NOTICES

When Government drawings, specifications, or other data are used for any purpose other than in connection with a definitely related Government procurement operation, the United States Government thereby incurs no responsibility nor any obligation whatsoever; and the fact that the Government may have formulated, furnished, or in any way supplied the said drawings, specifications, or other data, is not to be regarded by application or otherwise as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use, or sell any patented invention that may in any way be related thereto.

All distribution of this document is controlled. This document may be further distributed by any holder only with specific prior approval of:

Director of Supersonic Transport Development
Federal Aviation Agency
Washington, D. C. 20553

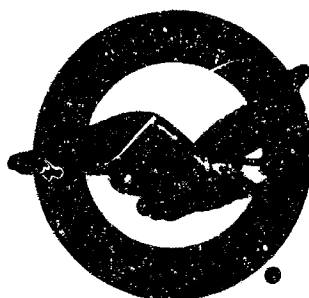

The distribution of this document is limited because it contains technology identifiable with items excluded from export by the Department of State (U. S. Export Control Act of 1949 as amended).

PREFACE

This index is presented in the following two parts:

Part A is a listing of proposal responses to material required by Section 5 (Substantiating Data) in the Request for Proposal. This material is presented in the format of RFP Section 5.

Part B is a complete detailed table of contents for the proposal.

General responses to the RFP are found by reference to Part A. If more detailed information is desired, the item found in Part A should be looked up in the appropriate Volume, Report, and Section in Part B.

PART A
RFP (SECTION 5)/PROPOSAL INDEX

RFP Description	Volume	Report	Section	Page
TECHNICAL/ENGINE	III			
Engine Performance	III	A		AIII-1
System	III	A	II	AIII-6
Uninstalled	III	A	II	AIII-9
Installation Effects Of:				
Thrust Reverser.	III	A	II	AIII-12
Noise Suppression Devices.	III	A	I	AI-13
Reverse Thrust	III	A	II	AIII-12
Engine Windmilling Drag	III	A	II	AIII-11
Engine Acceleration Time	III	A	II	AIII-15
Starting Characteristics	III	A	II	AIII-12
Ground Starting Time	III	A	II	AIII-12
East of In-Flight Starts	III	A	II	AIII-14
Cycle Calculations	III	A	II	AIII-19
Reasons for Engine Operating Limitations				
During Transient Regime	III	A	II	AIII-10
Components	III	A	III	AIIIA-1
Compressor/Fan	III	A	III	AIIIA-2
Phase II-C Performance	III	A	III	AIIIA-15
FTS Performance	III	A	III	AIIIA-38
Type Certification Performance	III	A	III	AIIIA-2
Primary Combustor.	III	A	III	AIIIB-1
Phase II-C Performance	III	A	III	AIIIB-2
FTS Performance	III	A	III	AIIIB-2
Type Certification Performance	III	A	III	AIIIB-20
Turbine	III	A	III	AIIIC-1
Phase II-C Performance	III	A	III	AIIIC-3
FTS Performance	III	A	III	AIIIC-4
Type Certification Performance	III	A	III	AIIIC-15
Augmentor	III	A	III	AIIID-1
Phase II-C Performance	III	A	III	AIIID-6
FTS Performance	III	A	III	AIIID-10
Type Certification Performance	III	A	III	AIIID-14
Exhaust Nozzle	III	A	III	AIIIE-1
Phase II-C Performance	III	A	III	AIIIE-11
FTS Performance	III	A	III	AIIIE-13
Type Certification Performance	III	A	III	AIIIE-13
Thrust Reverser.	III	A	III	AIIIE-20
Phase II-C Performance	III	A	III	AIIIE-20
FTS Performance	III	A	III	AIIIE-20
Type Certification Performance	III	A	III	AIIIE-20

