CONSOLIDATED TRANSLATION SURVEY

PREFACE

This survey is prepared monthly from lists received through the cooperation of US government agencies and includes universities, research institutions, and commercial translation organizations. It is a compilation of projects completed or started during the preceding month.

Translations are listed by area and subject category. Scientific projects, are grouped as a section regardless of geographic area. Title in English, author, foreign language title of source of material, date of publication, and publication identification of the completed project are given when available. Tables of contents of journals translated cover-to-cover are reproduced from the current publications.

Projects in process, i.e., not completed as of the date of this survey, are noted with an asterisk (*), and when available, a project-control or "in-process" number is noted in parentheses following the title. Certain details may be unavailable in such projects. New projects in process are not listed again until they are completed.

An index to authors of items in this issue is provided at the end of the survey.

Scientific and Technical translations are grouped according to the COSATI subject category list except for military science and ordnance items which are listed under "military" in the appropriate geographic areas.

CORRECTIONS

The following corrections have been suggested by the author.

G. Ja. Lozanovskii, *Calderon's Banach structures*, Vol. 8 (1966), 224-227 (Russian pages Tom 172, 1018-1020).

In Theorem 1, the spaces $(X_1^{1-s}X_2^s)'$ and $(X_1')^{1-s}(X_2')^s$ not only coincide in their elements and topology but also, in the natural way, they are isometric.

In Theorem 4 C can be any number greater than unity. But if $X = X''$, C may be taken equal to unity.

CORRECTIONS

The following corrections are translated from page VII of Tom 174.

V. R. Portnov, *A theorem on the density of finite functions in weight classes*, Vol. 6 (1965), no. 1, 149-152 (Russian pages Tom 160, 545-548).

On p. 150, l. 9, $\gamma^{(l,k)} - rp + 1$ should be $\gamma^{(l,k)} - rp + q_k$.

On p. 150 between the definition and Theorem 1 the following paragraph should be inserted:

Below we shall consider only those $L_{p,b}^{(\vec{a})}(\Omega)$ on which $u(x) \in L_{p,b}^{(\vec{a})}(\Omega)$ implies that $u(x)\psi(\tilde{x}_1) \in L_{p,b}^{(\vec{a})}(\Omega)$ for an arbitrary function $\psi(\tilde{x}_1)$ with bounded derivatives up to order $\max_l m^{(l,l)}$ and such that $\psi(\tilde{x}_1) = 1$ outside of some sphere.

CORRECTIONS AND ADDITIONS

The following corrections are translated from the original Tom 175:

- G. S. Litvin'uk, *Noether theorems for a class of singular integral equations with shift and conjugation*, Vol. 6 (1965), no. 3, 625-629 (Russian pages Tom 162, 26-29).

Propositions 2, 3 and 4 and Theorem 2 relate to the case of even n . Investigation of the case of odd n is trivial, and here $l > 2 \text{Ind } \Delta_n(t)$. In the article this case is illustrated by example (6).

- D. L. Berman, *On the theory of interpolation*, Vol. 6 (1965), no. 4, 945-948 (Russian pages Tom 163, 551-554).

Theorem 1 should be expressed in the following way:

The Lagrange interpolation process for a function of Dini-Lipschitz class with nodes (2) converges uniformly in $[-1, 1]$.

The inequality (4) on p. 946 is not valid.

In Theorem 3 $\lim_{n \rightarrow \infty} H_n(f, 0) = \infty$ should be replaced by the inequality

$$\lim_{n \rightarrow \infty} H_n(f, 0) > 1/2.$$

Equation (6) on p. 947 should have the form

$$\sum_{j=1}^{2n} \frac{1}{\sin^4 \varphi_j/2} = 16/3 n^4 + 8/3 n^2.$$

In the article

- A. D. Brjuno, *Divergence of transformations of differential equations to normal form*, Vol. 8 (1967), no. 3, 692-695 (Russian pages Tom 174, 1003-1006),

the author has requested that the following addition be inserted on p. 695 just before the bibliography:

