SEPTEMBER 9-10, 2008

EVENT #8490

2008 HOMELAND SECURITY SYMPOSIUM & EXHIBITION

NEW DIRECTIONS IN HOMELAND SECURITY

SEPTEMBER 9-10, 2008 ▶ ARLINGTON, VA

The Homeland Security Division of NDIA is sponsoring the 2008 Homeland Security Symposium & Exhibition from September 9-10, 2008 at the Marriott Crystal Gateway Hotel in Arlington, VA. The theme of this year's symposium is "New Directions in Homeland Security" and focuses on the future of Homeland Security as we enter a period of transition in Presidential administrations. Leading speakers from Congress, the Administration, both Presidential campaigns and other opinion leaders will engage in a lively dialogue highlighting what the future holds for Homeland Security. The Symposium will also concentrate on issues involving DHS procurement in a panel that will be facilitated by the DHS Chief Procurement Officer. A segment of the symposium also will address small business strategies.

HOMELAND SECURITY DIVISION

MISSION AND PURPOSE:

- ▶ To provide legal and ethical forums for the exchange of information, ideas and recommendations between industry and government on homeland security issues
- ▶ To promote a vigorous, robust and collaborative government-industry homeland security team
- ▶ To advocate for best-in-class, high technology equipment, systems, training and support for America's first responder community

FOCUS:

The Homeland Security Division incorporates the six critical mission areas identified in the National Strategy for Homeland Security: Intelligence and Warning, Border and Transportation Security, Domestic Counterterrorism, Protecting Critical Infrastructure and Key Assets, Defending Against Catastrophic Threats, and Emergency Preparedness.

The Homeland Security Division focuses on the protection and security of the assets, information, facilities, and resources of the government, military and private sector organizations which comprise the technological, military, and industrial infrastructure of the United States. The division provides input and advice to a wide range of agencies and departments of Federal, state and local governments and to commercial, industrial and academic institutions.

DIVISION CHAIR

Mr. Bob Kelly
CenTauri Solutions, LLC

VICE-CHAIR

Mr. Rich Cooper
Olive, Edwards, and Cooper, LLC

SECRETARY

Mr. Vince Cannava
Global Security
Engineering Solutions (GS&ES)/
L-3 Communications

TUESDAY, SEPTEMBER 9, 2008

- 7:00-8:00 AM **Registration/Continental Breakfast**
- 8:00-8:15 AM **Welcome & Opening Remarks**
Mr. Vince Cannava
Global Security and Engineering Solutions (GSE&S), L-3 Communications Symposium Chairman
- Major General Barry D. Bates, USA (Ret)
Vice President, Operations, NDIA
- Mr. Robert W. Kelly
Managing Partner, CenTauri Solutions, LLC Chairman, NDIA Homeland Security Division
- 8:15-9:00 AM **Keynote Address**
Congressman Bennie G. Thompson (D-MS)
Chairman, Committee on Homeland Security, U.S. House of Representatives
- 9:00-10:00 AM **Critical Infrastructure Protection**

Adjourn

ADMINISTRATIVE INFORMATION

For questions regarding attendee participation at this symposium, please contact Claudia Diaz, Meeting Planner, at (703) 247-2596 or cdiaz@ndia.org.

CONFERENCE PROCEEDINGS

Proceedings will be made available to symposium attendees one to two weeks after the symposium via DTIC link. You will receive notification via e-mail once proceedings are available for viewing.

ATTIRE

Symposium attire is business (suit/coat and tie) for civilians and Class A or uniform of the day for military.

ID BADGES

During symposium registration and check-in, each attendee will be issued an identification badge. Please be prepared to present a valid picture ID. Badges must be worn at all symposium functions.

SPECIAL NEEDS

NDIA supports the Americans with Disabilities Act of 1990. Attendees with special needs should contact Claudia Diaz, Meeting Planner, at (703) 247-2596 or cdiaz@ndia.org prior to Friday September 5, 2008.

HOTEL INFORMATION

A block of rooms has been reserved at Marriott Gateway Crystal City, 1700 Jefferson Davis Hwy, Arlington, VA 22202. Call (703) 920-3230 to make reservations. The room rate is \$251/single and double rooms for industry members. The room rate is \$201/single or the prevailing 2008 government rate for government attendees. The per diem rate is available ONLY to active duty military or civilian government employees. Identification will be required at check-in; a retired military ID is NOT acceptable. Reservations must be made by Friday, August 8, 2008. Rooms may be sold out before Friday, August 8, 2008. After that date, reservations will be accepted on a space available basis. Speakers and attendees are responsible for making their own hotel reservations. Be sure to mention that you are with the NDIA 2008 Homeland Security Symposium & Exhibition in order to receive the group rate.

WWW.DEFENSEJOBS.COM

The Defense Industry's leading employment website; find a job, post a job listing, post a resume, and search resumes. For more information, please contact info@defensejobs.com or (703)247-9461. Please visit www.defensejobs.com

NATIONAL DEFENSE MAGAZINE

Advertise in *National Defense* and increase your company exposure at this symposium! *National Defense* will be distributed to all attendees of this symposium and all of NDIA's other symposiums. For more information, contact Dino Pignotti at 703-247-2541 or dpignotti@ndia.org.

SPONSORSHIP MENU

OPENING RECEPTION SPONSOR (available to 3 co-sponsors)

Benefits include:

- Company logo and link to your company on event web site 90 days prior to symposium
- Company description (300 words) and logo in on-site materials
- Sponsor ribbons on designated badges
- Event specific signage and throughout symposium
- Company name on cocktail napkins at the reception
- Hosted bar and hors d'oeuvres for attendees

Investment: \$7,000 for each or \$18,000 for title sponsor.

CONTINENTAL BREAKFAST SPONSOR (available to 2 sponsors)

Benefits per Breakfast include:

- Company logo and link to your company on event web site 90 days prior to symposium
- Company description (300 words) and logo in the symposium on-site materials
- Sponsor ribbons on designated badges
- Event specific signage and throughout symposium
- Sponsor logo on tent signs at each breakfast table or event signage throughout breakfast area

Investment: \$5,000 per breakfast or \$8,000 for title sponsor.

SPONSORSHIP MENU CONTINUED

LUNCH SPONSOR (available to 2 sponsors)

Benefits per Lunch include:

- Company logo and link to your company on event web site 90 days prior to symposium
- Company description (300 words) and logo in the symposium on-site materials
- Sponsor ribbons on designated badges
- Event specific signage and throughout symposium
- Sponsor logo on tent signs at each breakfast table or event signage throughout lunch area

Investment: \$6,000 each or \$10,000 for title sponsor.

BREAK AREA SPONSOR (available to 4 sponsors)

Benefits per break include:

- Sponsor ribbons on designated badges
- Event specific signage and throughout symposium
- Logo in the symposium on-site materials
- Light refreshments for symposium attendees during breaks (to include coffee, tea, sodas and/or water)

Investment: \$3,000 per break or \$9,000 for title sponsor.

EXECUTIVE PADFOLIO SPONSORSHIP (limited to 1 sponsor)

The Executive Padfolio is very popular and will be handed out at the attendee registration desk. These leather padfolios are equipped with a calculator, pen and notepad and carried throughout the entire event. They are great for advertising both during and after the event.

Benefits Include:

- Sponsor ribbons on designated badges
- Event specific signage and throughout symposium
- Company logo on front of padfolio

Investment: \$7,000

INTERNET CAFÉ (limited to 1 sponsor)

The Internet Café will be located next to registration and that allows all attendees to stay connected while attending the Symposium. Attendees can use the Internet Cafe to check their e-mail and search the Internet. Brand your name with maximum exposure at this high traffic area.

Benefits Include:

- Sponsor ribbons on designated badges
- Event specific signage and throughout symposium
- Screen saver with your company logo
- Company website as homepage

Investment: \$5,000

LANYARDS SPONSOR (limited to 1 sponsor)

Brand your company logo on these premium woven lanyard cords that will be handed out to attendees as they register.

