CONSOLIDATED TRANSLATION SURVEY

PREFACE

This survey is prepared monthly from lists received through the cooperation of US government agencies and includes universities, research institutions, and commercial translation organizations. It is a compilation of projects completed or started during the preceding month.

Translations are listed by area and subject category. Scientific projects are grouped as a section regardless of geographic area. Title in English, author, foreign language title of source of material, date of publication, and publication identifications of the completed project are given when available. Tables of contents of journals translated cover-to-cover are reproduced from the current publications.

Projects in process, i.e., not completed as of the date of this survey, are noted with an asterisk (*), and when available, a project-control or "in-process" number is noted in parentheses following the title. Certain details may be unavailable on such projects. New projects in process are not listed again until they are completed.

An index to authors of items in this issue is provided at the end of the survey.

Scientific and technical translations are grouped according to the COSATI subject category list except for military science and ordnance items which are listed under "military" in the appropriate geographic areas.

CORRECTIONS

The following corrections are translated from pp. 758 and 1014 of Tom 179.

E. P. Židkov, and I. V. Puzyrin, I. V. *The stabilization method of solving boundary value problems for nonlinear second-order ordinary differential equations*, Vol. 8 (1967), no. 3, 614-616 (Russian pages Tom 174, 271-273).

On page 616 the first line of 2) of the Theorem should read:

2) the boundary problem $v'' + f_y(x, y(x))v = 0$, $v(0) = v(1) = 0$ has only the trivial solution ...

Ju. G. Borisovič and V. F. Subbotin, *The shift operator over trajectories of equations of evolution and periodic solutions*, Vol. 8 (1967), no. 4, 781-785 (Russian pages Tom 175, 9-12).

On page 784 the last line of Theorem 6 should read:

3) for $\Delta = 0$, the index $\gamma(\theta)$ is undefined or is equal to zero according as condition (10) is or is not satisfied.

Ms. Roberta Schoen
Deputy Director for Operations
Defense Technical Information Center
7725 John J. Kingman Road
Suite 0944
Ft. Belvoir, VA 22060

Dear Ms. Schoen:

In February of this year, DTIC provided the CIA Declassification Center with a referral list of CIA documents held in the DTIC library. This referral was a follow on to the list of National Intelligence Surveys provided earlier in the year.

We have completed a declassification review of the "Non-NIS" referral list and include the results of that review as Enclosure 1. Of the 220 documents identified in our declassification database, only three are classified. These three are in the Release in Part category and may be released to the public once specified portions of the documents are removed. Sanitization instructions for these documents are included with Enclosure 1.

In addition to the documents addressed in Enclosure 1, 14 other documents were unable to be identified. DTIC then provided the CDC with hard copies of these documents in April 2004 for declassification review. The results of this review are provided as Enclosure 2.

We at CIA greatly appreciate your cooperation in this matter. Should you have any questions concerning this letter and for coordination of any further developments, please contact Donald Black of this office at (703) 613-1415.

Sincerely,

A handwritten signature in dark ink, appearing to read "Sergio N. Alcivar".

Sergio N. Alcivar
Chief, CIA Declassification Center,
Declassification Review and Referral
Branch
