HYATT REGENCY MIAMI ▶ MIAMI, FLORIDA

VADM Gordon S. Holder, USN (Ret)
*Chairman, NDIA Logistics Management
Division; Vice President, Booz Allen
Hamilton*

The war on terrorism continues, and the economic crisis of 2008 and 2009 has had a significant effect on the entire Nation, and especially the Department of Defense.

The Nation is focused on national economic recovery. In the meantime, the Congress has decreed the weapons systems reform act, and the department is trying to ensure maintenance of effectiveness while increasing the efficiency of those very systems across the life cycle. The logistics systems that support virtually every system in the inventory, as well as the individual commodities that our war-fighters need around the world must be properly managed and maintained. Our military force is shifting from Iraq, which will hopefully become a peace keeping and training operation, to Afghanistan, which is a combination of terrorists elimination and nation building that is dependent on many contributions from U.S, allied, and coalition forces.

As our forces shift from Iraq to Afghanistan, we must ensure they have the required support. Logistics continues to be a significant contributor not only to the success of operations, but to the balance between efficiency and effectiveness. Supporting a new focus, and being prepared for what's next, such as January's catastrophic earthquake in Haiti is always a challenge when

the requirement is not well defined, but such is the lot of the logistician whether in government or commercial business. Understanding the ramifications of change, learning the lessons that have been taught on the field of battle, conducting the humanitarian operations and educating a force not only in its basic competencies but in the joint, unified, and multi-agency world is a significant challenge that our logistics leadership continues to face on a daily basis. Supporting this effort requires a willingness to change and evolve, not only in our military forces, but also in all the commercial sectors that support them. Our logistics capabilities must continue to be increasingly dynamic with greater interoperability, infused with new ideas, processes, and systems to support our operational personnel, regardless of whether they are in military uniform or not. The continuing efforts to align the educational processes of our logistics capabilities require the consistent energy and commitment that have been reflected throughout the defense department the past several years. The increased emphasis on small business interoperability in the market causes us to examine our relationships for the good of the clients we serve.

Our 2010 theme, **“Defense Logistics in an Era of Change: Strategically Focused, Operationally Engaged, and Committed to Professional Development”** again follows on the themes of previous years enabling us to examine performance, and measure the outputs that are needed by the operators around the world. To focus us, each day of the conference will feature a theme that will hopefully cause all of us to increase our awareness and need for interoperability across the government and commercial logistics world.

During the conference, three national-level awards for logistics excellence will be presented. Established in 1956 with a focus on industry, the Edward M. Greer Award stimulates thought and action of benefit to industry and the public by encouraging solutions to troublesome maintenance and integrated logistics support planning techniques. The Logistician Emeritus Award, established in 1980, will again be presented to an individual in government who has demonstrated outstanding competence and has made a substantial contribution in the field of national security logistics. Again this year we are honored to present the DoD Award for Supply Chain Operational Excellence on behalf of the Office of the Secretary of Defense (AT&L).

NDIA's Annual National Logistics Conference & Exhibition is one of the premier national-level forums for exchanging ideas and sharing insights into improving the support to our nation's warfighters across the spectrum of military operations. The conference brings together the senior logistics policy officials and senior practitioners attracting high-caliber government and industry participants. This conference presents yet another opportunity for logistics leaders to address their policy and resource allocation challenges in terms of today's urgent challenges. In addition, the expanded exhibit forum will again highlight the best cutting-edge technologies being developed to support our war fighters in an efficient, interoperable manner.

You have an important role on the war fighter's logistics team that consists of industry, government, and academia from both domestic and a growing number of international organizations. We share a mutual goal by seeking effective and efficient solutions to exceed the needs of our deserving customers in harm's way: Soldiers, Sailors, Airmen, Marines and Coast Guardsmen.

Our sponsor, the National Defense Industrial Association, Logistics Management Division, supported by the Office of the Secretary of Defense (Acquisition, Technology and Logistics) and the Logistics Directorate, J4, The Joint Staff, is committed to bringing you a world-class forum for an exchange of ideas that will help make your organizational and business strategy a reality. **Please join us by actively participating as we share information with this focus throughout the event, then share knowledge and enthusiasm by bringing it back to your organizations.**

AWARDS

During the conference, the Edward M. Greer, the Logistician Emeritus Award, and the DoD Award for Supply Chain Operational Excellence will be presented. Nominations for the Greer and Emeritus awards will be accepted until February 1, 2009. Nominations should be sent to Sam Campagna at scampagna@ndia.org and must contain the individual's accomplishments and rationale for the nomination.

The Edward M. Greer Award

The Greer Award is presented annually to an industry individual in recognition of noteworthy contributions or meritorious service to the Department of Defense in the area of integrated logistics support engineering and its implementation in maintenance and product support. The award was established in 1956 by Greer Hydraulics, Inc., to stimulate thought and develop programs which will benefit industry and the public. The award program encourages solutions to troublesome maintenance problems or to the development of integrated logistics support planning techniques to be employed in their solution. The award is presented in honor of its originator, Edward M. Greer.

The Logistician Emeritus Award

The Logistician Emeritus Award is presented to an individual who has demonstrated outstanding competence and has made a substantial contribution in the field of national security logistics while serving in a governmental position. The award was established by the Logistics Management Division in 1980 as a means of recognizing deserving individuals.

