic preparations in test tubes. (A special holder)
John N. Schutz
Am. Med. Technol. J., February, 1960, 15.

153. Use of autoclavable plastic material for do-it-yourself solutions to laboratory problems of safety.
Carl Lamanna
J. Lab. Clin. Med., 1960, 55:319-321
154. Lyophilization of Brucella melitensis
Robert J. Heckly, Kenneth Faunce, Jr., and
Sanford S. Elberg
Appl. Microbiol., 1960, 8:52-54
155. The biological mechanisms of air ion action. I. 5-Hydroxy-tryptamine as the endogenous mediator of positive air ion effects on the mammalian trachea.
Albert P. Krueger, and Richard F. Smith
J. Gen. Physiol., 1960, 43:533-540
156. Occurrence of poly- β -hydroxybutyrate in Pseudomonas pseudomallei.
H. B. Levine and H. Wolochow
J. Bacteriol., 1960, 79:305-306
157. Fractionation by free electrophoresis.
Robert J. Heckly
Biochim. Biophys. Acta, 1960, 38:370-372
158. Melioidosis: Pathogenesis and immunity in mice and hamsters. III. Effect of vaccination with avirulent strains of Pseudomonas pseudomallei on the resistance to the establishment and the resistance to the progress of respiratory melioidosis caused by virulent strains; all-or-none aspects of this disease.
Arthur M. Dannenberg, Jr., and Eva M. Scott
J. Immunol., 1960, 84:233-246
159. Influence of ingested foods on the oral toxicity in mice of crystalline botulin type A toxin.
Carl Lamanna and Charles E. Meyers
J. Bacteriol., 1960, 79:406-410
160. Comparative study of the agglutinogens of the endospores of Bacillus anthracis and Bacillus cereus.
Carl Lamanna and Daniel Eisler
J. Bacteriol., 1960, 79:435-441

161. Toxicity of bacterial exotoxins by the oral route.
Carl Lamanna
Science, 1960, 131:1100-1101
162. X-ray irradiation of Coccidioides immitis arthrospores:
Survival curves and avirulent mutants isolated.
J. M. Foley, R. J. Berman, and C. E. Smith
J. Bacteriol., 1960, 79:480-487
163. Immunity to coccidioidomycosis induced in mice by purified
spherule, arthrospore, and mycelial vaccines.
H. B. Levine, James M. Cobb, and C. E. Smith
Trans. N. Y. Acad. Sci., Ser. II, 1960, 22:436-449
164. On the size of the toxic particle passing the intestinal
barrier in botulism.
Robert J. Heckly, G. J. Hildebrand, and Carl Lamanna
J. Exptl. Med., 1960, 111:745-759
165. Effect of urocanic acid and dipicolinic acid on bacteria
exposed to ultraviolet radiation.
W. R. Leif and J. E. Hebert
Am. J. Hyg., 1960, 71:285-291
166. Some biologic properties of gaseous ions.
Albert Paul Krueger
J. Albert Einstein Med. Cen., 1960, 8:79-88
167. Transfer of delayed hypersensitivity to coccidioidin in man.
F. T. Rapaport, H. S. Lawrence, J. W. Millar,
D. Pappagianis, and C. E. Smith
J. Immunol., 1960, 84:358-367
168. The immunologic properties of coccidioidin as a skin test
reagent in man.
F. T. Rapaport, H. S. Lawrence, J. W. Millar,
D. Pappagianis, and C. E. Smith
J. Immunol., 1960, 84:368-373
169. Experimental studies on a new feline virus.
Robert A. Crandell and Stewart H. Madin
Am. J. Vet. Res., 1960, 21:551-556