Theorem 3. *If in the normal form (8) h is analytic and is not a function of two variables u and v only, then there exists an analytic system (7) for which (8) is the normal form, and every transformation of system (7) to an arbitrary normal form is divergent.*

CORRECTIONS AND ADDITIONS

The following corrections are translated from the original Tom 176:

- I. I. Ogieveckii, *Summation of unbounded sequences by linear regular methods*, Vol. 7 (1966), no. 2, 518-520 (Russian pages Tom 167, 989-991). In the second line of Theorem 4, instead of "a regular matrix", read "a normal regular matrix".

The following addition and corrections have been made by the author:

- B. D. Romm, *Fully reducible representations of a semisimple Lie algebra*, Vol. 8 (1967), no. 4, 861-864 (Russian pages Tom 175, 300-302).

In the article we have considered a linear representation $\alpha \rightarrow X(\alpha)$ of the semisimple algebra $\mathfrak{G}$ in a space $\mathfrak{U}$ of arbitrary dimension. Let $\mathfrak{N}$ be a subspace invariant with respect to this representation. Let $\mathfrak{X}$ be the totality of all linear operators in $\mathfrak{U}$ which send $\mathfrak{U}$ into $\mathfrak{N}$ and $\mathfrak{N}$ into $\{0\}$. Let us denote by $\tilde{C}$ the Casimir operator for the representation $\alpha \rightarrow \tilde{X}(\alpha)$.

In the last sentence of Theorem 1, C should be replaced by $\tilde{C}$ and $\mathfrak{U}$ by $\mathfrak{X}$, and instead of "then this representation is fully reducible" we should have "then for the representation $\alpha \rightarrow X(\alpha)$ there exists in $\mathfrak{U}$ a subspace $\mathfrak{B}$, the complement of $\mathfrak{N}$, invariant under all operators $X(\alpha)$ ".

In the last sentence of Theorem 2, $X(h)$ and $X^{-1}(h)$ should be replaced by $\tilde{X}(h)$ and $\tilde{X}^{-1}(h)$, and $\mathfrak{U}$ by $\mathfrak{X}$; instead of "the representation is fully reducible" we should have "for the representation $\alpha \rightarrow X(\alpha)$ there exists in $\mathfrak{U}$ an invariant subspace, the complement to $\mathfrak{N}$ ".

In the proofs of Theorems 1 and 2, $X(\alpha)$ should be replaced everywhere by $\tilde{X}(\alpha)$.

Theorems 3, 4 and 5 and the Corollary to Theorem 4 are in doubt since the proofs are not correct.

Ms. Roberta Schoen
Deputy Director for Operations
Defense Technical Information Center
7725 John J. Kingman Road
Suite 0944
Ft. Belvoir, VA 22060

Dear Ms. Schoen:

In February of this year, DTIC provided the CIA Declassification Center with a referral list of CIA documents held in the DTIC library. This referral was a follow on to the list of National Intelligence Surveys provided earlier in the year.

We have completed a declassification review of the "Non-NIS" referral list and include the results of that review as Enclosure 1. Of the 220 documents identified in our declassification database, only three are classified. These three are in the Release in Part category and may be released to the public once specified portions of the documents are removed. Sanitization instructions for these documents are included with Enclosure 1.

In addition to the documents addressed in Enclosure 1, 14 other documents were unable to be identified. DTIC then provided the CDC with hard copies of these documents in April 2004 for declassification review. The results of this review are provided as Enclosure 2.

We at CIA greatly appreciate your cooperation in this matter. Should you have any questions concerning this letter and for coordination of any further developments, please contact Donald Black of this office at (703) 613-1415.

Sincerely,

A handwritten signature in cursive script, reading "Sergio N. Alcivar".

Sergio N. Alcivar
Chief, CIA Declassification Center,
Declassification Review and Referral
Branch