Investment: SOLD to Parsons

LITERATURE INSERT SPONSORS (available to 10 co-sponsors)

One page flyer inserted into all attendee padfolios is a great way to promote a new product or service. Company provides the promotional flyer materials. Pre-approval is required.

Investment: \$1,500

To reserve your sponsorship contact NDIA, Laura Hoover, Sponsorship Manager at NDIA (804) 437-3773 or email: lhoover@ndia.org or Alden Davidson, Exhibits and Sponsorships Manager, at (703)247-2582 or email: adavidson@ndia.org

EXHIBIT FLOORPLAN

RESERVE BOOTH SPACE

To view, schedule and reserve booth space in real time, please visit www.ndia.org/exhibits/8490.

QUESTIONS?

Please contact Dennis Tharp, Exhibits Manager, with all exhibitor inquiries at (703) 247-2584 or dtharp@ndia.org.

PLEASE NOTE

No Photography is allowed in the exhibit hall. Cameras and cell phones will be confiscated by security if they are used to photograph any exhibit without prior consent from NDIA management.

No one under the age of 18 will be permitted in the exhibit hall.

EXHIBIT SCHEDULE*

*Schedule is subject to change. Please check website periodically for changes/updates.

MOVE IN

Monday, September 8, 2008

2008 HOMELAND SECURITY SYMPOSIUM AND EXHIBITION

Department of Homeland Security

Office of Small and Disadvantaged Business Utilization (OSDBU)

Homeland
Security

Department of Homeland Security Mission

“We will lead the unified national effort to secure America. We will prevent and deter terrorist attacks and protect against and respond to threats and hazards to the nation. We will ensure safe and secure borders, welcome lawful immigrants and visitors, and promote the free-flow of commerce.”

DHS Acquisition Regulation Small Business Policy

- ★ “DHS is committed to a unified team approach involving senior management, small business specialists, acquisition personnel and program staff to support both critical homeland security missions and meet public policy objectives concerning small business participation on departmental procurements.”

Three Major Types of Business Opportunities at DHS

- ★ **Contracts and Subcontracts**
- ★ **Research and Development**
- ★ **Grants to State and Local Governments**

8 Major DHS Buying Activities

- ★ Customs & Border Protection
- ★ DHS Headquarters Office of Procurement Operations
- ★ Federal Emergency Management Agency
- ★ Federal Law Enforcement Training Center
- ★ Immigration & Customs Enforcement
- ★ Transportation Security Administration
- ★ U.S Coast Guard
- ★ U.S. Secret Service

Customs and Border Protection (CBP)

- ★ Protects America's borders against terrorists and other criminals, while facilitating trade and travel.
- ★ Oversees 2,000 miles of border with Mexico, 5,000 miles of border with Canada, 317 "ports of entry" (official crossing points) and 136 Border Patrol stations with 33 interior checkpoints.

HQ Office of Procurement Operations

Provides a full range of acquisition support to 35 program offices within Homeland Security such as:

Science & Technology

Citizenship & Immigration Services

US-Visit

Center for Domestic Preparedness

CFO

CIO

HQ Office of Procurement Operations

Provides a full range of acquisition support to 35 program offices within DHS such as:

- ★ Office of the Secretary (USM, CPO, CIO, CFO, ITAC)
- ★ National Protection & Programs Directorate
- ★ US VISIT Program Office
- ★ Domestic Nuclear Detection Office
- ★ Science & Technology (HSARPA)
- ★ Citizenship & Immigration Services
- ★ Center for Domestic Preparedness

Federal Emergency Management Agency (FEMA)

- ★ **Manages Federal response and recovery efforts following any national disaster**
- ★ **Provides disaster assistance in the form of housing and financial assistance caused by disaster**
- ★ **Manages the National Flood Insurance Program**
- ★ **Manages the Grants and Assistance programs**
- ★ **Coordinates 4,000 standby disaster assistance employees available for deployment after disasters**

Federal Law Enforcement Training Center (FLETC)

- ★ Provides training that enables federal, state and local law enforcement partners to accomplish their missions (training is provided by in-house trainers)
- ★ Provides mission-responsive infrastructure

Immigration and Customs Enforcement (ICE)

- ★ Investigates issues such as human smuggling, export enforcement, contraband smuggling, and financial and immigration crimes
- ★ Ensures the departure from the U.S. of all removable aliens
- ★ Collects and analyzes intelligence data for use by ICE and DHS
- ★ Reduces threats posed against the more than 8,800 federal facilities nationwide (FPS)

Transportation Security Administration

- ★ Protects the nation's transportation systems
- ★ Screens all airline passengers
- ★ Deploys Federal air marshals to detect, defeat, and deter hostile acts targeting all transportation modes
- ★ Screens 100% of 1 billion pieces of luggage checked annually
- ★ Detects and deters the use of explosive devices in transportation systems

U.S. Coast Guard (USCG)

- ★ Protects ports, waterways, & flow of commerce from terrorism
- ★ Provides maritime border security against illegal drugs, illegal aliens, firearms and WMD
- ★ Provides protection of natural resources
- ★ Provides maritime safety, including search & rescue efforts, commercial and recreational boating safety

Coast Guard Area and District Geographical Boundaries

U. S. Secret Service

- ★ Protects the President, Vice President, visiting heads of state, and other government leaders
- ★ Protects U.S. currency from counterfeiters and safeguards Americans from financial crimes
- ★ Plans, coordinates, and implements security for designated national special security events (NSSE)
- ★ Emphasizes prevention through protective intelligence and threat assessment

Role of the OSDBU

- ★ The OSDBU serves as the focal point for small business acquisition matters, and works closely with all DHS organizations to implement the program.
- ★ The OSDBU strives to create an environment in which small businesses have a meaningful opportunity to obtain DHS prime and subcontracts.
- ★ OSDBU and small business procurement information: please visit www.dhs.gov/openforbusiness

Role of the OSDBU

Major Activities

- ★ Annual Forecast of Contract Opportunities (includes a point of contact for each project)
- ★ Listing of DHS large business prime contractors with small business prime contracting opportunities
- ★ Links to DHS acquisition offices, small business specialists, and FedBizOpps
- ★ Outreach Programs
- ★ DHS Mentor-Protégé Program

Small Business Considerations

- ★ 8(a)
- ★ HUBZone
- ★ Service Disabled Veteran Owned Small Business
- ★ Traditional Small Business Set-Asides
- ★ Small Business Teams or Joint Ventures
- ★ Full and Open Competition –
Subcontracting and DHS Mentor-Protégé Program

DHS Mentor-Protégé Program

- ★ Mentor-protégé program features three incentives: pre-award, post-award, and annual recognition
- ★ Mentor-Protégé Program is open to all small businesses
- ★ Details and application format available on the DHS small business website

Small Business Prime Contracting Preliminary Accomplishments Fiscal Year 2007

Category	Goal (%)	Accomplishment (\$)	Accomplishment (%)
Total Procurement Dollars	N/A	\$11,157,000,000	N/A
SB Prime Contracts	30.0%	\$3,953,000,000	35.4%
8(a) Contracts	4.0%	\$648,500,000	5.8%
SDB Prime Contracts [other than 8(a)]	4.0%	\$846,000,000	7.6%
SDB Prime Contracts [overall; including 8(a) contracts]	8.0%	\$1,500,000,000	13.4%
HUBZone SB Prime Contracts	3.0%	\$350,000,000	3.1%
SDVOSB Prime Contracts	3.0%	\$152,000,000	1.4%
VOSB Prime Contracts	N/A	\$598,000,000	N/A
WOSB Prime Contracts	5.0%	\$893,000,000	8.0%

