INTRODUCTION

This bibliography is intended to provide background reading for a study performed by IDA for the Office of Research of the Urban Mass Transportation Administration of the U.S. Department of Transportation. In keeping with the focus of the IDA Study, S-351, Intra-Airport Transportation Systems: An Examination of Technology and Evaluation Methodology, a survey of documents and articles was made to help identify current data and studies relating to air travel demand projections, alternative airport configurations, flow patterns and rates, and available or potential ground transportation concepts, systems, and components. This bibliography covers the subject areas up to August 1969.

STATISTICS AND PROJECTIONS ON AIR TRAVEL

1. A Digest and Assessment of Air Travel Forecasting Techniques, Ralph A. Calderone, Institute of Transportation and Traffic Engineering, California Univ. Berkeley. 1967.
2. "Airborne Stampede," J. M. Dixon. Architectural Forum, vol 128, January 1968, pp. 90-7.
3. Air Carrier Financial Statistics, 1957, q. Civil Aeronautics Board, Office of Carrier Accounts and Statistics, Washington, D.C.
4. Airports for the Future, Institute of Civil Engineers (London) 1967.
5. An Analysis of Intercity Passenger Movement Within the California Corridor Through 1980, William L. Metzger, and Howard R. Ross. Stanford Research Institute Final Report, FAA-ADS-75.
6. Aviation Demand and Airport Facility Requirements Forecasts for Large Air Transportation Hubs Through 1980, Department of Transportation, FAA, August 1967.
7. "Calling the Turns," Aeroplane, October 9, 1968.
8. "Chicago O'Hare International--The World's Busiest Airport," Interavia, vol 23, July 1968, pp. 866-868.
9. "City Characteristics and the Demand for Interurban Air Travel," Wesley H. Long. (Paper from unidentified document in UMT Library.)
10. Demand Analysis for Air Travel by Supersonic Transport, Institute for Defense Analyses, Vol. 1 AD-652309, Vol. 2 AD-652310 (DSA).
11. Economic Impact on Domestic Air Traffic, An Econometric Approach, Prepared for the 1969 Joint National Meeting Operations Research Society of America and American Astronautical Society
12. FAA: Airport Activity Statistics, Federal Aviation Administration, No. TL 535.5 .A4, Copy 2, 1965.
13. FAA: Airport Activity Statistics of Certificated Route Air Carriers, Civil Aeronautics Board and Federal Aviation Administration (DOT), December 13, 1967.
14. FAA: Air Traffic Patterns and Community Characteristics, Federal Aviation Administration, 1963.

15. FAA: Aviation Demand and Airport Facility Requirement Forecasts for Large Air Transportation Hubs Through 1980. FAA. Aug. 1967.
16. FAA: Aviation Forecasts Fiscal Years 1967-1977, Federal Aviation Administration, 1967.
17. "Forecast and Inventory Issue," Aviation Week, March 10, 1969.
18. "Forecasting Air Traffic," Ronald E. Miller, ASCE, Aerospace Transportation Division Journal, Vol. 91, October 1965, pp. 1-12.
19. Forecasting for Air Transport--Methods and Results, G. Besse, and G. Desmas. ITA Study 66/7 E. 1966.
20. "Forecasts for Philadelphia International Airport," P. H. Stafford. ASCE Transportation Engineers Conference - Preprint 396, October 1966. Also: ASCE Proceedings, Vol. 93, Paper 5452, September 1967, pp. 9-20.
21. Future Air Traffic and Implications for Airports, Roderick Heitmeyer. IATA, 17th Conference. October 1967.
22. General Aviation Study and Forecast of Fleet and Its Use in 1975, U.S. Federal Aviation Administration, Office of Policy Development, Washington, D. C. 1966.
23. Handbook of Airline Statistics, 1965 Edition, Civil Aeronautics Board, U.S. Government Printing Office, Washington, D.C., 1966.
24. "The Key to Air Traffic Growth," Interavia, April 1967.
25. Methodology of Forecasting North Atlantic Air Traffic, Federal Aviation Administration, October 1967.
26. "Next 50 Years in Aviation," W. M. Hawkins. Astronautics & Aeronautics Vol. 3, No. 7, July 1965, pp. 90-9.
27. 1965 Facts and Figures. Air Transport Association.
28. 1967 Air Transport Facts and Figures. Air Transport Association of America, Washington, D. C. 1967.

13. ABSTRACT (U) This bibliography is intended to provide background reading for a study performed by IDA for the Office of Research of the Urban Mass Transportation Administration of the U.S. Department of Transportation. In keeping with the focus of the IDA Study, S-351, <u>Intra-Airport Transportation Systems: An Examination of Technology and Evaluation Methodology</u>, a survey of documents and articles was made to help identify current data and studies relating to air travel demand projections, alternative airport configurations, flow patterns and rates, and available or potential ground transportation concepts, systems, and components. This bibliography covers the subject areas up to August 1969.
