CHAPTER I

INTRODUCTION

The purpose of this study is to develop Theater Army Replacement Procedures using equipment now available to the Army, compatible with Department of the Army doctrine, operable under current conditions and capable of expansion, which will assist in the transition to fully automated procedures, and which is attainable within two years of approval of the recommendations accompanying this study.

The most recent doctrine for the Theater Army Replacement System was published in Field Manual 100-10, Field Service Regulations -- Administration, in July 1963. However, standardized replacement organizations and procedures to support the doctrine have not been developed, approved, or published by Department of the Army. Each of the existing overseas theaters has evolved replacement procedures in response to Department of the Army information requirements and its own internal needs. These procedures require different organizations, equipment, and methods. Where one theater now uses punched card procedures for developing requisitions and making assignments, another

operates with manual procedures. Where one now requires the theater G-1 to forecast officer requirements, another requires the Adjutant General to perform this function. There is a need to develop uniform procedures which can currently be used in all overseas commands and which have an expansion capability.

U. S. Army Combat Developments Command is preparing a Theater Army replacement organization to support the concepts proposed by TASTA-70 (The Administrative Support, Theater Army) study and ADSAF (Automatic Data Systems for the Army in the Field). These concepts depict fully automated replacement systems. However, TASTA-70 and ADSAF are not expected to be completely operational for several years. The immediate need is for organizations and procedures to take advantage of today's technical capabilities and to assist in the future transition to the fully automated procedures of TASTA-70 and ADSAF.

Historically, the U. S. Army has relied upon hastily erected replacement organizations and procedures to meet expanding personnel needs. Time, skills, and numbers of men have been wasted. Fortunately, time has been available and the numbers of skilled men required have not

become critical to success. In today's environment, with expanding Army missions straining against budgetary restrictions and manpower ceilings, the best possible use of the Army's men is imperative. Replacement organizations and procedures must perform efficiently.

Undoubtedly, it is easier to diagnose the ills of replacement operations than to prescribe the cures. Many difficulties are perhaps unavoidable. But it is hoped that at least the mechanics of replacement operations can be devised, prescribed, and practiced by oversea commands army-wide before the need for rapid expansions occur. The organizations and procedures proposed by this study are an attempt to meet this need.

CHAPTER II

FUNCTIONS NECESSARY TO A REPLACEMENT SYSTEM

There are certain inescapable functions which must be performed that are integral or tangent to any replacement system regardless of the magnitude of the operation. The purpose of this chapter is to identify those functions.

REQUISITIONING

If replacements are to be available when and where they are needed, early determination of the skills required and the number of personnel needed by theaters of operations is essential. This estimate, or forecast, or requisition for personnel must be prepared early enough to permit procurement, classification, training, and timely movement of replacements to the theaters.

The most difficult function of the replacement system to accomplish is the reliable forecasting of personnel requirements. Upon the reliability of the forecasts rests the effectiveness of the entire system. In peacetime, the effects of stable personnel policies, established overseas tour lengths, and predictable expiration of terms of service (ETS) can be reflected in forecasts of personnel needs.

But even in peacetime, unscheduled losses and gains such as deaths, extensions of overseas tours, hardship transfers, and reenlistments affect forecast reliability.

Regardless of the recognized difficulties, estimates are absolutely necessary to the functioning of any replacement system. The only solution is to develop the best forecast possible using the best information and data available at the time the forecast must be made. The key to forecast development is the maintenance of historical and statistical data as an aid to forecast preparation. These information and data needs must be anticipated and the procedures established to satisfy the needs long before the estimates must be submitted. The fact that estimates will never be completely reliable, but are nevertheless absolutely necessary, must be recognized and accepted at every echelon of staff and command.

PERSONNEL ACCOUNTING

The personnel accounting system is inseparable from the replacement system. Current information of the status of assigned personnel must be maintained at all echelons. The accounting system must also provide a means of staying abreast of authorizations -- not only current authorizations, but authorizations projected into the future.

Without detailed information of assigned personnel and of authorizations it is impossible to realistically predict future requirements.

SELECTION AND ASSIGNMENT

The selection and assignment of qualified individuals to fill world-wide needs is primarily a responsibility of Department of Army. Within a theater of operations, the task is to match the replacement arriving in the theater to the vacancy for which he is most suited. Once selected, the theater's administrative machinery must rapidly assign the individual to his new job.

TRANSPORTATION

The responsiveness of the transportation system can have a profound effect on the replacement system. Although operation of the transportation system is not integral to the replacement system, transportation capabilities can be the decisive factor as to whether replacements are stocked in the theater or in CONUS, for example, or whether stockage is necessary at all. Additionally, the location of transportation terminals can determine the physical location of replacement units.

Other functions and activities will also have an effect on replacement operations. The efficiency of those

mentioned here, however, control the effectiveness of the replacement system. The operational failure of any of these functions will predispose the replacement system to failure or, at the least, inefficiency.

CHAPTER III

HISTORICAL BACKGROUND

Replacement Practices Before World War I

The weaknesses of the Continental Army recruiting system in the Revolutionary War, under which the Continental Congress recommended state manpower quotas but had no power to discipline States that failed to meet them, prompted General Washington to write: "Had we formed a permanent Army in the beginning which by continuance of the same men in service, had been capable of discipline we never should have had to retreat with a handful of men across the Delaware."¹ Imperfect as was the execution of the Revolutionary War replacement plan, it furnished the men to keep the Continental Army in action. Washington attempted to correct the deficiencies by improving the organization and functioning, not by changing the system.²

In the Civil War. the states sent recruits directly to regiments. where they were integrated into units. A federal recruiting service, organized late in the war, followed the same practice. The effectiveness of the first federal draft law of 1863 in producing the men needed to maintain the army was hampered by a provision allowing the hiring of substitutes and the buying of exemptions. The chief effect of the draft law was to spur enlistments.

¹Fitzpatrick, Writings of Washington, XIX, p. 136.

²Lerwill, The Personnel Replacement System in the United States Army. p. 18.

REPLACEMENT OPERATIONS -- WORLD WAR I

The United States entered World War I without any precedent for an organized personnel replacement system, but it was during World War I that the replacement system, as later defined in military terminology, was developed. Replacement training centers were formed with the mission of training men to replace combat losses. Facilities established by ports of embarkation to care for casualties going overseas developed into embarkation depots and became another link in the replacement system. Overseas replacement divisions, two for each corps, were intended to receive, train, and forward replacements after they arrived overseas. These divisions, however, were either committed to combat or skeletonized because of the unceasing demand for new combat units and individual replacements. This practice made it necessary to improvise replacement installations to operate in Europe. Fourteen divisions sent overseas either functioned as replacement depots for some period of time or were broken up on arrival in France and the units or individuals reassigned. Field commanders complained that this process of stripping divisions of men resulted in inefficiency and brought discouragement to the men. The experience overseas during World War I brought out the necessity of furnishing combat units with properly trained individual replacements.³

³ Ibid., pp 217-227.

WORLD WAR II

World War II brought the development of the largest sustained replacement operation ever experienced by the United States.

"Overseas replacement systems.....provided for a system of requisitioning within theaters of operations and from those theaters to the War Department.....During the early part of the war the War Department failed to give overseas commanders the direction and supervision that would have resulted in the establishment and operation of uniform replacement systems. Early replacement operations, as a consequence, were worked out by trial and error."

"Each theater developed its own replacement policy until a War Department directive of May 1944 brought about greater uniformity in organization. Following the receipt of this directive the Southwest Pacific Area (SWPA) established the Replacement Command; South Pacific Area organized its Replacement Training Command, which later served Pacific Ocean Area (POA); the China-Burma-India (CBI) theater formed the Replacement Service; the North African Theater of Operations, which had already established the Replacement Command, made such changes as were necessary to comply with the directive; and the European Theater of Operations revised its organization which became known as the Ground Forces Reinforcement Command."⁴ Figure 1 indicates the extent of the worldwide replacement pipeline that served the training commands.

⁴Ibid., pp. 392-393.

REPLACEMENT PIPELINES - WORLD WAR II

Figure 1

Source: Lerwell, The Replacement System in the United States Army, p. 393

"The plan which the War Department sent to the theaters⁵ provided that replacements were not to be used for purposes other than maintaining units at authorized strengths unless prior War Department approval was obtained. It called for continuous audit of personnel and an efficient assignment system. The principle that replacements were to be considered a second line of reserves was approved. Requisitions from units were to go to theater replacement and training commands while casualty and requirements sections in the offices of the theater adjutants general were to maintain data on casualties and assignment."⁶ The system prescribed by this letter, although modified several times, remained in effect through World War II. (Figure 2 depicts the functional organization of overseas theaters).

Deficiencies of the World War II system can be attributed partly to the necessity for large theater stockage of replacements because of limited transportation capabilities, partly to the difficulty experienced in projecting losses, and partly to personnel accounting problems. "Replacements tended to clog the pipelines during quiet periods but depots were rapidly emptied of combat replacements during heavy fighting."⁷ There was a tendency for combat replacements to "disappear" in the pipeline. "Battle casualties in the Mediterranean Theater numbered 179,403⁸ and the replacements sent to that theater

far exceeded both battle and non-battle losses. Between 1 June 1944 and V-E-Day, the Replacement Command (of MTO) handled about 300,000 replacements at the rate of about 46,000 per month."⁹

The great distances of the Pacific were a problem in themselves. Here, tactical operations were marked by long periods of quiet interspersed with short periods of heavy fighting as island after island was captured. Replacements frequently spent as much as a month on troopships followed by weeks or months of waiting for assignment to a permanent organization.

In the European Theater of Operations (ETO) replacement depots normally supported armies, replacement battalions supported corps, and replacement companies supported divisions. "Forward depots and battalions supporting the combat forces became depositories for static personnel of sundry categories. The chain of requisitions and subsequent transfer orders necessary to move replacements proved cumbersome."¹⁰ "The ground forces replacement system in Europe.....grew to an organization with a capacity for over 100,000 commissioned and enlisted replacements with a training cadre composed of all arms and services, training personnel in excess of 6,000 officers and men, and with a reinforcement unit cadre in excess of 20,000 officers and men. Before it was disbanded, the system handled more than 2,100,000 men, one half of the personnel in

¹⁰ Ibid, p. 443.

the theater."¹¹

KOREA¹²

The eruption of the Korean fighting in June 1950 found the Army at an ebb tide of authorized strength. Divisions immediately available in Japan for commitment to combat had only two of the three authorized battalions per regiment and these two battalions were understrength. As a result, Department of the Army was faced with the difficult task of filling existing units with individual replacements as well as deploying the combat units needed to sustain the fighting. During the early months of the war, requisitions for combat forces were filled with service troops, the only personnel immediately available to DA. Later, when rotation began, specialist requisitions were filled with combat trained troops, reflecting an inability of the training base to support the specialist training needed to sustain a rotation program.

Movement of personnel through the replacement system was primarily by rail and water. Replacements were received at Camp Drake, near Tokyo; traveled by rail to Sasebo, on the island of Kyushu; boarded ferries for Pusan or Inchon; then moved by train or truck to their permanent organizations. Port and rail throughput limitations in Korea were a continuing problem. Early in the war, when combat losses were heavy, the replacement depot at Sasebo maintained a stockage of 1,000 combat personnel, mostly infantry. After conditions became more stable; stockage in the theater was discontinued.

¹¹Ibid, p. 441.

¹²Information was obtained from documents on file in the office, Chief of Military History.

Problems encountered in the Korean replacement system were reminiscent of World War II. Combat replacements sometimes "disappeared" in the pipeline; for a time, when the theater was overstrength overall, combat units were understrength; accounting for non-effectives and pipeline personnel was a problem; and difficulty in forecasting battle and non-battle losses was experienced. In the final analysis, however, the Korean replacement system performed its function.

Today, the U. S. Army is once again engaged in a rapid build-up to fight a war in Vietnam -- and once again experiencing many of the same difficulties as in the past.

CHAPTER IV

CURRENT REPLACEMENT OPERATIONS¹³

Three selected overseas area replacement systems are described in this chapter--U. S. Army, Europe, Korea, and Vietnam. These descriptions are to provide an understanding of current replacement operations within overseas areas. Department of the Army requisitioning, accounting, and selection and assignment procedures virtually control the operation of replacement operations within overseas theaters. Because of Department of the Army's overwhelming--and justifiable--influence, requirements now imposed by DA on overseas theaters must be understood before a description of theater army systems can be undertaken.

Department of the Army Requirements

The requisitioning, selection, and assignment procedures required of overseas theaters by DA can be divided into two entities--enlisted and officer systems. They are distinguished by differences in time for submission of requisitions to DA, in information required in the requisitions, and in selection and assignment procedures within

¹³Information concerning the current system, with the exception of that concerning Vietnam, was obtained from officers assigned to OPO and from officers recently assigned to the various overseas areas who work or have worked in replacement operations. Information concerning the Vietnam system was obtained from the Adjutant General, U. S. Army, Vietnam, who was in Washington on temporary duty during the preparation of this study.

DA. The enlisted system is further distinguished by differences between the time for submission of requisitions, and between the procedures for selecting and assigning grades E7 through E9 and special categories of personnel, and grades E1 through E6. Both the officer and enlisted systems are highly centralized operations with DA selecting and assigning individuals to fill overseas requirements.

The enlisted personnel requisitioning regulation requires certain information from overseas commands and established a format for the requisition.¹⁴ Intratheater procedures for developing information necessary for the preparation of requisitions are not addressed in current regulations, however. A punched card system is established for agencies and commands requisitioning directly to DA. The system requires the preparation of one card for each replacement requested. A manually prepared requisition, following the same format as prescribed for the punched card, is required from agencies not having punched card equipment. (Fig. 3)

Requisitions are submitted monthly. E7 through E9 requests arrive at DA in the seventh month preceding the month the replacement is required. Requisitions for grades E1 through E6 are submitted to arrive in the fifth month preceding the requirement month. Changes to requisitions may be submitted at any time.

¹⁴ AR 614-202, Enlisted Personnel Requisitioning System, 27 January 1967.

[illegible]

Emergency requisitions, with justification for the request, may be submitted as the need arises. The requisition format provides DA with military occupational specialty (MOS), grade, and sex, as well as specialist qualifications such as linguistic ability or parachutist qualification, for each replacement requested. The requisition also shows the overseas unit of assignment desired by the theater commander for the replacement DA selects.

Upon receipt of requisitions at Enlisted Personnel Directorate, Office of Personnel Operations, the selection and assignment process begins. Each requisition is assigned a control number for ease of identification and future reference. To speed processing cards are punched by U. S. Army Data Support Command for each replacement requisitioned on the manually prepared format. All punched cards are then sorted according to grade--E7 through E9 and E1 through E6. Certain categories of personnel requirements, such as requests for linguists, parachutists, and NCO Logistics Program personnel, are sorted and included with grades E7 through E9 requests. From this point grades E7 through E9 and special categories selection and assignment procedures are similar to the procedures used for the selection and assignment of officers--a manual process. For grades E1 through E6 the procedure is essentially one of matching the requisition cards against cards showing availables. Figure 4 depicts the selection and assignment process to fill grades E1 through E6 requisitions submitted on the normal five month cycle, as well as procedures for filling priority, or emergency requisitions.

SELECTION AND ASSIGNMENT GRADES E-1 THROUGH E-6

FIGURE 4

FIGURE 4

The selection process for grades E1 through E7 result in instructions from DA to the losing CONUS unit to prepare orders assigning the individual selected to the overseas unit indicated by the requisition. Orders for grades E8 and E9 are prepared at DA. Army transportation terminals receive assignment data so that port calls can be issued. Also, an assignment information card containing such information as name, MOS, security clearance, secondary MOS and grade is transmitted by DA to the receiving command. Upon receipt of this information, overseas commands can determine if diversions from original assignment are necessary and can notify the losing CONUS unit, through OPO, of the decision to divert. Losing CONUS units then prepare, or amend, as necessary, individual assignment orders to conform to the overseas commanders' desires.¹⁵

Like the enlisted system, information required by DA in commissioned and warrant officer requisitions is prescribed, but internal theater procedures to develop the necessary information are not addressed in the current regulation.¹⁶ Officer requisitions are manually prepared by overseas theaters in a prescribed format and submitted to arrive at DA in the seventh month preceding the

¹⁵AR 614-215, U. S. Army Replacement System, Selection and Reassignment of Enlisted Personnel for Overseas Service, 15 Apr 66.

¹⁶AR 614-185, Requisition for Officers, 22 November 1957, with changes 1-4.

requirement month. (Fig. 5) As in enlisted requisitions, officer requisitions indicate the overseas unit of assignment for the replacement selected by DA. Although this procedure generally applies it is not all inclusive. USAREUR, at their discretion, will indicate the overseas unit of assignment or simply the major command USAREUR. A special requisition forecast for linguists, in addition to the regular requisition, is required. This involves the submission of a projection of commissioned and warrant officer linguists for each month of the second fiscal year subsequent to the fiscal year in which the forecast is submitted. This forecast is due in DA by 31 August each year.

A pre-validation procedure has been established by DA for officer requisitioning. This procedure results in DA limiting overseas commands to showing in their requisitions only the requirements which are necessary to maintain manning level strengths.

On arrival at Officer Personnel Directorate, Office of Personnel Operations, the requisitions are assigned a control number, validated, and forwarded to the various branches for fill action. This is a manual process, except that machine prepared rosters in several formats are used by assignment officers to assist in selection. Once an individual is selected to fill a requisition, assignment orders are prepared at Headquarters, DA by the Adjutant General, with the exception of orders for the initial assignment of OCS graduates. Orders for OCS graduates are published by the various school commandants based on instructions from DA.¹⁷ Officers, other than those selected for assignment

to U. S. Army Europe, are assigned to the overseas organization indicated by the theater requisitions. Officers selected for assignment to U. S. Army, Europe are given personalized attention with the objective of providing to the replacement a unit of assignment at least 90 days in advance of his departure for overseas.¹⁸ This unit of assignment may be contained in the USAREUR requisition or may be subsequently furnished to the losing command.

Both officer and enlisted replacements are moved to their overseas destination through a system of port calls issued by U. S. Army Transportation Terminal commanders.¹⁹ Upon receipt of assignment data cards in the case of EM, or information from the losing station commander in the case of officers, individual port call instructions are prepared by terminal commanders and forwarded to the losing station commanders and gaining overseas commanders. Arrival times at embarkation terminals for all replacements are correlated with the departure of specific transportation, either aerial or surface. The procedures vary slightly between accompanied and unaccompanied personnel. On arrival at the terminal replacements are processed and placed aboard transportation for their overseas destination.

¹⁹ AR 55-28, Port Call Procedures for Passenger Movements, 28 July 66 and AR 55-46, Travel of Dependents and Accompanied Personnel and Civilian Personnel to, from, or between Overseas Areas, October 1964.

U. S. ARMY, EUROPE

The replacement operation in Europe has evolved over the years in response to DA's informational needs and to internal theater capabilities and requirements. The enlisted replacement system is operated directly by The Adjutants General of USAREUR, Seventh U. S. Army, USACOMZEUR, and the divisions. Staff supervision of the enlisted system is exercised by the G1 at each echelon. On the other hand, the officer replacement system is operated directly by the G1s at all levels.

All theater requisitions are based on projected losses due to expiration of terms of service or rotation. The theater does not now adjust requisitions submitted to DA to reflect estimates of losses which are less predictable, such as deaths, emergency reassignments out of the theater, hospitalized personnel evacuated out of the theater, or extended absences without leave. Neither are adjustments made for theater generated gains, such as hospital patients returned to duty or prisoners returned to duty.

DA directives governing enlisted personnel require the requisitions to show a unit of assignment for each replacement requested. As requisitions are based on projected rotational and ETS losses, the unit which will experience the loss can be-- and is-- shown on the requisition submitted to DA.

The replacement operation for enlisted personnel in U. S.

Army, Europe is based primarily on a punched card requisitioning system.²⁰ Manually prepared requisitions are required from units not having card punch equipment. The manually prepared requisition contains the same information as required for the punched cards.

Requisitions for grades E7 through E9 are developed approximately eight months before the requirement month. DA requires the theater submission in the seventh month preceding the requirement month. Requests for grades E1 through E6 are developed approximately six months before the requirement month to meet DA's requirement for submission in the fifth month before the replacement is needed.

The enlisted requisitioning process begins each month with the preparation of a Personnel Information Roster (PIR).²¹ Rosters are prepared by the Personnel Service Divisions (PSD) supporting divisional units and by the Personnel Service Companies (PSC) or Unit Personnel Sections (UPS) supporting non-divisional units. Personnel Information Rosters list all personnel assigned to a unit and show, among other things, the projected date of loss due to ETS or rotation. The PIRs are forwarded to each unit for verification. Here corrections, if necessary, are made. The corrected rosters are returned to the supporting PSD, PSC, or UPS where

²⁰USAREUR Reg. 614-202, Requisitioning of Enlisted Personnel-- Grades E6 and Below, 1 Dec. 1964. USAREUR directives for requisitioning grades E7 through E9 are contained in a series of messages.

²¹AR 600-16, Personnel Services Divisions, Operations and Procedures, 27 January 1964; AR 600-17, The Division Personnel Support System, Organization and Procedures, May 1964; and DA Pamphlet 600-8, The Unit Personnel Officers Guide, 7 June 1961.

requisitions are prepared. Loss data from the PIR projected into the eighth succeeding month for grades E7 through E9 and into the sixth succeeding month for grades E1 through E6 are used to develop the requisition. Requisitions are prepared in a USAREUR prescribed format. The USAREUR format requires one consolidated card requisition for each category of personnel requested. Requisition cards are forwarded to the next higher administrative headquarters, either Seventh U. S. Army or USACOMZEUR. From here, requisitions are submitted without further consolidation to Hq., USAREUR. At USAREUR the theater-wide requisitions are adjusted, if necessary, to reflect known projected changes in the theater force structure. To comply with DA requirements the consolidated requisitions are then "exploded" at the supporting Data Processing Activity to produce one card for each replacement requested. The cards are then forwarded to DA for fill action.

