The Electrochemical Society, founded in 1902, is a leading not-for-profit that aims to disseminate quality research materials through publications and conferences. W911NF1710577 awarded a \$6,700 grant to give researchers and scientists online access to printed, archival materials to the Proton Conducting Membrane Fuel Cells Collection that they otherwise wouldn't have access to. ECS believes that by making older, important titles, such as PEM, available, we can further the existing science and discover new and exciting breakthroughs in electrochemistry.

Below are the digital object identifiers for the digitized content. The main page for it can be found here: http://ecsdI.org/site/misc/proceedings_volumes.xhtml. The total costs for the project was \$3543.80 from the award W911NF-17-1-0577 provided by the Army Research Office.