Strategic Positioning

- ★ Marketing tips from small businesses that have been successful in the federal marketplace:
 - Review all background information
 - Understand difference between use of pre-existing contract vehicles and open market buying – and position your firm accordingly
 - Participate in small business outreach/networking activities
 - Teaming

Helpful Hints

- ★ Register in CCR – make sure your small business profile is current and complete; especially the Performance History section (www.ccr.gov)
- ★ Receive electronic notifications from FedBizOpps (www.fbo.gov)
- ★ Looking for subcontracting opportunities – go to SBA's SubNet listing (<http://web.sba.gov/subnet>)
- ★ Look to local resources – SBA, PTACs, local Federal agencies (use the “blue” pages in the phone book to find them)

Other DHS Programs

- ★ Research and Development Opportunities (featuring Broad Agency Announcements from the DHS Science and Technology Division)
- ★ Small Business Innovation Research (SBIR) Program
- ★ DHS Grants to State and Local Governments (potentially resulting in a state or local government procurement opportunity)
- ★ For more information on DHS programs of interest to the business community, please visit www.dhs.gov/openforbusiness

Homeland Security

Opportunities for the Private Sector

- Summary

Homeland
Security

Homeland Security Mission

- Lead Unified National Effort to Secure America
- Prevent Terrorist Attacks Within the U.S.
- Respond to Threats and Hazards to the Nation
- Ensure Safe and Secure Borders
- Welcome Lawful Immigrants and Visitors
- Promote Free Flow of Commerce

**Homeland
Security**

U.S. Department of Homeland Security

Office of the Under Secretary for Science and Technology

S&T Goals

Consistent with the Homeland Security Act of 2002

- **Accelerate the delivery of enhanced technological capabilities** to meet the requirements and fill capability gaps to support DHS agencies in accomplishing their mission.
- Establish a lean and agile world-class S&T management team to deliver the technological advantage necessary to ensure DHS Agency mission success and prevent technological surprise.
- Provide leadership, research and educational opportunities and resources to develop the necessary intellectual basis to enable a national S&T workforce to secure the homeland.

Homeland
Security

DHS S&T Investment Portfolio

Balance of Risk, Cost, Impact, and Time to Delivery

Product Transition (0-3 yrs) • Focused on delivering near-term products/enhancements to acquisition • Customer IPT controlled • Cost, schedule, capability metrics	Innovative Capabilities (1-5 yrs) • High-risk/High payoff • “Game changer/Leap ahead” • Prototype, Test and Deploy • HSARPA
Basic Research (>8 yrs) • Enables future paradigm changes • University fundamental research • Gov’t lab discovery and invention	Other (0-8+ yrs) • Test & Evaluation and Standards • Laboratory Operations & Construction • Required by Administration (HSPDs) • Congressional direction/law

Customer Focused, Output Oriented

S&T Organization

Three Step Approach:

Keep it Simple and Make it Easy

Two Models for Product Realization

Big-A Acquisition

1. Requirements derived by Government
2. RFP and then cost-plus contract(s) with developer(s) (which incentivizes long intervals)
3. Focus on technical performance
4. Production price is secondary (often ignored)
5. Product price is cost-plus
6. Product reaches users via Government deployment

Performance is King

Relationship between end users and product developer is usually remote

**Is there a
“Middle Ground”**

Pure Commercialization

1. Requirements derived by Private Sector
2. Product development funded by the developer (which incentivizes short intervals)
3. Technical performance secondary (often reduced in favor of price)
4. Focus on price point
5. Product price is market-based
6. Product reaches users via marketing and sales channels

Performance/Price is King

Relationship between end users and product developer is crucial

A new model for Commercialization...

1. Development of Operational Requirements Document (ORD)
2. Assess addressable market(s)
3. Publish ORD and market assessment on public DHS web portal, soliciting interest from potential partners
4. Execute no-cost agreement (CRADA-like) with multiple Private Sector entities, transferring technology (if necessary)
5. Develop supporting grants and standards as necessary
6. Assess T&E after product is developed
7. New Commercial off the Shelf (COTS) product marketed by Private Sector with DHS support

Differences from the Acquisition model:

- **Primary criteria for partner selection is market penetration, agility, and performance/price ratio**
- **Product development is not funded by DHS**
- **Government involvement is limited to inherently governmental functions (e.g., Grants and Standards)**

**Homeland
Security**

Commercialization Process

10 Reasons to Partner with DHS Science & Technology

Reasons Color Legend:

Economics-based

Public Relations-based

Business Development-based

Strategic Marketing-based

Technical Resources-based

1. Access to Sizeable DHS Market and Ancillary Markets
2. Leverage the Financial Strength/Stability of DHS and off-set R&D costs through participation in mutually beneficial cost-sharing Programs
3. Utilize the SAFETY Act to gain liability protection and access DHS' array of PR and Market Communications services
4. Effectively reach the First Responders Market through FEMA-sponsored grant programs, the AEL (Approved Equipment List), other sponsored equipment lists and fast-track programs
5. Team with Science & Technology Personnel to leverage a vast Network of Laboratory Facilities for Technology and Product Development
6. Gain access to Test and Evaluation (T&E) Facilities for Product Development and actively participate in the generation of Standards, T&E methods and Regulations used at the tribal, local, state, and federal levels
7. Meet and establish Partnerships with others in the University, Business, and National Lab Communities
8. Potentially generate Licensing revenue and capture potential Derivative Product revenue
9. Leverage SBIRs, HITS and HIPS to gain experience with homeland security applications
10. Make a Real Difference by Developing Products to Defend the Homeland for Generations to come as well as gain recognition as a Corporate Citizen contributing to the Security of our Homeland

Cargo Security

Representative Technology Needs

- Enhanced screening and examination by non-intrusive inspection
- Increased information fusion, anomaly detection, Automatic Target Recognition capability
- Detect and identify WMD materials and contraband
- Capability to screen 100% of air cargo
- Test the feasibility of seal security; detection of intrusion
- Track domestic high-threat cargo
- Harden air cargo conveyances and containers
- Positive ID of cargo and detection of intrusion or unauthorized access

Establishment of Project IPTs: Detailed Specifications/Requirements

How the Business Consultant described it

How the project was documented

What operations installed

How the customer was billed

How it was supported

What the customer really needed

Getting on the “Same Page”

- Historical Perspective
- Language is Key
- Communication is Paramount

Technology Readiness Levels (TRLs): Overview

TRLs are NASA-generated and Used Extensively by DoD

Basic principles observed and reported	1	Basic
Technology concept and/or application formulated	2	
Analytical and experimental critical function and/or characteristic	3	
Component and/or breadboard validation in laboratory environment	4	Applied
Component and/or breadboard validation in relevant environment	5	
System/subsystem model or prototype demonstration in a relevant environment	6	Advanced
System prototype demonstration in a operational environment	7	
Actual system completed and 'flight qualified' through test and demonstration	8	
Actual system 'flight proven' through successful mission operations	9	

TRL Correlation: DHS and Private Sector

Call to Action: Mutual Benefits

Create “Win-Win-Win” Relationships

SECURE Program

“Mutually-Beneficial Goals Achieved Through Rigorous Process”

Goals	Process
S ystem E fficacy through C ommercialization	Alignment to DHS Detailed Requirements
U tilization	Private Sector Product Development
R elevance	Product Launch, Sales and Marketing
E valuation	Customer-Focused Capstone IPT Process
	Third-party Test & Evaluation with DHS Validation

Homeland
Security

SECURE Program

Concept of Operations

- Application – Seeking products/technologies aligned with posted DHS requirements
- Selection – Products/Technologies TRL-5 or above, scored on internal DHS metrics
- Agreement – One-page CRADA-like document. Outlines milestones and exit criteria
- Publication of Results – Independent Third-Party T&E conducted on TRL-9 product/service. Results verified by DHS, posted on DHS web-portal

Benefits:

- Successful products/technologies share in the imprimatur of DHS
- DHS Operating Components and First Responders make informed decisions on products/technologies aligned to their stated requirements
- DHS spends less on acquisition programs → Taxpayers win.

