13. ABSTRACT (Maximum 200 words) This report presents the September 1997 edition of the Aircraft Optical Disk (AOD) Inventory, prepared by the Naval Research Laboratory's Moving-Map Composers (MMC) project team. F/A-18 and AV-8B pilots and mission planners use the AODs in cockpit moving-map systems and ground-based mission planning systems, such as the AV-8B Mission Support System. The purpose of this report is to identify the contents of every AOD that has been inventoried by the MMC team, including blank, programmed, broken, and repaired AODs. NRL provides this reference to the Fleet to facilitate identifying the status and contents of AODs in the field.

Appendix B: AOD Report by Serial Number	B-1
Appendix C: AOD Report Order Form	C-1

Introduction

The AV-8B and F/A-18 programs at the Naval Air Systems Command (NAVAIR) have tasked the Moving-Map Composer (MMC) team at the Naval Research Laboratory, Stennis Space Center, MS (NRLSSC), to develop fleet-specified map theaters from multiple scales of digital aeronautical chart data. NRLSSC writes the map theaters to ruggedized Aircraft Optical Disks (AOD) – for use in aircraft moving-map systems – and to recordable Compact Disk (CD) for archival. This report presents a comprehensive inventory of all AODs that have been created, evaluated, or otherwise inventoried by the MMC team for F/A-18 and AV-8B.

AODs are ruggedized, Write Once, Read Many optical disks produced by Honeywell, Inc. Each AOD stores up to 260 megabytes (Mb) on each side. One side of an AOD contains (at most) one map theater¹, and each map theater consists of selected scales and geographic areas of chart data. The exact coverage of a given map theater is approved by the F/A-18 and AV-8B program offices at NAVAIR. Based on Fleet requirements, the MMC team builds a "master" map theater and assigns it a unique library number, which is referred to as the AOD image ID. The MMC team then copies the master map theater onto the specified number of AODs and distributes them to the Fleet as required. The master map theater is archived for future use.

The source data for the AOD map theaters is the Compressed Aeronautical Chart (CAC) database². CAC is a worldwide, seamless, digital chart database that is produced at six scales and distributed by the National Imagery and Mapping Agency (NIMA) on CD. The source data for CAC is NIMA's ARC (equal Arc-second Raster Chart) Digitized Raster Graphics (ADRG)³, which consists of scanned aeronautical charts that have been geo-referenced and transformed to the World Geodetic System 1984 (WGS-84) datum. NIMA compresses ADRG into CAC to match the map projection and pixel resolution required by the F/A-18 and AV-8B moving-map display systems. NRLSSC developed the software system to process ADRG into CAC, produced the original CAC library, and transitioned the CAC production system to NIMA in September, 1995⁴.

In 1997, the MMC team at NRLSSC completed development of the Map System II (MAP-II) to design these AOD map theaters for AV-8B and F/A-18⁵. The MAP-II is a single-user workstation (hosted by a Digital Equipment Corporation Alphastation), running NRL-developed MMC software, which performs all map design functions previously handled by the Map-Operator-Maintenance Stations (from Horizons Technology, Inc.). There are currently 10 MAP II workstations in operation, including 3 at NRLSSC (1 owned by AV-8B and 2 owned by F/A-18); 1 at the Marine Corps Air Station (MCAS) in Yuma, AZ; 1 at MCAS Cherry Point, NC; 1 at the Naval Air Warfare Center (NAWC) in China Lake, CA; 1 at Hughes in Indianapolis, IN; 2 in Rota, Spain (owned by the Spanish AV-8B program); and 1 in Aviano, Italy (owned by the Italian AV-8B program).

AOD Report Formats

This inventory lists every AOD that the MMC team has ever received, including blank AODs, programmed AODs that the MMC team has delivered to the Fleet, and failed AODs that the Fleet has returned to the MMC team. The inventory first reports the AODs by owner (Appendix A) and then again by serial number (Appendix B). Note that blank AODs are only reported in cumulative totals for each owner and are not listed individually by serial number.

The AOD Report by Owner is sorted by four keys: 1) owner (U.S. AV-8B, U.S. F/A-18, etc.); 2) current location; 3) status; and 4) serial number. Valid owners, locations, and status keys are provided in Tables 1, 2, and 3, respectively. Note that *current location* is actually the last known location for an AOD, which is usually where NRLSSC most recently delivered the AOD. If the AOD has changed location in the Fleet since NRLSSC delivered it, then that location may not be reflected in the inventory unless NAVAIR informed NRLSSC of the new location. Each serial number is listed with the date on which that AOD was shipped to its current location, followed by the AOD image ID and geographic area description for each side of the AOD. Valid geographic areas are provided in Table 4. A sample listing of this report is provided in table 5.

A sample listing of the AOD Report by Serial Number is provided in table 6. This report is sorted by ascending AOD serial numbers. Each record lists the serial number followed by the owner, current location, and status of every nonblank AOD. This report may be used to cross-reference a given AOD serial number to an owner or location in the AOD Report by Owner.

Table 1. Valid AOD Owners

Owner Key	Owner Name
—	Unknown
AV8B	AV-8B (U.S.)
FA18	F/A-18 (U.S.)
FINN	F/A-18 (Finland)
ITALY	AV-8B (Italian)
KFA18	F/A-18 (Kuwait)
MCAIR	McDonnell Douglas
SPAIN	AV-8B (Spanish)
SWISS	F/A-18 (Switzerland)

Table 2. Valid AOD Location Names

MCAS CHERRY POINT	VX-5

Table 3. Valid AOD Status Keys

Status Keyname	Definition
Blank	A blank AOD (i.e., contains no data).
Programmed	A working AOD that has been programmed with map data and is ready for field use.
Bad	An AOD that is unreadable in the field and has been returned to NRLSSC for troubleshooting and possible recovery.
Destroyed	An AOD that was destroyed in the field.
Prototype	An early AOD build (usually not given an ID #).
Scratch	An AOD used for testing purposes only (usually Bad or Prototype on one side).
Unknown	An AOD with an unknown status.

Table 4. Valid Geographic Areas of AOD Coverage

Acknowledgments

This work was funded by the NAVAIR AV-8B and F/A-18 programs (Program Elements 0604214N and APN). The authors thank the program managers at NAVAIR for their support of this project: Captain Hines (AV-8B); CDR J.V. Chenevy, LCDR C. Cleaver, and CDR S. Christensen (F/A-18). The authors also thank Perry Wischow, Marlin Gendron, Stephanie Myrick for their support to the MMC project and the CAC and AOD development projects.
