**ACTIVE DUTY- U.S. ARMY
NOISE INDUCED HEARING INJURY
QUARTERLY SURVEILLANCE
Q3 2011 THRU Q4 2013**

EXECUTIVE SUMMARY

PURPOSE:

The Department of Defense (DOD) Hearing Conservation Working Group, the U.S. Army Public Health Command, the Armed Forces Health Surveillance Center and the Hearing Center of Excellence collaborated to develop new DOD and individual Services' Noise-Induced Hearing Injury (NIHI) surveillance data. The purposes of these NIHI data summaries are as follows:

- To present and summarize available Army medical surveillance data for use in noise-induced hearing injury (NIHI) prevention program and policy planning, including -
 - o Defining the relative impact of NIHI among U.S. Army Active Duty personnel in the total Army and at individual Army installations.
 - o Providing Army injury rates and trends from Q3 2011thru Q4 2013.
 - o Identifying demographics most closely associated with NIHI incidence.
- To monitor progress-based metrics for reducing the NIHI morbidity burden over time.

The first NIHI data summary established a baseline against which future years' data can be compared for assessment of NIHI trends as prevention performance indicators.

CONCLUSIONS:

The Army NIHI quarterly surveillance summary for calendar years Q3 2011 THRU Q4 2013 shows incident case rates for sensorineural hearing loss significant threshold shift, tinnitus, and Noise-Induced Hearing Loss.

RECOMMENDATIONS:

Commanders and Preventive Medicine assets at multiple levels should use NIHI data summaries trends to maintain situational awareness of the progress of NIHI prevention operations.

**Active Duty-U.S Army
Noise Induced Hearing Injury
Quarterly Surveillance
Q3 2011 thru Q4 2013**

REFERENCES:

References are listed in Appendix A.

AUTHORITY:

Under Army Regulation (AR) 40-5, Section 2-19, the U.S. Army Public Health Command (USAPHC) is responsible for providing support for Army Preventive Medicine (PVNTMED) assets to include review and interpretation of surveillance data and identification and characterization of health problems as a foundation for injury prevention planning and policy efforts.

Under Department of Defense Instruction 6055.12 Hearing Conservation Program, Enclosure 2, Section 3 requires The Heads of the DOD components to annually evaluate the effectiveness of their hearing conservation programs (HCPs).

Under Department of Defense Directive (DODD) 6490-02E Comprehensive Health Surveillance, 2012; Section 1 paragraph c establishes the Armed Forces Health Surveillance Center (AFHSC) as the single source for DOD-level health surveillance information.

Under DODD 6200.04 Force Health Protection, Section 4.3.1.2 requires DOD components to promote and improve the health of the force through programs on injury prevention.

BACKGROUND:

Background details can be found in the annual Summary for calendar year (CY) 2007-2011.

Quarterly data time series will be updated semi-annually to provide a 10 quarter “moving window” of finer grained details compared to annual summaries.

METHODS:

Methods details can be found in the annual Summary for CY 2007-2011. The quarterly summary data are reported as is without statistical analysis.

Source: Defense Medical Surveillance System (DMSS).
Prepared by Armed Forces Health Surveillance Center (AFHSC).

RESULTS:

Results are shown in Appendix C.

SUMMARY AND CONCLUSIONS:

AFHSC and the Army Institute of Public Health will continue to provide annual and quarterly data summaries to support NIHI prevention coordination and planning by Army PVNTMED assets and unit commanders at multiple levels. The counts and rates of Noise Induced Hearing Injury “incident cases” are the principle prevention performance metrics. Incident cases are important because they represent cases that might have been prevented if prevention strategies planning and operations were effective.
