ANALYSIS OF VIETNAMIZATION:
HAMLET EVALUATION SYSTEM REVISIONS

SUMMARY

The objective of the research presented here was to determine recommendations for a revised Hamlet Evaluation System (HES). A reduction in the number of questions is desirable for obvious reasons. Changes in the organization of questions into submodels and models may also be appropriate. Finally, a revision which will not lose continuity with the old data is especially desirable.

Factor analysis and comparison to the structure implicit in existing submodels was the basic method employed. The interpretation of the resulting factors included some specific comments on existing models and questions. A recommendation for retention of 34 questions organized in 10 submodels is presented along with the monthly scores for the July 1969-October 1972 period. A series of map plot summaries illustrates the application of the revised system to monitoring the changes which have taken place since December 1971.

INTRODUCTION

There has been well founded concern over the future of the HES. Part of this concern is over whether the Vietnamese can or will desire continued reporting of so much information in the post cease fire period. Another aspect of concern is the validity of the output. While the mechanism has provided a wealth of information for managers and policy analysts, those familiar with the HES and its uses are well aware of its shortcomings and abuses. Most of these inadequacies have been documented and need not be reviewed; there is, however, general agreement that improvements are possible in both selecting questions and structuring the models and submodels into which those questions are combined.

Some question evaluation work has been done which assumed the various submodels and models in the HES validly summarized the useful information contained in the question responses. These models were used in the evaluation to assess each question's contribution to the summary scores. The effort was also limited in scope and time to eight sample provinces for two quarterly reporting periods (6 months).

Bendix programming and analytical techniques and the Bendix developed application of an ordinal scale to the HES/70-71 question responses (see Appendix A) allow the analysts to assess data over long periods of time (in the following report 30 months) and to consider the effects of relationships found in all 44 provinces. Previous work by Bendix demonstrated that factor analysis of a 58-variable subset from HES/70 identifies major dimensions which are substantially different from the models used in the HES. This previous comparison was made by simple visual inspection. The following analysis employs a more rigorous comparison and is based upon a refined variable list.

In order to utilize the present submodels and models as a basis for this critique, the dimensional structure (i.e., factors) of the time series variance contained in the responses is rotated to a best fit with the structure implicit in the grouping of questions in 16 of the level 1 submodels shown in Figure 1. Table I represents this implicit structure for the 58 questions for which data are available. This rotation to fit the "targets" represented by the table alters only the frame of reference for interpreting the factor analysis. Instead of having the reference vectors determined by the strongest pattern of common variance, the factor comparison process substitutes some expected patterns — in this case the structure implicit in the HES/70.

BSR 4012

(Underlined questions are included in the 58 analyzed in this test)

Table 1

Submodel Structure

[illegible]

Interpretation of these results sheds light on three subjects:

- The "niceness of the fit" of the information reported from July 1969-December 1971 to the theoretical structure underlying the HES/70-71 models.
- The number of models and submodels that most appropriately and succinctly summarize the data, and the proper grouping for different HES questions in those models.
- The usefulness of individual questions themselves.

Following this evaluation, a revised grouping of questions into models and submodels is presented, along with the province scores on these measures for the July 1969-October 1972 time frame (see Appendix B). These measures should be more sensitive than the present model or submodel scores. This occurs because the measures in the revised models tend to vary together producing a clearly defined dimension, much like re-enforcing sound vibrations produce a harmonious and distinct tone while vibrations which are not in phase render only dissonance or noise. Any inappropriate combination of questions will reduce much of the information inherent in the questions to such noise.

FINDINGS

From a comparison shown in Table II of the actual factor loadings with the implicit level 1 structure, the following series of observations and recommendations regarding specific questions included in this study can be made:

- The variable dealing with law enforcement, HQD-2, fails to define a separate dimension and is, if anything, part of a more general administrative presence concept. The question should either be combined with other administrative indicators or eliminated.
- The frequency of GVN technical cadre visits, VQN-5, is presently associated with economic development efforts, but its actual variation indicates that it is more a part of the psyops and information effort.
- HMD-1, civilian casualties, and HMD-2, enemy-caused damage, are presently considered in two submodels, Enemy Military Activity and the Impact of Military Activity. The two questions fit well into the activity model but not in the impact model. The civilian casualties measure is also associated with HMB-5, B-6, B-8, and D-7 — variables which seem to indicate politically motivated violence on the part of the VC/NVA.
- Enemy presence, HMB-4, does not fit well within the submodel to which it is assigned and its deletion would simplify and enhance variation in the model.