SECURE Program

Benefit Analysis “Win-Win-Win”

Taxpayers	Private Sector	Public Sector
1. Citizens are better protected by DHS personnel using mission critical products	1. Save significant time and money on market and business development activities	1. Improved understanding and communication of needs
2. Tax savings realized through Private Sector investment in DHS	2. Firms can genuinely contribute to the security of the Nation	2. Cost-effective and rapid product development process saves resources
3. Positive economic growth for American economy	3. Successful products share in the “imprimatur of DHS”; providing assurance that products really work	3. Monies can be allocated to perform greater number of essential tasks
4. Possible product “spin-offs” can aid other commercial markets	4. Significant business opportunities with sizeable DHS and DHS ancillary markets	4. End users receive products aligned to specific needs
5. Customers ultimately benefit from COTS produced within the Free Market System – more cost effective and efficient product development	5. Commercialization opportunities for small, medium and large business	5. End users can make informed purchasing decisions with tight budgets

More Opportunities with DHS Science and Technology

SAFETY Act

Support Anti-Terrorism by Fostering Effective Technologies Act of 2002

- Enables the development and deployment of qualified anti-terrorism technologies
- Provides important legal liability protections for manufacturers and sellers of effective technologies
- Removes barriers to industry investments in new and unique technologies
- Creates market incentives for industry to invest in measures to enhance our homeland security
- The SAFETY Act liability protections apply to a vast range of technologies, including:
 - Products
 - Services
 - Software and other forms of intellectual property (IP)

Examples of eligible technologies:

- Threat and vulnerability assessment services
- Detection Systems
- Blast Mitigation Materials
- Screening Services
- Sensors and Sensor Integration
- Vaccines
- Metal Detectors
- Decision Support Software
- Security Services
- Data Mining Software

Protecting You, Protecting U.S.

Criteria as stated in the SAFETY Act

- Is it an Anti-Terrorism Technology?
- Is it effective and available?
- Does it possess large potential third party liability risk exposure?
- Does Seller need SAFETY Act?
- Does it perform as intended?
- Does it conform to Seller's specifications?
- Is it safe for use as intended?

Addition SAFETY Act information...

Online: www.safetyact.gov Email: helpdesk@safetyact.gov

Toll-Free: 1-866-788-9318

Award Criteria

	Developmental Testing and Evaluation (DT&E)	Designation	Certification
Effectiveness Evaluation Conclusion	Needs more proof, has potential	Demonstrated effectiveness, i.e. Developmental testing (with confidence of repeatability)	Consistently proven effectiveness, i.e. operational performance (with high confidence of enduring effectiveness)
Protection	Liability cap • only for identified test event(s) and for limited duration (=3yrs)	Liability cap • for any and all deployments in 5-8 year term	Government Contractor Defense (GCD) • for any and all deployments in 5-8 years term
Examples	• EDS not yet TSL Certified • Novel incident pattern matching service	• Radiological detector with <u>laboratory</u> success Opt-out screeners, only similar projects completed	• EDS TSL Certified • Well-documented infrastructure protection service with history of excellent performance and meeting DoE standards

EDS=Explosive Detection System TSL=Transportation Security Laboratory (TSA)

The DHS S&T SBIR FY08.2 solicitation closed on July 8, 2008.

Department of Homeland Security
Science and Technology Directorate (S & T Directorate)
Small Business Innovation Research (SBIR) Program

The DHS S&T SBIR Program was initiated in 2004. For the DHS S&T SBIR Program, two solicitations are issued per year. Generally, they will be issued in November and May.

Solicitation topics are developed by Program Managers in each of the Science and Technology (S&T) Divisions, and from time to time, by the Offices of Innovation and Basic Research. The annual solicitations consist of topics that are relevant to the Chemical and Biological, Borders and Maritime Security, Human Factors, Explosives, Infrastructure and Geophysical, and Command, Control and Interoperability Divisions.

Similar to the R&D programs of the S&T Directorate, the SBIR topics generally address the needs of the seven DHS Operational Units, i.e., U.S. Coast Guard, U.S. Transportation Security Administration, U.S. Customs and Border Protection, Federal Emergency Management Agency, U.S. Citizenship and Immigration Services, U.S. Immigration and Customs Enforcement, and U.S. Secret Service, as well as First Responders.

For the Phase II SBIR effort, the DHS S&T SBIR Program has a Cost Match feature for SBIR projects that attract matching cash from an outside investor. The purpose is to focus SBIR funding on those projects that are most likely to be developed into viable new products that DHS and others will buy and that will thereby make a major contribution to homeland security and/or economic capabilities. Click here for more information about the [Cost Match feature](#).

The DHS S&T SBIR Program has several processes in place to accelerate the Phase I and Phase II award process to further satisfy operational requirements and commercial application.

- Phase I awards are typically made within 90 days of selection.
- Invited Phase II projects will be reviewed and awards will be made incrementally, as quickly as possible under the Jump Start feature, to maintain the momentum of the Phase I effort. The Phase II proposal invitation process expeditiously identifies those Phase I awardees deserving of Phase II awards.

To learn more about the SBIR Program, please visit <http://www.sba.gov/SBIR/indexsbir-sttr.html>.

Topic Recommendations

Tech Clearinghouse Mission

To rapidly disseminate technical information concerning existing and desired products and services to/between Federal, State, Local, and Tribal Government and the Private Sector in order to encourage technological innovation and facilitate the mission of the Department of Homeland Security.

- Establishes Central Federal Technology Clearinghouse
- Issues Announcements for Innovative Solutions
- Establishes S&T Technical Assessment Team
- Provides guidance for the evaluation, purchase, and implementation of homeland security enhancing technologies
- Provides users with information to develop or deploy technologies that would enhance homeland security
- Enables technology transfer

Improved Knowledge Sound Acquisition Decisions

TechSolutions

The mission of TechSolutions is to rapidly address technology gaps identified by Federal, State, Local, and Tribal first responders

- Field prototypical solutions in 12 months
- Cost should be commensurate with proposal but less than \$1M per project
- Solution should meet 80% of identified requirements
- Provide a mechanism for Emergency Responders to relay their capability gaps
 - Capability gaps are gathered using a web site (www.dhs.gov/techsolutions)
- Gaps are addressed using existing technology, spiral development, and rapid prototyping
- Emergency Responders partner with DHS from start to finish

Rapid Technology Development

Target: Solutions Fielded within 1 year, at <\$1M

Questions/Comments:

Thomas A. Cellucci, Ph.D., MBA

thomas.cellucci@dhs.gov

U.S. Department of Homeland Security: Science and Technology Directorate's Chief Commercialization Officer

Thomas A. Cellucci, PhD, MBA was recently appointed Chief Commercialization Officer for the Department of Homeland Security's Science and Technology (S&T) Directorate . The Chief Commercialization Officer (CCO) is responsible for initiatives that identify, evaluate and commercialize technology for the specific goal of rapidly developing and deploying products and services that meet the specific operational requirements of the Department of Homeland Security's Operating Components and its end users. The CCO also develops and drives the implementation of DHS-S&T's outreach with the private sector to establish and foster mutually-beneficial working relationships to facilitate cost-effective and efficient product/service development efforts.

Cellucci is an accomplished serial entrepreneur, seasoned senior executive and Board member possessing extensive corporate and VC experience across a number of worldwide industries. Profitably growing high technology firms at the start-up, mid-range and large corporate level has been his trademark. In 1999, he founded a highly successful management consulting firm--Cellucci Associates, Inc. -- that raises capital and provides strategic business services to top-tier global high technology firms. He serves on both public and private Boards and has authored or co-authored over 120 articles on Nanotechnology, Laser physics, Photonics, Environmental disturbance control, MEMS test and measurement, Mistake-proofing enterprise software, and Sales & Marketing. He has also held the rank of Lecturer or Professor at institutions like Princeton University, University of Pennsylvania and Camden Community College. Cellucci also co-authored ANSI Standard Z136.5 "The Safe Use of Lasers in Educational Institutions".