DoD Award for Supply Chain Operational Excellence

The Assistant Secretary of Defense for Logistics and Materiel Readiness (ASD(L&MR)) is partnering with the Supply-Chain Council and the National Defense Industrial Association (NDIA), to sponsor the tenth annual Department of Defense (DoD) Award for Supply Chain Operational Excellence to recognize projects that demonstrate significant improvements in supply chain management. The DoD Award for Supply Chain Operational Excellence provides a showcase for innovative management and technology tools we are using to improve our supply chain efficiency and effectiveness in order to enhance our support to the warfighter. The award honors organizations that have made exceptional progress through innovative development or adoption of the best supply chain practices. Last year, the United States Transportation Command received the award for its Supply Chain Operations Reference (SCOR) model base Distribution Process Owner (DPO) Strategic Opportunities (DSO) to improve the efficiency of the DoD-wide distribution processes.

Defense Logistics in an Era of Change

A world map is centered in the image, rendered in a dark blue color. From the map, numerous bright blue rays of light radiate outwards, creating a starburst effect against a black background. The rays are most intense near the map and fade as they extend towards the edges of the frame.

Learning, Education and Development...

What should we teach?

What to know...When to know?

- ✓ Meet customer defined outcomes
- ✓ Non-linear trends/trajectories
- ✓ Adaptive, learning adversaries
- ✓ Shortened cycle times
- ✓ Strategy is not a blueprint...
- ✓ Tight tolerances invite failure...avoid mechanistic patterns

Tension between genuine education, institutional agenda & culture...

Learning, Education and Development...

How should we teach... *how do students best learn?*

- ✓ Value of peer evaluations over that of instructors...
- ✓ Integration of social networking in to the learning environment
- ✓ Simulations, active learning, blended environments work best
- ✓ Create necessary tension – student led learning...

Faculty... *critical to creating effective learning*

- ✓ Caution against predictability
- ✓ Develop an appreciation for the importance of considering options that you don't approve of
- ✓ Develop an understanding of the purpose of politics
- ✓ Create the strategic and joint learning conditions necessary to a broad perspective.

*Investing in our faculty
may be the most important task of all*

Educating 21st Century Logisticians

- Logisticians must understand the organizations whom they support
- Logisticians must be masters of their craft at tactical and operational level
- Integration and synchronization are **HARD**
- Logisticians must recognize primacy of effectiveness over efficiency
- Senior logisticians must bring clarity to “Seamless,” “assured access,” “just in time,” “enhanced support,” “interdependent” . . . What do these slogans really mean in the context of full spectrum operations?

Keeping the Pace of Change

From Textbooks and Notebooks to Kindle and IPAD

Teaching Strategy Conference And professional Writing

Operational Support (April 09 to Mar 10)

- Over 93 engagements
- 24 Country Visits
- 9 Combatant Commands
- 40 Agencies Supported
- 3 Theater Operations
- Continued relationships between Saudi, Kazak, and Afghan War Colleges

Direct Combatant Command Support

- CSL – AFRICOM
- CSL – SOUTHCOM
- CSL – EUCOM
- CSL – PACOM
- PKSOI – JFCOM
- DNSS - CENTCOM

How do you maintain relevant curriculum inside the 21st Century pace of change?

Mission

USAWC **prepares** selected military, civilian, and international leaders for the responsibilities of strategic leadership In a joint, interagency, intergovernmental, and multinational environment.

- **Educates** current and future leaders on the development and employment of land power
- **Supports** the operational and institutional force
- **Conducts research, and publishes** to inform thought on national security and military strategy
- **Supports** the Army's strategic communication efforts

Our Focus

Transforming an Incoming Professional Who
Has...

- Had relatively **limited** and well-defined **responsibilities**
- Worked in a structured environment
- Dealt primarily with problems for which there was usually a best **solution** or a **clear set of options**
- Been an **executor** of policy
- Succeeded based on capacity to **apply skills**
- Had primarily a **single-service** and unilateral orientation
- Communicated both verbally and in writing in a concise and direct manner

Into a Graduate

Who Will...

- Hold positions of broad scope and great responsibility
- Work in highly **volatile, uncertain, complex, ambiguous** environments
- Deal with problems which have no clear-cut solutions
- Be an executive who innovates and initiates policy
- Succeed based on spirit of **cooperation**
- Be involved in **joint, interagency, intergovernmental, and multinational** organizations and issues
- Communicate complex concepts effectively and persuasively, both verbally and in writing

If This is The Strategic Environment

Globalization

Top 1% of world population owns 40% of wealth
... Interconnected world economies and opportunities ... The 'have-nots' know it

... Shifting Demographics

60% will live in urban areas by 2030
... Africa, Middle East, Central Africa have 40-50% Youth Bulge

... Weapons of Mass Destruction

~25 nations possess, stockpile or develop ... 3770 tons of enriched uranium ... al Qaeda religious duty

... Climate Change

Arctic sea ice melted by 2040 ...
Desertification at 70,000Km²/yr ...
1.4B confront environmental fragility

... Failed / Fragile States

Account for 77% of conflict ... Fragile states have 4 times terror problems ... 28 of 51 African states high risk

... Uncertain Natural Resource Availability

World food cost up 45%, shortages of rice, wheat & maize ... triple digit oil prices ... 450M face severe water shortage

And the Focus of Support is Timeless

1944

2003

Then These Attributes ...