In terms of the 16 level 1 submodels, the following conclusions and implications for a modified system apply:

- ADMIN — There is a distinct administrative dimension which seems to have been fairly accurately captured by the existing submodel except for:

HQE2 Hamlet Chief Presence, which probably contained too little variance to add much useful information.

VQL1 Information/Chieu Hoi Cadre.

HQD2 Law Enforcement.

VQF7 RDC Sleeping Location.

HMB1 Enemy Control of Hamlet.

— all of which were used in other submodels.

----	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------

For the modified system, it is recommended that the following questions be retained and combined for the ADMIN submodel:

VQE4 Village Chief Presence.

VQE2 Elected Village Council.

VQE3 Elected Village Chief.

VQE7 GVN Tax Collection.

- POL-MOB — There also appears to be a distinct dimension of political mobilization which was measured by the present submodel except for:

VQR2 Secondary School Attendance.

VQB1 Village Level VCI.

VQN1 Self-Development Activity.

VQF7 RDC Sleeping Location.

— all of which were used in other models, but actually reflect aspects of political mobilization.

The recommended new submodel should include:

HQC6 % in PSDF.

VQF1 Village Council Open Meetings.

HQF2 % in Government Service.

HQF6 % in "Peoples" Groups.

- EN-MIL-ACT — The submodel for enemy military activity appears to have been a useful distinction from political activity except for:

HMB6 Non-Selective Terrorism, which went with both types of enemy activity.

HMB4 Presence of Enemy Military Forces and

HMB1 Enemy Control of Hamlet, both of which were not well associated with enemy military activity.

While wishful thinking might anticipate this submodel will soon be overtaken by events, the following questions are recommended for retention:

HMD1 Civilian Casualties.

HMD2 Enemy-Caused Damage.

HMB2 Attacks Against Local Forces.

HMB3 Intensity of Enemy Activity.

- DEV-ASST — There is a dimension which represents the level of development assistance provided and the existing submodel was accurate except for:

VQN5 Technical Cadre Visits, which was more closely associated with info-psyops activity.

The questions recommended for retention are:

VQN1 Self-Development Activity.

VQN2/3 Self-Development Retardation.

VQN4 Public Works Projects.

HQN1 Participation in Self-Development.

- PUB-HEALTH — Although there are indications that public health and education are essentially concepts which vary together, it appears useful to continue to distinguish between the two in the level 1 submodels as follows:

Public Health submodel:

VQP3 Hospital/M. D. Available.

HQP1 Medical Services Available.

VQP1/2 Dispensary or Maternity Clinic Available.

Education submodel:

VQR1 Secondary School Available.

VQR2 % Attending School.

VQR2 % Completion of Primary Education.

- ECON-ACT — Economic activity was only moderately associated with the questions in the existing submodel. It was interesting to find that primary school availability was also a weak indicator of an economic dimension. A level 1 submodel consisting of the following questions should be retained:

VQL1 Availability of Commodities other than rice.

VQL2 Availability of Manufactured Goods.

HQL1 Market Development.

- EDUCATION — Previously noted with public health.
- EN-POL-ACT — As noted for enemy military activity, there are distinct dimensions for military and political aspects of enemy activity. As could be expected, it was found that non-selective terrorism and civilian casualties are associated with both and thus might be deleted to enhance the distinction. The questions recommended for the revised submodel are:

HMB5 - Selective Terrorism.

HMB7 - Incidents Against Non-Military Targets.

HMB8 - Enemy Propaganda Activity.

- EN-POL-PRS — While there were several exceptions to the way in which this dimension was captured by the present submodel, it should be retained with the following questions:

HQB1 Hamlet VCI.

VQB1 Village VCI.

HQB2 Enemy Tax Collection.

HQB3 % Participation in Enemy Activities.