170. Response of monkeys to respiratory challenge following subcutaneous inoculation with Coccidioides immitis.
D. Pappagianis, Robert L. Miller, C. E. Smith
and G. S. Kobayashi
Am. Rev. Respir. Diseases, 1960, 82:244-250
171. Approaches to the physiology of Coccidioides immitis.
Demosthenes Pappagianis and George S. Kobayashi
Ann. N. Y. Acad. Sci., 1960, 89:109-121
172. A system for fractionating by density gradient procedures.
Robert J. Heckly
Anal. Biochem., 1960, 1:97-102
173. Adaptation of the "focuspot" rangefinder for closeup flash photography.
John N. Schutz
J. Biol. Photo Assoc., 1960, 28:117
174. Blow pipe for cleaning light traps on film holders.
John N. Schutz
J. Biol. Photo Assoc., 1960, 28:118
175. Delayed recovery of airborne Serratia marcescens after short-time exposure to ultra-violet irradiation.
R. L. Dimmick
Nature, 1960, 187:251-252
176. Characteristics of dried Serratia marcescens in the airborne state.
Robert L. Dimmick
J. Bacteriol., 1960, 80:289-296
177. The biological mechanisms of air ion action. II. Negative air ion effects on the concentration and metabolism of 5-hydroxytryptamine in the mammalian respiratory tract.
Albert P. Krueger and Richard F. Smith
J. Gen. Physiol., 1960, 44:269-276
178. Oral poisoning by bacterial exotoxins exemplified in botulism.
Carl Lamanna
Ann. N. Y. Acad. Sci., 1960, 88:1109-1114

179. Some attributes of virulence in Shigella.
H.M.S. Watkins
Ann. N. Y. Acad. Sci., 1960, 83:1167-1186
180. Detection of viability in aged or injured Pasteurella tularensis.
N. A. Schlamm
J. Bacteriol., 1960, 80:818-822
181. Inhibitory influence of ethanol on serotonin metabolism.
George Rosenfeld
Proc. Soc. Exptl. Biol Med., 1960, 103:144-149
182. Potentiation of the narcotic action and acute toxicity of alcohol by primary aromatic monoamines.
George Rosenfeld
Quart. J. Studies Alc., 1960, 21:584-596
183. Spectrophotometric determination of germanium in biological materials.
George Rosenfeld
Anal. Biochem., 1960, 1:469-477
184. Measurement of the physical decay of aerosols by a light scatter method compared to a radioactive tracer method.
Robert L. Dimmick
J. Hyg., Camb., 1960, 58:373-379
185. A visual approach to bio-assay.
L. J. Goldberg
In Quantitative Methods in Pharmacology,
H. deJonge (ed.). No. Holland Publ. Co.,
Amsterdam (Interscience Publ., Inc., N. Y.)
1960, 172-205

1961

186. Precipitins against Pasteurella pestis in normal and anti-bacterial sera.
Daniel M. Eisler and Eleanor von Metz
J. Immunol., 1961, 86:17-21
187. Immunization of mice with viable Coccidioides immitis.
D. Pappagianis, H. B. Levine, C. E. Smith,
R. J. Berman, and G. S. Kobayashi
J. Immunol., 1961, 86:28-34

188. Phagocytosis of staphylococci by mouse leukocytes in the presence of botulinum toxin.
Noel L. Freeman
J. Bacteriol., 1961, 81:156-157
189. Studies of antigens from young mycelia of Coccidioides immitis.
D. Pappagianis, C. E. Smith, G. S. Kobayashi, and Margaret T. Saito
J. Infectious Diseases, 1961, 108:35-44
190. Coagulation of human plasma by Pasteurella pestis.
Daniel M. Eisler
J. Bacteriol., 1961, 81:241-245
191. A light-scatter probe for aerosol studies.
Robert L. Dimmick
Am. Ind. Hyg. Assoc. J., 1961, 22:80-81
192. Influence of ions and dinitrophenol on adrenocortical steroidogenesis.
George Rosenfeld
Am. J. Physiol., 1961, 200:477-482
193. The recovery of aerosolized bacteria from humans.
I. Effects of varying exposure, sampling times, and subject variability.
Charles E. Meyers, Howard A. James, and Calvin Zippin
Arch. Environ. Health, 1961, 2:384-390
194. The recovery of aerosolized bacteria from humans.
II. Estimation of number of samples necessary for specified assurance of detecting exposure to an indicator organism.
Howard A. James, Calvin Zippin and Charles E. Meyers
Arch. Environ. Health, 1961, 2:391-396
195. Antigenic relationship of the endospores of Bacillus cereus-like insect pathogens to Bacillus cereus and Bacillus anthracis.
Carl Lamanna and Linda Jones
J. Bacteriol., 1961, 81:622-625
196. Melioidosis: Pathogenesis in rabbits. I. In vivo studies in the rabbit ear chamber.
Russell Miller and Doris I. Clinger
Arch. Pathol., 1961, 71:629-634