(From Army Leader Development Strategy)

Leaders who:

- **Understand** context
- **Act** within the understanding
- **Assess and adapt** based on enemy and environment
- **Consolidate** tactical and operational opportunities into strategic aims
- **Transition** among the forms of operations

Recognize

But is this enough?

This is what it means to us

Leaders who:

- Achieve decisiveness and clarity in the land of options and latitude
- Are comfortable within the civil military relationship
- Routinely use information in an analytical fashion
- Are critical thinkers from continual practice

Attributes:

- Self Aware
- Negotiators
- Ethical
- Resilient

“It’s About Performance”

Remarks to the Logistics Workforce Education and Human Capital Initiatives Panel

**Abe Zwany, Officer
Booz Allen Hamilton**

April 15, 2010

*This document is confidential and is intended solely for the use and
information of the client to whom it is addressed.*

To be successful, the Defense Logistics Community of Practice should focus on two essential tenets

▶ It's about PERFORMANCE

- Goal Oriented
- How we leverage “People” and “Knowledge” affects “Performance”

▶ Today's People Practices, Learning Technologies, and Information/Communications Capabilities make it possible to get the ...

- Get the Right Stuff, to the
- Right Person, at the
- Right Time, in the
- Right Way, at the
- Right Place

We can meet the demand for knowledge to get the job done

To be successful, the Defense Logistics Community should focus on two essential tenets

▶ It's about PERFORMANCE

- Goal Oriented (Focus on Outcomes)
- How we leverage “People” and “Knowledge” affects “Performance” (Integrated, Holistic Perspective)

▶ Today's People Practices, Learning Technologies, and Information/Communications Capabilities make it possible to get the ...

- Right Stuff (Requirements), to the
- Right Person (On Demand), at the
- Right Time (When Needed; Even at the Point of Performance), in the
- Right Way (Tailored; Based on Competencies; Education, Training, Performance Support), at the
- Right Place (At Any Place on the Planet)

Challenges: Why aren't we doing better? What's the problem?

- ▶ **Culture** – it's hard to change / need to adopt an integrated perspective
 - Individuals must be able to receive knowledge and act
 - Organizations must be able to facilitate
- ▶ **Infrastructure** – it was built with differing objectives in mind
- ▶ **Tools** – we need to build new integrated support systems
 - Should we provide knowledge, or the tools to access and use knowledge?
- ▶ **Investment** – it costs money to change (and we have to continue to operate under the old paradigm while preparing to change)
- ▶ **Measurement** – we need to continually evaluate results to ensure we are headed in the right direction
- ▶ **Technology** – the rapid pace of change may call for Communities of Practice that facilitate peer-to-peer interactions, social networking, etc.
- ▶ **Leadership** – it takes vision and courage to lead change

SECDEF Growth Strategy Objectives

1. Rebalance the acquisition total force – **grow the organic acquisition workforce 15% by 2015 —126,000 to 147,000**
 - 9,887 new positions
 - 10,000 in-sourced contract services positions
2. Strategically grow to improve acquisition capabilities and capacities -- **strengthen organic core**
 - **Technical capabilities – to include Life Cycle Logistics**
 - **Business functions-- contracting, pricing and cost estimating**
3. Improve DoD's oversight capability to improve acquisition outcomes
4. Assess workforce competencies
5. Strategically **reshape DAW training**

Shaping the Future Enterprise Logistician

- Emphasis on “fully qualified”
- Diversified experience to achieve acquisition success – The Enterprise Logistician
- DAU committed to improving caliber of both civilian AND military Defense Acquisition Workforce members
- Crucial balance between recruitment & training
 - “Adding 10,000 people each with one year's experience is different than adding 500 people with 20 years' experience” -- *Norm Augustine, 25 Feb 10*
- Life Cycle Logistics workforce expanding
 - FY05-09 +2,360 (19%); FY08-09 +1,500 (11%); by FY15 20,000?

Shaping the Future Enterprise Logistician Aggressive Life Cycle Logistics Roadmap (FY10-13)

Shaping the Future Enterprise Logistician

- Professional development of executive level, strategic-thinking logisticians who can function successfully across DoD enterprise
 - Focus on supporting warfighter & achieving best value life cycle systems readiness
 - Logistics is NOT a PM's "only discretionary account" -- cannot simply "worry about sustainment later"
 - DoD needs "Enterprise Logisticians" with broadly diverse understanding
 - across the DoD logistics domain of maintenance, supply, transportation/ distribution, life cycle logistics, AND
 - Across the DoD acquisition domain of life cycle logistics, program management, systems engineering, business, and others
- DAU leverages Performance Learning Model (PLM) to raise the professional development bar for the Life Cycle Logistician

Summary

Objective: "Agile, timely, precise, cost-effective support to the warfighter"

- Fully Qualified vs. Fully Certified
- Partnering with NDIA and AIA logistics committees
- Established DAU Chair at Industrial College of the Armed Forces (ICAF)*
- Evolving Strategy to Embed DAU Life Cycle Logistics Training into ICAF Senior Acquisition Course Portfolio
- DoD Logistics Human Capital Strategy Implementation – Collaboration

U.S. Navy Vision for Joint Logistics

Guide And Focus Navy's Engagement in Joint Logistics

Vision

Optimal alignment and integration of Navy and its logistics capabilities within the Joint Logistics Environment (JLE)

Fleet of the Future

- Minimally manned – crew of 40
- Ashore Support Infrastructure – logistics and maintenance
- Mission Package provides “plug and fight” flexibility to the JTF Commander

Presents affordability and support challenges...