- INFO-PSYOPS — GVN information activities form a unique pattern as expected by the existing submodel. It was noted that tech cadre visits are associated with this pattern, but this probably reflects a weakness in the administration of technical assistance rather than an aspect of information activity. Retention of the submodel with the following questions is recommended:

VQC2 Movies/Cultural Drama Exposure.

VQC3 Information Cadre Visits.

- EN-MIL-PRS — The one question used in this submodel did not fit this implicit dimension at all nor did any other questions. Deletion of the submodel is possible as far as the 58 questions analyzed are concerned.
- PSDF-ACT — Again no strong associations emerged and apparently PSDF activity as a submodel adds little or nothing useful. Deletion is recommended.
- IMP-MIL-ACT — This is another submodel which appears to be necessary.
- FRN-MIL-PRS — The presence of only one question in the data analyzed makes it difficult to judge this submodel as well as the three preceding submodels. However, for purposes of how the HES is used to evaluate the situation in the countryside, it is clear that better information is available from operational sources.
- LAW-ENFRC — The variance or information going into this submodel appears to be redundant since the same information is already incorporated in the ADMIN dimension.
- RDC — This submodel should also be deleted, as the available information seems to belong more appropriately in POL-MOB and/or DEV-ASST submodels.

These observations and recommendations are based on a 58-variable HES subset. Obviously, some variables and submodels which did not fit with others in this analysis might well be appropriately combined with some of the questions not included. A more complete data set would not, however, affect the low loadings of these variables inappropriately combined into the various submodels or models.

APPENDIX A

AN ORDINAL SCALE FOR HES DATA

The approach taken to scaling the HES data greatly enhanced the analysts' methodological options by avoiding the use of letter scores. In the scheme employed, each possible response to the individual HES questions was given a weight between 0 and 4. Zero represents the worst or least desirable conditions for the GVN while a 4 indicates the best or most desirable conditions. For those questions pertaining to VC/NVA, the same scale was applied; again a 0 indicating the least desirable condition from the VC/NVA point of view and a 4 representing the best possible circumstance or greatest amount of VC/NVA presence and activity. The figure below represents the scaling concept used in this analysis.

Examples of the application of this scale appear below:

Enemy-Caused Damage

	<u>Scale Weight</u>
HMD2-0 = No damage	4
HMD2-1 = Minor damage	3
HMD2-2 = Serious damage	1
HMD2-3 = Widespread damage	0

Participation in Peoples Groups

	<u>Scale Weight</u>
HQF6-0 = None	0
HQF6-1 = Yes < 10%	1
HQF6-2 = Yes 10-40%	2
HQF6-3 = Yes 41-90%	3
HOF7-4 = Yes > 90%	4

After the individual variable scores were compiled, several questions were then combined into various indices; e.g., VOL 1, VOL 2, VOL 3, and HQL 1. All these questions, which pertain to economic conditions, were combined into an index of economic strength. Factor analysis was employed to assess the validity of the indices. This technique indicates the extent to which each of the variables measures a statistically common and distinct dimension.

A strong confirmation of index validity is obtained when its component variables load on the same factor or have a similar loading distribution across several factors. This technique was employed to reconstruct the indices, i.e., to add and delete variables from the various indices, depending on the strength of the variables loading on a factor which best represented the index in question.

ILLUSTRATION

The best way of determining the value of the recommended shorter and reorganized HES is to present an example of how it could have been used. A good one is the December 1971 through October 1972 period, because anyone who has been using the existing HES reports is familiar with the impact of the offensive on pacification.

This illustration uses summary map plots for December 1971 and March, June, and October 1972. The individual province scores are used to categorize the province-month observations according to quartile of the July 1969-October 1972 distribution of scores. This use of the total data sample as a reference standard facilitates month-to-month evaluation of changes observed. In contrast, the first set of maps shown in Figure 2 uses only October 1972 distributions to categorize the provinces by quartile. Incidentally, the use of quartiles is arbitrary. One could also use halves, thirds, or deciles. It is simply a device for reducing 44 or more values to a few readily observed categories. As can be seen in Figure 2, five model scores are being used in this illustration: (1) Pacification, (2) Political Mobilization, (3) Social-Economic Conditions, (4) GVN Presence and Activity, and (5) Enemy Presence and Activity. The summary format of Figure 2 is an easy way to view the relative status of the provinces on each measure at any point in time; but it says nothing about trends.