USAREUR officer requisitions are manually prepared.²² Requirements projected into the eighth succeeding month based on known rotation or separation losses are developed by PSDs, PSCs, and UPS. The requisitions are prepared monthly on DA Form 872 (Fig. 5). They then are forwarded through Seventh U. S. Army and USACOMZEUR to USAREUR. The G1 of USAREUR validates and adjusts the theater wide requisition to conform to DA pre-validated limitations,

²²USAREUR Reg. 614-100, Requisitioning of Commissioned Officers (Except General Officers) and Warrant Officers, 21 Jan 1965.

prepares a consolidated theater requisition, and forwards it to DA for fill action.

Selection and assignment of both officers and enlisted personnel within USAREUR is primarily done through the requisitioning process. As requisitions are based on projections of rotational and ETS losses, the unit which will experience the loss can be shown on the requisition submitted to DA. DA selects and assigns enlisted personnel to this unit. DA generally, selects and assigns officers to USAREUR. The only actions needed to complete the assignment process within USAREUR is to divert enlisted personnel to a different unit, if necessary, and to furnish specific unit assignments for officers to losing commands. Diversions now total between three and five percent of the replacements received. During wartime this procedure could not be followed as the specific unit which would experience combat losses could not be reliably anticipated and shown on a requisition to DA.

Advance information of requisition fill is received in Europe in the form of qualification data cards; port call cards; copies of Form 66 and 20; copies of orders; and, for replacements departing from Fort Dix, N. J., manifest information transmitted by a USAREUR liaison team stationed there. This information, when received, is used to confirm the original assignment or to divert individuals to different assignments. The advance information is also used to inform subordinate units of anticipated replacement fill action.

Arriving replacements are met at the port of debarkation,

either aerial or water, by representatives from the USAREUR replacement battalion; unit of assignment; or, where practical, by the individual sponsor of senior enlisted and officer personnel. Replacements are then moved by previously arranged transportation to their new unit.

EIGHTH U. S. ARMY, KOREA

The Eighth Army replacement operation is similar to the European system. Because of the many similarities, only the major differences between the Eighth Army and USAREUR operations will be described.

A major dissimilarity occurs in the enlisted requisitioning system. Eighth Army has recently begun to develop theater requisitions entirely within the AG section of Army headquarters. Reference to requisitions generated by subordinate units is not considered necessary because of (a) the relatively small magnitude of the Korean replacement operation and (b) the maintenance of complete authorization and current asset files at Army headquarters which, by a comparison procedure, will yield a projection of Army requirements. In peacetime, with projected losses based on known rotational or ETS dates, the unit which will experience a loss can be determined in advance from information available to Army headquarters. In wartime, however, an internal requisitioning system to determine which unit had experienced a combat loss would have to be devised before assignments could be made.

A difference between USAREUR and Eighth Army also exists in the officer requisitioning system. In Eighth Army, the AG develops officer requisitions, while in USAREUR the G1 develops officer requisitions entirely within the G1 section. A final major difference exists. The unit to which DA assigns grades E1 through E6 in USAREUR is the unit of ultimate assignment for these grades. For Eighth Army the requisition indicates, and DA assigns, grades E1 through E6 to the 177th Replacement Company. Orders are then amended or prepared by the Eighth Army AG to assign individuals either to a division or to a specific non-divisional unit.

U. S. ARMY, VIETNAM

The entire U. S. Army, Vietnam requisitioning, selection, and assignment system is a manual operation. The Army Adjutant General operates the system, under the staff supervision of the G1, for both officer and enlisted personnel. Military Assistance Command, Vietnam (MACV) conducts its own replacement operation.

Both enlisted and officer requisitions emanate monthly from PSDs, PSCs, and UPSs and are forwarded to Hq, USARVN.

At USARVN headquarters theater requisitions are adjusted to include enlisted unscheduled losses projected for the requirement month. Enlisted requisitions are then consolidated, typed in the prescribed DA formats and sent to DA for fill action. Replacement of unscheduled officer losses is forecasted by USARV based on command experience and requisitioned 90 days prior to expected requirements. The requisition shows

a unit of assignment for all replacements requisitioned. For requests for unscheduled losses, the replacement battalion is designated as the unit of assignment and a final destination is determined on receipt of advance information of the individual's arrival, or upon his actual arrival in the theater. USARVN does not directly assign replacements to units within a division or to units subordinate to the Logistics Command.

All replacements arrive in Vietnam by air. On arrival at Saigon they are met by representatives from the replacement battalion where initial processing takes place. This processing includes amending or preparing assignment orders by the Army AG. The replacement battalion arranges transportation to units of assignment-- by air if the individual is assigned to an outlying organization, or, if the unit of assignment is located near Saigon, the unit picks up their assigned personnel. Presently, approximately thirty percent of arriving replacements are diverted from their original assignment to a different unit.

One replacement battalion of three replacement companies handles both incoming replacements and rotatees. The battalion, located adjacent to the office of the Army AG, is able to maintain close liaison and coordination with Army headquarters.

Personnel accounting has been a problem in Vietnam because of the lack of adequate data processing equipment and

a data processing activity assigned the primary mission to perform this function. The administration of the replacement activity in the Army AG section is limited to that which can be done manually. Very little assistance from machine records and reports is available. By July 1966, however, the plan is to assign a DPA to Vietnam with the primary mission of personnel accounting.

Accounting for and requisitioning replacements for hospitalized personnel has been a problem. The rapid evacuation process, with individuals moved quickly from the battlefield to hospitals located in the Philippines or even CONUS, has outstripped the personnel accounting process. Units of assignment have difficulty in determining the exact location of their evacuees. Determining whether an individual will be returned to duty has been a particular problem. The procedure is for units to submit requisitions for casualty losses as they occur, even though the individual may return to duty. The AG, U. S. Army, Vietnam maintains experience tables on casualties and adjusts his requisitions to DA to reflect theater generated gains. Current experience is that about sixty per-cent of hospitalized losses eventually return to duty.

The problems inherent to any rapid expansion of forces have been encountered during the Vietnam build up. Maintaining authorization accounts, personnel data reporting systems, communication difficulties, and transportation problems are a few

examples. As long as a build up continues and the situation is unstable, problems will continue to occur.

CHAPTER V

PROPOSED THEATER ARMY REPLACEMENT PROCEDURES

This chapter presents a general description of a proposed Theater Army Replacement System (TARS). Details of system operation are contained in Annexes A through F. These annexes include a draft proposed army regulation, proposed Tables of Organization and Equipment to support the system, and one annex lists current regulations which would require change if the proposed system is adopted.

The Theater Army Replacement System proposed here is primarily to establish uniform procedures and organization for the operation of the theater replacement activities, within oversea commands under present conditions. These standardized procedures and organizations will provide a firm base for the expansion -- or contraction -- of theater replacement operations. The present lack of standard internal theater army procedures to provide a basis for training individuals and units to operate an overseas replacement system places the Army in the position of devising expedient procedures. The proposed system will not drastically change the procedures now practiced by Department of the Army or by the Theaters. However, some changes are proposed, mainly in the requisitioning procedures, which will require adjustment at every echelon.

CONCEPTS

In developing the TARS, the concepts contained in Chapter 17, FM 100-10, July 1963 have been followed. The proposed TARS is centrally controlled by theater army, field army, independent corps, and division commanders with decentralized operation by replacement units. Movement of replacements from CONUS or within theaters is by the fastest available transportation and in the most direct flow possible to the unit of ultimate assignment. Stockage, reclassification and retraining within the theater are limited to the necessary minimum.

The New Army Authorization Documents System (NAADS) reflects the organizational structure of the Army in terms of authorization documents. These documents are tables of organization and equipment (TOE), modification tables of organization and equipment (MTOE), tables of distribution and allowances (TDA), modification tables of distribution and allowances (MTDA), common-type tables of allowances (CTA), joint tables of allowances (JTA), and Army portion of joint tables of distribution (JTD). These documents, in punched card form, are the basic source from which a Master Authorization File is created and modified by Data Processing Activities (DPA).

Personnel Service Divisions (PSDs) and Personnel Service Company/Unit Personnel Sections (UPS) are furnished a Master Authorization File for each organization they service. This file is the backbone of the system and must be kept current and accurate.

The administrative procedures for requisitioning, selecting, and assigning individuals in the TARS are based entirely on a punched card operation. Maintained at PSDs and Personnel Service Company/UPS will be a Master Authorization File containing pre-punched cards for each authorized space in each unit. (Fig 6) (See Sec I, App I). Each card contains basic data concerning the position it represents. Information such as MOS, grade, sex, and special qualification requirements of the position are shown. This basic card, reproduced and transmitted from PSD or Personnel Service Company/UPS to field army, and then to theater army, serves as a requisition and also is used for selection and assignment throughout the entire theater replacement process. At each succeeding level of control, information is added to the basic card. Information such as requisition number, and unit to which replacement is to be assigned is added. However, the basic card is never changed either in content or format--it is only "added to"--throughout. This procedure should reduce considerably the possibility of error in preparing cards and save time in card preparation and verification.

ORGANIZATION

The proposed system will be operated by theater army, field army, independent corps, and division commanders under the staff supervision of the G1 at each echelon. Operational control will be exercised by the AG at these headquarters. Figure 7 depicts theater organizational structure.

THEATER ARMY REPLACEMENT ORGANIZATION

INDICATES
SUPPORT NOT
SUBORDINATE UNIT
OF STAFF ELEMENT

Cellular TOEs (Annex B) for an AG Replacement Division for theater army, field army, or independent corps AG offices are proposed to provide a standardized capability to support varying replacement workloads in different theaters, different headquarters, and under different operational conditions. These TOE include a data processing capability with appropriate EAM equipment.

Proposed TOEs revising the current replacement battalion (Annex C & D) have also been prepared. The replacement battalion, controlling three to five replacement companies, is the principal replacement operating unit of theater army, field army and independent corps. The replacement battalion is equipped with a transceiver for receiving and sending assignment and shipment instructions and for transmitting reports. Each replacement company is capable of processing up to 400 replacements per day. The replacement detachment of ROAD divisions is currently organized to handle replacements at division level. Changes to current TOE for divisions are not needed.

The PSD supporting divisional units, and the Personnel Service Company and UPS supporting non-divisional units are integral to the TARS. PSDs, Personnel Service Companies, and UPSs initiate requisitions, maintain personnel accounts--both authorized and actual, prepare reports, and perform the machine operations for matching replacements received against requirements for the units which they support.

REQUISITIONING

The key to effective operation of any replacement system is the development and submission of reliable requisitions based on projected losses. Projecting when, where, and what losses will occur is also the most difficult function of the system to execute. Regardless of the difficulty of projecting the various kinds of losses, requisitions must be prepared to reflect projected losses using the best information that can be developed at the time the requisition must be submitted.

In peacetime, requirements for the majority of replacements are generated by rotational losses due to either completion of prescribed overseas tours or expiration of term of service. As tour lengths are fixed by policy and ETS is fixed by contract and law, the date of an individual's return from overseas to CONUS can be reliably predicted. This information, combined with job requirements for the position being vacated, can serve as the basis for requisitioning a replacement.

Other categories of losses are more difficult to project. These are losses from death, accident, sickness, emergency or hardship re-assignment, wounds, missing in action, and capture. In short, these are all losses not attributable to ETS or normal rotation. These losses, with some exceptions, occur both in peacetime and in wartime, with a proportionately larger number occurring in wartime. To provide some degree of reliability in projecting these losses, a broad statistical base is necessary. Even with a broad statistical

base, the time that a specific unit will experience a particular loss is almost impossible to predict with any degree of reliability. Probably the best prediction that can be obtained will indicate only that a loss in a particular MOS should occur somewhere in the theater within a specified period of time.

It follows then, that requisitions for replacements for ETS and normal rotational losses can be projected reliably by the units which will experience the loss. On the other hand, units lacking a broad statistical base cannot predict reliably when other type losses -- casualties, etc. -- will be experienced. At the lower levels, requisitions can be submitted for the less predictable losses only as they occur.

Factors other than projected losses will also affect requirements for replacements. Intra-theater gains must be considered also. In a peacetime situation, these gains include personnel returned to duty from confinement in the theater, hospitalized personnel returned to duty, enlistments of various categories of personnel residing within the theater, tour extensions, and reenlistments which extend overseas tours. In wartime, these gains, plus gains such as personnel returned from missing or captured status, wounded returned to duty, and recalled reservists residing in the theater, must also be considered in developing requisitions. Again, a broad statistical base is necessary to project intra-theater gains. The projections must be made at a level where the statistical information is available .

A final factor affecting projected personnel requirements must be considered also in developing requisitions. This factor is the anticipated changes in theater strength authorization and force structure. This also must be developed at a level where information of projected changes is known.

The maintenance of statistical information concerning all types of losses alone is not enough. It is necessary to relate the statistics to historical information. Statistics combined with history will provide the "what," "how many," and "why" of past loss and gain occurrence. The "what," "how many," and "why" of the past then can be applied with judgment to a knowledge of future operational plans to produce a projected personnel requirement.

In preparing a requisitioning procedure for TARS, consideration was given to the possibility of developing projected overseas theater replacement requirements at DA level from ETS and normal rotational loss data obtained from the enlisted and officer master tape records and from statistical data developed to produce a projection of other theater losses and gains. A DA developed theater replacement requirement would, in effect, negate the requirement for theaters to submit requisitions to DA. This possibility, although probably feasible, would not satisfy the Theater Army Commander's requirements. Regardless of how personnel requirement forecasts are developed, the various theaters would still find it necessary to devise a reporting system for determining the specific unit of assignment for replacements received.

This requirement will continue to exist as long as theater requirements continue to change and result in changes in theater priorities.

A requisitioning procedure for the proposed TARS based on the rationale of the preceding paragraphs has been developed.

In the proposed TARS, requisitions for all categories of personnel except general officers will be prepared and submitted to DA on the same time schedule and in the same basic format. Standardizing a time and format for submitting and updating requisitions for all categories of personnel should alleviate the present requirements for submissions in varying formats at varying times for several categories of personnel requested. (Figure 8 depicts requisition and replacement flow).

Overseas commands will prepare and submit monthly requisitions to DA eight months in advance of the requirement month. Information received in this time frame should provide DA with a basis for timely planning for procurement and training. An update of the eight-month requisition will be required of overseas areas in the fifth month preceding the requirement month. This should allow DA to plan Advanced Individual Training. A final update of the requisition would be required seventy five days in advance of the requirement month. This would give DA sufficient time to adjust the assignment of personnel from AIT, as well as from permanent party, to meet world-wide needs.

The overseas areas will be required to submit one card for each replacement requested. Consideration was given to consolidated

requisitions. Consolidated requisitions were rejected for TARS for several reasons.

First, the entire requisitioning and assignment system is based on a prepunched card which does not basically change in content or format throughout the entire process. This is to reduce the possibility of error in card preparation and to reduce workloads at all levels. Consolidation of these cards would increase the card punching requirement, change the formats, and would require many "header" cards to be prepared and transmitted.

Second, even if consolidated requisition cards were prepared, it would be necessary to "explode" the consolidated requisitions at all echelons -- DA, Theater Army, Field Army, Independent Corps, and Divisions -- to produce single cards for each replacement requisitioned. This would be necessary to match by machine the cards representing availables and requirements and to account for the unfilled portion of requisitions.

Theater submissions to DA will reflect projected ETS and normal rotational losses, projected losses for other reasons, and projected changes in theater force structure. Theater Army will be required to develop and maintain a statistical and historical data base for use in projecting personnel requirements.

Within an overseas theater, requisitions are developed at the level having the capability for projecting losses, intra-theater gains, or anticipated changes in force structure. Proposed intra-theater requisitioning procedures are also based on two categories

of requisitions. First, requisitions based on known losses from ETS and normal rotation, hereafter referred to as scheduled losses. Second, requisitions based on the less predictable type losses such as KIA and WIA; hereafter referred to as unscheduled losses.

Three control levels for requisitioning are established -- PSD or Personnel Service Company/UPS (level 1), Field Army or independent Corps (level 2), and Theater Army (level 3).

At PSD and Personnel Service Company/UPS (level 1) the requisitioning cycle for known or scheduled losses is based on an eight month cycle. Initially, loss projections, computed on known rotational and ETS losses for the eighth subsequent month, will be submitted by all PSD's and Personnel Service Company/UPS's to Field Army or Independent Corps, as appropriate.

Initiation of the 8-month cycle starts at the PSD for divisional units and at the Personnel Service Company/UPS for nondivisional units. The PSD/Personnel Service Company/UPS will prepare a complete monthly roster of all personnel assigned to subordinate units. This roster will contain name, grade, MOS, and scheduled departure date as well as any additional information required by the PSD/Personnel Service Company/UPS and will be prepared in TOE paragraph and line number sequence. Upon receipt of the roster, unit commanders will verify the information, make any corrections required as a result of promotion, changes in position or status and return the original copy of the roster, as corrected, to the PSD/Personnel Service Company/UPS. As projected losses are to be treated as the basis for replacement of personnel,

it is necessary to incorporate into the system a means for the unit commander to exercise a degree of latitude in requesting personnel in MOS's and grades other than those corresponding to projected losses. The system provides for the direct grade and MOS replacement of all projected losses without further action on the part of the unit unless the commander desires an individual of lower grade or a different MOS. In the event the unit commander desires a replacement of a lower grade than that authorized for the departing individual, the monthly personnel roster can be annotated to reflect the desire on the same line containing the returnee's name and personnel data. Where an entirely different MOS is requested, regardless of grade, the information is to be entered after the last entry on the roster with a brief explanation of the reasons therefor. (i.e. "Qualified replacement on hand and pending change of primary MOS," "OJT of the current asset will satisfy basic requirements"). The roster will then be used by the Personnel Service Division/Personnel Service Company/UPS to update the master personnel data file cards from which the roster was prepared. The updated cards will then be sorted and all cards with a rotation or ETS date of eight months subsequent to the month of preparation will be separated. The eighth month loss cards will be matched against the Master Authorization Card File and corresponding Master Authorization cards will be removed from the file. The master authorization cards withdrawn will be reproduced and batched. This batch will have a unit requisition number added and the data from the card batch will be transmitted to Field Army, Independent Corps,

or to Theater Army in the case of a Personnel Service Company supporting Theater Army. In addition to constituting the eighth month projection of losses, the reproduced cards transmitted with the unit requisition number thereon serve as an automatic requisition to the next higher echelon in the chain of command and will be retained by the originating unit for future use as a requisition file. After transmission of the data to the next higher level of command is completed, the original Master Authorization cards will be returned to the master file and will be filed in a separate suspense section to indicate that the loss is anticipated and that it has been reported for replacement action. Maintenance of this suspense section of the Master Authorization Card File also assures that validation of requirements at the PSD/Personnel Service Company/Unit Personnel Section is possible with a minimum of cross referencing. Return of these cards to the active portion of the file will be discussed under procedures for the receipt and assignment of replacement personnel.

Each succeeding month the same process will be followed and a new eighth month projection submitted. The previous month's submission will be revised and updated and the changes posted. All changes, additions and deletions will be prepared on punched cards which will be retained at the PSD/Personnel Service Company/UPS until the fifth month prior to the anticipated loss at which time the changes, (additions and deletions) will be transmitted to the next higher echelon to permit updating of Field Army, Independent Corps, and Theater Army requisitions. Updating of files will

continue and 75 days prior to the requirement month, changes will be forwarded to the next higher echelon to permit updating of Field Army and Theater Army requisitions. Changes that occur subsequent to the submission of the 75-day revision will be reported as additions or deletions to the next regular 75-day submission prepared the following month. For example: A 75-day requisition submitted during January for replacements required during the month of April would not have a change submitted in February. The normal 75-day requisition submitted in February for replacements required in May would be adjusted to reflect changed requirements. The prime reason for the cutoff 75 days prior to the requirement month is to permit Headquarters, Department of the Army sufficient time to select personnel, notify the unit of current assignment and allow the individuals selected time to close out personal affairs and take leave prior to reporting for shipment. Under peacetime conditions, selection, notification, clearing and leave will consume up to 75 days without unusual delays or special circumstances. Thus the notification will occur at the same time as the 75-day revision submitted during that month and rather than adjusting the previous requisition, it is more efficient to enter the requirement on the current month revision and to permit the normal cycle to operate.

Requirements developed at PSD and Personnel Service Company/UPS (level 1) for unscheduled losses will be processed in the following manner: Units serviced by PSDs and Personnel Service Company/UPS will submit daily requests for replacement of losses as the losses

occur. Only nonscheduled losses will be reported as all other losses will have been projected in advance and valid requisitions will exist at the time of actual loss. For unscheduled losses, units will indicate the replacement desired by MOS, grade, sex, security clearance and language qualification based on the vacant position without regard to the actual loss sustained. The PSD/Personnel Service Company/UPS will prepare a requisition card in the same manner as that described for scheduled losses. In view of the nature of the loss, the PSD/Personnel Service Company/UPS will not have projected the loss and consequently no scheduled gains will be available to satisfy the requirements. However, unscheduled gains, as reflected in the In-Theater gains file, will have to be screened prior to forwarding the request to the next level. In the event a qualified replacement is reflected in the In-Theater gains file appropriate instructions will be issued to the supporting Replacement Unit, by the AG Replacement Division, or PSD to move the individual to the unit which initiated the request. AG Replacement Division of Theater Army or Field Army would direct the supporting replacement battalion to prepare orders to complete the assignment. At Division level, the PSD will prepare orders and notify the replacement detachment to arrange transportation. When the requirement cannot be met from unscheduled In-Theater gains, the data from the Master Authorization File Card corresponding to the replacement required will be transmitted to the next higher level after addition of a unit requisition code number to facilitate future identification when the replacement is received.