Navy's Total Ownership Cost Challenges

- 1. Life Cycle Costs are set early in an acquisition program**
 - Understanding & influencing the cost drivers is essential
 - Need to increase the focus on TOC at every decision point

- 2. The majority of the 2020 Battle Force exists today**
 - 222 of today's 285 ships are required in 2020
 - Platforms must achieve their Expected Service Life

- 3. Life cycle costs of next generation systems must be more fully understood**
 - Increased fidelity of sustainment strategies is essential
 - The F-35 Challenge is representative of the future

7.0 Earthquake Strikes Haiti

January 2010

The Earthquake: According to the U.S. Geological Survey, the most powerful earthquake (7.0 magnitude) to hit Haiti in a century struck 12 January 2010 shortly before 1700 and was centered about 10 miles southwest of Port-au-Prince. According to witnesses, it was felt strongly in eastern Cuba, more than 200 miles away. The quake took place about 6 miles underground, according to the USGS. At least 10 aftershocks followed, including two in the magnitude 5.0 range, the USGS reported.

Logistics Impact: Major damage to the Port-au-Prince seaport, loss of air control tower/perimeter roads at the airport and major building collapse severely complicated initial search & rescue and relief delivery efforts. Thousands of injured Haitians and displaced/missing AMCITs required 24/7 medical & long term recovery team efforts.

EARTHQUAKE INTENSITY
 The Modified Mercalli (MMI) Intensity Scale*

4 LIGHT	8 SEVERE
5 MODERATE	9 VIOLENT
6 STRONG	10+ EXTREME
7 VERY STRONG	

*MMI is a measure of ground shaking and is different from overall earthquake magnitude as measured by the Richter Scale.
 *Area shown on map may fall within MMI 9 classification, but constitute the areas of heaviest shaking based on USGS data.

Mission and Objectives

Mission: Conduct Foreign Humanitarian Assistance and Disaster Relief (FHA/DR) in support of U.S. Government efforts in Haiti, in order to mitigate near term human suffering and accelerate recovery.

Objectives:

- Provide direct, urgent humanitarian relief support to the government & people of Haiti
- Provide security in support of humanitarian relief to the government & people of Haiti
- Provide sustaining support to the government & people of Haiti
- Prevent deterioration of general security within Haiti
- Provide logistics enabling support to international relief efforts
- Evacuate American citizens as required
- Be prepared for mass casualties and mass migration
- Prevent misperceptions regarding USG relief and support effort

Logistics and the Interagency: Whole-of-Government Initiative

13 April 2010

Where We Are

4

Phase I: Build the trust and momentum needed across agencies

Phase II: Solve more complex, systemic issues as we move forward

Achieved in 6 Months

4

**Quick Win #1:
Ready for Action
(S/CRS & USAID)**

Eliminated undue travel and customer wait time

**Quick Win #2:
Shopping Smart
(All)**

Connected federal-wide interagency contracts with people who need them

**Quick Win #3:
Open Kimono
(DHS & TRANSCOM)**

Set clear expectations with customers on DOD airlift and distribution capacity and cost

**Quick Win #4:
Making Deals
(DHS & DLA)**

Set agreements for supplies and services that Homeland Security and DOD will exchange

**Quick Win #5:
Concierge Service
(DOS)**

Created information sharing capability for interagency partners taking care of DOD members abroad

Why Did it Work?

