NOTICE

Distribution of this report in full-size copy is made on a loan basis upon request to Personnel Research Laboratory (PROI), Lackland AFB, Texas 78236. Microform copy is available from the Defense Documentation Center to qualified DDC users.

When US Government drawings, specifications, or other data are used for any purpose other than a definitely related Government procurement operation, the Government thereby incurs no responsibility nor any obligation whatsoever, and the fact that the Government may have formulated, furnished, or in any way supplied the said drawings, specifications, or other data is not to be regarded by implication or otherwise, as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use, or sell any patented invention that may in any way be related thereto.

DICTIONARY OF VARIABLES FOR PREVENTIVE MEDICINE INVENTORY AFSCS 907X0

IDENT	VARIABLE DEFINITION OR DESCRIPTION	FORMAT
C001	= CASE IDENTIFICATION ASSIGNED BY INPUT PROGRAM	I4
C002	= NUMBER OF NON-ZERO RESPONSES TO THE QUESTIONAIRE	I4
C003	= KPATH SEQUENCE NUMBER	I4
C004	= DECISION VALUE USED TO COMBINE CASES AT THIS STAGE (BEST OR AVERAGE BETWEEN)	F6.2
C005	= AVERAGE OF ALL VALUES IN THIS GROUP AT A GIVEN STAGE (AVERAGE WITHIN)	F6.2
V001	= CASE CONTROL NUMBER	1A4

13 ABSTRACT

A job inventory covering four specialties in the Preventive Medicine Career Ladder, and consisting of 275 tasks grouped under 16 duty categories, was administered to 381 airmen in 14 major air commands. Incumbents of all skill levels completed a background information section and rated on a 7-point scale relative time spent on tasks. The airmen also indicated on a 7-point scale amount of work experience on each task compared with other tasks performed. Job descriptions are presented for 32 groups selected according to background information variables. Included are 8 specialty groups, 10 groups with differing lengths of military service, 6 groups with differing job interests, 2 groups differing in directed duty assignment, 2 groups defined according to assignment inside or outside CONUS, 2 groups having had specific technical courses and 2 groups without these courses. Job descriptions are also presented for the Preventive Medicine Career Ladder total sample and for 17 significant job types identified by the automated job clustering program.

A group overlap matrix shows the similarity of groups in terms of time spent on tasks. Summary tables indicate the percentage of members in each group who perform each task. Group difference descriptions are given for selected groups. Distributions of background variables for the total sample and for the 32 specialty groups are also shown.