As a result of his consistent achievement in the commercialization of emerging technologies, Cellucci has received numerous awards and citations from industry, government and business.

Cellucci earned a PhD in Physical Chemistry from the University of Pennsylvania, an MBA from Rutgers University and a BS in Chemistry from Fordham University. He has also attended and lectured at executive programs at the Harvard Business School, MIT Sloan School, Kellogg School and others. Dr. Cellucci is regarded as an authority in rapid time-to-market new product development and is a frequent public speaker.

Security

North American Public Sector

New Directions in Industrial Base Infrastructure

Reconciling Protection and Resiliency - Information Technology Sector

Guy Copeland
Vice President
CSC

NDIA 2008
Homeland Security
Symposium & Exhibition
September 9, 2008

Protection and/or Resiliency

- **Protection and Resiliency**
 - Not either/or
 - Different views of the same set of physical and cyber challenges to balance primarily on risk assessment
- **CSC helps clients – government and private sector – achieve their strategic goals through the use of information technology, frequently as part of a solution set that also includes other technologies, management solutions, processes and deep mission or business understanding and expertise.**
- **Some of the world's most important service, financial, production and government institutions rely on CSC for continuity and availability (COOP and COG in government terms) – DHS, DoD, NASA,**

Preparation is Key

- Risk Assessment, Priority Implementation, Training, Exercising and Feedback
- The communications backbone, the power distribution grid and IT functions and services are designed to be highly robust, BUT
- Specific facilities must consider site, equipment, connectivity and personnel redundancy needs – e.g., Tier III data centers must achieve 99.98 percent availability (no more than 4 hours of unplanned outage every 2.5 years)
- Pervasive management support and employees as the lynchpins
- Katrina and Rita Lessons: *“Planning and teamwork were the keys to our success. Luck alone won’t take you very far when you have to go to plan B and start thinking on your feet. We learned a lot during this event, and will factor these lessons into our recovery plans for the future.”*
 - Deborah Hojem, CIO, DynMcDermott’s CIO. a CSC subsidiary that operates and manages the US Strategic Petroleum Reserve. The SPR is the world’s largest reserve of crude oil, which is stored in underground caverns along the Gulf of Mexico in Louisiana and Texas.

Partnership is Key

- **President's National Security Telecommunications Advisory Committee (NSTAC)**
<http://www.ncs.gov/nstac/nstac.html>
- **National Coordinating Center for Telecommunications (NCC)**
<http://www.ncs.gov/ncc/index.html>
- **Network Security Information Exchanges**
http://www.ncs.gov/nstac/reports/fact_sheet/NSTAC_08.pdf
- **Information Technology Information Sharing and Analysis Center (IT-ISAC)**
<https://www.it-isac.org/>
- **ISAC Council**
<https://www.isaccouncil.org/>
- **Partnership for Critical Infrastructure Security (PCIS)**
<http://www.pcis.org/>
- **Cross Sector Cyber Security Working Group**
<http://homeland.house.gov/SiteDocuments/20071031154922-91266.pdf>

Cyber is Critical

- **Cyber “Hurricane” is hitting us all – some more than others – 24/7**
- **Risk Assessment, Priority Implementation, Training, Exercising and Feedback all apply**
- **The communications backbone, the power distribution grid and IT functions and services are designed to be highly robust, BUT**
- **Consolidate for manageable span of protection and response**
 - DoD and DHS strategy to consolidate and simplify
 - Reduction in Internet access points
- **Certification and Accreditation**
- **Best Practices**
- **Education and awareness**
- **Identity, Access and Privilege Management appropriate to the assets, functions and services to protect**
 - CSC Center of Excellence because this is critical to virtually everything

Exercise to Verify and Learn

- **Internal**
- **External – National level (e.g., TOPOFF, Cyber Storm, NLE 2-09)**
- **CSC and other companies participated in Cyber Storm II - A national cyber security exercise to test processes and capabilities of companies and agencies in both the private and public sector.**
 - **CSC Objectives**
 - » Opportunity to evaluate operations in a national scenario with partners
 - » Learn lessons for needed improvement
 - » Build upon existing continuous improvement for preparation and response posture
- **The largest government-sponsored national cyber security exercise of its kind.**
- **Exercises such as Cyber Storm II are critical in maintaining and strengthening cross-sector, inter-governmental and international relationships, enhancing processes and communications linkages, as well as ensuring continued improvement to cyber security procedures and processes.**

Operational Exercise Benefits

- **Operational Exercises' Benefits Include**
 - **Experience in and development of external interaction for major incident handling**
 - **Participation with major international, national, state and local, and private sector players**
 - **Exercise, test and advance the CONOPS for the IT-ISAC**
 - **CSC is a Founding Member and part of the executive committee leadership**
 - **Exercise vendor partnerships - investigate key supply chain dependencies**
 - **Exercise NOC/SOC organizational incident response processes**
 - **Demonstrate and recognize employee skills and leadership**
 - **Support for participating clients (e.g., DHS, EPA, DoS, GETS)**
 - **Education and awareness opportunity – direct and indirect**

Learn More

- **Be active in the Critical Infrastructure Protection community**
 - **Government and private sector**
- **Join your Sector Coordinating Council**
- **Join your Information Analysis and Sharing Center**
- **Participate in exercises through the SCC and ISAC**
- **Help with your sector's risk assessment and other implementation of your sector's specific plan**
- **Participate actively**
- **Apply lessons learned internally**
- **Ask your sector's CIP leadership how you can help**

DHS Office of Procurement Operations

Presented by:
Soraya Correa, Director

Office of Procurement Operations (OPO)

Mission ~

We will obtain the best value products and services for our DHS customers. We will be innovative and continuously improve our processes for managing and implementing acquisitions. We will support the mission, ensuring conformance with law and preserving the public's trust.

About OPO

- *Provides grants/federal assistance management, procurement, and acquisition management services to various DHS directorates and organizations reporting to the Office of the Secretary;*
- *Provides a full range of acquisition services for department-wide acquisition initiatives identified by both the Chief Information Officer and several strategic sourcing commodity councils within DHS;*
- *Established as the eighth Head of Contracting Activity (HCA) with the most diverse customer base in DHS;*
 - *Committed to establishing our organization as a leader in the effective and efficient delivery of acquisition services in support of the DHS mission.*

Office of Procurement Operations

The Office of Procurement Operations (OPO) takes pride in supporting the needs of its diverse and unique customer base. Our customers include:

- Under Secretary for Management (includes the CIO, CSO, CAO, CHCO and CPO)
- Chief Financial Officer (CFO)
- Under Secretary National Protection & Programs
- Under Secretary Intelligence & Analysis
- Under Secretary Science & Technology
- Director Domestic Nuclear Detection Office
- Director Citizenship & Immigration Services (CIS)
- Assistant Secretary Health Affairs/ Chief Medical Officer
- Director Operations Coordination
- Director Counter Narcotics Enforcement
- Ombudsman Citizenship & Immigration Services
- Chief Privacy Officer
- Civil Rights & Civil Liberties Officer
- Assistant Secretary Policy
- General Counsel
- Assistant Secretary Legislative Affairs
- Assistant Secretary Public Affairs
- Inspector General

Challenges

- *Provide full range of acquisition support to 35 DHS program offices through a unified “One DHS” program;*
- *Diverse and wide range of requirements;*
- *Fast-paced environment / quick response capability;*
- *High-visibility acquisitions of interest to public, media, and industry;*
- *Hire and retain a professional, motivated workforce.*

In the Spotlight

- *Scrutiny*
- *Congress*
- *Media*

Plan to Cut Federal Security Unit Decried

By [Mary Beth Shendan](#) Washington Post Staff Writer
Thursday, June 21, 2007; Page A01

The Bush administration wants to overhaul the troubled federal buildings, cutting personnel and giving a bigger role to private firms in fighting the plan, saying that it could leave government employees out of the loop.