197. Melioidosis: Pathogenesis in rabbits. II. A simplified surgical technique for in vivo observations of pathologic changes in abdominal viscera.
Russell Miller and Doris Clinger
Arch. Pathol., 1961, 71:635-640
198. Purification of the spherule-endospore phase of Coccidioides immitis.
H. B. Levine
Sabouraudia, 1961, 1(2):112-115
199. Distribution and particle size of type A botulinum toxin in body fluids of intravenously injected rabbits.
G. J. Hildebrand, Carl Lamanna and Robert J. Heckly
Proc. Soc. Exptl. Biol. Med., 1961, 107:284-289
200. Immunogenicity of spherule-endospore vaccines of Coccidioides immitis for mice.
H. B. Levine, James M. Cobb, and C. E. Smith
J. Immunol., 1961, 87:218-227
201. Complement fixation test in experimental clinical and sub-clinical melioidosis.
Clara Nigg and Margaret M. Johnston
J. Bacteriol., 1961, 82:159-168
202. Human coccidioidomycosis.
Charles E. Smith, Demosthenes Pappagianis, Hillel B. Levine, and Margaret Saito
Bacteriol. Rev., 1961, 25:310-320
203. Immunological aspects of airborne infection: Some general considerations of response to inhalation of toxins.
Carl Lamanna
Bacteriol. Rev., 1961, 25:323-330
204. The cellular changes produced by two variants within type E₅₄ of vesicular exanthema of swine virus in tissue culture.
Adeline J. Hackett
Virology, 1961, 15:102-112
205. Free-radical formation during storage of freeze-dried Serratia marcescens.
R. L. Dimmick, R. J. Heckly, and D. P. Hollis
Nature, 1961, 192:776-777

206. Polysaccharide of Coccidioides immitis.
D. Pappagianis, E. W. Putman, and G. S. Kobayashi
J. Bacteriol., 1961, 82:648-656
207. Growth of shigellae in monolayer tissue cultures.
Dolores F. Gerber and H.M.S. Watkins
J. Bacteriol., 1961, 82:815-822
208. Preservation of bacteria by lyophilization.

In Advances in Applied Microbiology, v. 3, pp. 1-76,
W. Umbreit (ed.), Academic Press, Inc., New York.
209. Protection against infection in the microbiological laboratory: Devices and procedures.
Mark A. Chatigny
In Advances in Applied Microbiology, v. 3, pp. 131-192, W. Umbreit (ed.), Academic Press, Inc., New York.
210. Propagation and attenuation of hog cholera virus in tissue culture.
James H. Gillespie, Ben E. Sheffy, Leroy Coggins, Stewart H. Madin, and James A. Baker
Ann. Proc. U.S. Livestock Sanitary Assoc., 1961, 65:57-63
211. Endotoxic properties of Pseudomonas pseudomallei.
Felix T. Rapaport, Jack W. Millar, and John Ruch
Arch. Pathol., 1961, 71:429-436
212. Detection of inclusion bodies containing deoxyribonucleic acid by means of autoradiography.
Moshe Aronson and Sanford S. Elberg
Nature, 1961, 192:981-982

1962

213. Immunogenicity of experimental vaccines in systemic mycoses.
H. B. Levine
Fungi and Fungous Disease (Gilbert Dalldorf, Ed.)
A Symposium of the Section of Microbiology. The N. Y. Academy of Medicine. Charles C. Thomas, Springfield.
1962. Chapter 18, pp. 254-276