At Field Army or Independent Corps (level 2) requisitions will be processed as follows: When scheduled loss cards are received from the PSD's and Personnel Service Companies/UPS's Field Army submits the total field army requirements to Theater Army with the requests indicating which replacements are to be scheduled for assignment to the replacement battalion or battalions supporting the field army. Loss cards received from the PSD's and Personnel Service Company/UPS' will be maintained at Field Army by unit. The total file will also be maintained by month of submission. Identification of a particular unit or divisional request can thus be accomplished by reference to month of submission and requisition code number.

Requisitions for replacements to fill vacancies created as a result of unscheduled losses will be received daily at field army level and will be compared to the In-Theater gain data cards for unscheduled gains to determine if Field Army assets can satisfy the requirement. If the requirement can be matched against an unscheduled gain Field Army will create an Assignment Information Card to be transmitted to the requesting organization. This card will direct the replacement battalion currently scheduled to receive the individual or holding him for assignment to issue orders and arrange transportation to move him to his unit of assignment. In the event unscheduled gains cannot meet the requirement and the requirement is of sufficient urgency to warrant immediate diversion of other assets, Field Army will screen the Assignment Information cards for replacements due in to satisfy

scheduled losses and if a match can be obtained the replacement organization scheduled to receive the individual will be directed to prepare assignment orders and move the individual to his assigned unit. In the latter case the Field Army will immediately submit a request for replacement to satisfy the vacancy created by the diversion. The new requisition card will indicate the unit from which the diversion was made and a cancellation notification will be made to the original requesting unit to notify them that the diversion was made and that the requirement had been resubmitted but that fill action would not take place in the time frame originally anticipated. Unscheduled losses for which no match is possible from In-Theater gains, or when appropriate from scheduled gains, will be forwarded to Theater Army as immediate requirements.

At Theater Army (level 3) monthly requisitions submitted to DA will consist of personnel requirements by MOS, grade, security clearance, language qualification and special qualification, if any. This requisition will be revised at five months and again at 75 days prior to the month in which the replacements are required. In order to facilitate distribution of replacements upon their arrival in the theater the requisitions will indicate the unit of assignment as determined by the Theater Commander and will be separated into the following categories:

- a. Division--For assignment by Department of the Army to a designated division and for further assignment within the division as determined by the Personnel Services Division of the Administration Company.

- b. Replacement Battalion--For assignment by Department of the Army to a replacement battalion supporting Theater Army or one of the Field Armies within the Theater Army or Field Army as determined by the Headquarters supported by the replacement battalion.
- c. Specific Non-Divisional Unit--For assignment by Department of the Army to a specific unit such as a separate company or battalion where final assignment is not expected to change regardless of the individual replacement selected by DA to fill the requirement.

The Theater Army requisition will differ from the Field Army and Division requisitions in that Theater Army requisitions will not only include projected scheduled losses based on completion of overseas tour and ETS but when authorized by Headquarters, Department of the Army will also include a factor for unscheduled gains and losses. The latter projection, while unpredictable with respect to time and place of loss, can be predicted with reasonable reliability when computed on a broad statistical base and adjusted by actual experience factors over an extended period of time. The key to the unscheduled loss and gain factor determination is in the statistical base and maintenance of information in a format that will assist in determining MOS and grade requirements. These factors will include but not be limited to potential gains from re-enlistments, enlistments within the theater, hospital returnees and voluntary extensions of overseas tours as well as potential losses from deaths, hospital evacuations, court-martial and board actions, and emergency departures from the command.

The requisitions as transmitted to Headquarters, Department of the Army would include a Theater Army requisition number for

identification of personnel designated to fill a particular requisition. Individuals selected by Headquarters, Department of the Army for assignment to the command would be assigned against a specific requisition number from the command.

Emergency requisitions may be generated as follows: Unscheduled loss requisitions received by Theater Army will be compared with unscheduled gains generated within the Theater to determine if the requirement can be satisfied through the use of Theater assets. If the requirements can be satisfied, the AG Replacement Division of the Theater Army Headquarters will direct the replacement unit scheduled to receive the individual or holding him for assignment to prepare orders and arrange transportation to the requesting unit. Theater Army will also prepare an Assignment Information Card to be sent to the Personnel Service Company/UPS or PSD supporting the requesting unit. This card will notify the unit of the impending arrival of the replacement. In the event unscheduled gains cannot meet the requirement, the AG Replacement Division will screen the requisition submitted five months previously for which replacements are due in the command during the current month. If previous unscheduled loss factor computations are reliable, a replacement should be scheduled to arrive in the command during the month and can be assigned against the loss. In the event the loss was not projected due to limited or non-existent experience factors, the criticality of the loss must be determined prior to submission of an emergency requisition. If the loss is critical to the accomplishment of the unit mission, Theater Army will enter the request for replacement

on the 75 day requisition submitted during the month of loss.

When changes to requirements indicate that a previous request will result in an overstrength, the requesting unit will take immediate action to delete the requirement from the next scheduled requisition revision. Should this condition arise subsequent to the submission of the 75 day requisition, notification will be made to Theater Army with the understanding that fill action may require that the unit accept the replacement and carry an overstrength for a period of time. In the event the replacement has not arrived in the theater and overall theater requirements can absorb the MOS and grade of the expected arrival, Theater Army will establish diversion action to adjust within the command.

As a matter of policy, Headquarters, Department of the Army will cancel all unfilled requisitions or portions thereof 60 days subsequent to the last day of the requirement month. Thus, specific notification will be issued by Headquarters, Department of the Army to the Theater of Operations (Theater Army) advising which unfilled requisitions or portions thereof are cancelled. Unless the requirement has been satisfied through some other source, the notification will be the basis for including the requirement in the next 75 day updating requisition submitted to Headquarters, Department of the Army.

In the event, Headquarters, Department of the Army has taken action to fill a particular requisition, but the availability date of the individual selected is later than the requirement month due to deferment or completion of school training, Department of the Army will inform

the command and direct that the portion of the requisition corresponding to the particular request be kept active until the receipt and assignment of the individual within the command.

Validation, within the theater, of requirements will be accomplished primarily at the PSD/Personnel Service Company/UPS level. As unit requests are received either as a result of the return of the monthly personnel inventory roster or as a result of actual losses, the PSD/Personnel Service Company/UPS will validate the stated requirement against the assigned strength and the master authorization file. Field Army will perform no validation functions. At Theater Army level the requisitions will be validated against the Theater Army manning level and separate calculations will be performed to assure that grade and MOS balances are maintained within acceptable limits. The primary concern of the Theater Army will be to assure that combat qualified personnel levels are maintained and that overages in non-combat personnel are detected prior to the time overall Theater Strength imbalances create shortages of a critical nature in combat units while noncombat personnel overages continue to build. When a trend toward any imbalances is noted, the Theater Army Commander must take prompt action to request rotation of surplus personnel or to retrain potential combat type individuals to restore the balance.

SELECTION AND ASSIGNMENT

Upon receipt of requisitions from overseas commands at Department of the Army the selection and assignment process commences. To fill requisitions for officers, senior enlisted personnel, and personnel requiring long training lead times, selection may take place upon receipt of the eighth month requisition. To fill requisitions for other personnel, particularly those which are to be filled from AIT classes, the selection of an individual to fill the requisition will probably not occur until after the fifth month or seventy-five day update of the requisition. As the factors governing selection and the procedures for selecting personnel at DA level are complex and are not pertinent to this study, it is enough to state that the end result will be the selection of an individual to fill the theater requisition.

Once an individual has been selected to fill a requisition, the overseas command will be notified by DA using an Assignment Information Card with the name of the replacement punched into it as the basis. This card will tell the overseas commander who is coming to the theater but will not tell him precisely when. To provide the "when", the army terminal commander will, after issuing a port call to the individual, transmit assignment data information with the time of arrival and port of debarkation added. With this information, the theater commander can make tentative assignments from the initial information received, then finalize the assignment using the Assignment Information Card. During wartime, it is possible and probable that only assignment

Information Cards would be transmitted to the overseas commander. Should this become necessary, assignments within the theater would not be delayed as the assignment card contains the same information as the card transmitted by DA upon selection of the individual.

Assignments within the theater would be based on machine matching the assignment cards showing the name of an individual to fill the requisition with the requisition cards on file at theater army. In peacetime, with DA assigning most replacements to a unit of ultimate assignment as designated by the original requisition, theater army would be primarily concerned with necessary diversions. In wartime, with the unit of ultimate assignment within the theater undeterminable until the loss occurs, the theater would be concerned with matching replacements intransit and present in the theater with the requisitions received from field army for unscheduled losses, then further assigning replacements as required. The proposed TARS regulation at Annex A includes detailed internal theater procedures for assigning replacements received as well as establishing procedures for diverting from original assignment, assigning intra-theater gains, reclassifying, and retraining, where necessary. Procedures are prescribed for all levels within the theater -- Theater Army, Field Army, and PSD or Personnel Service Company/UPS. These procedures are all designed around matching punched cards representing requirements against cards representing availables with the objective of moving replacements to a unit of assignment without unnecessary delay.

PERSONNEL ACCOUNTING

The adoption of the proposed TARS will not disarrange the accounting procedures now established. To the contrary, the adoption of TARS should enhance the accounting system by providing a standardized procedure for assigning and accounting for replacements within a theater. As the accounting and replacement systems are, in fact, integrated, one should contribute to the operation of the other.

At theater army and field army level, the accounting system will have to provide input into the replacement system in the form of data to maintain statistical and historical information to generate loss estimates. Conversely, the replacement system will furnish input to the accounting system for a similar purpose.

At PSD and Personnel Service Company level, the replacement and accounting operation will be completely integrated. The proposed TARS is built around current organization and procedures. The only change necessary to PSD and Personnel Service Company procedures is to add the proposed TARS procedures to current regulations.

The replacement procedures proposed by this study should be placed in effect Army-wide not later than January 1968 for the following reasons:

1. Unnecessary delay will further prolong the time that the Army has no uniform prescribed procedures for the internal operation of a theater army replacement system. Without such a system the difficult and sometimes painful experiences of the past can be expected to repeat themselves in the future.

2. Rapid implementation of this system will ease the transition from current procedures to TASTA-70 automated procedures.

3. New equipment to improve the administrative capabilities of Personnel Service Divisions and Personnel Service Companies is programmed for distribution in the last part of FY 1967. Rapid approval of the procedures proposed by this study would allow the implementation of this system coincident with new equipment issue.

Subsequent to the development of the procedures, information was received indicating that a Personnel Line Item Requisitioning System (PLIRS) was to be made operational on a world-wide basis during mid-summer 1966. As a result, procedures and card formats required modification for compatibility with that system. The procedures and card formats contained in Annex A reflect those changes.

SECTION I

GENERAL

1. PURPOSE. These regulations establish policies and prescribe the administrative procedures for the organization and operation of the Theater Army Replacement System (TARS) under current conditions.

2. EXPLANATION OF TERMS.

a. Assignment Information Card -- A punched card containing items of assignment information. It is furnished by Headquarters, Department of the Army to the gaining requisitioning commander as an assignment aid. It is used throughout the system for matching against Requisition Cards.

b. Assignment Unit -- The organization to which an individual will be assigned as determined by the requisitioning commander. This organization may be a Division Replacement Detachment, a Replacement Battalion, or a unit of ultimate assignment.

c. Fill File -- A punched card file containing requisition cards indicating requisitions against which personnel have been assigned.

d. Fill Report -- A daily report showing assignments made during the preceding 24 hours.

e. G-1 -- The term G-1 will be interpreted to mean DCSPER wherever appropriate in these regulations.

f. In-Theater Gain Data Card -- An EAM card containing

assignment data on each individual, unit, or unit component.

It is created by the Theater Army AG Replacement Division for all intra-Theater Replacements at such time as the Theater Army Replacement System assumes jurisdiction for obtaining an assignment.

g. In-Theater Gains File -- A punched card file consisting of In-Theater Gain Data Cards.

h. Intra-Theater Replacements -- All individual, unit and unit component replacements entering the Theater Army Replacement System from intra-theater sources.

i. Master Authorization File -- A file containing a punched card for each position authorized by TOE or TDA.

j. Master Personnel Data File -- A punched card file containing information on each individual assigned to an organization serviced by a Personnel Service Division or Personnel Service Company. Information includes TOE or TDA paragraph and line number positions.

k. Replacement Operating Unit -- Replacement Battalions and Replacement Companies under the operational control of a Theater Army or Field Army and Replacement Detachments organic to Divisions.

l. Requisitioning Commander -- Commanders who submit requisitions for personnel replacements direct to Headquarters, Department of the Army.

- m. Requisition File -- A punched card file reflecting replacement requirements for authorized positions as reflected by the Master Authorization File.
- n. Scheduled Gain -- A gain to the replacement inventory resulting from filling a requisition or from receipt of an assignment information card.
- o. Scheduled Loss -- A loss which can be anticipated based on an individual's predetermined date of loss through ETS or completion of overseas tour.
- p. TARS Data Processing Activity -- An element of the Replacement Division of the Adjutant General's Office of a Theater Army or Field Army activity capable of supporting the Theater Army Replacement System.
- q. Theater Army Commander -- The commander of an overseas area requisitioning replacements directly from Headquarters, Department of the Army.
- r. Unit Component Replacements -- Replacement of TOE platoons, squads and comparable units as complete entities.
- s. Unit of Ultimate Assignment -- The organization to which an individual is assigned for duty.
- t. Unit Replacements -- Replacements of TOE battalions, companies and comparable units as complete entities.
- u. Unscheduled Gain -- An individual gain for which a requisition was not submitted.

v. Unscheduled Loss -- A loss which results from a individual being dropped from command strength prior to a predetermined date for his departure from the command.

3. PURPOSE OF THE THEATER ARMY REPLACEMENT SYSTEM.

To support U. S. Army units within the theater by providing individual, unit and unit component replacements and to provide support for other services and nations as may be directed.

4. APPLICABILITY. The Theater Army Replacement System applies to all Army replacements other than general officers. The mission, objectives, policies and procedures apply to all echelons within theaters of operation. On M-Day or declaration of an emergency this regulation will be suspended by separate Headquarters, Department of the Army instructions.

5. OBJECTIVES OF THE THEATER ARMY REPLACEMENT SYSTEM. The objectives of the Theater Army Replacement System are to:

- a. Maintain U. S. Army units at authorized strength.
- b. Maintain the minimum number of replacement operating units required to support the operation.
- c. Process replacements in a manner which will maintain their dignity, morale and esprit de corps.
- d. Assign or reassign individual replacements and assign or coordinate the assignment of unit or unit component replacements to using units as needed to assure effective manpower utilization within the Theater.

e. Move replacements as expeditiously as possible to their unit of ultimate assignment.

f. Maintain control of accounting, administration, movement and inventory of replacements,

g. Effectively use available EAM equipment to increase the speed and responsiveness of the system.

h. Maintain minimum number of replacements in excess of immediate requirements (stockage) in accordance with Department of the Army policy for the particular theater situation.

i. Assure that the theater army commander and staff, and commanders at all appropriate echelons, are informed concerning the receipt, allocation, assignment, inventory and location of replacements within their areas of jurisdiction.

j. Keep the replacement system flexible and responsive to the needs of the tactical situation and to the desires of the theater army commander.

k. Process rotatees in accordance with Headquarters, Department of the Army and Theater Army policy.

6. RESPONSIBILITIES.

a. Theater Army Commanders -- Theater Army Commanders are responsible for implementation and operation of the Theater Army Replacement System as set forth in these regulations.

b. Logistical Commanders -- Logistical commanders are responsible for:

(1) Exercising Command (less operational control)

over TARS replacement operating units located in the communications zone.

(2) Providing administrative and logistical support for operation of the TARS.

(3) Furnishing transportation for the movement of replacements.

(4) Maintaining liaison between Theater Army Adjutant General Replacement Division and Army air or surface terminal commanders.

7. THE THEATER ARMY REPLACEMENT ORGANIZATION.

a. The Theater Army Replacement Organization is designed to centralize control of the replacement system and to decentralize operation by replacement operating units. The replacement system will have its apex in the Theater Army Headquarters or Field Army which it serves.

b. The TARS will be operated by the Theater Army Commander, under the general staff supervision of the Theater Army G-1, and under the operational control of the Theater Army Adjutant General. The replacement system within the Field Army will be operated by the Field Army and division commanders, under the general staff supervision of the G-1 and under the operational control of the Adjutant General.

c. Replacement operating units will be organized according to current TOEs for the:

(1) Adjutant General Replacement Organization at Theater Army , Field Army, or independent corps headquarters (TOE 12-500G).

(2) Replacement Battalions (TOE 12-56G) and Replacement Companies (TOE 12-57G). The Replacement Battalion is the principal operating unit of the Theater Army Replacement System.

(3) Replacement Detachment of the Division. The Replacement Detachment, organic to the Division Administration Company, is the division replacement operating unit.

d. The specific organization for replacement operations in a Theater Army or a Field Army will be dependent upon the size and geographical dispersion of the Army or lesser force of an independent Corps or Division being supported, nature of conflict, transportation facilities, area of operation, and replacement sources. The TOEs for AG Replacement Divisions of headquarters are cellular, and will permit organization for various size theaters, replacement workloads, and other factors.

SECTION II

REPLACEMENT POLICIES AND PROCEDURES

8. REPLACEMENT SOURCES.

a. CONUS -- Replacements from CONUS will be allocated and furnished by Headquarters, Department of the Army in response to requisitions submitted by Requisitioning Commanders.

b. Intra-Theater-- Personnel in the theater who become available for assignment or reassignment as individuals or as part

of a unit or unit component regardless of source (i.e. inductions, enlistments of prior service personnel, order to active duty of Reserve Component personnel residing in the theater, hospital returnees, surplus due to reduction of former unit authorization).

9. REPLACEMENT FLOW.

a. Replacement from CONUS -- The maximum possible number of individual, unit and unit component replacements scheduled for divisions will be moved directly from CONUS to the Army division to which being assigned unless the requisitioning commander directs assignment to a subordinate element of the division. Non-divisional replacement personnel will be moved directly from CONUS to the Theater or Field Army replacement operating unit in direct support of the unit of ultimate assignment unless the requisitioning commander directs assignment to the unit of ultimate assignment.

b. Intra-Theater Replacements -- Theater generated replacements--individuals, units, or unit components--will be directed to the nearest replacement battalion where they will be classified and reported by means of an In-Theater Gain Data Card to Theater or Field Army. They will then be applied against requirements and assigned according to theater policy. Requisitions previously submitted to Headquarters, Department of the Army, for the vacancies filled by such assignment will be adjusted in the next requisition forwarded to Headquarters, Department of the Army.

10. ASSIGNMENT POLICIES AND PROCEDURES

a. Individual replacements.

(1) All CONUS replacements will arrive in a theater with a predetermined destination (a division replacement detachment, a replacement battalion, or a unit of ultimate assignment). Ultimate assignments for replacements assigned to Theater Army and Field Army replacement operating units will be determined by Theater Army and Field Army Headquarters and furnished to replacement operating units in accordance with procedures contained in Appendix I.

(2) Hospital patients returned to duty will be processed in accordance with procedures contained in Section IV Appendix I.

(3) Recovered prisoners of war will be hospitalized immediately upon return to U. S. Army control for medical examination and physical classification. Upon completion of hospitalization they will be processed in accordance with procedures contained in Section IV, Appendix I or returned to CONUS in accordance with Headquarters, Department of the Army and Theater Army policy.

(4) Personnel to be rotated will move through the replacement system.

(5) Upon receipt of daily replacement status reports, the Commanders of Theater Army, Field Armies and Divisions will designate priorities for filling requisitions, if required, and will identify individuals with MOS for which there are no requirements within the foreseeable future.

(6) Replacements with MOS for which there are no foreseeable requirements will not be permitted to remain in replacement operating units for long periods of time. The following actions will be taken:

(a) Field Army, upon receipt of the Daily Replacement Status Report from Replacement Battalions and Divisions, indicating replacements having MOS for which there is no requirement, will review Field Army requirements to determine whether a need exists for reported MOS elsewhere within the Field Army. Except as indicated in (7) below, when the fourth Daily Replacement Status Report is received from these organizations showing the replacements are still in the organization, the Field Army, when submitting its Daily Replacement Status Report to Theater, will indicate there are no requirements for these MOS within the foreseeable future.

(b) Theater Army, upon receipt of the Daily Replacement Status Report from Field Armies and Theater Replacement Battalions, will review theater requirements to determine whether a need exists for these replacements. When there are no requirements for these replacements, Theater Army will direct that replacements holding such MOS be reclassified by the replacement operating unit into another MOS for which they are qualified and which a requirement exists. Information of MOS changes will be transmitted to the Field or Theater Army Headquarters concerned using codes and format in Appendices II and V. Additionally, replacement operating units will

report such changes in accordance with the provisions of AR 335-60. Replacements will then be assigned against requisitions for personnel in the new MOS. Those replacements not qualified in any other MOS will be processed in accordance with the provisions of paragraph 12b.