Homeland Security Contracts Abused

Report Finds Extensive Waste

By [Spencer S. Hsu](#)
Washington Post Staff Writer
June 27, 2006; Page A01

A billion-dollar surge in federal contracting to bolster domestic defenses in the wake of the Sept. 11, 2001, attack has been marred by extensive waste and misspent funds, according to a new bipartisan congressional report.

Lawmakers say that since the Homeland Security Department's creation in 2003, an explosion of no-bid deals and a critical lack of oversight have allowed government contract managers to abuse the system. Based on a comprehensive survey of government audits, 32 Homeland Security Department contracts worth a total of \$34 billion have "experienced significant wasteful spending, or mismanagement," according to a report which is slated for release today and was obtained in part from the Washington Post.

Costs Rocket As DHS Runs Up No-Bid Contracts

By [Robert O'Hara](#)
Washington Post Staff Writer
Thursday, June 21, 2007

The project started in 2004 with a contract to help the new Department of Homeland Security quickly get its emergency operation up and running.

Over the next year, the cost of the no-bid arrangement with consultant [Booz Allen Hamilton](#) soared by millions of dollars per month, as the firm provided analysts, administrators and other contract employees to the department's [Information Analysis and Infrastructure Protection](#) offices.

By December 2004, payments to Booz Allen had exceeded \$30 million -- 15 times the contract's original value. When department lawyers examined the deal, they found it was "grossly beyond the scope" of the original contract, and they said the arrangement violated government procurement rules. The lawyers advised the department to immediately stop making payments through the contract and allow other companies to compete for the work.

But the competition did not take place for more than a year. During that time, the payments to Booz Allen more than doubled again under a second no-bid arrangement, to \$73 million, according to internal documents, e-mail and interviews.

The arrangements with the [McLean](#) consulting firm, one of the nation's largest government contractors, illustrate a transformation in the way the federal government often gets its work done: by relying on private, sometimes costly consultants to fill staffing shortfalls in federal agencies.

Contracting specialists said companies are increasingly being called upon to handle duties once considered appropriate only for government workers. And because the number of federal procurement workers responsible for overseeing spending has not kept pace, the spending on such contracts often soars far beyond approved estimates, the specialists said.

Oversight

- *House and Senate*
 - *Committees / Subcommittees*
- *Government Accountability Office (GAO)*
- *Inspector General (IG)*
- *Office of Federal Procurement Policy (OFPP)*
- *DHS Oversight*
 - *Chief Procurement Officer (CPO)*

Internal OPO Oversight

- *Internal OPO Oversight*
 - *Policy, Oversight and Customer Support Division*
 - *Compliance with FAR, HSAR, HSAM, DHS Management Directives, Internal OPO Policies/Procedures*
- *Mandatory Annual Ethics Training*
- *Mandatory Annual Security Training*

Our Customer Service Creed

We will work in partnership with our customers to ensure they get the goods and services they need to meet their mission needs.

We will work together to identify and implement the best business solutions available to satisfy requirements.

We will continuously communicate with customers, re-prioritize workloads to meet special needs and, most importantly, establish mutually agreeable transaction milestone schedules.

Our Customer Service Creed

We will continuously collaborate to ensure all stakeholder needs are considered and come to bear on our ultimate procurement solution.

As both business advisors and stewards of our customers' procurement dollars, we have an obligation to work with them to develop smart acquisition strategies that are realistic, achievable and in full conformance with laws and regulations.

Conclusion

We are proud of our membership in the DHS acquisition community and the work we do each day to support the men and women who secure our homeland.

*Soraya Correa
Director, Office of Procurement Operations*

SAFETY Act

September 9, 2008

The Support Anti-terrorism by Fostering
Effective Technologies Act of 2002

**Homeland
Security**

A Summary of the SAFETY Act

- The Support Anti-terrorism by Fostering Effective Technologies Act of 2002 (SAFETY Act) was enacted as part of the Homeland Security Act of 2002 (Title VIII, Subtitle G)
- Intended to facilitate the development and deployment of effective anti-terrorism technologies by creating systems of “risk management” and “litigation management”
- Provides important legal liability protections for manufacturers and sellers of technologies and services that could save lives in the event of a terrorist attack
- Protections apply **only** to claims arising out of, relating to, or resulting from an Act of Terrorism

What is Eligible for SAFETY Act Protections?

The SAFETY Act liability protections apply to a wide range of technologies, including:

- Products
- Services
- Software and other forms of intellectual property

Examples of eligible technologies:

- Threat and vulnerability assessment services
 - Detection Systems
 - Blast Mitigation Materials
 - Screening Services
- Sensors and Sensor Integration
- Threatening Object Detectors
 - Decision Support Software
 - Security Services
- Crisis Management Systems
- Cyber Security Technologies

Homeland
Security

Essential Concepts

1. Two Principal Levels of Protection

Homeland
Security

Essential Concepts

2. Benefits of Designation

- Liability = Insurance required by DHS
- Exclusive action in Federal Court
- No Joint and Several Liability for non-economic damages
- No punitives or prejudgment interest
- Recovery reduced by amounts from collateral sources

Homeland
Security

Essential Concepts

3. Benefits of Certification

- Benefits of Designation +
- Assert Government Contractor Defense
 - Even if not selling to a Government entity
 - Includes services and COTS
- Placed on Approved Product List for Homeland Security

Homeland
Security

Essential Concepts

4. SAFETY Act Protections Extend to Users *(whether Designation or Certification)*

“Such cause of action may be brought **only** **against the Seller** of the QATT and may **not** **be brought against the buyers, the buyers’ contractors, downstream users of the QATT,** the Seller’s suppliers or contractors, or any other person or entity...”

-Preamble to Final Rule, 6 CFR Part 25, at 33150.

Essential Concepts

5. Criteria for Designation

- Prior United States Government use or demonstrated substantial utility and effectiveness
- Availability of the Technology for immediate deployment in public and private settings
- Existence of extraordinarily large or unquantifiable potential third party liability risk exposure to the Seller or other provider of the technology
- Substantial likelihood that the Technology will not be deployed unless SAFETY Act risk management protections are extended
- Magnitude of risk exposure to the public if the Technology is not deployed
- Evaluation of scientific studies that can be feasibly conducted in order to assess the capability of the Technology to substantially reduce risks of harm
- Whether the Technology is effective in facilitating the defense against Acts of Terrorism
- ATT determination made by Federal, State, or Local officials

Essential Concepts

5a. How to Establish Effectiveness

- Successful testing in operational environment
- Operational testing
 - Evidence of performance metrics, including:
 - ✓ Probability of Detection
 - ✓ False Positive and False Negative Rates
 - ✓ Limits of Detection (and why that limit is relevant)
 - ✓ Interferents
 - ✓ Maintenance and Training
- Suitable performance of past deployments documented
- Domain expertise appropriate and available
- In/external audits favorable
- Customer feedback favorable
- QA plans documented
- Repeatability proven

Homeland
Security

Essential Concepts

6. Criteria for Certification

Designation is a prerequisite for granting Certification

To receive Certification, a Qualified Anti-terrorism Technology must also be shown to:

- Perform as intended
- Conform to the Seller's specifications
- Be safe for use as intended
 - Seller is required to provide safety and hazard analyses

Homeland
Security

Essential Concepts

6a. Performs as Intended

High confidence it will continue to be effective

- Consistent positive results (e.g., long-term low failure rates and false alarms)
- Reliability/Availability is high (e.g., MTBF)
- Performs in accordance with performance specifications
- Installation, use, maintenance procedures proven
- Documented processes (e.g., training, hiring, technology refresh) are being followed
- Standards are identified and met
- QA/QC processes are effective

