Report Title

Economic Development and Network Science

ABSTRACT

Many of the basic assumptions underlying macro-economic and financial theory are so simplistic that the models upon which they are built cannot be used to predict or explain economic events. The concept of homo economicus assumes that individuals make rational decisions based on complete knowledge motivated by their self-interest in an effort to achieve the greatest benefit at the least cost. Simplifications inherent in the representative agent approach assume away complexities associated with the interconnectedness of economic actors and the effects of their actions

Technical Report 11-001

Economic Development and Network Science

Margaret Moten, Daniel Evans

U.S. Military Academy, West Point NY

April 2011

**United States Military Academy
Network Science Center**

**U.S. Military Academy
Network Science Center**

Authorized and approved for distribution:

COL KEVIN HUGGINS, Ph.D.
Director of Research

COL JOHN GRAHAM, Ph.D.
Director

Technical review by

BG(R) Christopher Arney, Ph.D., Department of Mathematical Sciences, U.S. Military Academy
COL John Graham, Ph.D., Department of Behavioral Sciences and Leadership, U.S. Military Academy

NOTICES

DISTRIBUTION: Primary distribution of this Technical Report has been made by the U.S. Military Academy Network Science Center. Please address correspondence concerning distribution of reports to: Network Science Center, U.S. Military Academy, 646 Swift Road, West Point, NY 10996

FINAL DISPOSITION: This Technical Report may be destroyed when it is no longer needed. Please do not return it to the U.S. Military Academy Network Science Center.

NOTE: The findings in this Technical Report are not to be construed as an official Department of the Army position, unless so designated by other authorized documents
