ABSTRACT

Meteorological data gathered for the launching of NIKE-HYDAC, STV-94 and NIKE-HYDAC, STV-93, are presented for the Space and Missile Systems Organization, AFMDC, Holloman Air Force Base, New Mexico, and for ballistic studies. The data appear, along with calculated ballistic data, in tabular form.

INTRODUCTION

Nike-Hydac, STV-94, was launched from Launch Complex 33, left boom of L-361, White Sands Missile Range (WSMR), New Mexico, at 0800 hours MDT, 5 May 1970.

Nike-Hydac, STV-93, was launched from Launch Complex 33, right boom of L-361, White Sands Missile Range (WSMR), New Mexico, at 1100 hours MDT, 5 May 1970.

Meteorological data used in conjunction with theoretical calculations to predict rocket impact were collected by the Meteorological Support Technical Area, Atmospheric Sciences Office (ASO), WSMR, New Mexico. Ballistics Meteorologists for this firing were Gordon Dunaway and Len E. Carter.

DISCUSSION

Wind data for the first 216 feet above the surface were obtained from a system composed of five Aerovanes mounted on a 200-foot tower and cabled to component wind indicators.

From 216 to 4,000 feet above the surface, wind data were obtained from T-9 Radar tracked balloon ascents.

Temperature, pressure, and humidity data, along with upper wind data from 4,000 to approximately 100,000 feet above the surface, were obtained from standard rawinsonde observations.

Mean wind component values in each ballistic zone were determined from vertical cross sections by the equal-area method.

Theoretical rocket performance values and wind-weighting values as a function of altitude were provided by ASO and are the basis for the data appearing in Tables I and II.

10. DISTRIBUTION STATEMENT This document is subject to special export controls and each transmittal to foreign governments or foreign nationals may be made only with prior approval of Atmospheric Sciences Office White Sands Missile Range, New Mexico.			
11. SUPPLEMENTARY NOTES		12. SPONSORING MILITARY ACTIVITY U. S. Army Electronics Command Atmospheric Sciences Office White Sands Missile Range, New Mexico	
13. ABSTRACT Meteorological data gathered for the launching of Nike-Hydac STV-94 and Nike-Hydac STV-93, are presented for the Space and Missile Systems Organization, AFMDC, Holloman Air Force Base, New Mexico, and for ballistic studies. The data appear, along with calculated ballistic data, in tabular form.