(7) Personnel in highly skilled MOS, as determined by Headquarters, Department of the Army, who require lengthy training or experience may be held in stockage longer or may be assigned as temporary overstrength to units which can use these skills. Personnel assigned as overstrength will provide a source of replacements for requirements for the highly skilled MOS in other units.

b. Unit replacements and unit component replacements --

(1) Units of battalion and company size will move from CONUS with TOE equipment in accordance with the provisions of AR 220-10. Unit components will move with equipment specified by Headquarters, Department of the Army.

(2) Unit or unit component replacements move into the theater through port-of-entry staging facilities to destinations specified by the Theater Army Commander.

(3) Units furnished through the replacement system will retain their identity as units. They will be assigned only as replacements for troop basis units. They will not be used in a reinforcement role or to establish provisional units.

(4) Unit replacements will normally remain under Theater Army control until assigned.

(5) Combat arms unit component replacements will normally be programmed for direct flow from CONUS to Divisions or Field Army replacement battalions.

(6) Service unit component replacements will remain under Theater Army control until assigned.

(7) Depleted units will be inactivated, returned to CONUS, or restored by the TARS when feasible. After restored units regain combat effectiveness they will be assigned in accordance with Theater policy. Depleted or inactivated units returned to CONUS will be sent without personnel and equipment. Residual personnel will be reassigned as individuals or unit component replacements by Division, Field Army or Theater Army, as appropriate.

11. PERSONNEL PROCESSING

a. Replacements arriving in the theater will be met at the port of debarkation, air or surface, by representatives of a Theater Army Replacement operating unit. Personnel processing required by Theater Army policy will be completed and individuals, units or unit components not being diverted will be moved to assignment unit or unit of ultimate assignment.

b. All elements of the replacement system will conduct command information activities in accordance with the provisions of AR 360-81.

c. Intra-Theater replacements will undergo processing in the replacement system. The replacement operating unit initially receiving such personnel will be responsible for clothing, equipping, classifying, and other processing necessary to ready them for assignment. Processing will be accomplished without delay.

12. TRAINING AND RETRAINING OF REPLACEMENTS

a. Training of individual replacements. Individual replacements awaiting assignment will be given limited training as prescribed by the Theater Army Commander. Movement of replacements will not be delayed for training purposes.

b. Re-Training of individual and unit replacements. Retraining of individual replacements and units will be limited. Retraining will be conducted within the Theater Army Replacement System only when directed by the Theater Army Commander. The Theater Army Commanders will determine, with the concurrence of Headquarters, Department of the Army, whether individual and unit replacements in excess of foreseeable requirements will be returned to CONUS or whether retraining will be accomplished within the Theater Army Replacement System. When a retraining mission is assigned to theater replacement operating units, the units will be augmented with instructor personnel and equipment consistent with the retraining requirement.

13. STOCKAGE

a. While the optimum number of replacements within the theater in excess of immediate requirements (stockage) is zero, the actual

stockage required will be dependent upon many factors. Related to these factors are Headquarters, Department of the Army requirements for fulfilling world-wide commitments.

b. When theater Army is authorized stockage by Headquarters, Department of the Army, retention of replacements in an unassigned status will not exceed limits established by Headquarters, Department of the Army.

14. LOSS RATE TABLES AND STATISTICAL DATA.

a. Theater Army is responsible for obtaining, maintaining, and evaluating statistical and historical data pertaining to all gains and losses. This continually updated data is essential to the preparation of requisitions for unscheduled losses, when authorized. (See paragraph 17). Minimum data requirements will be gains and losses by MOS and grade and the reasons, conditions and circumstances under which the gains and losses were experienced.

b. Replacement status reports, requisitions, casualty reports and other strength reports, flowing into Theater Army Headquarters are a valuable source of information for developing statistics to assist in preparing loss rate tables. Procedures will be developed by Theater Army Commanders to maintain data for use in preparing requisitions and to provide Headquarters, Department of the Army with data and statistics of this nature when requested.

c. Early in any conflict, casualty and non-battle loss data available to the Theater Army Commander will be derived from loss rate

factors contained in FM 101-10-1. Headquarters, Department of the Army will authorize the inclusion of unscheduled loss data into requisitions submitted to Headquarters, Department of the Army, however, before using these factors to project losses the Theater Army commander must consider the type of warfare being conducted or anticipated. With the start of hostilities, Theater Army Commanders will develop theater loss rate tables using the formulas in Chapter 2, FM 101-10-1. In addition theater developed tables will show losses by MOS and grade.

d. Field Army and other major commanders subordinate to the Theater Army Commander will develop and maintain loss rate tables when directed.

15. AUDITS

a. The Theater Army Commander will develop internal procedures for the conduct of personnel audits. Procedures will be designed to:

- (1) Detect and prevent overstrengths.
- (2) Verify the reliability of, or detect inadequacies in the operation of the replacement system.
- (3) Insure equitable qualitative distribution of personnel.

b. Auditing is concerned with both qualitative and quantitative distribution. Generating special reports to be used solely for auditing programs will be avoided. Procedures will provide for

periodic visits to major commands to audit personnel, administrative, and strength accounting procedures and personnel utilization. Auditing within subordinate units of Field Armies and other major commands will be accomplished by the headquarters concerned primarily to observe manpower utilization and to verify strength data.

c. Headquarters, Department of the Army, for officer personnel, will conduct monthly audits of assigned and projected strengths. Validation and fill of requisitions will be based on the Headquarters, Department of the Army audit.

SECTION III

REQUISITIONS, SELECTION AND ASSIGNMENT

16. GENERAL: a. The key to effective operation of the TARS is the development and submission of reliable requisitions based on projected theater losses and gains. Projecting when, where and what losses and gains will occur is the most difficult function of the system to execute. Regardless of the difficulty, requisitions must be developed to reflect projected losses and gains using the best information available at the time the requisition must be submitted.

b. Scheduled losses. In peactime and -- dependent upon rotation policies -- possibly in wartime, requirements for the majority of replacements are generated by rotational losses due to either completion of prescribed overseas tours or to expiration of terms of service. As tour lengths are fixed by policy and ETS is fixed by contract and law, the date of an individual's return from overseas to CONUS can be reliably predicted. This loss information, combined with the job requirements for the position being vacated, can serve as the basis for requisitioning a replacement. Scheduled losses can be determined and requisitions submitted by the unit which will experience the loss.

c. Unscheduled losses. Unscheduled losses are difficult to predict. These are losses from death, accident, sickness, emergency or hardship reassignment, wounds, missing in action, and cap-

ture. In short, these are all losses not attributable to ETS or normal rotation. These losses, with some exceptions, occur both in peacetime and in wartime, with a proportionately larger number occurring in wartime. To provide some degree of reliability in projecting these losses, a broad statistical and historical base is necessary. Even with a broad statistical and historical base, the time that a specific unit will experience a particular loss is almost impossible to predict. The best prediction that can be obtained will indicate that a loss in a particular MOS and grade should occur somewhere in the theater within a specified period of time. Unscheduled loss projections must emanate from the command echelon having the statistical and historical base necessary for predicting the loss.

d. Factors other than projected losses will affect requirements for replacements.

(1) Intra-theater gains must be considered. In peacetime, these gains include personnel returned to duty from confinement in the theater, hospitalized personnel returned to duty, enlistment of personnel residing within the theater, tour extensions, and reenlistments which extend overseas tours. In wartime, these gains, plus gains such as personnel returned from missing or captured status, wounded returned to duty, and recalled reservists residing in the theater must also be considered in developing requirements. A broad statistical base is necessary to project these gains. The pro-

jections must be developed at a level of command where the information is available.

(2) Anticipated changes to theater strength authorizations and force structure must be considered in developing replacement requirements. This factor must also be developed at a level of command where projected changes are known. To enhance responsiveness, anticipated changes in strength authorization will be the basis for submission of requisitions, once the Theater Army Commander has submitted his recommendations to Headquarters, Department of the Army.

(3) Future operational plans affect personnel requirements. Future operational plans translated into their effect upon gains and losses must be considered in developing requisitions. This factor must be developed at the level of command with a broad knowledge of future operations.

17. REQUISITIONS.

a. General. (1) The TARS requisitioning procedures are based on the preparation and submission of a machine punched card for each replacement requested throughout the entire system.

(2) In the absence of punched card machine (PCM) equipment requisitions will be manually prepared in the format shown in Figure 2, contain data shown in the Appendices and forwarded to the next higher echelon. The first echelon having operating PCM equipment will convert the manual data to punched cards and

process the cards in accordance with these regulations.

(3) Requisitions for unit and unit component replacements will be submitted when authorized by Headquarters, Department of the Army.

b. Requisitioning Procedures from Requisitioning Commander to Headquarters, Department of the Army.

Requisitioning Commanders will submit to Headquarters, Department of the Army one requisition card for each replacement required eight months in advance of the month the replacement is required. Changes to the eighth month requisition will be submitted at the fifth month and again seventy-five days before the requirement month. Submissions will reflect all projected losses and gains tempered by judgment and a knowledge of future operations. Detailed procedures for the preparation and submission of requisitions are contained in Appendix I.

c. Requisitioning Procedures Within the Theater--

(1) Organizations. The Personnel Service Division, Personnel Service Company or Unit Personnel Section will prepare regular monthly requisitions reflecting scheduled losses for the eighth subsequent month. Additions and deletions will be submitted at the fifth month and seventy-five days before the requirement month. Requisitions reflecting unscheduled losses will be prepared and submitted daily to Field Army, or Theater Army, as appropriate, as the losses occur. Detailed procedures are contained in Appendix I.

(2) Field Army. Field Army will forward the regular requisitions received from Divisions and Personnel Service Companies/Unit Personnel Sections supporting non-divisional units to Theater Army during the same month in which received after entering data shown in Appendix III-1. Requisitions for unscheduled losses will be matched against unscheduled gains as provided in Appendix I. Unscheduled loss requisitions which cannot be matched will be forwarded to Theater Army daily after incorporating the additional data as shown in Appendix III-1.

(3) Theater Army. The AG Replacement Division of the Theater Army will forward to Headquarters, Department of the Army, through the Data Processing Activity (DPA) supporting the Theater, regular requisitions received from Field Armies and Personnel Service Companies/Unit Personnel Sections under Theater Army jurisdiction. Requisitions will be dispatched so as to arrive in Headquarters, Department of the Army, Office of Personnel Operations not later than the 25th day of each month. AG Replacement Division Theater Army will prepare the requisition in accordance with instructions contained in Section III, Appendix I and in the format shown in Appendix III-2. Additionally, when authorized by Headquarters, Department of the Army, Theater Army will include requirements in the regular requisition for unscheduled loss and projected operations factors developed, as required by paragraph 14, for the eighth subsequent month. Unscheduled loss requisitions received from Field Armies and Personnel Service Companies/Unit Personnel Sections will

be used as source data for updating statistical and historical files.

18. DAILY REPLACEMENT STATUS REPORTS. To provide each headquarters with information which reflects the status of unassigned individual, unit and unit component replacements on hand in replacement operating units, a Daily Replacement Status Report will be prepared as of 2400 hours each day. The Daily Replacement Status Report will be prepared by replacement operating units (Appendix IV) and transmitted to the next higher administrative headquarters.

19. ACTIONS AT HEADQUARTERS, DEPARTMENT OF THE ARMY AND TRANSPORTATION TERMINAL COMMANDS

a. Upon receipt of a requisition from a Theater Army Commander, Headquarters, Department of the Army, Office of Personnel Operations will:

(1) Select the individual to fill requisition.

(2) Forward an Assignment Information Card to the Requisitioning Commander for each individual selected after verification of availability.

b. The U. S. Army Terminal Commander will:

Furnish the requisitioning commander a Port Call Response Card for each individual departing for the overseas command in accordance with the procedures contained in AR 55-28 (Transportation and Travel--Port Call Procedures for Passenger Movements).

20. MOVEMENT OF REPLACEMENTS.

a. The effectiveness of the replacement system depends upon availability, and effective use of transportation.

b. The Commanding General, TALOG is responsible for furnishing transportation for movement of replacements throughout the Theater Replacement System, including transportation for replacements moving direct from port of entry to divisions and Field Army replacement battalions.

c. Commanders of replacement operating units at the ports of entry will furnish Theater Army Headquarters a daily report showing the number of replacements received and placed in-transit and number awaiting onward transportation.

21. SELECTION AND ASSIGNMENT.

a. General. Intra-theater assignments are based on machine matching of Assignment Information Cards or In-Theater Gain Data Cards with the requisition cards on file at each echelon of command.

b. Theater Army Headquarters selection and assignment procedures are prescribed in Section III, Appendix I.

c. Field Army or Independent Corps selection and assignment procedures are prescribed in Section II, Appendix I.

d. Division selection and assignment procedures are prescribed in Appendix I.

22. VERIFICATION OF ARRIVAL.

a. Individuals who fail to arrive 48 hours after date

shown in Port Call Response Cards (Theater) or receipt of In-Theater Gain Cards will be reported as non-arrivals by replacement operating units or units of ultimate assignment to Theater Army or Field Army Headquarters, as appropriate, (Codes and format indicated in Appendix II and V), unless prior notification indicates that they were eliminated from shipment.

b. Theater Army Headquarters will inform Headquarters, Department of the Army of non-arrivals after insuring that they are not carried elsewhere in the theater inventory.

c. Individuals who fail to arrive at their units of assignment by their EDCSA date will be carried on the morning report of the unit to which assigned as "assigned not joined" for accountability purposes. Additionally, the provisions of AR 630-10 will apply.

d. In those cases where replacements arrive at a replacement battalion or division replacement detachment for whom In-Theater Gain Data Cards are not on file, replacement battalion or division will prepare and transmit an unexpected arrival card (Appendix IX) to Theater Army Headquarters.

e. Theater Army Headquarters, will match unexpected arrival cards against non-arrival cards to insure that the individuals are not carried elsewhere in the theater inventory (paragraph b, above). For individuals identified as belonging to an organization in the theater, necessary instructions will be issued which will assist

the individuals in reporting to their organizations. Individuals not carried in the theater inventory will be applied as an unscheduled gain against unscheduled loss requirements.

23. THEATER ARMY REPLACEMENT SYSTEM DATA PROCESSING. The flow and processing of personnel and organizational data are prescribed in Appendix I.

APPENDIX I

REPLACEMENT PROCEDURES

SECTION I

PERSONNEL SERVICE DIVISIONS AND PERSONNEL SERVICE COMPANIES/UNIT PERSONNEL SECTIONS

1. Master Authorization File. Servicing Data Processing Activities will prepare and furnish each Personnel Service Division, Personnel Service Company, and Unit Personnel Section a Master Authorization File for the organization(s) supported by that Personnel Service Division/Personnel Service Company/Unit Personnel Section. The Master Authorization File will contain a punched card for each authorized position as shown on the TOE/TDA or MTOE/MTDA based on 100% TOE/TDA or MTOE/MTDA. When a TOE/TDA or MTOE/MTDA contains multiple positions for one line number, a card will be prepared for each position separately. Cards will be prepared in the format shown in Figure 1. Whenever the TOE or TDA of an organization is changed by a Theater approved MTOE or MTDA, the servicing Data Processing Activity will prepare and furnish the affected Personnel Service Division, Personnel Service Company or Unit Personnel Section an updated Master Authorization File reflecting the MTOE or MTDA changes. For organizations authorized a strength level less than 100% TOE/TDA or MTOE/MTDA, the PSD or Personnel Service Company/UPS will withdraw the cards for the positions not to be filled and file them in an inactive section at the rear of the cards for the positions authorized (authorized section). Whenever the authorization is increased, the cards for the positions to be filled will be withdrawn from the inactive section and placed in their proper positions by paragraph and line number in the authorized section. Whenever the authorization is decreased, the cards for the

positions not to be filled will be withdrawn from the authorized section and placed in their proper position, paragraph and line number, in the inactive position. Whenever an organization is reassigned to the jurisdiction of another supporting PSD/Personnel Service Company/UPS, the servicing Data Processing Activity of the gaining PSD/Personnel Service Company/UPS will prepare and furnish a new Master Authorization File to that gaining PSD/Personnel Service Company/UPS.

2. Personnel Information Rosters. Personnel Service Divisions and Companies/Unit Personnel Sections prepare Personnel Information Rosters monthly for each organization supported. (Procedure 3-18, AR 600-16 and Procedure 3-11, DA Pamphlet 600-8). The rosters are forwarded monthly to the supported units for verification of the data contained thereon. Supported units verify the data. Additionally, unit commanders determine whether positions to be vacated during the eighth subsequent month will be filled by requisitions, or from within the organization. When the commander desires to fill them from within the organization, he will indicate the specific positions to be so filled, and make an entry identifying the positions which will be vacated as a result and thereby identify the positions for which he desires replacements. Additionally, when the commander desires an E-7, E-8 or E-9 position to be filled by an individual in the organization and the individual recommended is one grade lower, but is qualified for promotion, he will annotate the roster to indicate he requires a promotion

quota for the specific E-7, E-8, or E-9 position to be filled from within the organization. After verification and selection actions are completed, the roster will be returned to the Personnel Service Division, the Personnel Service Company or Unit Personnel Section (Procedure 11-1-16, AR 600-17).

3. Requisitioning Procedures. a. Scheduled losses--Upon return of the Personnel Information Rosters from the supported organizations they will be reviewed. The date of loss column and the commander's entries on the rosters will be carefully screened and the positions identified for each individual scheduled as a loss during the eighth subsequent month. A requisition will be prepared in accordance with the following:

(1) PSD, Personnel Service Company and UPS's having EAM equipment.

(a) The Master Authorization Card for the position to be requisitioned for is withdrawn from the Master Authorization File. Except when requisitioning chaplain's assistants, columns 1 through 12, 35, 37 and 38 through 58 will be reproduced. For chaplain's assistants columns 1, 9 through 12, 35, 37 and 38 through 58 are reproduced.

(b) The reproduced card becomes the Routine Basic Individual Replacement Requisition after the additional data, as shown in Appendix III, is manually key punched into the card.

(c) A Communications Control Card will be prepared by PSD's and Personnel Service Company/UPS's having EAM equipment. Personnel Service Company/UPS's supporting Field Army non-Divisional units and PSD's will prepare the Communications Control Card in the format shown in Paragraph 3a, Appendix VII. Personnel Service Company/UPS's having EAM equipment and supporting non-Divisional and COMMZ units of the Theater Army will prepare a Communications Control Card in the format shown in Paragraph 3b, Appendix VII.

(2) UPS's without EAM equipment. -- A requisition worksheet as shown in Figure 2 will be prepared, in duplicate, for each position for which a replacement is being requisitioned. Source of data to be inserted in the worksheet is shown in Appendix III.

(3) Punched card requisitions will be transceived to Field Army AG Replacement Division or for Personnel Service Company/UPS's supporting non-Divisional and COMMZ units of the Theater Army to Theater Army AG Replacement Division in accordance with schedules established by the next higher command. Punched card requisitions to be transmitted by means other than transceiver as provided for in paragraph 17a(2), basic regulation will be reproduced and the reproduced copy forwarded with the Communications Control Card.

(4) Manual requisitions will be forwarded to Field Army AG Replacement Division or UPS's supporting non-Divisional and

* Personnel Identity Code

COMMZ units of the Theater Army to Theater Army AG Replacement Division in accordance with schedules established by the next higher command.

(5) Requisition cards and worksheets (duplicate) will be filed in a Requisition File by MOS and grade for warrant officers and enlisted personnel and by branch, grade and MOS for officer personnel within unit within the requirement month (Column 25).

(6) The Master Authorization Card for the requisitioned positions will be filed in the suspense section of the Master Authorization File. This procedure will permit the expeditious identification of those positions scheduled to be vacated and for which requisitions have been submitted. Assignment procedures contained in paragraph 4 provide for the refiling of these Master Authorization Cards.

(7) The procedures indicated in (1) through (6), above, will be accomplished each month and will result in the creation of the scheduled loss portion of the monthly requisition. Additionally, Personnel Information Rosters returned by the supported organizations each month will be carefully reviewed to determine whether any changes are required to update requisitions previously submitted. Changes may be required as a result of reenlistments, extensions of terms of service and extensions or terminations of overseas tours. Such changes require the cancellation of the corresponding scheduled loss requisition.

In the case of personnel previously reported as scheduled losses, premature permanent departure from the position by reason of death, hospitalization, emergency evacuation, or early termination also requires the submission of an unscheduled loss requisition as indicated in b, below. When changes are required the following actions will be taken:

(a) The requisition card or worksheet for the position will be withdrawn from the Requisition File.

(b) The requisition card or worksheet will be reproduced less column 14 (transaction codes).

(c) Column 14 will be punched or an entry made, as appropriate, with the cancellation transaction code "C" as shown in paragraph B, Appendix II.

(d) The Master Authorization Card will be withdrawn from the suspense section of the Master Authorization File and refiled in its proper position within the main section of the File except under the circumstances indicated below. The Master Authorization Card will remain in the Master Authorization File under these circumstances to indicate an outstanding requisition:

1 When the period of extension of an overseas tour, reenlistment, or extension of term of service terminates with a month for which a requisition has already been submitted. In these cases, the actions indicated in (1)

through (6) will be taken. The "Month and Year Required" (Columns 25-26) will be changed to show the revised requirement month.