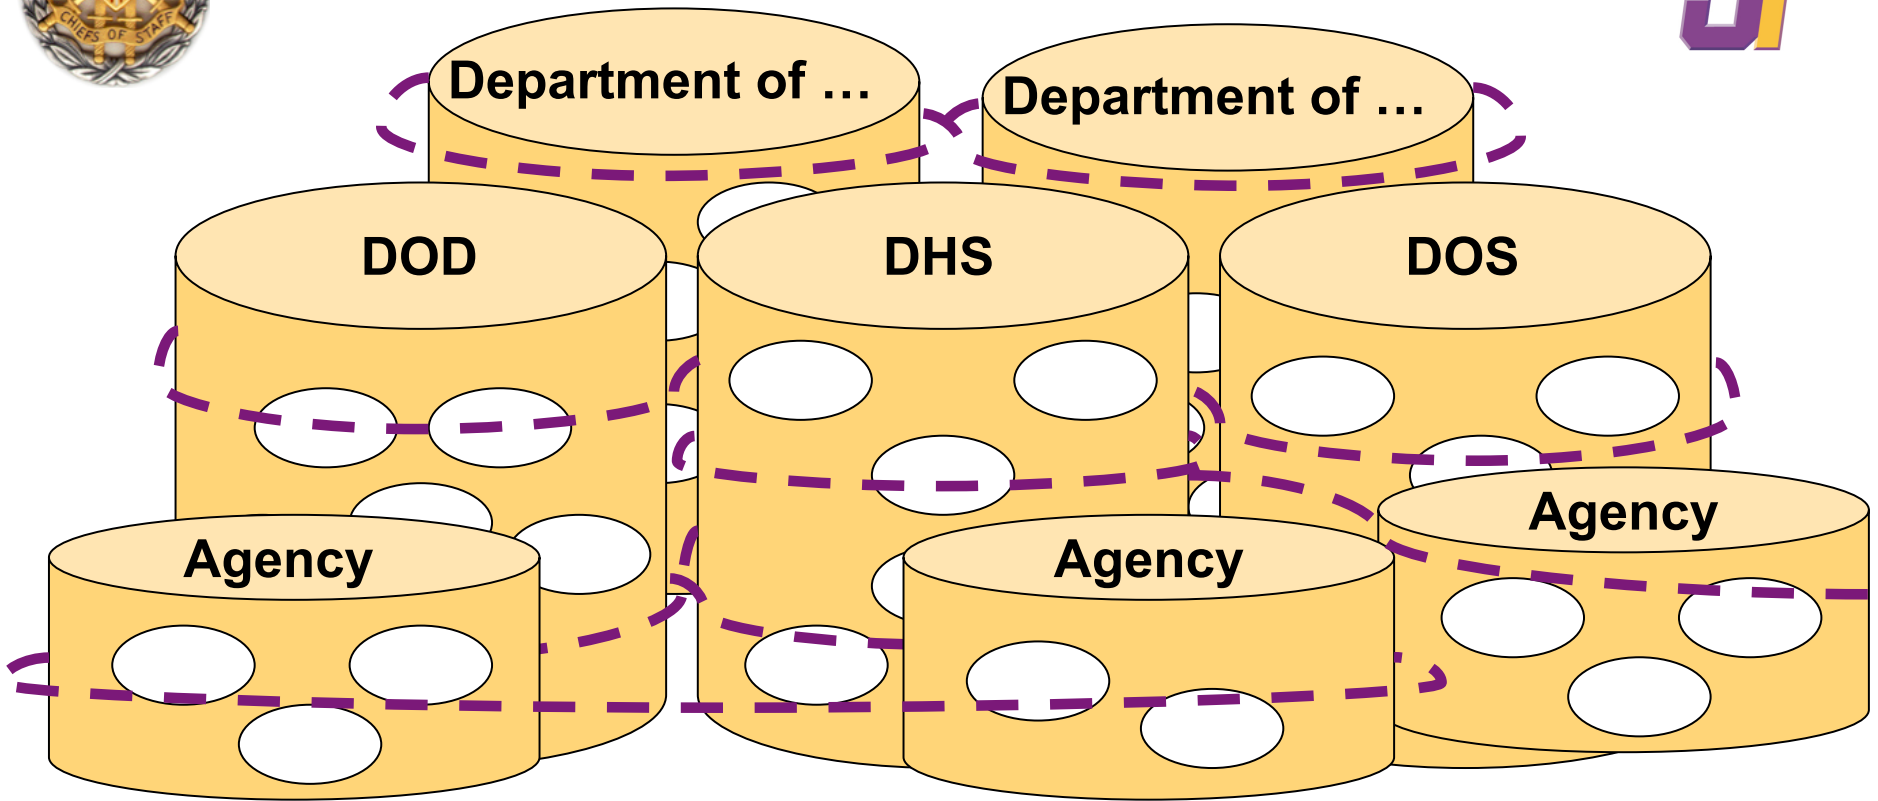

- Leaders owned initiatives...and personally acted for results
- Involved action officers (DIALOG and QW Teams)
- Honest, timely communication
- Main goal was to build trust
- Project outcomes were meaningful

Where We Are Going

4

Expand the sphere of interagency partners and complexity of issues over time

Cultural transformation: seamless partnership across US government logistics

NDIA Logistics Conference

Miami, FL

April 14, 2010

Panel Line-Up

- Mr. Randy Fowler – Assistant Deputy Under Secretary of Defense (Materiel Readiness) – Moderator
- RDML Vince Griffith – Commander, Defense Supply Center Richmond
- RDML Dave Baucom – Deputy Asst. Secretary of the Navy (Acquisition & Logistics Management)
- BrigGen James Kessler – Commander, Marine Corps Logistics Command
- Mr. Lou Kratz – Vice President, Logistics and Sustainment, Lockheed Martin Corporation

DoD Product Support Assessment

Assessment Purpose

- Recommends to senior leadership improvement of existing weapon system sustainment strategy
- Encompasses operational, acquisition, and sustainment communities
- Complements Weapon System Acquisition Reform Act with perspectives attentive to life cycle management and sustainment
- Provides recommendations to improve weapon system readiness and control life cycle cost

- ✓ *Senior Steering Group strongly endorsed report and way ahead*
- ✓ *Final report signed by USD(AT&L) on November 12, 2009*
- ✓ *Implementation Teams Underway*
- ✓ *Thanks to NDIA for participation along the journey!*

DoD Weapon System Acquisition Reform Product Support Assessment

Product Support Business Model:

Provide Program Managers a model template for a weapon system support strategy that drives cost-effective performance and capability for the Warfighter across the weapon system life cycle and enables most advantageous use of an integrated defense industrial base

Industrial Integration Strategy:

Align and expand the collaboration between Government & Industry that produces best value partnering practices