Figures 3 through 7 permit an evaluation of the trends. The combined pacification scores shown in Figure 3 present a rather simple overview of what has happened. Some declines can be noted already in March (Quang Tri, Thua Thien, Quang Nam, Darlac, Kien Hoa, and Chuong Thien). The obvious major impacts of the offensive in Quang Tri, Kontum, Binh Dinh, Binh Long appear in the April, May, June, and October maps. However, it can also be seen that the situations in Quang Ngai, Pheu Yen, Long Khanh, Binh Duong, Hau Nghia, Long An, Chou Doc,

Vinh Binh, Chuong Thien, and An Xuyen become worse and have not yet recovered as in Quang Tin, Darlac, Khanh Hoa, Phuoc Tuy, Kien Phong, and Kien Hoa.

An examination of Figures 4 through 7 provides more detailed information. Figure 3 tells generally how the situation is going. The four lower level models can give an idea of why changes are taking place. For example, we noted that a pacification decline between December 1971 and March 1972 took place in six provinces. Figures 7(a) and (b) show Enemy Presence and Activity account for the declines in Quang Tri, Thua Thien, Quang Nam, Darlac, and Kien Hoa. The decline in Chuong Thien comes largely from a drop in Political Mobilization — an interesting fact because Chuong Thien is the only Delta province remaining low on Social-Economic Conditions.

Figures 7(a) and (b) also reveal the danger in looking at only the overall combined pacification scores to monitor the situation. In these figures we see an increase in Enemy Presence and Activity model is quite significant because it is the product of only general district level observations of events and conditions at the point where they impact on the population, not the direct product of a sophisticated intelligence collection and analysis system.

Numerous other interesting tidbits can be gleaned from these summary displays. More could be observed by going down to the various submodels, but it is believed that the utility of the revised system has been demonstrated.

APPENDIX B

REVISED HES SCORES, RANKINGS, AND
DISTRIBUTIONS; JULY 1969-OCTOBER 1972

This appendix consists of the data which would have been obtained using only the 34 questions of the recommended HES. Scores have been computed for all four levels of models. In the following pages, 10 months of data by province are listed on each right-hand page. The facing left-hand page is a listing of the corresponding monthly rankings for each province. Following the 8 pages of data and ranking for each submodel or model the distribution of those scores is shown in a histogram.

This lengthy presentation is included for two reasons. It demonstrates that the recommended revisions are possible without loss of continuity in the time series. And finally, someone with the time and resources could find it a rich data source for further analysis and understanding of the war.

DOCUMENT CONTROL DATA - R&D

(Security classification of title, body of abstract and indexing annotation must be entered when the overall report is classified)

1. ORIGINATING ACTIVITY (Corporate author) The Bendix Corporation Aerospace Systems Division 3300 Plymouth Road, Ann Arbor, Michigan 48107		2a. REPORT SECURITY CLASSIFICATION Unclassified	
3. REPORT TITLE Analysis of Vietnamization: Hamlet Evaluation System Revisions		2b. GROUP N/A	
4. DESCRIPTIVE NOTES (Type of report and inclusive dates) Technical Report of Analyses 12/71 - 2/73			
5. AUTHOR(S) (Last name, first name, initial) Prince, William G. Adkins, John H.			
6. REPORT DATE February 1973		7a. TOTAL NO. OF PAGES 177	7b. NO. OF REFS -0-
8a. CONTRACT OR GRANT NO. DAHC 15 71 C 0222		8a. ORIGINATOR'S REPORT NUMBER(S) BSR 4012	
b. PROJECT NO.		8b. OTHER REPORT NO(S) (Any other numbers that may be assigned this report) ----	
c. ARPA Order No. 1770			
d. Program Code No. 1G10			
10. AVAILABILITY/LIMITATION NOTICES Qualified requestors may obtain copies of this report from DDC.			
11. SUPPLEMENTARY NOTES ----		12. SPONSORING MILITARY ACTIVITY Defense Advanced Research Projects Agency	
13. ABSTRACT This report compares the structure implicit in the design of Hamlet Evaluation System (HES) submodels to the structure defined by observed variance in the data over the 7/69 - 12/71 time frame. A recommended revision to the HES is presented which reduces it to only 34 questions, 10 level one submodels, 3 level two models, 1 level three model, and 1 level four macro-model. The scores for the various models are presented for the 7/69 - 10/72 time frame and illustrated with a number of summary map plots.