2 Upon receipt of a cancellation card and new requisition card from Field Army (paragraph 2b(3)(b) and (c), Section II). The old requisition card or worksheet for the position will be withdrawn from the Requisition File and destroyed. For manual operations a new Requisition Worksheet, original only, will be prepared with the revised data. The new requisition card or worksheet will be filed in the place previously occupied by the destroyed card or worksheet.

(e) Cancellations generated in the three months following the month of requisition submission will be maintained by the Personnel Service Division and Personnel Service Company/Unit Personnel Section until the third month. After producing the cancellations for the third month, all cancellations for the entire three month period will be transceived or transmitted, as appropriate, to Field Army AG Replacement Division or for Personnel Service Company/UPS's supporting non-Divisional and COMMZ units of the Theater Army, to Theater Army AG Replacement Division. Cancellations generated in the fourth month following the month of requisition submission will be held by the Personnel Service

Division and Personnel Service Company/Unit Personnel Section until the middle of the fifth month. After withdrawing the first half of the fifth month cancellations the cumulative changes (additions and deletions) will be transceived or forwarded, as appropriate, to the AG Replacement Division of the Field Army or Theater Army for Personnel Service Company/UPS's under Theater Army jurisdiction.

EXAMPLE: January requisition for September fill (requirement month): February and March cancellations and additions to this requisition are held by PSD/Personnel Service Company/UPS until April. In April, after preparation of the April cancellations and additions, the combined February, March and April changes will be forwarded to the AG Replacement Division of the Field Army or Theater Army for Personnel Service Company/UPS's under Theater Army jurisdiction. May changes will be held by the PSD/Personnel Service Company/UPS until the 15th of June. On the 15th of June after withdrawal of the first half of June cancellations and additions of new requisitions with requirement month of September, the cumulative changes (additions and deletions) will be transceived or forwarded, as appropriate, to the AG Replacement Division of the Field Army or Theater Army for Personnel Service Company/UPS's under Theater Army jurisdiction. This transaction updates the original requisition submitted five and one half months previously which was revised two and $\frac{1}{2}$ half months previously and thus represents the final requisition for September. Changes to the September

requisition developing in July and August will be incorporated into the 15th of July changes for the October requisition. A chart indicating requisitioning month, five month updating submission, seventy-five day final submission and requirement month is shown at Figure 3.

(f) The requisition card or requisition worksheet which was withdrawn from the Requisition File, and which is no longer a valid requisition will be destroyed.

b. **Unscheduled losses.** Unscheduled losses as a result of premature permanent departure of personnel from a position will be reported to Personnel Service Division or Personnel Service Company/Unit Personnel Section daily as they occur. Upon receipt of information indicating an unscheduled loss, the Personnel Service Division and Personnel Service Company/Unit Personnel Section will take the actions indicated in paragraph a(1) through (6) except that columns 25-26 (Month and Year Required) will show the month and year that the requisition is submitted. **EXAMPLE:** Unscheduled requisition submitted on 4 March 1967 will show month and year required as 3 7.

4. **Assignment Procedures.** AG Replacement Division of Field Army and Theater Army for Personnel Service Company/UPS's under Theater Army jurisdiction will transceive or forward, as appropriate, an Assignment Information Card containing the data shown in Figure 4, to each PSD or Personnel Service Company/UPS not later than

ASSIGNMENT INFORMATION CARDS (Continued)

- b. Only the last digit of the year is shown
- 2. The last two digits of the year are shown.

Figure 4

24 hours prior to the individual's reporting time. Upon receipt of the Assignment Information Cards the following actions will be taken:

a. Assignment Information Cards will be sorted to provide sequence by MOS and grade for warrant officers and enlisted personnel and by Branch, grade and MOS for officers within unit within the requirement month (Column 78).

b. Assignment Information Cards will be matched against the Requisition File. Match will be by OPO Control Number (Assignment Information Card Columns 63-65; Requisition Card Columns 28-30) and Requisition Line Number (Assignment Information Card Columns 66-69; Requisition Card Columns 31-34). Matched cards or matched card and worksheet will provide the basis for issuance of orders when required, assigning the individual to the requesting organization.

c. After issuance of orders the Assignment Information Cards will be destroyed.

d. The requisition card or worksheet will be filed in the Fill File pending production of the Fill Report. After production of the Fill Report, the requisition will be refiled in the Fill File and maintained a minimum of 30 days for statistical purposes.

e. Utilizing the Fill Report, the Master Authorization Card will be withdrawn from the suspense section of the Master

Authorization File and refiled in the main (active) section of that file.

5. Unscheduled loss requisition and fill flow chart is shown at Figure 5 and Figure 6, respectively.

UNSCHEDULED LOSS REQUISITION & FILL FLOW CHART

FIGURE 5

FIGURE 5

SECTION II

FIELD ARMY

1. Requisitioning Procedures. Upon receipt of requisition cards or requisition worksheets from Personnel Service Divisions/ Personnel Service Companies or Unit Personnel Sections the following actions will be taken:

a. Scheduled loss requisitions. (These requisitions can be identified as such by the "Month and Year Required" date. This date will always be a projected month as opposed to the current month).

(1) A Requisition Card as shown in Appendix III-1 will be prepared for each Requisition Worksheet received from Unit Personnel Sections without EAM equipment. The Requisition Worksheet will be destroyed after the Requisition Card has been created and the data verified.

(2) Columns 16-17 will be punched with the Field Army number. (See paragraph C, Appendix II).

(3) A determination will be made which will reflect the Field Army assignment policy.

(a) For replacements to be assigned to the unit of ultimate assignment (Columns 38-58) as shown in the basic requisition, columns 18-19 will be punched "00".

(b) For replacements to be assigned to a replacement battalion for subsequent assignment to the unit of ultimate

assignment as shown in the basic requisition or a unit to be determined at a later date columns 18-19 will be punched with the appropriate code of the specific replacement battalion as shown in paragraph D, Appendix II.

b. Unscheduled loss requisitions.

(1) A Requisition Card as shown in Appendix III-1 will be prepared for each Requisition Worksheet received from Unit Personnel Sections without EAM equipment. The Requisition Worksheet will be destroyed after the Requisition Card has been created and the data verified.

(2) Unscheduled loss requisition cards will be matched against the Assignment Information Cards of unscheduled gains. Matches will be processed in accordance with the assignment procedures contained in paragraph 2, this section.

(3) Columns 16-17 of unmatched requisition cards will be punched with the Field Army number. (See paragraph C, Appendix II).

(4) Columns 18-19 will be punched "00" for replacements to go direct to the unit of ultimate assignment or with a code identifying the specific replacement battalion to which the replacement will be assigned.

c. A Communications Control Card for transmitting the card data to Theater Army AG Replacement Division will be prepared in the format shown in paragraph 3b, Appendix VII.

d. Requisitions will be transceived to Theater Army AG Replacement Division in accordance with schedules established by Theater Army. Requisitions to be transmitted by means other than transceiver as provided for in paragraph 17a(2), basic regulation will be reproduced and the reproduced copy forwarded with the Communications Control Card.

e. Requisition cards will be filed in a Requisition File by MOS and grade (WO and enlisted personnel) and by Branch, grade and MOS (Officers) within unit within the requirement month (Column 25).

f. Cancellations from PSD/Personnel Service Company/UPS or Theater Army will trigger the following actions:

(1) Preparation of a Communication Control Card for transmitting the data to Theater Army AG Replacement Division (para 3b, Appendix VII) or PSD/Personnel Service Company/UPS (para 3f, Appendix VII).

(2) Withdrawal and destruction of the corresponding requisition card subsequent to transmission of cancellation action.

g. Additions to requisitions received from PSD/Personnel Service Company/UPS and Theater Army AG Replacement Division will result in the following actions:

(1) Preparation of a Communication Control Card for transmitting the data to Theater Army AG Replacement Division similar to that indicated in paragraph f(1) above.

(2) After transmission the requisition cards will be filed in the proper requisition file by MOS and grade for WO and enlisted personnel and by Branch, grade and MOS for officers within unit within the requirement month (Column 25).

2. Assignment Procedures. Theater Army AG Replacement Division will transceive an Assignment Information Card (Figure 4) to the Field Army AG Replacement Division not later than 32 hours prior to the individual's reporting time. Normally, for each Assignment Information Card received in the Field Army AG Replacement Division there will be a Requisition Card in the Requisition File. Both the Assignment Information Cards and the Requisition Card will contain the same unit identification code. However, based on circumstances and conditions which may have developed subsequent to the submission of the requisition card, the Field Army Commander upon receipt of the Assignment Information Card can divert replacements by assignment to other units as he deems appropriate. Upon receipt of Assignment Information Cards the following actions will be taken:

a. Assignment Information Cards will be sorted to provide sequences by MOS and grade for warrant officers and enlisted personnel and by Branch, grade and MOS for officers within unit within the requirement month (Column 78).

b. Assignment Information Cards will be matched against the Requisition File using OPO Control Number (Assignment Information

Card Columns 63-65; Requisition Card Columns 28-30) and Requisition Line Number (Assignment Information Card Columns 66-69; Requisition Card Columns 31-34). Matched cards will be processed in accordance with the following:

(1) No diversion (replacement assigned to unit of ultimate assignment). Assignment Information Card will be transceived or forwarded, as appropriate, to the Personnel Service Division or Personnel Service Company/Unit Personnel Section supporting the unit or ultimate assignment. The requisition card will be filed in the Fill file pending production of the Fill Report. After production of the Fill Report, the requisitions will be refiled in the Fill file and maintained a minimum of 30 days for statistical purposes.

(2) No diversion (replacement assigned to Replacement Battalion). Assignment Information Card will be transceived to the Replacement Battalion. Requisition Card will be filed in the Fill file pending production of the Fill Report. After production of the Fill Report the requisition will be refiled in the Fill file and maintained a minimum of 30 days for statistical purposes.

(3) Diversion

(a) Assignment Information Card will be reproduced less Columns 74-77. The Unit Identification Code for the organization to which the replacement is being diverted will be key punched into Columns 74-77.

(b) Assignment Information Card will be trans-

ceived or forwarded to the PSD/Personnel Service Company/UPS supporting the gaining unit or to the gaining Replacement Battalion.

(c) A cancellation card will be prepared by Field Army AG Replacement Division. Cancellation cards will use the requisition card format and will be reproduced less column 14 (Transaction code). This column will be punched with the cancellation transaction code "C" as shown in paragraph B, Appendix II. Cancellation cards will be transceived or forwarded to the Personnel Service Division or Personnel Service Company/Unit Personnel Section which submitted the initial requisition.

(d) Prepare a new requisition card. New requisition cards will be a reproduction of the old requisition card less Columns 25-26 (Month and Year Required), 28-30 (OPO Requisition Control Number) and 31-34 (Requisition Line Number). These columns will be punched with the month and year of the next regular scheduled seventy-five day final requisition, a new OPO Requisition Control Number and a new Requisition Line Number. New requisition cards will be transceived or forwarded to the Personnel Service Division or Personnel Service Company/Unit Personnel Section which submitted the initial requisition for file in the Requisition File. Upon receipt of the next regular scheduled seventy-five day final requisition from the Personnel Service Division or Personnel Service Company/Unit Personnel Section, the Field Army AG Replacement Division will incorporate the new requisition as an addition.

(e) Prepare Communication Control Cards in the format shown in paragraph 3f, Appendix VII for EAM equipped PSD's and Personnel Service Company/UPS's supporting Field Army non-Divisional Units.

SECTION III

THEATER ARMY

1. General. Requisitions received at Theater Army will be in four distinct categories. Processing of each category will be discussed independently although an interrelationship exists among all types.

2. Requisitioning Procedures

a. Eighth month requisition. Scheduled monthly requisitions for personnel losses anticipated during the eighth month subsequent to the month of submission.

(1) Upon receipt of requisition cards Theater Army AG Replacement Division will tabulate total Theater requirements for the requirement month by Branch, grade and MOS for Officers and by MOS and grade for warrant officers and enlisted personnel. In addition, WHEN AUTHORIZED BY HEADQUARTERS, DEPARTMENT OF THE ARMY, theater experience factors for unscheduled losses and gains will be used to calculate personnel requirements required to offset anticipated unscheduled losses during the requirement month. Personnel requirements will be calculated by branch, grade and MOS for officers and by MOS and grade for warrant officers and enlisted personnel. In the absence of valid experience factors, as for a new Theater of Operations, estimates will be derived from the loss rate tables contained in FM 101-10-1 and experience factors such as percent of personnel returned to duty subsequent to hospitalization must be considered

and current rates computed based on the conditions within the particular theater of operations.

(2) After computation of total adjusted requirements Theater Army AG Replacement Division will conduct a final review of the Theater requisition to assure that projected on-hand strength for the eighth subsequent month plus the replacements requested will not exceed the Theater troop authorization.

(3) Determination will be made with respect to assignment of replacements to a replacement battalion under Theater Army or to the organization designated by Field Army.

(4) Preparation of the Theater Army requisition for transmission to Headquarters, Department of the Army will be accomplished by reproducing requisition cards received from Field Armies and Personnel Service Company/UPS's under Theater Army jurisdiction. Cards will be reproduced less columns 16-19 and the additional data, as shown in Appendix III-2, key punched into the card.

(5) In addition to punch card requisitions for colonel positions, Theater Army Commanders will submit a report of current and projected colonel requirements in accordance with AR 614-102.

(6) Final action at Theater Army AG Replacement Division will be the preparation of communications control cards for each separate batch which identifies the Theater Army replacement battalion, Field Army replacement battalion, Division replacement

detachment or separate unit to which direct assignment is to be made. Card format will conform to that prescribed in Appendix VII.

(7) The Theater Army AG Replacement Division will forward a duplicate set of cards of the completed requisition to the Theater Army servicing DPA for transmission to Headquarters, Department of the Army.

(8) Servicing Data Processing Activities will transceive the requisitions to Headquarters, Department of the Army or forward the requisitions to the transmitting Data Processing Activity for transceiving to Headquarters, Department of the Army. When conditions preclude electrical transmission, the requisition cards as well as communications control cards will be dispatched by the fastest available means to Headquarters, Department of the Army. (Para 17a(2), basic regulation).

b. Fifth month revision

(1) Requirement changes which occur subsequent to the submission of the eighth month requisition will be received from subordinate units of the Theater Army during the fifth month prior to the requirement month. Upon receipt of these changes from subordinate elements, Theater Army AG Replacement Division will update the requisition for the requirement month in the following manner:

(a) Requisition cards will be matched against cancellation cards contained in the change cards received.

(b) Requisition cards which match will be removed from their respective batches and destroyed.

(c) Cards representing additions not previously reported as requirements will be reproduced and the original merged with the original requisition cards. (Duplicates will be forwarded to the Theater Army servicing DPA for transmission to Headquarters, Department of the Army after action indicated in (2) below is completed).

(2) Upon completion of the updating of the unit requisitions a tabulation of overall Theater requirements will be made and compared with the tabulation prepared at the time the original requisition was submitted. Based on this comparison Theater Army AG Replacement Division will make necessary adjustments to the computations and prepare the changes (additions and deletions) for transmission to Headquarters, Department of the Army. Unscheduled losses of personnel previously scheduled to depart the command and for which a replacement has been requested on an eight month or five month replacement requisition will be processed in accordance with procedures outlined in paragraph 2d(2).

c. 75 day revision

Requirement changes occurring between the submission of the fifth month revision and seventy-five days prior to the requirement month will be received at Theater Army AG Replacement Division on the seventy-fifth day prior to the requirement month.

Processing of the revision will be accomplished in the same manner as that described in paragraph b above for the fifth month revision. Receipt of the 75 day changes by Headquarters, Department of the Army will mark the cutoff for changes to requirements for that particular requirement month. Changes occurring subsequent to the submission of the 75 day requisition will be reflected in the next regular 75 day requisition.

d. Unscheduled losses.

(1) Unscheduled losses reported to Theater Army AG Replacement Division will be processed in the following manner:

(a) Requisition Cards and Requisition Worksheets indicating the replacement desired will be received at Theater Army AG Replacement Division from Field Army AG Replacement Division and from Personnel Service Company/UPS's supporting non-Divisional units directly under Theater Army.

(b) Theater Army AG Replacement Division will compare on-hand assets (Assignment Information Cards and In-Theater Gain Data Cards) of all replacement personnel on hand (not assigned) in Theater Army Replacement Battalions to determine if the requirement can be satisfied. If a match by grade and MOS, (warrant officers and enlisted personnel) and by Branch, grade and MOS (officers) can be made, fill action will be taken as described in Theater Army assignment procedures.

(c) In the event on-hand assets cannot satisfy the requirement the following procedures will govern:

1 When unscheduled losses are NOT authorized for inclusion in requisitions, Theater Army AG Replacement Division will use the data to develop and update the statistical and historical base for such losses. Whenever the data reveals losses of a significant nature, Theater Commanders may submit that data to the Office of Personnel Operations, Headquarters, Department of the Army and request authority to include factors pertaining to such losses in requisitions.

2 When unscheduled losses are authorized for inclusion in requisitions, Theater Army AG Replacement Division will screen the requisition cards for the current requirement month to determine if previously computed loss factors provided for a replacement of the proper grade and MOS (warrant officer and enlisted personnel) or Branch, grade and MOS (officers). In the event previous loss factors as computed by Theater Army AG Replacement Division, provided for a loss of the grade and MOS (or Branch, grade and MOS, as appropriate) desired the Requisition Cards will be placed in a current month suspense file and fill action will be completed upon receipt of an Assignment Information Card indicating the individual is due in the Theater. In the event previously computed loss factors did not provide for a loss in the particular grade and MOS (or Branch, grade and MOS, as appropriate) required, Theater Army AG Replacement Division will determine if an adjustment can be made to the next scheduled 75 day revision.

(2) Unscheduled losses previously reported as a scheduled loss on an 8 month requisition or a 5 month or 75 day revision will require the following actions at Theater Army:

(a) Cancellation card will be transmitted from Field Army AG Replacement Division or Personnel Service Company/UPS directly under Theater Army. This cancellation will cause the Requisition Card to be withdrawn from the file for the month the loss was previously anticipated.

(b) Losses previously projected and reported on an eighth month requisition or fifth month revision will be automatically cancelled as a result of the updating procedures taken at the time of the next revision.

(c) Losses of personnel previously reported on a 75 day revision will be handled manually on an exception basis. Procedures for this processing follow:

1. The cancellation card received from Field Army AG Replacement Division or Personnel Service Company/UPS supporting units directly under Theater Army will be used to match against the Requisition File for the requirement month and the Requisition Card will be withdrawn from the Requisition File.

2. The original Requisition Card will be placed in a suspense file together with the unscheduled loss Requisition Card received concurrently with the cancellation card and held pending receipt of assignment information data indicating

that the replacement originally scheduled to fill the scheduled vacancy is due in the command. At the time of receipt of the assignment information data fill action will be completed.

3. Assignment Procedures.

All replacements assigned to a Theater of Operations will be reported by means of Assignment Information Cards (Figure 7, or 8) prepared by Headquarters, Department of the Army. Receipt of the Assignment Information Cards by Theater Army AG Replacement Division will cause the following actions to take place:

a. Assignment Information Cards received will be reproduced less columns 31-34, 36-37, 42-43, 46-48, 57-62, 70-73 and 79-80. The reproduced card becomes the Theater Assignment Information Card (Figure 4). Officer and Enlisted Assignment Information Cards received from Headquarters, Department of the Army after being reproduced, as indicated, will be retained for 30 days and then destroyed.

b. Assignment Information Cards will be sorted to conform to the following format:

(1) Requirement month (Column 78).

(2) Requesting organization (Column 74-77).

c. Theater Assignment Information Card will be reviewed to determine if diversion action is required.

ENLISTED ASSIGNMENT INFORMATION CARDS-----Continued

<u>Element of Data</u>	<u>Reference</u>	<u>Cols Punched</u>
Requisition Line Number	AR 614-202	66-69
Record Identification Group "B"		70
Servicing DPA of Gaining Organization	AR 330-330	71
Assignment Code of Gaining Command	AR 330-330	72-73
Unit Identification Code of Gaining Organization	AR 18-50-10(S)	74-77
Allocation or Requisition Month		
Month	Note 1	78
Record Identification Number "V"		79
Preparing DPA (High 12 punch)		80

NOTE: 1. a. The months January through September will be punched 1 through 9 respectively; the months October, November, and December will be punched -, J, and K, respectively.

b. Only the units position of the year will be punched.

NOTE 2. The tens and units position of year will be punched.

(1) No diversion action at Theater Army AG Replacement Division.

(a) Sorted cards will be matched with requisition cards for the requirement month by unit. All Requisition Cards which correspond to a Theater Assignment Information Card will be withdrawn from the Requisition File and placed in a Fill File.

(b) For units directly under Theater Army, assignment information data will be transmitted to:

1. The Personnel Service Company/UPS supporting the unit of assignment when movement is to be direct to the unit of ultimate assignment.

2. The replacement battalion indicated on the basic requisition for all others.

If assignment is to be direct to a unit of ultimate assignment, transportation will be arranged by Theater Army AG Replacement Division. The replacement will be met at the port of debarkation, processed in accordance with Theater Army policy and moved to the unit of ultimate assignment. If the replacement is to be assigned to a replacement unit prior to assignment to a unit of ultimate assignment, Theater Army AG Replacement Division will arrange for transportation to the replacement battalion indicated on the original requisition and issue assignment instructions to the replacement battalion.

(c) For Field Army units, including Divisions under Field Army, the Theater Assignment Information Cards will be transmitted to Field Army AG Replacement Division. Replacements will be met at the port of debarkation, processed in accordance with Theater Army policy and transported to Field Army Replacement Battalions, Division Replacement Detachments or unit of ultimate assignment indicated on the original Requisition Card or as indicated in separate instructions from Field Army AG Replacement Division.

