OAR
INDEX OF RESEARCH RESULTS
1967★1968

Editor
Jacob Seiden

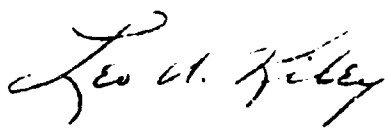
OFFICE OF AEROSPACE RESEARCH
United States Air Force
Arlington, Va.

FOREWORD

This 1967-1968 issue of the *OAR Index of Research Results* represents a continuous effort on the part of the Office of Aerospace Research to assure that the results of OAR research are made available to interested users throughout the scientific community.

By disseminating the results of OAR research included in this *Index* to scientists in industry, in Government and at the universities throughout the world, we not only implement the Air Force responsibility for "coupling" -- i.e., the transfer of OAR research results to potential users, with a resultant feedback to OAR -- but we also aid in fulfilling an even greater Government responsibility, i.e., the broadest dissemination of information possible to the scientific community worldwide.

We hope that this *Index*, representing as it does the results of research conducted by highly competent scientists, both in-house and at university and industry laboratories throughout the world, contributes to this fulfillment.



LEO A. KILEY
Brigadier General, USAF
Commander

INTRODUCTION

The OAR Index of Research Results, 1967-1968 has been so constructed as to permit the user

- to readily identify all scientific and technical reports produced and published by the various OAR subordinate units during the calendar years 1967 and 1968.

- to provide a record of the results of research sponsored by OAR at the AFSC laboratories during this same period.

- to furnish a ready reference for the identification of technical reports produced by particular authors or contractors, or under certain contracts, grants, or projects.

The *Index* is divided into several parts beginning with a Bibliography (Section I) of the results of both OAR-conducted and -sponsored research published during 1967 and 1968. This Bibliography is organized into subsections (A through F) representing AFSC through ORA. Within each subsection the technical reports are arranged alphanumerically according to the report numbers assigned by each organization. Each bibliographic entry includes the following information (if available and applicable): report number; corporate author; title and date; security classification (if classified); name(s) of the author(s); Defense Documentation Center (DDC) accession (AD) number; OAR accession number; contract or grant (instrument) number; and project and task numbers. Several Indexes (Sections II through VII) follow the Bibliography and are keyed to it by the report numbers. These are Corporate-Author, Author, Contract/Grant-Number, Project-Number, AD-Number, and KWIC (Keyword-in-Context)-Type Subject Indexes. (The last-mentioned introduces a new "across-the-page" format, with the keywords to the far left, instead of down the center of the listings as in the 1965-1966 issue. This format should make it easier for the user to follow.) Three Appendices are also included to assist the user to reference pertinent reports to the relevant Air Force R&D organizations and projects.

Every effort has been made to incorporate all research results published during 1967-1968, whether from OAR-conducted or OAR-sponsored research. Questions concerning this publication, or suggestions for improving subsequent *Indexes of Research Results*, should be directed to HQ Office of Aerospace Research (RRYC), 1400 Wilson Boulevard, Arlington, Virginia 22209.