Homeland
Security

Essential Concepts

7. DT&E Designation

For technology that:

- Is in a prototype stage
- Has lab tests that are not operational in nature (too controlled)
- Indicated potential effectiveness
- Has a testing scenario identified and “customers” to prove relevant metrics
- Limited term (up to 3 yr) and limited number of sites

Essential Concepts

8. SAFETY Act Award Summary

	DTED	Designation	Certification
Effectiveness Evaluation	Needs more proof, but potential exists	Proven effectiveness (with confidence of repeatability)	Consistently proven effectiveness (with high confidence of enduring effectiveness)
Protection	Liability cap only for identified test event(s) and for limited duration (≤3yrs)	Liability cap for any and all deployments made within 5-8 year term	Government Contractor of Defense (GCD) for any and all deployments made within 5-8 year term

Timeline of SAFETY Act Application Review Process

SAFETY Act Progress

**2006-
2007**

- Processing time has decreased by 31%
- Applications have increased by 63%
- With no additional resources

Applications by Company Size *

*Small = \$0 - \$50,000,000

*Medium = \$50,000,000 - \$1,000,000,000

*Large = Over \$1,000,000,000 by Net Revenue

Homeland
Security

How is Your Proprietary Data Protected?

- Strong data protection measures that conform to DHS information security standards
- All application reviewers are screened for conflicts of interests, sign conflict of interest statements for each application they review, and sign general nondisclosure agreements

Homeland
Security

Who are the SAFETY Act Reviewers?

- Conflict of Interest & Non-Disclosure Agreement signed by each reviewer per application.
- Three Technical Reviewers and two Economic Reviewers per application.
- Reviewers from the FFRDCs, non-profits, Federal Government, Federal & National Labs, and Academia.
- 100+ already trained reviewers (SMEs) in:

➤ Cyber

➤ Economic

➤ Chemical

➤ Biological

➤ Explosive

➤ Rad/Nuc

SAFETY Act: Encouraging Development and Commercialization of Transition Technologies

Examples:

SPACEHAB, Inc: Miniature Mass Spectrometer. A trace chemical detector designed to detect residues and vapors from explosives, chemical warfare agents, and toxic industrial chemicals. This can be done either through the sampling of ambient air or the use of swabs.

Surveillance Consulting Group, Inc: Digital Radio Frequency Jammer. A digital radio frequency jammer that can be used to block the remote detonation of improvised explosive devices (IEDs).

VeriTainer Corporation, Inc: VeriSpreader™. A crane-mounted radiation scanning device.

MindCo, Inc: MINDS. A security system that monitors the environment for the presence of nuclear spectra. Designed to detect and identify the presence of radionuclide elements.

Integrated Threat Response

Preparedness

- **A 60% increase in number of officers**
- **Expenditures in excess of \$1.2 billion**
- **Additional protection against vehicle and waterborne bombs**
- **Improved operational readiness**

Preparedness

- **Added and upgraded armament**
- **Revised Security and Emergency Plans**
- **Enhanced officer training**
- **Coordination with state and local officials**
- **Enhanced mitigation strategies for catastrophic events**

Nuclear Sector Coordinating Council

- **Represents nuclear sector to federal government agencies**
- **Corresponding Government Council – DHS, NRC, DOE, FBI**
- **Establishes “Seat at the Table” for Security and Homeland Defense Issues**

Initiatives

- **Risk Analysis and Management for Critical Asset Protection**
- **Comprehensive Reviews**
- **Post attack communications**
- **Routine threat briefings**
- **Pandemic Influenza preparation**

Conclusions

- **Nuclear power plants are the most secure industrial facilities in the National infrastructure**
- **Industry has been extremely responsive and has significantly improved its ability to prepare for a significant terrorist attack**
- **Partnering through DHS is the way to integrate and leverage onsite and offsite resources in a meaningful and cooperative way**

U.S. Customs and
Border Protection

NDIA Homeland Security Symposium

September 10, 2008

U.S. Customs and Border Protection

Our Mission

We are the guardians of our Nation's borders.

We are America's frontline.

We safeguard the American homeland at and beyond our borders.

We protect the American public against terrorists and the instruments of terror.

We steadfastly enforce the laws of the United States while fostering our nation's economic security through lawful international trade and travel.

We serve the American public with vigilance, integrity and professionalism.

- Washington, DC

U.S. Customs and Border Protection's Procurement Directorate Activities

- 2.75 Billion Spend in 2007
- Reverse Auctioning
- Strategic Sourcing
- Traditional Methods
- 14,507 Acquisitions
- 278,637 P-card Transactions

U.S. Customs and Border Protection's Procurement Directorate Features

'We ensure the timely acquisition of all goods and services needed to carry out the mission of U.S. Customs and Border Protection.'

What we buy:

Food and Beverage Items, Body Armor, Ammunition, Uniform Rental & Laundry Services

U.S. Customs and Border Protection's Procurement Directorate Activities

■ What we buy

- Canines
- Uniforms
- HR Management Services
- Training
- Radios
- Horses

U.S. Customs and Border Protection's Procurement Directorate Activities

■ What we buy:

- Airplanes, maintenance, parts and services
- Helicopters
- Boats
- Information Technology equipment and services
- Non-Intrusive Inspection Devices

U.S. Customs and Border Protection's Procurement Directorate Activities

- What we buy:
 - Night Vision Goggles
 - Grounds & Facilities Maintenance
 - Gun Cases

Continuous Improvement

- Acquisition Improvement Initiative (AI²)
 - Systematic approach and framework to improve operations
 - Focuses dedicated resources on managing improvement initiatives
 - Coordinates organization-wide view of initiatives and best practices
 - Balances the challenge of accomplishing continuous improvement and daily work activities
 - ABCD Model

U.S. Customs and
Border Protection

Continuous Improvement – Why?

- The growing size, complexity, and speed of the mission demands it
- Our customers are improving
- Our customers and our people tell us there is room for improvement
- We want to be the best organization we can be

The means to improve: AI²

- The Acquisition Improvement Initiative - a program, but more than that
- Continuous improvement fully integrated into the organization's culture, mission, goals, and daily activities

AI²

- **Assets**
 - People, leadership, tools
- **Business**
 - Processes
- **Customer**
 - Needs, expectations and relationships
- **Data**
 - Informed decision making using data

U.S. Customs and
Border Protection

Knowledge Management

Knowledge Management (KM):

ability to form a collection of structures and processes aligned to leverage human know-how and acquire the maximum return for an organization

Benefits of KM:

- ✓ Retain institutionalized knowledge
- ✓ Identify, store, manage, market and access best practices
- ✓ Share lessons learned
- ✓ Maximize group collaboration and facilitate communication
- ✓ Promote business process innovation
- ✓ Leverage individual experience and expertise
- ✓ Facilitate communication
- ✓ Increase interaction with internal and external customers
- ✓ Accelerate development of workforce knowledge and expertise

DHS Procurement – 2007 Spend Data

**FY07 DHS SPEND
SPEND BY COMPONENT
TOTAL SPEND = \$17,423.3M**

Source: FY07 Procurement systems, P-card data, SSP analysis

**FY07 DHS SPEND
SPEND BY COMMODITY FAMILY
TOTAL SPEND = \$17,423.3M**

Source: FY07 Procurement systems, P-card data, SSP analysis

KEY FINDINGS

- The largest spend component is DHS HQ with \$3.7B in spend in support of agency mission areas
- Professional Services is the largest Commodity Family with 25% of FY07 spend
- 16.4% of "Unclassified" data is attributed to a lack of FSC and line item information within the underlying procurement data systems

Dual System of Accountability (Contracting)

DHS Chief Procurement Officer's FY 2008 Priorities

1. Quality Contracting

- Goal: To make good business deals
- Goal: To perform effective contract administration