(2) Diversion by Theater Army AG Replacement Division.

(a) Diversion action involving units directly under Theater Army will be accomplished in the following manner:

1. Theater Army AG Replacement Division will prepare a new Theater Assignment Information Card and transmit it to the replacement battalion or Personnel Service Company/UPS supporting the unit to which the diversion is being made.

2. Theater Army AG Replacement Division replacement personnel at the port of debarkation will be notified of diversion action and provided instructions with respect to the new destinations of the diverted personnel.

3. Replacements will be met at the port of debarkation, processed in accordance with Theater Army policy, informed of the diversion action and transported to the Replacement Battalion supporting the unit to which they have been diverted or to the unit of ultimate assignment.

4. A cancellation card will be prepared and transmitted to the Personnel Service Company/UPS supporting the organization for which the replacement was originally requisitioned. The original Requisition Card will be removed from the Theater Army AG Replacement Division Requisition File and destroyed.

5. A new Requisition Card will be prepared by Theater Army AG Replacement Division and the data thereon will be transmitted to the original Personnel Service Company/UPS requesting the replacement. The requirement will also be transmitted through the servicing DPA to Headquarters, Department of the Army as part of next scheduled 75 day theater requisition.

6. The Requisition Card received from the unit to which the diversion was made will be placed in the Fill File.

(b) Receipt of the cancellation and new Requisition Cards by the Personnel Service Company/UPS supporting the original requesting organization will serve as notification of diversion and as confirmation of resubmission of the requirement to assure that replacement action will take place although at a later date than anticipated.

(3) Diversion by Field Army AG Replacement Division. Diversions requested by Field Army AG Replacement Division will cause the following actions to be taken:

(a) Replacement personnel will be met at the port of debarkation by representatives of the Theater Army

AG Replacement Division and informed of the change in assignment. Processing in accordance with Theater Army policy will be accomplished and transportation provided to move the replacement(s) to the destination indicated in the diversion request of the Field Army Replacement Division.

(b) Theater Assignment Information Cards will be matched against requisition cards and the requisition cards corresponding to Theater Assignment Information Cards will be withdrawn from the Requisition File and placed in the Fill File.

d. In all cases Theater Army AG Replacement Division personnel at the Air or Surface port of debarkation will be notified of the estimated arrival time, number of personnel due in and the destination if no diversion action is contemplated.

e. When all of the above actions which may apply have been accomplished and units scheduled to receive replacements for ultimate assignment have received the assignment information data, the Theater Assignment Information Cards at Theater Army AG Replacement Division will be destroyed. An exception to this procedure is necessary in the event a replacement is to be held temporarily pending final decision with respect to unit of ultimate assignment. In the latter case the Theater Assignment Information Cards will be retained and the matching Requisition Card will not be removed from the Requisition File.

f. Requisition cards placed in the Fill File, as a result of the assignment actions prescribed above, will be used

to prepare the print out of the fill report. The Requisition Cards will then be filed by requirement month and retained for statistical purposes until data available from the cards is integrated into the system.

SECTION IV
HOSPITAL RETURNEES

1. Hospital commanders will report patients determined to be fit for duty to Theater Army AG Replacement Division. Report will be in the format shown in Appendix VI.

2. Theater Army will direct disposition of the individual in accordance with Theater policy. The following actions will be taken by Theater Army AG Replacement Division.

a. Hospital commanders will be directed to assign the individual to the replacement battalion nearest the hospital.

b. An In-Theater Gain Data Card will be prepared in the format shown in Appendix V. Data received on Hospital Returnee Report (Appendix VI) will assist in the preparation of the In-Theater Gain Data Card.

c. Communications Control Card (paragraph 3e, Appendix VII) will be prepared for transmitting the In-Theater Gain Data Card to the gaining replacement battalion.

d. In-Theater Gain Data Card will be filed in a suspense file pending assignment action.

3. Replacement battalion will evaluate the individual's records to determine whether hospitalization has resulted in a change in the individual's physical profile. A change in profile which would preclude assignment to a duty for which MOS qualified would result in reclassification action. Upon completion of such action,

the replacement battalion will prepare an In-Theater Gain Data Card (Appendix V) containing the individual's newly awarded MOS. In-Theater Gain Data Card will be transmitted to Theater Army AG Replacement Division. Additionally, the changes will be reported in accordance with the provisions of AR 335-60.

4. Theater Army AG Replacement Division upon receipt of the In-Theater Gain Data Card will withdraw the original card from the suspense file and destroy it. The new card will be filed in the In-Theater Gain Data File and used for matching against unscheduled requisitions received from Field Army AG Replacement Division and Personnel Service Companies under Theater Army jurisdiction. Matches will be processed as indicated in paragraph 3, Section III.

APPENDIX II

MISCELLANEOUS CODES

Codes contained in AR 330-330 and the following codes will be used in connection with AR 614- to identify data in Requisitions, Assignment Information Cards, In-Theater Gain Data Cards and Daily Replacement Status Report Cards.

A. Personnel Identity Codes (Column 10)

O (Alpha) Officer-Male
L Officer-Female
W Warrant Officer-Male
V Warrant Officer-Female
E Enlisted-Male
A Enlisted-Female
I (Alpha) Either

B. Transaction Codes (Column 14)

R Requisition-Routine-Basic Individual Replacement
1 Requisition-Routine-Unit Replacement
2 Requisition-Routine-Unit Component Replacement
3 Daily Replacement Status Report, Division Replacement Det or Replacement Battalion INDIVIDUAL REPLACEMENTS
4 Daily Replacement Status Report, Division Replacement Det or Replacement Battalion UNIT REPLACEMENTS
5 Daily Replacement Status Report, Division Replacement Det or Replacement Battalion UNIT COMPONENT REPLACEMENTS
6 Assignment Information Data, Individual Replacement--From CONUS or other source outside the Theater
7 Assignment Information Data, Unit Replacements--From CONUS or other source outside the Theater
8 Assignment Information Data, Unit Component Replacements--From CONUS or other source outside the Theater
A In-Theater Gain Data, Individual Replacement Theater Generated
B In-Theater Gain Data, NON-ARRIVAL--Individual, Unit or Unit Component

C Cancelled requirement, Individual,
Unit or Unit Component

D In-Theater Gain Data, UNEXPECTED
ARRIVAL--Individual, Unit or Unit
Component

E EMERGENCY REQUISITION, Individual,
Unit or Unit Component

F Hospital Returnee

G In-Theater Gain Data, Unit Replacement--
Theater Generated

H In-Theater Gain Data, Unit Component
Replacement--Theater Generated

V Revoked requirement, Individual, Unit
or Unit Component

C. Field Army Codes (Columns 16-17)

~~01-20~~ Use number corresponding to Field

F. Special Instruction or Qualification Codes (Column 37)

ENLISTED

A--Indicates replacement for administrative MAAG/MISSION requirement and must be qualified in accordance with Chapter 4, Section III, AR 600-200.

B--Indicates replacement for training MAAG/MISSION requirement and must be qualified in accordance with Chapter 4, Section III, AR 600-200.

C--Indicates replacement must be qualified in accordance with AR 601-275.

D--Indicates replacement must be qualified in accordance with AR 611-15.

E--Indicates replacement must be qualified in accordance with AR 611-50.

F--Indicates replacement must be qualified in accordance with AR 614-40.

G--Indicates replacement must be qualified in accordance with paragraph 4-18b(4) and column 9, figure 4-3, AR 600-200.

H--Individual replacement must be qualified in accordance with Col 1 (less USA Elm, DASA), 2,3,4,5, 6,7,8,10,11, or 12, figure 4-3, AR 600-200, as appropriate.

I--Indicates replacement must be a US Citizen.

J--Indicates that replacement must not be married to a foreign national.

K--Indicates that unit is located in isolated areas where minimum medical and dental facilities are not available. Therefore, individual requiring medical treatment should not be assigned.

L--Indicates that replacement must be qualified in accordance with paragraph 4-18b(1) and sub-column for USA Element, Defense Atomic Support Agency within column 1, figure 4-3, AR 600-200.

M--Indicates that reassignment orders should read "For further assignment as directed by CO."

N--Passport and visa required.

O--For E-7, E-8 and E-9 Section II (Code 2) and III (Code 3) requirements only. To be used when individual is located at a "one man station." A "one man station" is defined as a unit, detachment, or similar activity at which only one individual in a particular grade and MOS is authorized.

P--Indicates replacement must meet selection criteria contained in AR 614-3.

Q--Combination of Codes D and I.

R--Combination of Codes D, I and K.

S--Combination of Codes D,G and K.

T--Combination of Codes D and G.

U--Combination of Codes G and K.

V--Not used.

W--Indicates that replacement for International and/or Joint Headquarters and must be qualified in accordance with Chapter 4, Section III, AR 600-200.

X--NCOLP requirement, Section IX, AR 600-200. Sheet will be attached giving NCOLP position number.

Y--ASA and USA Strategic Communications Command requirements. Replacements must be qualified in accordance with paragraph 4-18b(2) and 4-18b(6) and column 7, figure 4-3, AR 600-200 as appropriate. Orders will not be issued prior to receipt of notification that EM are acceptable for assignment. When requirement for ASA oversea activity, port call availability date will be furnished by CGUSASA after EM are determined acceptable.

Z--Indicates special requirements or instructions not otherwise explained. In these instances, a manually prepared data sheet will be attached, identifying the specific line number of the requisition and citing the specific requirement, identification of special equipment on certain MOS's (i.e., unique qualifications required for the duty position not normally associated with MOS involved or TDY enroute to duty station, etc.). Include identification of equipment which replacement in MOS 34B, 34C and 34D will maintain. The specific column or column of figure 4-3, Section IV, AR 600-200 will be indicated on the manually prepared data sheet for requirements that must meet special selection criteria under provisions of AR 600-200.

OFFICER

A--When the provisions of Column A, Figure 1, AR 611-103, apply.

B--When the provisions of Column B, Figure 1, AR 611-103, apply.

C--When the provisions of Column C, Figure 1, AR 611-103 apply.

D--When the provisions of Column D, Figure 1, AR 611-103 apply.

G. Country Codes

(Columns 59-60)

	Blank		61-62	
	ZIP APO Number	Note 7	63-67	29-33L
	APO City		68-69	38-39L
	<u>Overseas Stations Without APO</u>			
	Overseas Country Code	Para G, App II	59-60	25-26L
	Blank		61	
	Station Name or City	Note 8	62-67	28-33L
	Country	Note 8	68-69	38-39L
(21)	Blank		70-73	
(22)	Unit Identification Code	Note 9 AR 18-50-10(s)	74-76	45-47L
(23)	Morning Report Identification Code	Note 10	77	48L
(24)	Blank		78-80	

NOTES:

1. Chaplain's Assistants will be requisitioned by entering the following appropriate MOS reporting code: 09F20-CATHOLIC; 09G20-PROTESTANT; 09H20-JEWISH.

2. Punch the requirement month in accordance with the following:

<u>Month Requisition Submitted</u>	<u>Requirement Month</u>	<u>Punch</u>
January	September	9
February	October	X (11 punch)
March	November	J
April	December	K
May	January	1
June	February	2
July	March	3
August	April	4

<u>Month Requisition Submitted</u>	<u>Requirement Month</u>	<u>Punch</u>
September	May	5
October	June	6
November	July	7
December	August	8

A one position numeric code representing the last numeric digit of the calendar year of the requirement month will be punched, e.g., punch 6 for calendar year 1966; punch 7 for 1967; punch 8 for 1968, etc.

3. For E-7, E-8 and E-9 positions the appropriate code indicated below will be punched in column 27:

<u>Factor</u>	<u>Code</u>

A replacement for the position is desired.	1

Fill can be accomplished from within the organization and the individual recommended to fill the position is one grade lower but is qualified for promotion within the eligibility criteria in paragraph 7-15; AR 600-200.	2

Promotion quota requested--Fill can be accomplished from within the organization and the individual recommended to fill the position is one grade lower but will NOT be eligible for promotion to the next higher grade when the vacancy occurs.	3

4. Punch three position number furnished by OPO--(EPD--enlisted personnel: OPD--officer and warrant officer personnel).
5. Punch consecutive numbering commencing with "0001" for each requisition card being submitted (e.g., requisition submitted in January for September consisting of requirement for 280 replacements of various MOS would be comprised of 280 cards numbered consecutively from 0001 through 0280).

6. Punch the appropriate tour length in accordance with the following:

<u>Tour Length Criteria</u>	---	<u>Tour Length Code</u>	
		<u>Long</u>	<u>Short</u>
Concurrent travel--category 1 (Para 15a, AR 55-46)		D	M
Concurrent travel--category 2 (Para 15b, AR 55-46)		E	N
Concurrent travel not authorized because of nonavailability of government quarters. Estimated forecast of delay between availability date or reporting date of sponsor and date of travel of dependents is 61 days or more, but less than 20 weeks.		F	O (Alpha)
Concurrent travel not authorized because of nonavailability of government quarters. Estimated forecast of delay between availability date or reporting date of sponsor and date of travel of dependents is 20 weeks or more.		G	P
Concurrent travel not available.		H	Q
Concurrent travel not applicable.		L	S

7. When the organization is located at a station having a ZIP/APO number that data will be punched.
8. Punch station name or city. When the station name or city exceeds 6 letters punch the first 6 letters. Punch the first 2 letters of the name of the country. EXAMPLE: Monrovia, Liberia would be punched "MONROV" in columns 62-67 and "LI" in columns 68-69.
9. The second, third and fourth positions of the unit identification code will be used.
10. The Morning Report indicator code provided by the servicing data processing activity will be entered.

APPENDIX III-1
REQUISITION--BASIC INDIVIDUAL REPLACEMENT
(BASIC REQUISITION WITH FIELD ARMY INPUT)

<u>ITEM NO.</u>	<u>DATA</u>	<u>REFERENCE</u>	<u>COLUMNS PUNCHED</u>	<u>TYPE BARS FROM WHICH INTERPRETED</u>
(1)	Blank	As received from PSD/Per- sonnel Service Company/UPS	1

(28)	Record Identification Number (Requisition)	Punch "9"	79	
(29)	Transmitting DPA Code	Para 31, AR 330-330	80	50L

NOTES:

1. Punch the Area Control Code in accordance with the following:

<u>Personnel</u>	<u>Code</u>
Officers	O (Alpha)
Warrant Officers	O (Alpha)
E-7 through E-9 and all NCOLP requirements	S
All other requirements	L

2. Punch the applicable code for the requirements indicated:

<u>Requirements</u>	<u>Code</u>
E-7 through E-9 and NCOLP require- ments for all grades will be punched with one of the follow- ing codes: Intelligence MOS (Includes MOS 96B, 96C,) (96D, 97D, 97Z, all pay) (grades)	5
Combined Arms MOS	6
General Support MOS	7
Maintenance and Supply MOS	8
Special Category MOS	9
E-6 and below requirements for Special Forces requisitions (only MOS fifth digit) ("S" requirements)	9
Special category personnel requisitions	9
All other requisitions	Ø

APPENDIX III-3

UNIT REPLACEMENT REQUISITION CARDS

Unit replacement requisition cards will be prepared on general purpose cards and submitted to the next higher echelon in the replacement system. Format for the cards will be as follows:

1. PSD or Personnel Service Company/UPS (Note 1)

<u>ITEM NO.</u>	<u>DATA</u>	<u>REFERENCE</u>	<u>COLUMNS PUNCHED</u>	<u>TYPE BARS FROM WHICH INTERPRETED</u>
(1)	Blank		1-3	
(2)	TOE or TDA Number		4-12	5-13U
(3)	Blank		13	
(4)	Type Transaction	Para B, App II	14	15U
(5)	Control "X"		15	
(6)	Blank		16-19	
(7)	Number of Complete Units Required		20-21	23-24U
(8)	Blank		22-24

(17)	Geographical Location	Ditto	59-69	25-39L
(18)	Record Identification Group (Personnel)	Punch "B"	70	
(19)	DPA to which transmitted (USADATCOM)	Punch "12" (high punch)	71	
(20)	Assignment Code	Para 30, AR 330-330	72-73	42-43L
(21)	Unit Identification Code	As received from Field Army AG Replacement Division or Per- sonnel Service Company/UPS	74-76	45-47L
(22)	Morning Report Identification Code	Ditto	77	48L
(23)	Servicing DPA Code	Para 31, AR 330-330	78	49L
(24)	Record Identification Number (Requisition)	Punch "9"	79	
(25)	Transmitting DPA Code	Para 31, AR 330-330	80	50L

NOTES:

1. To be used only when authorized by Theater Army.
2. Punch the requirement month in accordance with the following:

<u>Month Requisition Submitted</u>	<u>Requirement Month</u>	<u>Punch</u>
January	September	9
February	October	X (11 punch)
March	November	J
April	December	K
May	January	1
June	February	2
July	March	3
August	April	4
September	May	5
October	June	6
November	July	7
December	August	8

3. Punch three position number furnished by OPO.
4. Punch consecutive numbering commencing with "0001" for each requisition card being submitted (e.g., requisition submitted in June for February consisting of a requirement for 15 units of various TOE and TDA would be comprised of 15 cards numbered consecutively from 0001 through 0015).
5. Punch station name or city. When the station name or city exceeds 6 letters punch the first 6 letters. Punch the first 2 letters of the name of the country, e.g., Monrovia, Liberia would be punched "MONROV" in columns 62-67 and "LI" in columns 68-69.
6. The second, third and fourth positions of the unit identification code will be used.
7. The Morning Report indicator code provided by the Servicing Data Processing Activity will be entered.
8. Unless diversion is contemplated, Field Army AG Replacement Division will enter the Division Replacement Detachment code in these columns for all unit replacements destined for assignment to a Division. For non-Divisional unit replacements, Field Army will enter the code for the Replacement Battalion supporting the requesting unit or "00" if the unit replacement is to be assigned directly to the requesting unit.

9. To be submitted only on authority of Headquarters, Department of the Army.
10. Unless diversion is contemplated, Theater Army AG Replacement Division will enter "ØØ" in these columns. If diversion is contemplated or the unit replacements are to be held under Theater Army jurisdiction pending future assignment, Theater Army will enter the code for the Replacement Battalion selected to furnish support pending assignment.

APPENDIX III-4

REQUISITIONS--UNIT COMPONENT REPLACEMENT

Unit component requisition cards will be prepared by PSD's for divisional units and by the Personnel Service Company/UPS's for non-divisional units. All requisitions will be submitted in accordance with Theater Army policies regarding unit component requisitions. Theater Army will submit unit component requisitions in accordance with Headquarters, Department of the Army policy. When authorized to submit requisitions, the following format will be used:

1. PSD/Personnel Service Company/UPS level

ITEM NO.	DATA	REFERENCE	TYPE BARS	
			COLUMNS PUNCHED	FROM WHICH INTERPRETED

(26)	Record Identification Number (Requisition)	Punch "9"	79	
(27)	Transmitting DPA Code	Para 31, AR 330-330	80	50L

NOTES:

1. Punch the requirement month in accordance with the following:

<u>Month Requisition Submitted</u>	<u>Requirement Month</u>	<u>Punch</u>
January	September	9
February	October	X (11 Punch)
March	November	J
April	December	K
May	January	1
June	February	2
July	March	3
August	April	4
September	May	5
October	June	6

<u>Month Requisition Submitted</u>	<u>Requirement Month</u>	<u>Punch</u>
November	July	7
December	August	8

2. Punch three position number furnished by OPO.
3. Punch consecutive numbering commencing with "0001" for each requisition card being submitted (e.g., requisition submitted in June for February consisting of a requirement for 35 unit components of various TOE and TDA would be comprised of 35 cards numbered consecutively from 0001 through 0035).
4. Punch station name or city. When the station name or city exceeds 6 letters punch the first 6 letters. Punch the first 2 letters of the name of the country; e.g., Monrovia, Liberia would be punched "MONROV" in columns 62-67 and "LI" in columns 68-69.
5. The second, third and fourth positions of the unit identification code will be used.
6. The Morning Report indicator code provided by the Servicing Data Processing Activity will be entered.
7. Unless diversion is contemplated, Field Army AG Replacement Division will enter the Division Replacement Detachment code in these columns for all unit component replacements destined for assignment to a Division. For non-Divisional unit component replacements, Field Army will enter the code for the Replacement Battalion supporting the requesting unit or "00" if the unit component replacement is to be assigned directly to the requesting unit.
8. Unless diversion is contemplated, Theater Army AG Replacement Division will enter "00" in these columns. If diversion is contemplated or the unit component replacements are to be held under Theater Army jurisdiction pending future assignment, Theater Army will enter the code for the Replacement Battalion selected to furnish support pending assignment.

