2008 Tactical Wheeled Vehicles Conference (TWV)
Event #8530
February 3 - 5, 2008

The Portola Plaza Hotel at Monterey Bay
& Monterey Conference Center
Monterey, California

Welcome to the 2008 Tactical Wheeled Vehicles Conference.

Objective:

This annual seminar historically has brought the military service, industry, prime contractors, subcontractors and their suppliers together to discuss present and future wheeled vehicle requirements for all services. It has afforded an atmosphere for open discussions between the customers and the suppliers based on the needs of the military users. This is the only conference held specifically for the military's Tactical Wheeled Vehicle community.

The information presented is valuable to program managers, engineers, planners and marketers. In addition, open discussions will be invaluable to DoD planners and program managers. This year's theme is: "TWV: DURING AND POST-OIF."

CONFERENCE DESCRIPTION

This year's Tactical Wheeled Vehicle (TWV) Conference will highlight the actions being taken to implement the Army's recently announced new TWV Transformation Strategy. The strategy was developed and resourced by an Army TWV Board of Directors made up of key Army leaders and decision makers in the Pentagon, the PEO CS/CSS and the Chief of Transportation. The intent of this strategy is to ensure the Army and the other services will have a balanced and viable TWV fleet through FY '18 and beyond. This Conference will address the procurement of new vehicles while conducting the cyclic refurbishment of existing vehicles. Other topics will include the status of the ongoing ACTD's intended to modernize the current fleet, and how the Army intends to provide for the spiral insertion of new technologies to support these efforts.

This is the only annual conference held that is specific to the military's Tactical Wheeled Vehicle community. It has historically brought Department of Defense representatives, prime contractors, subcontractors, and their suppliers together to discuss present and future wheeled vehicle requirements for all services. It has afforded an atmosphere for open discussions between the customers and the suppliers based on the needs of the military users. The information presented is valuable to program managers, engineers, planners and marketers. In addition, open discussions will be invaluable to DoD planners and program managers.

The agenda speakers, schedule and room assignments contained herein are subject to change.

There are no exhibits or displays at this conference --
it is a conference only.

TACTICAL WHEELED VEHICLES DIVISION:

Mission/Objective/Purpose

Division Objectives

The primary objective of the Tactical Wheeled Vehicle Division of NDIA is to enhance the security of the United States by promoting communications and interaction between defense industry, government and military in the area of automotive activities.

The specific charter of the Tactical Wheeled Vehicle Division is to conduct conferences in technology areas directly related to automotive research, design, development, test and production. Such conferences are intended to present advanced technology and provide for an exchange of information and an interchange of views between defense industry, government and military representatives. The effective cooperation between these three groups is vital to our defense effort in the tactical wheeled vehicle area. Each group brings unique inputs to such conferences. No one group can function at maximum effectiveness without the other two.

Specific Objectives:

- ▶ To serve as an effective communications vehicle for the exchange of views and information between government and industry on matters of common concern.
- ▶ To foster mutual understanding and effective working relationships between government and industry in order to achieve a sound body of government policy and procedures which will serve both the security objectives of the United States as well as the commercial interests of its industry.
- ▶ To provide government with industry advice on government policies, practices and procedures and industry's needs and problems within the Division's purview.

Mission Responsibility:

To promote national exchanges between the Defense Department, government agencies and industry, of information relating to the design, development, acquisition and support of vehicles and vehicle systems employed in land and amphibious military operations.

BL: A Legendary fleet doing well despite duty cycle, in an extremely hostile environment

How can you help reduce O&S now and in the future?

GWOT Support:

- Executing Objective Gunner Protection Kit w/ MNF-I Mods (To date, 10,460 kits Installed in AOR) on TWVs, demand continues to grow!
- Completed Frag Kit (FK) 5 for UAH Systems, enhancing Soldier protection against IED events and other threats (To date, 14,545 Installed in AOR). Developing Frag Kit 6 for limited application.
- Safety Enhancements Program “Build-out”, integrated most into current UAH production baseline. Over 90K “eaches” delivered to the AOR.
- Other Key efforts underway:
 - ◆ ECM – Mission Module deconfliction

OIF/OEF: “The Long War”

“The Long War” = Opportunities for you to help us... in the areas of:

- Space Management
 - ◆ Space management both under the hood and in crew compartment an issue. Smaller footprints for components, accessories and modules are desirable.
- More Demand on existing Power Distribution Infrastructure (not readily able to accept higher output demand).
 - ◆ Wiring, circuit breakers, switches sized for lower output legacy alternators, we’re going to 400!
 - ◆ Replacement wiring harnesses need to be able to achieve desired higher demand
- Thermal Management in hostile environment
 - ◆ Heat reduction in crew compartment and in automotive components continues to be a challenge
- Operation & Support Cost Reduction opportunities
 - ◆ Frame and Suspension components longevity an issue
 - ◆ Filters/Oils/Brakes
 - ◆ Ballistic glass, armor components

Did I say we’re a \$10B Business?

From the Operations Sergeant Major, 1-221st Cavalry Squadron

Discipline. Professionalism. Competence in the Field.

Colonel Kidd,

We want to thank you for all the support you've given us. We cannot even begin to explain the positive impact every person in your organization has had on the war fighters here. In the past months, we have traveled approximately 4 million miles in harm's way. The Armor upgrades you and your group provide for us combined with LTC Caires' and SFC Mortons' work on distribution make it safer to conduct combat operations.

We brought 120 soldiers with us from 1-221 Cavalry from the Great State of Nevada. Every one of these Soldiers is a volunteer. We all came directly from a 2 year deployment at the National Training Center directly to the Iraq Theater of Operations. When you spend three years with soldiers you worry every time they go into harms way. Your Armor program helps to mitigate so many of the risks we face on a daily basis.

SGT Orozco's gunner (the Soldier you met at Navistar) is SPC P. He is a 22 year old college student from Nevada and he volunteered for this deployment after NTC. He was on a mission as a gunner in Iraq with one of your new turrets. His turret took a direct hit from an EFP and he walked away with zero injuries. Yes, I said zero! That has not been the fact with Soldiers with the previous turrets.

SPC P just came in my office and dropped off a Harley shirt for me from Ireland. He just returned from R and R leave. He said that this leave had significant meaning because he knows that had it not been for that turret he would not be with us today.

On behalf of the United States Cavalry, the 11th ACR, 1st Squadron 221st Cavalry, myself and most of all SPC P, we thank you for all your hard work. Please let you staff know how much we appreciate them.

Keep up the great work! It is appreciated.

Robert S Brown
SGM, USA

SPC P is home now!