2. Quality Acquisition Management

- Goal: To improve the quality of program management throughout DHS

3. Quality People

- Goal: To build and sustain the DHS Acquisition Workforce

Congressional Oversight

New Directions in Industrial Base Infrastructure Protection — Voluntary Private Sector Preparedness Standards

September 8, 2008

Homeland
Security

***Dr. Kevin J. Reardon
Deputy Assistant Secretary
Infrastructure Protection***

The Voluntary Private Sector Preparedness Program

Improving Private Sector Preparedness in:

- Disaster Management
- Emergency Management
- Business Continuity

***Goal: Enhance nationwide resilience
in an all hazards environment***

Major Disasters' Costs Are Increasing

Causes and Costs of U.S. Catastrophic Losses

1987 to 2006 (2006 \$ billions)

Munich Re, the world's largest re-insurance agency, reports that in 2004, disaster-related loss in the U.S. was up \$145 billion – from \$65 billion in 2003

Voluntary Private Sector Preparedness Program

The Concern

The 9/11 Commission report found that:

- The private sector remains largely unprepared for a terrorist attack
- Lack of a widely embraced private sector preparedness standard was a principal contributing factor to this lack of preparedness

Recommended adoption of a national standard for disaster management, emergency management, and business continuity programs

Voluntary Private Sector Preparedness Program (Cont.)

Mandated Action

The 9/11 Act directs DHS to establish a “Voluntary Private Sector Preparedness Accreditation and Certification Program”

DHS Key Requirements

- Establish accreditation and certification program
- Obtain stakeholder / public comment
- Select preparedness standards for use

Key Program Requirements

- Voluntary participation
- Provide method to independently certify preparedness of private sector entities
- Administered by nongovernmental entity
- DHS designate one or more standards based on published target criteria
- Integrate and leverage existing regulatory requirements and programs, if feasible
- DHS maintain a listing of certified public entities and make public a list of consenting participants
- Special consideration for small business

Program Timeline

- **Incorporate stakeholder / public input**
 - 2008 and ongoing
- **Develop target criteria**
 - Fall 2008
- **Develop accreditation and certification program (ANAB)**
 - Summer 2008—Spring 2009
- **Select initial standards**
 - Fall 2008
- **Perform initial accreditation of certifying bodies**
 - TBD: Expected by early 2009
- **Begin voluntary certifications**
 - TBD: 2009

Criteria and standards will evolve over time – 3 to 5 years required to update standards

Outcomes

- Enhanced national all-hazards resilience
- Improved private sector preparedness
 - Disaster management
 - Emergency management
 - Business continuity

***Private sector acceptance and
active participation***

Homeland Security

Filter Testing-Performance Analysis and Performance Enhancement

*Thomas E. Sutto, Ph.D.
Material Science and Technology Division,
Naval Research Laboratory*

Objectives of Testing

Part 1: What to test?

Part 2: How to test it?

Part 3: How to translate laboratory testing to meaningful data to the user community.

Industrial Chemicals

These few selected industrial uses are only a small subset of the over **5000** chemical manufacturing and processing facilities worldwide.

What to test?

1. Over 5000 chemical facilities worldwide
2. An even greater number of distributors
3. TIC prioritization focused on a comprehensive risk management of what we do not know:
 - Absolute global production levels
 - Absolute global distribution amounts

Assess the actual environmental hazard

Inputs:

- (1) Chemical Reactivity
- (2) Decay rate fed into model
- (3) Container Regulations

Outputs:

- (1) Major By-product: Hydrogen Chloride
- (2) Release Modeled as such

How to test?

1. Challenge Levels

- **Scenario Modeling (For T&E purposes)**
- **Vignette Modeling (For operational analyses)**

2. Breakthrough Levels

3. Detection Approaches

- **Multiple species may be present**

4. Chemical Class Analysis

5. Humidity Effects

Scenario Modeling

For each prioritized TIC:

- 1. Utilize DOT/UN transport regulations to determine large, moderate and asymmetric releases.**
- 2. Determine maximum challenge levels at set distances**
 - (100, 500, 1000 meters)
- 3. Consider operational relevance to challenges.**
 - At 100 meters from a large rail car explosion-is the threat an inhalation hazard or a blast hazard?

Challenge Levels

Test a range of concentrations (Scenario Driven)

- Performance curve generated vs. single data point
- Extrapolation of performance for any vignette

How to detect?

Consider NO_2 :

Humidity – partial conversion to HNO_3 and HNO_2

Reactions with different impregnates:

Develop capability for in-line detection of multiple species.

How to detect?

One example:

- Use of ion selective-electrochemical sensors
- Commonly available for industry
- Below lists a few of those with high sensitivity and limited cross interference

Acrylonitrile (AN)	Fluorine (F ₂)	Nitric Acid (HNO ₃)
Ammonia (NH ₃)	Formaldehyde	Nitric Oxide (NO)
Arsine (AsH ₃)	Hydrazine (N ₂ H ₄)	Nitrogen Dioxide
Benzene (C ₂ H ₆)	Hydrogen Bromide	N ₂ O
Bromine (Br ₂)	Hydrogen Chloride	Ozone (O ₃)
Butadiene (C ₄ H ₆)	Hydrogen Cyanide	Phosgene (COCl ₂)
Carbon Monoxide	Hydrogen Fluoride	Phosphine (Ph ₃)
Chlorine (Cl ₂)	Hydrogen Sulfide	Styrene
Cyclohexane	MEK (CH ₃ COC ₂ H ₅)	Sulfur Dioxide
Ethylene Oxide	Methyl Bromide	Vinyl Chloride

How to detect?

Simple t-cell detection set-up

Class Based Analysis

Dual Use of a chemically based Class Analysis

- Risk mitigation of the unknown absolute scoring of a chemical's presence globally.
- Class based analysis to assess filter performance against other related chemicals not tested.

Chemical Classes in Prioritization

Oxidizers-includes “acid gases”, and “acid forming gases” such as chlorine or fluorine.

Reducers-includes ammonia and the other hydrides, as well as the hydrazines and amines.

Lachrymators- self-polymerizing “tear causing chemicals”→ acrylonitrile, acrolein, allyl alcohol, methyl isocyanate and phosgene.

Volatile Organics- simple, volatile solvents such as carbon disulfide or carbon tetrachloride.

Pest/Herbicide-called due to toxicity, stability and current/past global distribution

From initial ranking, select those with the highest scores in each Class to ensure that all classes are represented.

Class Based Analysis in Filter Testing

Ammonia

Phosphine

Arsine

Increasing reactivity (stronger reducing agent)

Increasing stability in the environment

Increasing ability to filter (increasing capacity)

Humidity Effects and Anhydrous Gases

Anhydrous gases present a two-fold challenge:

1. Upon release in the environment-conversion to an aerosol hazard
 - HCl gas to aerosolized hydrochloric acid
 - HBr gas to aerosolized hydrobromic acid
 - NH_3 gas to aerosolized ammonium hydroxide
2. Second hazard occurs behind this expanding aerosol hazard-a zero humidity challenge

Aerosol Hazard of Anhydrous Gases

HCl Vapor

Hydrochloric Acid Aerosol

Utilizing Filter Performance data for Operational Assessments

Based upon performance curve data:

- Estimate operational time at IDLH values or AEGL-3 values

Based upon scenario modeling and performance curve data

- Estimate operational time at specific distances for large, moderate and asymmetric types of releases.

Conclusions

1. What to test based on a comprehensive risk mitigation strategy
2. How to test-lessons learned from previous T&E as well as fundamental chemistry
3. Simple, low cost approaches to breakthrough detection
4. Two fold use of Class Based Analysis
 - Risk mitigation during prioritization
 - Performance assessment during T&E and operational analysis
5. Humidity effects-Test at the most challenging (zero humidity?)
6. Utilize performance curve data to translate laboratory test data to operationally relevant filter performance.