APPENDIX IV

DAILY REPLACEMENT STATUS REPORT--DIVISIONS, REPLACEMENT BATTALIONS

Replacement Status Report Cards will be prepared daily on General Purpose Cards in the following format:

1. Individual Replacements

<u>ITEM NO.</u>	<u>DATA</u>	<u>REFERENCE</u>	<u>COLUMNS PUNCHED</u>	<u>TYPE BARS FROM WHICH INTERPRETED</u>
(1)	Blank		1	
(2)	Branch (Officers only)	Para 5, AR 330-330	2-3	31-32U
(3)	<u>MOS</u>			
	<u>Officers</u>			
	Special Qualification Prefix		4	1U
	Code		5-8	2-5U
	<u>Warrant Officers</u>			
	Code		4-6	1-3U
	Equipment Identification Suffix		7	4U
	Special Qualification Suffix		8	5U
	<u>Enlisted personnel</u>			
	Code		4-6	1-3U
	Skill Level Suffix		7	4U
	Special Qualification Suffix		8	5U
(4)	Grade Code		9	7U
(5)	Personnel Identity Code	Para A, App II	10	9U
(6)	Language Code	Para 12, AR 330-330	11-12	16-17U
(7)	Control	Punch "X"	13	

<u>ITEM NO.</u>	<u>DATA</u>	<u>REFERENCE</u>	<u>COLUMNS PUNCHED</u>	<u>TYPE BARS FROM WHICH INTERPRETED</u>
(8)	Type Transaction	Punch "3" Para B, App II	14	60L
(9)	Proficiency Pay Eligibility	Note 1	15	21U
(10)	Blank		16-24	
(11)	Date of Report (day and month)	Note 2	25-27	58-60U
(12)	Number of replacements on hand and not assigned	Note 3	28-30	53-55U
(13)	Blank		31-34	
(14)	Security Clearance	Para 17, AR 330-330	35	11U
(15)	Blank		36	
(16)	Special Qualifications	Para F, App II	37	13U
(17)	Reporting Unit	Para D or E, App II	38-39	1-2L
(18)	Blank		40-80	

2. Unit Replacements.

<u>ITEM NO.</u>	<u>DATA</u>	<u>REFERENCE</u>	<u>COLUMNS PUNCHED</u>	<u>TYPE BARS FROM WHICH INTERPRETED</u>
(1)	Blank		1-3	
(2)	TOE or TDA Number		4-12	5-13U
(3)	Blank		13	
(4)	Type Transaction	Punch "4" Para B, App II	14	60L

<u>ITEM NO.</u>	<u>DATA</u>	<u>REFERENCE</u>	<u>COLUMNS PUNCHED</u>	<u>TYPE BARS FROM WHICH INTERPRETED</u>
(5)	Control	Punch "X"	15	
(6)	Blank		16-24	
(7)	Date of Report (day & month)	Note 2	25-27	58-60U
(8)	Number of units on hand not assigned	Note 3	28-30	53-55U
(9)	Blank		31-37	
(10)	Reporting Unit	Para D or E, Appendix II	38-39	1-2L
(11)	Blank		40-80	

3. Unit Components

<u>ITEM NO.</u>	<u>DATA</u>	<u>REFERENCE</u>	<u>COLUMNS PUNCHED</u>	<u>TYPE BARS FROM WHICH INTERPRETED</u>
(1)	Blank		1-3	
(2)	TOE or TDA Number		4-12	5-13U
(3)	Blank		13	
(4)	Type Transaction	Punch "5" Para B, App II	14	60L
(5)	TOE or TDA Paragraph Number		15-16	15-16U
(6)	Control	Punch "X"	17	
(7)	Blank		18-24	

<u>ITEM NO.</u>	<u>DATA</u>	<u>REFERENCE</u>	<u>COLUMNS PUNCHED</u>	<u>TYPE BARS FROM WHICH INTERPRETED</u>
(8)	Date of Report (day & month)	Note 2	25-27	58-60U
(9)	Number of unit components on hand unassigned	Note 3	28-30	53-55U
(10)	Blank		31-37	
(11)	Reporting Unit	Para D or E, App II	38-39	1-2L
(12)	Blank		40-80	

NOTES:

1. For personnel entitled to proficiency pay enter "1" for P-1 pay, "2" for P-2 pay or "3" for P-3 pay.
2. Enter day of submission 1 thru 31 and the code for the month as follows: January thru September will be punched 1 thru 9, respectively: the months of October, November and December will be punched "X" (11 punch), "J" and "K", respectively. EXAMPLE: Daily Replacement Status Report submitted on 24 July for 24 July will be punched "24" in columns 25 and 26 and "7" in column 27.
3. In preparing Daily Replacement Status Reports Replacement Detachments (PSD) and Replacement Battalions will report only those individuals, units or unit components for which no assignment instructions or orders have been received. Assets on hand awaiting transportation to unit of ultimate assignment will not be reported.

APPENDIX V

IN-THEATER GAIN DATA

In-Theater Gain data cards for all intra-Theater replacements will be prepared on General Purpose Cards. Format for cards for all levels will be as follows:

1. Individual Replacements

<u>ITEM NO.</u>	<u>DATA</u>	<u>REFERENCE</u>	<u>COLUMNS PUNCHED</u>	<u>TYPE BARS FROM WHICH INTERPRETED</u>
(1)	Blank		1	
(2)	Branch (Officers only)	Para 5, AR 330-330	2-3	31-32U
(3)	MOS			
	Officers			
	Special Qualification		4	1U
	Prefix			
	Code		5-8	2-5U
	<u>Warrant Officers</u>			
	Code		4-6	1-3U
	Equipment Identification Suffix		7	4U
	Special Qualification Suffix		8	5U
	<u>Enlisted Personnel</u>			
	Code		4-6	1-3U
	Skill Level Suffix		7	4U
	Special Qualification Suffix		8	5U
(4)	Grade Code	Para 10, AR 330-330	9	7U
(5)	Personnel Identity Code	Para A, App II	10	9U
(6)	Language	Para 12, AR 330-330	11-12	16-17U

<u>ITEM NO.</u>	<u>DATA</u>	<u>REFERENCE</u>	<u>COLUMNS PUNCHED</u>	<u>TYPE BARS FROM WHICH INTERPRETED</u>
(7)	Blank		13	
(8)	Type Transaction	Para B, App II	14	60L
(9)	Blank		15-17	
(10)	Field Army Replacement Battalion to which replacement is to be assigned Code	Para D, App II Note 1	18-19	22-23U
(11)	Control	Punch "X"	20	
(12)	Theater Army Replace- ment Battalion to which replacement is to be assigned Code	Para D, App II Note 2	21-22	27-28U
(13)	Blank		23-24	
(14)	Security Clearance	Para 17, AR 330-330	35	11U
(15)	Blank		36	
(16)	Special Qualifications		37	13U
(17)	Blank		38-46	
(18)	Name		47-60	1-14L
(19)	Service Number		61-70	16-25L
(20)	Estimated Arrival Time			
	Hour	Note 3	71-74	27-30L
	Day and Month	Note 4	75-77	32-34L
(21)	Blank		78-80	

2. Unit Replacement

<u>ITEM NO.</u>	<u>DATA</u>	<u>REFERENCE</u>	<u>COLUMNS PUNCHED</u>	<u>TYPE BARS FROM WHICH INTERPRETED</u>
(1)	Blank		1-3	
(2)	TOE or TDA Number		4-12	5-13U
(3)	Blank		13	
(4)	Type Transaction	Para B, App II	14	15U
(5)	Number of Units		15-16	18-19U
(6)	Control	Punch "X"	17	
(7)	Field Army Replacement Battalion to which unit is to be attached Code	Para D, App II Note 1	18-19	22-23U
(8)	Blank		20	
(9)	Theater Army Replacement Battalion to which unit is to be attached Code	Para D, App II Note 2	21-22	27-28U
(10)	Blank		23-70	
(11)	Estimated Arrival Time Hour Day and Month	Note 3 Note 4	71-74 75-77	27-30L 32-34L
(12)	Blank		78-80	

3. Unit Component Replacement

<u>ITEM NO.</u>	<u>DATA</u>	<u>REFERENCE</u>	<u>COLUMNS PUNCHED</u>	<u>TYPE BARS FROM WHICH INTERPRETED</u>

(2)	TOE or TDA Number		4-12	5-13U
(3)	Blank		13	

<u>ITEM NO.</u>	<u>DATA</u>	<u>REFERENCE</u>	<u>COLUMNS PUNCHED</u>	<u>TYPE BARS FROM WHICH INTERPRETED</u>
(4)	Type Transaction	Para B, App II	14	15U
(5)	TOE or TDA Paragraph Number		15-16	18-19U
(6)	Blank		17	
(7)	Field Army Replacement Battalion or Division Replacement Detachment to which unit component is to be attached/assigned Code	Para D or E, App II Note 1	18-19	22-23U
(8)	Blank		20	
(9)	Theater Army Replacement Battalion to which unit component is to be attached Code	Para D, App II Note 2	21-22	27-28U
(10)	Control	Punch "X"	23	
(11)	Number of Unit Components		24-25	30-31U
(12)	Blank		26-70	
(13)	Estimated Arrival Time			
	Hour	Note 3	71-74	27-30L
	Day and Month	Note 4	75-77	32-34L
(14)	Blank		78-80	

NOTES:

1. Enter Field Army Replacement Battalion Code to which individual, unit or unit component replacement is to be assigned/attached as contained in Paragraph D, Appendix II. When assignment or attachment is to be made to Theater Army Replacement Battalion enter "ØØ" in columns 18-19.

2. Enter "ØØ" in columns 21-22 when individual, unit or unit component replacements are assigned or attached to Field Army Replacement Battalions or Division Replacement Detachments. Enter the appropriate Replacement Battalion Code as contained in Paragraph D, Appendix II in columns 21-22 when individual, unit or unit component replacements are assigned or attached to Replacement Battalion under Theater Army jurisdiction.

3. Enter approximate hour of arrival at the Replacement organization. Entry will be shown in four digits in accordance with the military time system, i.e., 9:00 A.M. will be shown as 0900; 12 noon as 1200, etc.

4. The months of January through September will be punched 1 through 9, respectively; the months of October, November and December will be punched "X" (11 punch), "J" and "K", respectively.

APPENDIX VI

HOSPITAL RETURNEE REPORT

1. Within the Theater Army, a hospital returnee card will be prepared and forwarded to AG Replacement Division when it is determined that an individual is ready to return to a duty status.

2. Format of the card for reporting personnel for return to duty will be as follows:

<u>ITEM NO.</u>	<u>REFERENCE</u>	<u>COLUMNS PUNCHED</u>	<u>TYPE BARS FROM WHICH INTERPRETED</u>
(1) Blank		1	
(2) Branch (Officers only)	Para 5, AR 330-330	2-3	31-32U
(3) MOS			
<u>Officers</u>			
Special Qualification		4	1U
Prefix			
Code		5-8	2-5U
<u>Warrant Officers</u>			
Code		4-6	1-3U
Equipment Identification Suffix		7	4U
Special Qualification Suffix		8	5U
<u>Enlisted personnel</u>			
Code		4-6	1-3U
Skill Level Suffix		7	4U
Special Qualification Suffix		8	5U
(4) Grade Code	Para 10, AR 330-330	9	7U
(5) Personnel Identity Code	Para A, App II	10	9U
(6) Language	Para 12, AR 330-330	11-12	16-17U

<u>ITEM NO.</u>	<u>DATA</u>	<u>REFERENCE</u>	<u>COLUMNS PUNCHED</u>	<u>TYPE BARS FROM WHICH INTERPRETED</u>
(7)	Blank		13	
(8)	Type Transaction	Punch "F" Para B, App II	14	60L
(9)	Proficiency Pay (if known)	Note 1	15	21U
(10)	Blank		16-21	
(11)	Date of Hospitalization (Month and Year)	Note 2	22-23	56-57U
(12)	Blank		24	
(13)	Date Available for Assignment to new unit (month and year)	Note 2	25-26	59-60U
(14)	Control	Punch "X"	27	
(15)	Hospital Reporting Code Numerical Designation Code	Note 3	28-31 32-33	23-26U 28-29U
(16)	Blank		34	
(17)	Security Clearance Code	Para 17, AR 330-330	35	11U
(18)	Blank		36-37	
(19)	Unit Designation of former unit of assignment Numerical designation Blank Code	Note 3	38-41 42-44 45-46	50-53L 57-58L
(20)	Name		47-60	1-14L
(21)	Service Number		61-70	16-25L
(22)	Blank		71-80	

NOTES:

1. For personnel who were receiving proficiency pay in their former unit of assignment at time of hospitalization, enter "1" for P-1 pay, "2" for P-2 pay, or "P" for superior performance pay.
2. For months of January thru September punch 1 thru 9 respectively in column "22" and "25"; for the months of October, November and December punch "X" (11 punch), "J" and "K", respectively in column "22" and "25". A one position numeric code representing the last numeric digit of the calendar year will be punched in column "23" and "26".
3. Unit designation codes as shown below will be entered as follows: Numerical designation will be entered in columns "28-31" and "38-41"; i.e., the 238th would be punched "Ø" in column 28 and "238" in columns 29-31. 4th would be punched "ØØØ4" in columns 38-41. Code will be entered in columns "32-33" and "45-46"; i.e., Field Hospital would be punched "2T" in columns 32-33 and Infantry Division would be punched "6A" in columns 45-46. 238th Field Hospital will be punched "Ø2382T" and 4th Infantry Division would be punched "ØØØ46A."

APPENDIX VII

COMMUNICATIONS CONTROL CARDS

1. All data transmission pertaining to reporting requirements of the Theater Army Replacement System will be accompanied by a Communications Control Card for each type of detail card which is identified by a different transaction code (Para B, Appendix II).

2. In those instances where the total number of cards to be transmitted for a single transaction code exceed 500, the provisions of Paragraph 17a, TB SIG-289 will apply.

3. Communications Control Cards will be prepared in the following format:

a. PSD/Personnel Service Company/UPS (For transmission to Field Army).

<u>ITEM NO.</u>	<u>DATA</u>	<u>REFERENCE</u>	<u>COLUMNS PUNCHED</u>	<u>TYPE BARS FROM WHICH INTERPRETED</u>
(1)	Precedence	TB SIG-289	1	
(2)	Agency Code (Punch "8")	TB SIG-289	2	
(3)	Reserved (Punch "ø")	TB SIG-289	3	
(4)	Receiving Terminal Code (Leave blank)	TB SIG-289	4-8	
(5)	Transmitting Terminal Code (Leave blank)	TB SIG-289	9-13	
(6)	Content Code			
	Reserved (Punch "øø")		14-15	
	Transaction Code	Para B, App II	16	
(7)	Identification (Punch "11")	TB SIG-289	17	
(8)	Originators Code			
	Reserved (Punch "øøø")		18-20	
	PSD or Personnel Service Company/UPS Code	Para H,I, or J App II	21-22	

<u>ITEM NO.</u>	<u>DATA</u>	<u>REFERENCE</u>	<u>COLUMNS PUNCHED</u>	<u>TYPE BARS FROM WHICH INTERPRETED</u>
(9)	Addressee Code			
	Reserved (Punch "øøø")		23-25	
	Field Army Code	Para C, App II	26-27	
(10)	Card Count	TB SIG-289	28-31	
(11)	Communications Control Number			
	Julian date	TB SIG-289	32-34	
	Consecutive Communications Control Number	TB SIG-289	35-37	
(12)	Time Filed (Punch "øø")	TB SIG-289	38-39	
(13)	Date and Hour Cleared	TB SIG-289	40-43	
(14)	Zeros ("ø's")	TB SIG-289	44-80	

b. Field Army or Personnel Service Company/UPS supporting
Theater Army (for transmission to Theater Army)

<u>ITEM NO.</u>	<u>DATA</u>	<u>REFERENCE</u>	<u>COLUMNS PUNCHED</u>	<u>TYPE BARS FROM WHICH INTERPRETED</u>
(1)	Precedence	TB SIG-289	1	
(2)	Agency Code (Punch "8")	TB SIG-289	2	
(3)	Reserved (Punch "ø")	TB SIG-289	3	
(4)	Receiving Terminal Code (Leave Blank)	TB SIG-289	4-8	
(5)	Transmitting Terminal Code (Leave Blank)	TB SIG-289	9-13	

<u>ITEM NO.</u>	<u>DATA</u>	<u>REFERENCE</u>	<u>COLUMNS PUNCHED</u>	<u>TYPE BARS FROM WHICH INTERPRETED</u>
(6)	Content Code			
	Reserved (Punch "øø")		14-15	
	Transaction Code	Para B, App II	16	
(7)	Identification (Punch "11")	TB SIG-289	17	
(8)	Originators Code			
	Reserved (Punch "øøø")		18-20	
	Field Army or Personnel Service Company/UPS Code	Para C, I or J App II	21-22	
(9)	Addressee Code			
	Reserved (Punch "øøøø")		23-25	
	Theater Army Code	Para 30, AR 330-330	26-27	
(10)	Card Count	TB SIG-289	28-31	
(11)	Communications Control Number

e. Field Army (For Transmission to PSD's, Personnel Service Com-
pany/UPS's and Replacement Battalions supporting Field Army)

<u>ITEM NO.</u>		<u>REFERENCE</u>	<u>COLUMNS PUNCHED</u>	<u>TYPE BARS FROM WHICH INTERPRETED</u>
(1)	Precedence	TB SIG-289	1	
(2)	Agency Code (Punch "8")	TB SIG-289	2	
(3)	Reserved (Punch "0")	TB SIG-289	3	
(4)	Receiving Terminal Code (Leave Blank)	TB SIG-289	4-8	
(5)	Transmitting Terminal Code (Leave Blank)	TB SIG-289	9-13	
(6)	Content Code			
	Reserved (Punch "00")		14-15	
	Transaction Code	Para B, App II	16	
(7)	Identification (Punch "11")	TB SIG-289	17	

<u>ITEM NO.</u>	<u>DATA</u>	<u>REFERENCE</u>	<u>COLUMNS PUNCHED</u>	<u>TYPE BARS FROM WHICH INTERPRETED</u>
(8)	Originators Code			
	Reserved (Punch "øøø")		18-20	
	Field Army Code	Para C, App II	21-22	
(9)	Addressee Code			
	Reserved (Punch "øøø")		23-25	
	PSD, Personnel Service Company/UPS or Re- placement Battalion Code	Para H, I, J or D, App II	26-27	
(10)	Card Count	TB SIG-289	28-31	
(11)	Communications Control Number			
	Julian date	TB SIG-289	32-34	
	Consecutive Communica- tions Control Number	TB SIG-289	35-37	
(12)	Time filed (Punch "øø")	TB SIG-289	38-39	
(13)	Date and Hour Cleared	TB SIG-289	40-43	
(14)	Zero's ("ø's")	TB SIG-289	44-80	

APPENDIX VIII UNEXPECTED ARRIVAL CARD

1. PSD's and Replacement Battalions will prepare an Unexpected Arrival Card for all individuals, units or unit components on hand for which no Assignment Information Cards or In-Theater Gain Data Cards have been received. These cards will be transmitted to the next higher echelon in the replacement system for submission to Theater Army and will be forwarded without consolidation at intermediate levels.

2. Format of the cards will be as follows:

a. Individual Replacements

ITEM NO.	DATA	REFERENCE	COLUMNS PUNCHED	TYPE BARS FROM WHICH INTERPRETED
(1)	Blank		1	
(2)	Branch (Officers only)	Para 5, AR 330-330	2-3	31-32U

	Day		23-24	57-58U
	Month		25	59U
	Year		26	60U
(11)	Number of Unit Components		27-28	30-31U
(12)	Blank		29-80	

NOTES:

1. Enter $\emptyset$ s in all columns which the data is unknown or not applicable.
2. Enter "1" for P-1, pay, "2" for P-2 pay, "3" for P-3 pay, or "P" for Superior Performance Pay.
3. Enter two digit code for day; 1 thru 9, for January thru September, respectively; and "X" (11 punch), "J", or "K" for October, November or December, respectively. Year will be shown as the last digit of the calendar year, e.g., 28 October 1967 will be punched "28" in columns 23-24, "X" in column 25 and "7" in column 26.

APPENDIX IX

CANCELLATION CARD

Cancellation cards will be prepared in the same format as the original transaction (Requisition, In-Theater Data) to be cancelled. The information on the card will correspond to the data contained on the original card except for column 14 which will reflect type transaction code "C" for cancellation action.

APPENDIX X

NON-ARRIVAL CARDS

1. In the event individual, unit or unit component replacements do not arrive within 48 hours after receipt of an Assignment Information Card or In-Theater Gain Data Card, the receiving unit will prepare a non-arrival card for transmission to the organization or agency originating the Assignment Information Card or In-theater Gain Data Card.

2. Format for the non-arrival card will be the same as the card received and will contain the same information except for column 14 where type transaction code "B" for non arrival will be entered. (Paragraph B, Appendix II).

ANNEX B

AG REPLACEMENT DIVISION

ORGANIZATION

1. MISSION. To supervise and control the input of individual and unit replacements into a theater of operations, Field Army or independent corps in order to maintain these U. S. Army Forces at authorized strength.

2. ASSIGNMENT. To a theater army, to a Field Army Support Command, or to a support command of an independent corps with attachment to and under control of the Adjutant General of the headquarters to which assigned.

3. CAPABILITIES. a. At full strength AG Replacement Division has the following capabilities:

(1) Supervise and control the estimating, requisitioning, receiving, processing, accounting and distributing of replacements in a theater of operations, field army area or independent corps area as indicated below:

(a) Type A - 130,000 to 160,000 Replacements per month.

(b) Type B - 100,000 to 130,000 Replacements per month.

(c) Type C - 70,000 to 100,000 Replacements per month.

(d) Type D - 40,000 to 70,000 Replacements per month.

(e) Type E - Up to 40,000 Replacements per month.

(2) Operate EAM equipment as required for processing data necessary in estimating, requisitioning, receiving, processing, accounting and distributing replacements in a theater of operations, field army area, or independent corps area.

b. The Strength level 2 and 3 columns adapt this Table of Organization to the lesser requirements for personnel and equipment during prolonged non-combat periods and for a limited period of

combat.

c. Equipment and personnel are provided for a two shift operation, when required.

d. This TO&E is not adaptable to Type B organization.

e. Units organized under this TO&E are dependent upon Personnel Services Company for processing personnel administrative actions to include classification, personal affairs, maintenance of personnel records, personnel accounting, casualty reporting, rosters and orders effecting personnel actions; and for messing, supply, medical and chaplain services are dependent upon such units furnishing these services to the other elements of the headquarters to which assigned.

f. Individuals of this organization can engage in effective coordinated defense of their installations.