214. Translocation of bacteriophage across the intestinal wall of the rat.
G. J. Hildebrand and H. Wolochow
Proc. Soc. Exptl. Biol. Med., 1962, 109:183-185
215. Studies on the survival characteristics of the parasitic phase of Coccidioides immitis with comments on contagion.
Lorraine Friedman, C. E. Smith and R. J. Berman
Am. Rev. Respirat. Diseases, 1962, 85:224-231
216. Air ions and physiological function.
Albert Paul Krueger
J. Gen. Physiol., 1962, 45:233-241, Supplement
217. Chromosomes in a marsupial (Potorous tridactylis) tissue culture.
Kirsten H. Walen and Spencer W. Brown
Nature, 1962, 194:406
218. Studies on the effects of gaseous ions on plant growth.
I. The influence of positive and negative air ions on the growth of Avena sativa.
Albert P. Krueger, Sadao Kotaka and Paul C. Andriese
J. Gen. Physiol., 1962, 45:879-895
219. Studies on the effects of gaseous ions on plant growth.
II. The construction and operation of an air purification unit for use in studies on the biological effects of gaseous ions.
Albert P. Krueger, J. C. Beckett, Paul C. Andriese and Sadao Kotaka
J. Gen. Physiol., 1962, 45:897-904
220. The preservation of selected mammalian cells by freezing and storage at -64°C. I. Studies on the short-term preservation of eight mammalian cell strains.
Irving J. Green
J. Formosan Medical Association, 1962, 61:527-536
221. The preservation of selected mammalian cells by freezing and storage at -64°C. II. The long-term preservation of eight mammalian cell strains.
Irvin J. Green
J. Formosan Medical Association, 1962, 61:537-544

222. The photodynamic effects of acridine orange on an RNA virus (Vesicular Exanthema).
Adeline J. Hackett
Photochemistry and Photobiology, 1962, 1:147-154
223. Influence of vaccination on respiratory coccidioid disease in Cynomolgous monkeys.
H. B. Levine, R. L. Miller and C. E. Smith
J. Immunol., 1962, 89:242-251
224. Cellular resistance in tissue culture, induced by noncytopathogenic strains, to a cytopathogenic strain of virus diarrhea virus of cattle.
James H. Gillespie, Stewart H. Madin and Norman B. Darby, Jr.
Proc. Soc. Exptl. Biol. Med., 1962, 110:248-250
225. Serial propagation of Influenza B (Lee) virus in a transmissible line of canine kidney cells.
Irving J. Green
Science, 1962, 138:42-43
226. Enhancement of experimental coccidioidomycosis in mice with testosterone and oestradiol
H. B. Levine and S. H. Madin
Sabouraudia, 1962, 2: Part 2, 47-55
227. Studies on the effects of gaseous ions on the mammalian trachea.
Albert P. Krueger and Richard F. Smith
Biometeorology, Pergamon Press, 1962, 498-506
228. Some observations on the physiological effects of gaseous ions.
Albert P. Krueger, Sadao Kotaka and Paul C. Andriese

262. Studies on air-ion-enhanced iron chlorosis. I. Active and residual iron.
A. P. Krueger, S. Kotaka and P. C. Andriese
Int. J. Biometeor., 1964, 8:5-16
263. The effect of air containing O_2^- , O_2^+ , CO_2^- and CO_2^+ on the growth of seedlings of Hordeum vulgare.
A. P. Krueger, S. Kotaka and P. C. Andriese
Int. J. Biometeor., 1964, 8:17-25

264. A rapid screening method for microorganisms producing antibiotics.
James M. Cobb and H. B. Levine
Health Laboratory Science, 1964, 1:307-308
265. Toxic lysolipoid: Isolation from Pseudomonas pseudomallei.
M. S. Redfearn
Science, 1964, 146:648-649
266. Attachment and growth of bacteria on surfaces of continuous-culture vessels.
Don H. Larsen and R. L. Dimmick
J. Bacteriol., 1964, 88:1380-1387.
267. Differentiation of exotoxin and other biologically active substances in Pseudomonas pseudomallei filtrates.
Robert J. Heckly
J. Bacteriol., 1964, 88:1730-1736
268. Standard sampler for assay of airborne microorganisms.
P. S. Brachman, R. Ehrlich, H. F. Eichenwald,
V. J. Cabelli, T. W. Kethley, S. H. Madin,
J. R. Maltman, G. Middlebrook, J. D. Morton,
T. H. Silver and E. K. Wolfe.
Science, 1964, 144:1295
269. Pathogenesis of experimental brucellosis of rabbits in pseudopregnancy.
A. J. Kniazeff, S. S. Elberg and J. Traum
J. Compar. Pathology and Therapeutics, 1964,
74:141-150
270. Animal cell strains.
The Cell Culture Collection Committee
Science, 1964, 146:241-243
271. Catalase activity of a crude enzyme preparation from iron-chlorotic barley (Hordeum vulgare) seedlings.
Sadao Kotaka, Albert P. Krueger and P. C. Andriese
Nature, 1964, 204:1198-1199
272. The electron microscopy of RNA from reovirus and wound tumor virus.
A. K. Kleinschmidt, T. H. Dunnebacke, F. L. Schaffer,
R. S. Spendlove and R. F. Whitcomb
J. Molecular Biol., 1964, 10:282-288