INSTRUCTIONS

1. **ORIGINATING ACTIVITY:** Enter the name and address of the contractor, subcontractor, grantee, Department of Defense activity or other organization (*corporate author*) issuing the report.

2a. **REPORT SECURITY CLASSIFICATION:** Enter the overall security classification of the report. Indicate whether "Restricted Data" is included. Marking is to be in accordance with appropriate security regulations.

2b. **GROUP:** Automatic downgrading is specified in DoD Directive 5200.10 and Armed Forces Industrial Manual. Enter the group number. Also, when applicable, show that optional markings have been used for Group 3 and Group 4 as authorized.

3. **REPORT TITLE:** Enter the complete report title in all capital letters. Titles in all cases should be unclassified. If a meaningful title cannot be selected without classification, show title classification in all capitals in parenthesis immediately following the title.

4. **DESCRIPTIVE NOTES:** If appropriate, enter the type of report, e.g., interim, progress, summary, annual, or final. Give the inclusive dates when a specific reporting period is covered.

5. **AUTHOR(S):** Enter the name(s) of author(s) as shown on or in the report. Enter last name, first name, middle initial. If military, show rank and branch of service. The name of the principal author is an absolute minimum requirement.

6. **REPORT DATE:** Enter the date of the report as day, month, year, or month, year. If more than one date appears on the report, use date of publication.

7a. **TOTAL NUMBER OF PAGES:** The total page count should follow normal pagination procedures, i.e., enter the number of pages containing information.

7b. **NUMBER OF REFERENCES:** Enter the total number of references cited in the report.

8a. **CONTRACT OR GRANT NUMBER:** If appropriate, enter the applicable number of the contract or grant under which the report was written.

8b, &c, & 8d. **PROJECT NUMBER:** Enter the appropriate military department identification, such as project number, subproject number, system numbers, task number, etc.

9a. **ORIGINATOR'S REPORT NUMBER(S):** Enter the official report number by which the document will be identified and controlled by the originating activity. This number must be unique to this report.

9b. **OTHER REPORT NUMBER(S):** If the report has been assigned any other report numbers (either by the originator or by the sponsor), also enter this number(s).

10. **AVAILABILITY/LIMITATION NOTICES:** Enter any limitations on further dissemination of the report, other than those

imposed by security classification, using standard statements such as:

- (1) "Qualified requesters may obtain copies of this report from DDC."
- (2) "Foreign announcement and dissemination of this report by DDC is not authorized."
- (3) "U. S. Government agencies may obtain copies of this report directly from DDC. Other qualified DDC users shall request through _____."
- (4) "U. S. military agencies may obtain copies of this report directly from DDC. Other qualified users shall request through _____."
- (5) "All distribution of this report is controlled. Qualified DDC users shall request through _____."

If the report has been furnished to the Office of Technical Services, Department of Commerce, for sale to the public, indicate this fact and enter the price, if known.

11. **SUPPLEMENTARY NOTES:** Use for additional explanatory notes.

12. **SPONSORING MILITARY ACTIVITY:** Enter the name of the departmental project office or laboratory sponsoring (paying for) the research and development. Include address.

13. **ABSTRACT:** Enter an abstract giving a brief and factual summary of the document indicative of the report, even though it may also appear elsewhere in the body of the technical report. If additional space is required, a continuation sheet shall be attached.

It is highly desirable that the abstract of classified reports be unclassified. Each paragraph of the abstract shall end with an indication of the military security classification of the information in the paragraph, represented as (TS), (S), (C), or (U).

There is no limitation on the length of the abstract. However, the suggested length is from 150 to 225 words.

14. **KEY WORDS:** Key words are technically meaningful terms or short phrases that characterize a report and may be used as index entries for cataloging the report. Key words must be selected so that no security classification is required. Identifiers, such as equipment model designation, trade name, military project code name, geographic location, may be used as key words but will be followed by an indication of technical context. The assignment of links, rules, and weights is optional.