Supply Chain Operational Strategy:

Connect platform product support strategies to enterprise supply chain approaches that produces best value across the DoD components

Governance:

Strengthen and develop organization and mgmt processes to deliver the right sustainment information to decision-makers

Analytical Tools:

Build a toolbox of analytical approaches (including BCA)

Metrics:

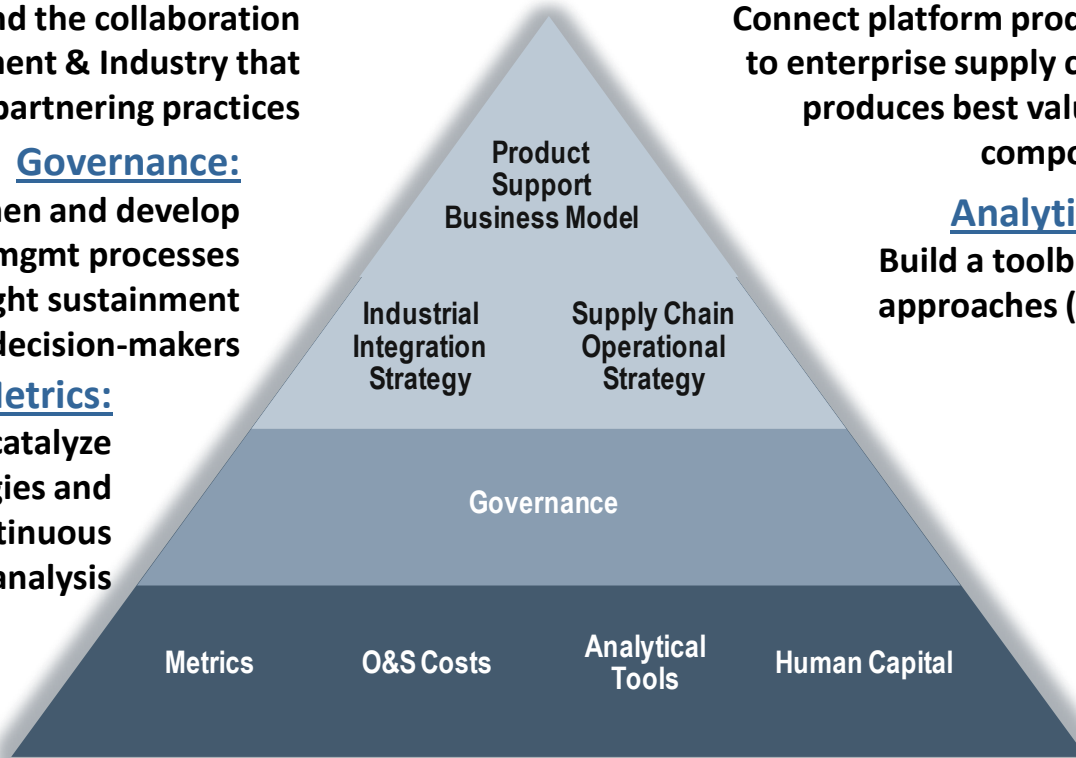

Use existing metrics to catalyze sustainment strategies and trigger continuous supportability analysis

Human Capital:

Integrate Product Support competencies across the Logistics and Acquisition workforce domain to institutionalize successful traits of an outcome-based culture

O&S Costs:

Improve O&S cost visibility and influence

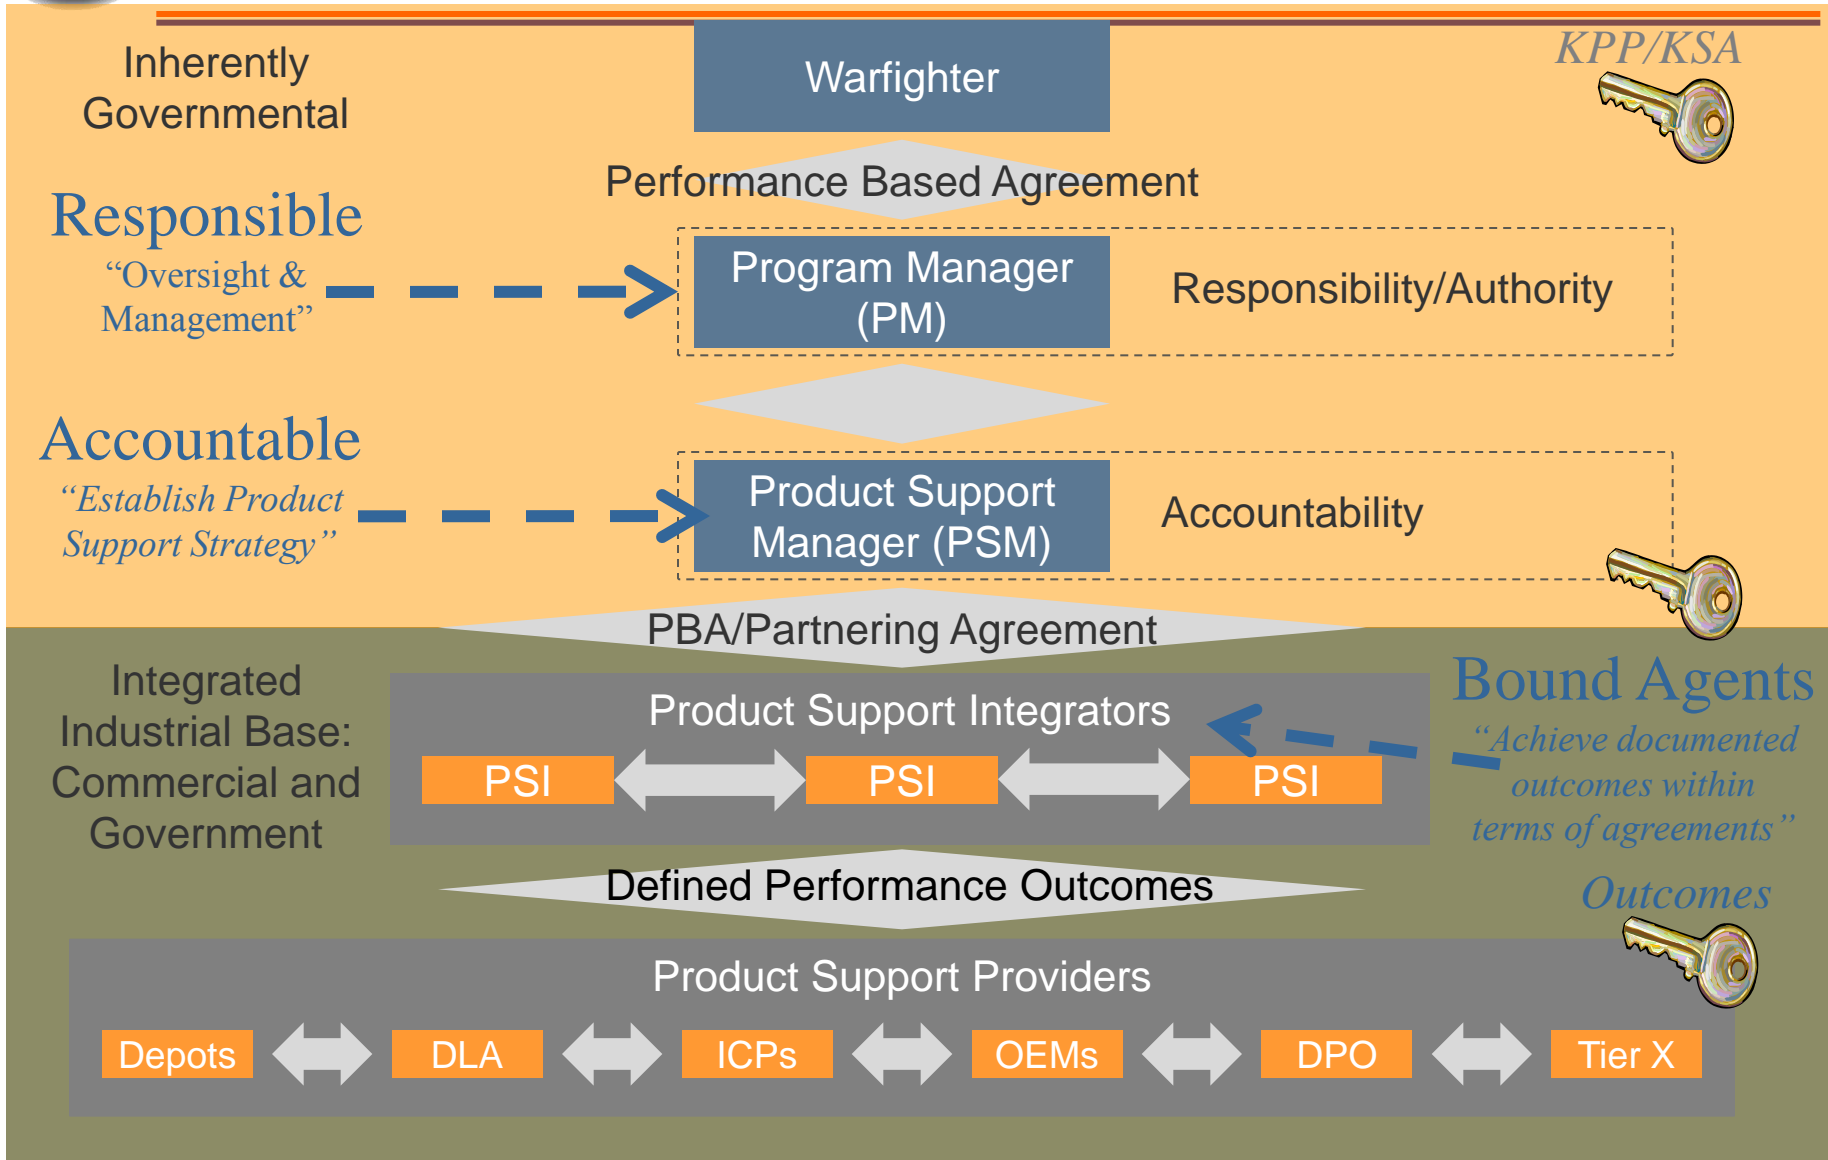

Weapons System Data:

Define, collect, report, and manage the data we need to drive effective Life Cycle Product Support