273. Behavior of Colorado tick fever, vesicular stomatitis, neurovaccinia and encephalomyocarditis viruses in the airborne state.
H.M.S. Watkins, L. J. Goldberg, E. F. Deig and W. R. Leif
Proceedings, First Intern. Symp. Aerobiology, Berkeley, 1963, pp. 381-388 (1965).
274. Preliminary studies with a continuous impinger for collection of bacterial and viral aerosol samples.
L. J. Goldberg and H.M.S. Watkins
Proceedings, First Intern. Symp. Aerobiology, Berkeley, 1963, pp. 211-218 (1965).
275. A study of dynamic aerosols of bacteria subjected to rapid changes in relative humidity.
M. T. Hatch and R. L. Dimmick
Proceedings, First Intern. Symp. Aerobiology, Berkeley, 1963, pp. 265-281 (1965).
276. Survival of lyophilized bacteria during storage.
R. J. Heckly and R. L. Dimmick
Proceedings, First Intern. Symp. Aerobiology, Berkeley, 1963, pp. 305-317 (1965).
277. Aerosols produced by dental instrumentation.
R. L. Miller, W. E. Burton and R. W. Spore
Proceedings, First Intern. Symp. Aerobiology, Berkeley, 1963, pp. 97-120 (1965).
278. An approach to study of microflora in atmosphere.
R. L. Dimmick and R. J. Heckly
Proceedings, Atmospheric Biology Conference, 1965 pp. 187-197
279. Rhythmic response of Serratia marcescens to elevated temperature.
R. L. Dimmick
J. Bacteriol., 1965, 89:791-798
280. Immunization of mice to Coccidioides immitis: dose, regimen and spherulation stage of killed vaccines.
H. B. Levine and Y. M. Kong
J. Immunol., 1965, 94:132-142

281. An apparatus for sampling density gradients.
Nelson Newton
Analyt. Biochem., 1965, 10:361-364
282. Antibodies in human coccidioidomycosis: Immunolectric properties.
D. Pappagianis, Norma J. Lindsey, C. E. Smith
and Margaret Saito
Proc. Soc. Exp. Biol. Med., 1965, 118:118-122
283. Enzymatic enhancement of reovirus infectivity.
R. S. Spendlove and F. L. Schaffer
J. Bacteriol, 1965, 89:597-602
284. Peculiarities of ovine cells in culture.
W. A. Nelson-Rees, A. J. Kniazeff and N. B. Darby
Chromosoma, 1965, 16:79-89
285. Depolarizing action of endotoxin.
G. J. Hildebrand and Y. M. Seys
Nature, 1965, 206:406-407
286. Role of hyperreactivity of bronchial and pulmonary vascular muscle to acetylcholine and to histamine in anaphylactic shock in rabbits and guinea pigs.
James Ng, Y. M. Seys and G. J. Hildebrand
Intern. Arch. Allergy Appl. Immunol., 1965, 27:35-45
287. Spatial relationships in the replication of chromosomal DNA.
Kirsten H. Walen
Genetics, 1965, 51:915-929
288. Similarities of biophysical properties of several human enteroviruses as shown by density gradient ultracentrifugation of mixtures of the viruses.
F. L. Schaffer and L. H. Frommhagen
Virology, 1965, 25:662-664
