FOREWORD

This volume completes the bibliographic listing of translations from foreign publications held in the Technical Library, Fort Detrick. These translations are listed numerically as they were acquisitioned by the Library. In addition to the present volume, the series includes: Miscellaneous Publication 42, covering translations numbered 800 through 1199; Miscellaneous Publication 43, 1200 through 1699; Miscellaneous Publication 44, 1700 through 2199; and Miscellaneous Publication 45, 2200 through 2741. Subject and author indexes are available for all volumes; each volume includes translations from about 20 different languages.

Complete information was not available for a few citations, but all available information has been included.

Most of these translations have been incorporated into the Defense Documentation Center (DDC) holdings, and eligible readers may obtain copies from there. The DDC accession number is shown with each translation available there. An occasional translation will be shown with a JPRS or Technical Translation number; these may also be obtained by that number from DDC.

Mrs. Ethel M. Gretzinger was of invaluable help in researching the citations in the Technical Library and offered many constructive suggestions. Her extensive knowledge of source materials made possible a much more accurate bibliography than would otherwise have been realized. The author also is grateful to Mrs. Carol L. Brown, who typed the final copy. Her willingness to undertake this tedious task, and to perform it so well, was most helpful in completing this assignment.

ABSTRACT

This volume contains a sequential bibliographic listing of 799 translations from the files of the Technical Library, Fort Detrick, Frederick, Maryland, and the call numbers by which they can be requested from Defense Documentation Center. Complete subject and author indexes are included.