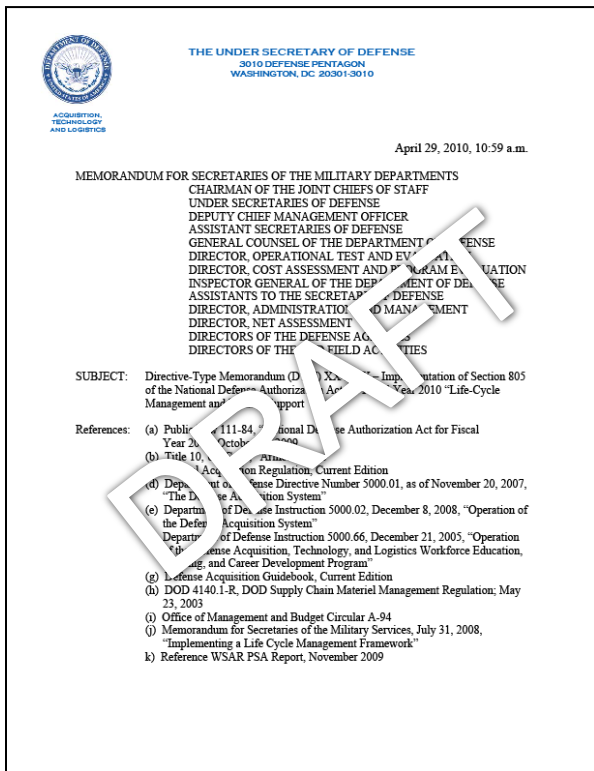

Product Support Business Model

FY 2010 NDAA Sec. 805, Life Cycle Management and Product Support

Attachment 1 - Guidance on LCM and Product Support Strategies

Attachment 2 – Definitions

- Outcome-based (readiness-based) strategies at best-value costs
- Balanced use of DoD and industry resources via stable and robust partnerships
- Maximize competition, or the option of competition for long-term effectiveness
- **Assist PMs in LCM responsibilities via establishment of mandatory product support manager (PSM) positions**
- Assign properly qualified military or DoD employee to PSM positions
- Specifies PSM duties

On track for April 30 guidance issuance

Sec 805 – What's Different?

- **Explicitly establishes a PM help-mate**
- **Strengthens PM authority (funding)**
- **Builds a better Life Cycle Logistics human capital asset**
- **More respect for an integral program management position (front-line)**
- **Potential for many key roles and responsibilities to be performed better**

Quadrennial Defense Review 2010

➤ *Reforming How We Buy:*

Improving program execution

- Employ fixed-price development contracts more frequently
- Constrain added requirements by employing Configuration Steering Boards
- Demonstrate critical technologies and prove concepts prior to initiating engineering and manufacturing development
- Certify technology maturity through independent reviews and technology readiness assessments
- Develop more accurate technical baselines
- Conduct realistic integrated testing as early as possible
- Better align profitability with performance
- ***“Achieve effective life cycle cost management by employing readiness-based sustainment strategies, facilitated by stable and robust government-industry partnerships.”***

➤ *Strengthening the Industrial Base*

- ***“...create and/or sustain competition, innovation, and essential industrial capabilities.”***

Authorization for government-provided medical care

Interoperable bar code; provides unique identification

The government organization specified above, in its mission support capacity under the contract, authorizes the individual employee identified herein, to proceed to the location(s) listed for the designated deployment period set forth above. Non-supervisory positions shall be rated GS-12 or equivalent. Supervisory / Managerial positions shall be rated as GS-13 or equivalent. Upon completion of the mission, the employee will return to the point of origin. Travel being performed is necessary and in the public's service. Travel is in accordance with FAR 31.205-36 and the maximum per diem allowable under the appropriate travel regulations (Joint Travel Regulation (for AK, HI and outlying areas of the United States and US possessions), Federal Travel Regulation for CONUS and US Territories, and Dept of State's Standardized Regulations for OCONUS Foreign Areas designated by DOS).

Emergency medical support will be determined by the appropriate supported commander. Contractor authorization aboard military aircraft will be determined by the supported commander. Necessary identification badges will be determined and provided by the supported command.

This Contractor is considered as "Key Personnel, Government Civilian" in connection with "Non-Combatant Evacuation Orders" at the civil service grade indicated above.

Capability Improvements

- Integrating SPOT with the Biometric Identification System for Access (BISA)
- Established a Secret Internet Protocol Router Network functionality allowing classified and sensitive contract and contractor information to be available through SPOT
- Awarding a contract that will bring together classified and unclassified data systems under a management tool (Total Operational Picture Support System – TOPSS)
- Working to streamline the SPOT registration process by assessing the ability of government data systems to integrate industry-generated credentials

SPOT Enterprise Suite

SPOT NIPR – SPOT deployed on the Non-secure Internet Protocol Router Network

SPOT SIPR – SPOT deployed on the Secure Internet Protocol Router Network

JAMMS – Joint Asset Movement Management System

TOPSS – Total Operational Picture Support System

Complexities

- Integrating SPOT with the Biometric Identification System for Access (BISA)
- Interagency and international cooperation
- Early deployment to future contingencies
- Common Access Cards; government and federated

The "Gotchas" of Application Implementation

- Expectations not properly managed and become inflated
- Project delivery overshadows the value delivery
- Improper deployment strategy selected
- Personnel issues are minimized
- Fail to consider context of the Life Cycle
- Processes added, then fail to eliminate the old