REPORT B ENGINE DESIGN REPORT.	III	B		
Section I Introduction	III	B	I	BI-1
A. Design Objectives	III	B	I	BI-1
B. Design Requirements	III	B	I	BI-1
C. Background.	III	B	I	BI-5
D. Design Approach	III	B	I	BI-6
E. Engine Description.	III	B	I	BI-7
1. Fan and Compressor.	III	B	I	BI-8
2. Burners	III	B	I	BI-10
3. Turbine	III	B	I	BI-10
4. Bearing System.	III	B	I	BI-10
5. Reverser-Suppressor	III	B	I	BI-10
6. Controls and Accessory Drive Systems. . .	III	B	I	BI-11
7. External Configuration.	III	B	I	BI-11
F. Design Criteria	III	B	I	BI-11
Section II Major Components.	III	B	II	BIIA-1
A. Fan/Compressor.	III	B	II	BIIA-1
1. Fan Section	III	B	II	BIIA-1
a. Design Description.	III	B	II	BIIA-1
b. Design Objectives and Requirements. .	III	B	II	BIIA-2
c. Design Approach	III	B	II	BIIA-2
2. Compressor.	III	B	II	BIIA-42
a. Design Description.	III	B	II	BIIA-42
b. Design Objectives and Requirements. .	III	B	II	BIIA-43
c. Design Approach	III	B	II	BIIA-44
B. Primary Combustor	III	B	II	BIIB-1
1. General Description	III	B	II	BIIB-1
2. Objectives and Requirements	III	B	II	BIIB-1
3. Design Approach	III	B	II	BIIB-2
4. Detailed Description.	III	B	II	BIIB-3
a. Diffuser.	III	B	II	BIIB-3
b. Dome and Swirler.	III	B	II	BIIB-9
c. Ignition System	III	B	II	BIIB-10
d. Fuel Nozzles and Support Housings . .	III	B	II	BIIB-11
e. Annular Combustion Chamber.	III	B	II	BIIB-14
f. Transition Duct	III	B	II	BIIB-22
g. Inner and Outer Rear Cases.	III	B	II	BIIB-25
h. Primary Combustor Temperature Analysis.	III	B	II	BIIB-25
i. Materials Summary	III	B	II	BIIB-26
5. Product Assurance Considerations.	III	B	II	BIIB-26
a. Maintainability	III	B	II	BIIB-26
b. Reliability	III	B	II	BIIB-27
c. Safety.	III	B	II	BIIB-27
d. Value Engineering	III	B	II	BIIB-28

B. Description of Complete JTF17 Engine/ Airframe Interface Boundary	III	D	I	IIIDI-1
1. Mounting and Installation Attachment Systems	III	D	I	IIIDI-1
a. Engine Inlet.	III	D	I	IIIDI-1
b. Front Mount	III	D	I	IIIDI-19
c. Rear Mount.	III	D	I	IIIDI-19
d. Reverser-Suppressor Shroud.	III	D	I	IIIDI-19
2. Accessory Drive System.	III	D	I	IIIDI-19
a. Power Takeoff	III	D	I	IIIDI-19
b. Accessory Drives.	III	D	I	IIIDI-19
c. Power Takeoff Decoupler Actuation	III	D	I	IIIDI-19
3. Fuel System	III	D	I	IIIDI-19
a. Fuel Inlet.	III	D	I	IIIDI-19
b. Fuel Return to Airframe	III	D	I	IIIDI-29
c. Fuel Pump Outlet Vent	III	D	I	IIIDI-29
d. Fuel Drains	III	D	I	IIIDI-29
e. Engine Fuel Power Control	III	D	I	IIIDI-29
f. Engine Fuel Shutoff Control	III	D	I	IIIDI-30
4. Oil System.	III	D	I	IIIDI-30
a. Oil Breather.	III	D	I	IIIDI-30
b. Oil Tank Inlet.	III	D	I	IIIDI-30
c. Oil Tank Overflow	III	D	I	IIIDI-30
d. Oil Drains.	III	D	I	IIIDI-30
e. Seal Drains	III	D	I	IIIDI-30
f. No. 1, 2, and 3 Bearing Seal Vents.	III	D	I	IIIDI-30
5. Electrical Systems.	III	D	I	IIIDI-32
a. Ignition Exciter.	III	D	I	IIIDI-32
b. Remote Trim Input	III	D	I	IIIDI-32
6. Air Bleed and Vent Systems.	III	D	I	IIIDI-32
a. High Pressure Air Bleed Ports	III	D	I	IIIDI-32
b. Bleed Pilot Valve Ambient Vent.	III	D	I	IIIDI-35
c. Duct Heater Fuel Pump Exhaust	III	D	I	IIIDI-35
d. Secondary Air Flow Control.	III	D	I	IIIDI-35
e. Aerodynamic Brake Position Valve.	III	D	I	IIIDI-35
7. Instrumentation and Instrumentation Provisions.	III	D	I	IIIDI-35
a. Fuel Flowmeter Provisions	III	D	I	IIIDI-35
b. Main Fuel Pump Inlet Pressure	III	D	I	IIIDI-36
c. Fuel Inlet Temperature.	III	D	I	IIIDI-36
d. Fuel Filter Inlet and Outlet Pressure	III	D	I	IIIDI-36

PART B
PROPOSAL CONTENTS
(Continued)

	Volume	Report	Section	Page
Section I Installation Compatibility (Continued)				
e. Oil Level Sensing	III	D	I	IIIDI-36
f. Oil Pressure and Temperature.	III	D	I	IIIDI-36
g. Oil Pressure Transmitter Vent	III	D	I	IIIDI-36
h. Oil Filter Inlet and Outlet Pressure.	III	D	I	IIIDI-36
i. Turbine Exit Temperature.	III	D	I	IIIDI-36
j. Turbine Exit Pressure	III	D	I	IIIDI-37
k. Duct Heater Nozzle Position Feedback.	III	D	I	IIIDI-37
l. Reverser Position Indicator	III	D	I	IIIDI-37
m. Low Rotor Speed Transducers	III	D	I	IIIDI-37
n. Aerodynamic Brake Position.	III	D	I	IIIDI-37
o. Vibration Pickup.	III	D	I	IIIDI-37
p. In-Flight Power Setting Systems Provision	III	D	I	IIIDI-37
C. Installation Configuration and Supporting Design Details.	III	D	I	IIIDI-38
1. Installation Configuration and Design for Airframe Compatibility.	III	D	I	IIIDI-38
2. Installation Configuration and Design for Maintainability and Servicing	III	D	I	IIIDI-39
3. Installation Configuration and Design for Safety Considerations	III	D	I	IIIDI-41
D. Secondary Airflow System Definition and Requirements.	III	D	I	IIIDI-42
1. Description	III	D	I	IIIDI-42
2. Design Objectives	III	D	I	IIIDI-42
3. Design Requirements	III	D	I	IIIDI-42
4. Design Criteria	III	D	I	IIIDI-42
5. Design Approach	III	D	I	IIIDI-42
E. Engine Mockup Plan.	III	D	I	IIIDI-44
1. Scope and Objectives.	III	D	I	IIIDI-44
2. Organization.	III	D	I	IIIDI-45
3. Description	III	D	I	IIIDI-46
4. Requirements.	III	D	I	IIIDI-46
5. Mockup Changes and Review	III	D	I	IIIDI-47
6. Background and Facilities	III	D	I	IIIDI-47
F. Engine Installation Handbook.	III	D	I	IIIDI-47
Section II Inlet System Compatibility.	III	D	II	DII-1
A. Objectives and Introduction	III	D	II	DII-1
E. Airframe/Engine Compatibility Agreement	III	D	II	DII-1
C. Engine Inlet Compatibility Test Plan.	III	D	II	DII-2
1. Program Integration of Fan/Compressor Rig Testing	III	D	II	DII-2
2. Inlet Distortion Generator Tests.	III	D	II	DII-3
3. High Compressor Simulation Tests.	III	D	II	DII-5

PART B
PROPOSAL CONTENTS

	Volume	Report	Section	Page
Section II Inlet System Compatibility (Continued)				
4. 0.6 Scale Fan Rig Tests	III	D	VI	DII-6
5. Rematched Engine Tests.	III	D	II	DII-7
6. 0.6 Scale "Boilerplate" Subsonic Diffuser and Fan Rig Tests	III	D	II	DII-7
7. Full-Scale Fan Rig Tests.	III	D	II	DII-7
8. Complete Engine Tests	III	D	II	DII-8
9. Instrumentation	III	D	II	DII-11
10. Compatibility Tests in AEDC Facilities. .	III	D	II	DII-11
11. Flight Tests.	III	D	II	DII-11
12. Cross-Check with Analytical Simulation. .	III	D	II	DII-12
D. Analytical Simulation	III	D	II	DII-12
1. Introduction.	III	D	II	DII-13
2. Analytical Technique and Simulation . . .	III	D	II	DII-13
3. Analytical Studies.	III	D	II	DII-22
a. Response and Stability.	III	D	II	DII-22
b. Downstream Transient Feedback Effects	III	D	II	DII-24
c. Pressure, Temperature, Airflow Transient Effects	III	D	II	DII-33
4. Phase III Analytical Simulation Test Plan.	III	D	II	DII-36
E. Distortion Prediction Development	III	D	II	DII-37
1. Empirical Distortion Factors.	III	D	II	DII-37
2. Considerations for Analysis of Distorted Flow.	III	D	II	DII-39
3. Undistorted Inlet Compressor Information. .	III	D	II	DII-39
4. Analytical Prediction of Distorted Compressor Performance.	III	D	II	DII-39
5. Distortion Limits Based on Blade Element Characteristics	III	D	II	DII-43
6. Blade Element Distortion Limit Analysis Procedure	III	D	II	DII-43
Section III Exhaust System Compatibility				
A. Introduction.	III	D	III	DIII-1
B. Installation Effects.	III	D	III	DIII-1
1. Previous Experience	III	D	III	DIII-3
2. JTF17 Exhaust System Installation Effects	III	D	III	DIII-4
3. JTF17 Installation Tests.	III	D	III	DIII-5