4. BASIS OF ALLOCATION.

a. One Type A for each theater Army having a replacement workload of 130,000 to 160,000 per month.

b. One Type B for each theater Army having a replacement workload of 100,000 to 130,000 per month.

c. One Type C for each theater Army having a replacement workload of 70,000 to 100,000 per month. One Type C for each Field Army having a replacement workload of 70,000 to 100,000 per month.

d. One Type D for each theater Army having a replacement workload of 40,000 to 70,000 per month. One Type D for each Field Army having a replacement workload of 40,000 to 70,000 per month.

e. One Type E for each theater Army having a replacement workload of up to 40,000 per month. One Type E for each Field Army having a replacement workload of up to 40,000 per month. One Type E for each independent corps having a replacement workload of up to 40,000 per month.

5. CATEGORY. This unit is designated a Category III unit (Reference Unit Categories, AR 320-5).

6. MOBILITY. Fixed. When employment of the TARS data processing activity in a command requires mobility, the appropriate mobile augmentation from TOE 12-510E (Data Processing Unit) will be used.

EQUIPMENT

7. This table is in accordance with AR 310-series, and, together with documents listed in paragraph 10, is the authority to requisition and issue, in accordance with pertinent Department of the Army directives, all items listed herein unless otherwise indicated.

8. In accordance with pertinent Department of the Army and/or theater documents, units are authorized the following (Definition of terms in accordance with AR 320-5 as amplified by SB 38-26):

- a. Basic Load.
- b. Prescribed Load.

9. When there appears to be a discrepancy between the allowances shown in Section III, Equipment, strength column and the basis of distribution as indicated in the "Remarks" column, the amount shown in the strength column will govern.

10. Items of clothing, equipment, components of sets and kits, repair parts, accessories, special tools, and allowances of expendable items, as contained in the following publications, are authorized so far as they pertain to the allowances for the organization and/or individuals covered by this table.

- a. Supply Manuals and expendable TA.

Pam 310-6, Index of Supply Catalogs and Supply Manuals.
TA 3-103, Allowances of Chemical Expendable Supplies for PSYWAR Units (when applicable).

TA 8-100, Allowances of Army Medical Service Expendable Supplies.

TA 10-100-series, Allowances of Quartermaster Expendable Supplies.

TA 11-101 (12-57), Allowances of Signal Corps Expendable Supplies for Replacement Company.

- b. Regulations.

AR 11-14, Army Programs--Materiel Readiness.

AR 40-61, Medical Service--Installation Stock Control and Supply Procedures.

AR 95-1, Army Aviation--General Provisions.

Alt 220-1, Unit Readiness.

AR 310-1, Military Publications--General Policies.

AR 310-34, Organization and Equipment, Authorization Table Equipment.

- AR 385-32, Protective Clothing and Equipment.
- AR 622-5, Qualification in Arms--Qualification and Familiarization.
- AR 700-20, Type Classification of Materiel.
- AR 700-8400-1, Issue and Sale of Personal Clothing.
- AR 711-16, Installation Stock Control and Supply Procedures.
- AR 715-30, Local and Regional Purchase of Civilian-Type Items.
- AR 725-950, Local Purchase and Requisitioning of Ordnance Expendable Items (Except for Ammunition and Guided Missiles).
- AR 735-5, Property Accountability--General Principles and Policies, and Basic Procedures.
- AR 735-11, Accounting for Lost, Damaged and Destroyed Property.
- AR 735-35, Supply Procedures for TOE Units, Organizations and Non-TOE Activities.
- AR 735-7600-1, Library Books.
- AR 750-1, Maintenance Concepts.
- AR 750-5, Organization, Policies and Responsibilities for Maintenance Operation.
- AR 750-8, Command Maintenance Management Inspections.
- AR 750-10, Materiel Readiness (Serviceability of Unit Equipment).
- AR 750-22, Maintenance of Supplies and Equipment--Technical Assistance Program.
- AR 750-50, Use of Controlled Cannibalization as a Source of Low Mortality Repair Parts Supply.
- AR 756-405, Sale of Quartermaster General Supplies Property.

c. Other applicable TA.

- TA 20-2, Equipment for Training Purposes.
- TA 23, Target and Target Equipment.
- TA 23-100, Ammunition Rockets and Missiles for Training.
- TA 23-101, Miscellaneous Ammunition and Explosives.
- TA 23-103, Dummy, Drill and Inert Ammunition.
- TA 45-8 (20-92), United States Army Troop Information Activities.
- TA 50-901, Clothing and Equipment (PEACE) (For active Army).
- TA 50-902, Clothing and Equipment (MOBILIZATION) (for active Army).
- TA 50-903, (21-1), Clothing and Equipment for Army National Guard.
- TA 50-905 (21-3), Clothing and Equipment for Army Reserve.
- TA 50-911 (20-4), Equipment for Food Service Facilities.

TA 50-913, Office Type Furniture and Equipment.
TA 50-914, Individual Safety and Protective Clothing and Equipment
TA 50-915, Quartermaster Equipment: Allowances for Flags, Tentage, Sewing Machines, and Equipment for Civilian Guards.
TA 50-918 (20-15), Dayroom Furnishings.
TA 50-919 (20-16), Furnishings for Government Controlled Nonhousekeeping Personnel Quarters and All Types BOQ.
TA 50-920 (20-90), Furniture and Furnishings for Government Controlled Personnel Quarters.
TA 50-922, Chaplain and Chapel Facilities.

d. Other publications.

DA Pamphlet 310-3, Index of Doctrinal, Training and Organizational Publications.
DA Pamphlet 310-4, Index of Technical Manuals, Technical Bulletins, Supply Manuals (Types 4, 6, 7, 8 and 9), Supply Bulletins, Lubrication Orders and Modifications Work Orders.
DA Pamphlet 310-5, Index of Graphic Training Aids and Devices.
DA Pamphlet 750-1, Preventive Maintenance Guide for Commanders.
SB 3-40, Pesticides and Herbicides.
(C) SB 38-26, Ammunition Supply Rates (U).
TM 38-750, Army Equipment Record Procedures.

11. The military terms, abbreviations, and symbols used herein are in accordance with AR 320-5 and AR 320-50.

12. Unless otherwise indicated, items of equipment authorized herein are the latest adopted types articles (see AR 310-34). Priorities of issue and/or issue of substitute items pending availability of later models or in lieu thereof until exhausted, are established by current supply directives.

13. This table contains the minimum essential quantities and types of equipment necessary to accomplish the mission of the unit. When additional equipment is required and is not covered by pertinent equipment authorization documents, approval must be obtained in accordance with procedures established by AR 310-31, AR 310-34 and AR 310-48.

14. Allowances of equipment authorized herein may be decreased or omitted at the direction of the commanders of major commands. Units will requisition only the authorized items which they are able to receive, store, maintain, and utilize unless otherwise directed by Headquarters, Department of the Army after submission and DA approval of an MTOE.

SECTION I

GENERAL

ORGANIZATION

1. MISSION. To supervise and control processing, orientation, limited equipping, messing and billeting of replacements.

*This table supersedes TOE 12-56G, 31 October 1966.
Units will be reorganized under this table at the earliest practicable date in accordance with the following:

Active Army Units - WAB DA upon request of troop basis proponents concerned.

National Guard Units - WAB CNGB.

Army Reserve Units - WAB Area Comdr (AR 140-1).

HEADQUARTERS AND HEADQUARTERS DETACHMENT
REPLACEMENT BATTALION

2. ASSIGNMENT. Normally to a theater army, to a field army support command, or to a support command of an independent corps.

3. CAPABILITIES. a. At Level 1, this unit provides:

(1) Command, staff, administration and supply for three to five replacement companies.

(2) Processing of 18,000 to 30,000 normal replacements per month at the average of 48 hours per replacement or 6,000 to 10,000 stockage replacements per month at the average of 144 hours per replacement to include receiving, orienting, and preparation for distribution.

(3) Organizational maintenance, as required for organic electric accounting machines and attached companies' motor vehicles and teletypewriters.

(4) Reclassification for approximately 3,000 hospital returnees, theater casualties and other replacements per month.

(5) Requests for and coordination of transportation required to physically move replacements from Replacement Battalion to gaining units.

(6) Furnishes the nucleus of a training battalion Headquarters and Headquarters Detachment for MOS retraining when augmented with trainer personnel and equipment, and appropriately reorganized.

b. The columns under Levels 2 and 3, adapt the table for reduced operational capabilities, in degressive 10% increments, from approximately 90% for Level 2 to 80% for Level 3 during MOBILIZATION. The columns under Level 3 and Cadre, adapt the table for reduced operational capabilities during PEACE.

c. This unit is not adaptable to a type B organization.

d. The columns designated by Levels 1 through 3 are designed to relate to the categories established in AR 220-1, Unit Readiness and AR 135-8, Reserve Component Unit Readiness.

e. When the mission to be performed or the workload imposed on this unit exceeds the capabilities indicated above, the additional capabilities required must be provided from appropriate cellular teams of the 500-series TOE or by the establishment of a Modification Table of Organization and Equipment (MTOE) under the provisions of AR 310-31.

f. The unit is dependent upon the AG Personnel Service Company to which attached for personnel administrative actions; and upon an attached replacement company for messing and partial supply.

g. Individuals of this organization, except chaplain personnel, can engage in effective, coordinated defense of the unit's area or installation

4. BASIS OF ALLOCATION. One per Theater and Field Army (PEACE). One per three to five Replacement Companies, TOE 12-57 (MOBILIZATION).

5. CATEGORY. This unit is designated a category II unit. (Reference unit categories, AR 320-5).

6. MOBILITY. Forty percent mobile.

EQUIPMENT

7. This table is in accordance with AR 310-series, and, together with documents listed in paragraph 10, is the authority to requisition and issue, in accordance with pertinent Department of the Army directives, all items listed herein unless other indicated.

8. In accordance with pertinent Department of the Army and/or theater documents, units are authorized the following (definition of terms in accordance with AR 320-5 as amplified by SB 38-26):

a. Basic load.

b. Prescribed load.

9. When there appears to be a discrepancy between the allowances shown in section III, Equipment Allowances, level column and the basis of distribution as indicated in the "Remarks" column, the amount shown in the level column will govern.

10. Items of clothing, equipment, components of sets and kits, repair parts, accessories, special tools and allowances of expendable items, as contained in the following publications, are authorized so far as they pertain to the allowances for the organization and/or individuals covered by this table.

a. Supply Manuals and expendable TA.

Pam 310-6, Index of Supply Catalogs and Supply Manuals.
TA 8-100, Allowances of Army Medical Service Expendable Supplies.
TA 10-100, Allowances of Expendable Supplies.

TA 10-100-40, Allowances of Quartermaster Expendable Stationery and Office Supplies.
TA 50-971, Allowances of Expendable Supplies for the Army National Guard.
TA 50-973, Allowances of Expendable Supplies for the U. S. Army Reserve.
TA 50-986, Allowances of Expendable Supplies to Supplement Equipment for Food Service Facilities Serving Field Installations, Troop and Hospital Trains and Army Vessels.
TA 50-989, Allowances of Expendable Supplies for Chaplain and Chapel Facilities.

b. Regulations.

AR 11-14, Army Programs--Materiel Readiness.
AR 40-61, Medical Service--Installation Stock Control And Supply Procedures.
AR 220-1, Unit Readiness.
AR 310-1, Military Publications--General Policies.
AR 310-31, Organization and Equipment Authorization Tables; Tables of Organization and Equipment.
AR 310-32, Organization and Equipment Authorization Tables; Personnel.
AR 310-34, Organization and Equipment Authorization Tables; Equipment.
AR 370-5, Qualification in Arms--Qualification and Familiarization.
AR 385-32, Safety Protective Clothing and Equipment.
AR 700-20, Type Classification of Materiel.
AR 700-8400-1, Issue and Sale of Personal Clothing.
AR 711-16, DSU, Installation Stock Control and Supply Procedures (Army Field Stock Control System).
AR 711-17, Utilization and Processing of DA Forms 2765 and 2765-1, Request for Issue or Turn In (Punched Card Series).
AR 715-30, Local Purchase of Civilian-Type Items.
AR 725-50, Requisitioning, Receipt and Issue System.
AR 725-501, Engineer Requisitions.
AR 725-950, Local Purchase and Requisitioning of Ordnance Expendable Items (Except for Ammunition and Guided Missiles).
AR 735-5, Property Accountability--General Principles and Policies and Basic Procedures.
AR 735-11, Accounting for Lost, Damaged and Destroyed Property.
AR 735-35, Supply Procedures for TOE Units, Organizations and Non-TOE Activities.
AR 735-7600-1, Library Books.
AR 750-1, Maintenance Concepts.

AR 750-5, Organization, Policies and Responsibilities for Maintenance Operation.
AR 750-6, Maintenance Support Planning.
AR 750-8, Command Maintenance Management Inspections.
AR 750-10, Materiel Readiness (Serviceability of Unit Equipment).
AR 750-22, Maintenance of Supplies and Equipment-- Technical Assistance Program.
AR 750-45, Materiel Readiness of Selected Equipment (Reports Control Symbol CSGLD 1042).
AR 750-50, Use of Controlled Cannibalization as a Source of Low Mortality Repair Parts Supply.
AR 756-405, Sale of Quartermaster General Supplies Property.

c. Other applicable CTA.

TA 20-2, Equipment for Training Purposes.
TA 23, Targets and Target Equipment.
TA 23-100, Ammunition, Rockets and Missiles for Training.
TA 23-101, Miscellaneous Ammunition and Explosives.
TA 23-103, Dummy, Drill and Inert Ammunition.
TA 45-8, United States Army Troop Information Activities.
TA 50-901, Clothing and Equipment (PEACE).
TA 50-902, Clothing and Equipment (MOBILIZATION).
TA 50-903, Clothing and Equipment for Army National Guard.
TA 50-905, Clothing and Equipment for Army Reserve.
TA 50-911, Equipment for Food Service Facilities Serving Field Installations, Troop and Hospital Trains and Army Vessels.
TA 50-913, Office Type Furniture and Equipment.
TA 50-914, Individual Safety and Protective Clothing and Equipment.

TA 50-922, Chaplain and Chapel Facilities.

d. Other publications.

DA Pamphlet 310-3, Index of Doctrinal, Training and Organizational Publications.
DA Pamphlet 310-4, Index of Technical Manuals, Technical Bulletins, Supply Manuals (Types 7,8, and 9), Supply Bulletins, Lubrication Orders and Modification Work Orders.

DA Pamphlet 310-5, Index of Graphic Training Aids and Devices.
DA Pamphlet 750-1, Preventive Maintenance Guide for Commanders.

SB 3-40, Pesticides and Herbicides.
(C) SB 38-26, Ammunition Supply Rates (U).
TM 38-750, Army Equipment Record Procedures.

11. The abbreviations used herein are in accordance with AR 320-50.
12. Unless otherwise indicated, items of equipment authorized herein are the latest adopted type articles. Priorities of issue and/or issue of substitute items, pending availability of later models or in lieu thereof until exhausted, are established by current supply directives.
13. This table contains the minimum essential quantities and types of equipment necessary to accomplish the mission of the unit under each operational level. When additional equipment is required and is not covered by pertinent equipment authorization documents, approval must be obtained in accordance with procedures established by AR 310-31, AR 310-34 and AR 310-48.
14. Allowances of equipment authorized herein may be decreased or omitted at the direction of the commanders of major commands. Units will requisition only the authorized items which they are able to receive, store, maintain, and utilize unless otherwise directed by Headquarters, Department of the Army.
15. When assigned military personnel exceeds that authorized in section II, items of equipment authorized on an individual basis are increased accordingly.
16. All personnel armed with rifle 7.62mm light barrel unless otherwise indicated.

SPECIAL INSTRUCTIONS

17. In accordance with ARs 310-31 and 310-44, recommendations for changes to sections I, II, III may be submitted directly to Headquarters, United States Army Combat Developments Command, through command channels. Emphasis will be placed on recommending changes designed to accomplish the most efficient and economical use of personnel and equipment. Recommended changes to or inquiries on section IV should be addressed to Headquarters, United States Army Materiel Command.

SECTION I

GENERAL

ORGANIZATION

1. MISSION. To provide the operating component of the replacement system for messing, billeting, limited equipping, locally controlling and orienting replacements.

2. ASSIGNMENT. Normally to a theater army, to a field army support command, or to a separate corps; normally attached to Headquarters and Headquarters Detachment, Replacement Battalion, TOE 12-56.

*This table supersedes TOE 12-57E, 31 Oct 1966. Units will be reorganized under this table at the earliest practicable date in accordance with the following:

Active Army Units - WAB DA upon request of troop basis proponents concerned.

National Guard Units - WAB CNGB

Army Reserve Units - WAB Area Comdr (AR 140-1).

REPLACEMENT COMPANY

TOE 12-57 G

Not included at strength Level 3.

3. CAPABILITIES. a. At Level 1 this unit provides:

(1) Messing, billeting, and limited supply and training for 400 replacements.

(2) Replacement capability per month at the average of 48 hours per replacement -- 6,000.

or

(3) Stockage capability per month at the average of 144 hours per replacement -- 2,000.

(4) Furnish the nucleus of a training company for MOS retraining when augmented with trainer personnel and equipment and appropriately reorganized.

b. The columns under Levels 2 and 3, adapt the table for reduced operational capabilities, in degressive 10% increments, from approximately 90% for Level 2 to 80% for Level 3 during MOBILIZATION. The columns under Level 3 and Cadre, adapt the table for reduced operational capabilities during PEACE.

c. This unit is not adaptable to Type B organization.

d. The columns designated by Levels 1 through 3 are designed to relate to the categories established in AR 220-1, Unit Readiness and AR 135-8, Reserve Component Unit Readiness.

e. When the mission to be performed or the workload imposed on this unit exceeds the capabilities indicated above, the additional capabilities required must be provided from appropriate cellular teams of the 500-series TOE or by the establishment of a Modification Table of Organization and Equipment (MTOE) under the provisions of AR 310-31.

f. The unit is dependent upon the AG Personnel Service Company to which attached for personnel administrative actions; and upon the Replacement Battalion to which assigned or attached for motor maintenance support.

g. Individuals of this organization can engage in effective, coordinated defense of the unit's area or installation.

4. BASIS OF ALLOCATION. a. One per Replacement Battalion, TOE 12-56(PEACE).

b. One per 6,000 normal replacements to be processed per month or MFCT. (MOBILIZATION).

or

c. One per 2,000 stockage replacements per month or MFCT. (MOBILIZATION).

5. CATEGORY. This unit is designated a Category III unit (Reference Unit Categories, AR 320-5).

6. MOBILITY. Twenty-five percent mobile.

EQUIPMENT

7. This table is in accordance with AR 310-series, and, together with documents listed in paragraph 10, is the authority to requisition and issue, in accordance with pertinent Department of the Army directives, all items listed herein unless otherwise indicated.

8. In accordance with pertinent Department of the Army and/or theater documents, units are authorized the following (definition of terms in accordance with AR 320-5 as amplified by SB 38-26):

a. Basic Load.

b. Prescribed Load.

9. When there appears to be a discrepancy between the allowances shown in section III, Equipment Allowances, level column and the basis of distribution as indicated in the "Remarks" column, the amount shown in the level column will govern.

10. Items of clothing, equipment, components of sets and kits, repair parts, accessories, special tools, and allowances of expendable items, as contained in the following publications, are authorized so far as they pertain to the allowances for the organization and/or individuals covered by this table.

a. Supply Manuals and expendable TA.

Pam 310-6, Index of Supply Catalogs and Supply Manuals.

TA 8-100, Allowances of Army Medical Service Expendable Supplies.

TA 10-100, Allowances of Expendable Supplies.

TA 10-100-40, Allowances of Quartermaster Expendable Stationery and Office Supplies.

TA 50-971, Allowances of Expendable Supplies for the Army National Guard.

TA 50-973, Allowances of Expendable Supplies for the U.S. Army Reserve.

TA 50-986, Allowances of Expendable Supplies to Supplement Equipment for Food Service Facilities Serving Field Installations, Troop and Hospital Trains and Army Vessels.
TA 50-989, Allowances of Expendable Supplies for Chaplain and Chapel Facilities.

b. Regulations.

AR 11-14, Army Programs--Materiel Readiness.
AR 40-61, Medical Service--Installation Stock Control and Supply Procedures.
AR 220-1, Unit Readiness.
AR 310-1, Military Publications--General Policies.
AR 310-31, Organization and Equipment Authorization Tables; Tables of Organization and Equipment.
AR 310-32, Organization and Equipment Authorization Tables; Personnel.
AR 310-34, Organization and Equipment Authorization Tables; Equipment.
AR 370-5, Qualification in Arms--Qualification and Familiarization.
AR 385-32, Safety Protective Clothing and Equipment.
AR 700-20, Type Classification of Materiel.
AR 700-8400-1, Issue and Sale of Personal Clothing.
AR 711-16, DSU, Installation Stock Control and Supply Procedures (Army Field Stock Control System).
AR 711-17, Utilization and Processing of DA Forms 2765 and 2765-1, Request for Issue or Turn In (Punched Card Series).
AR 715-30, Local Purchase of Civilian-Type Items.
AR 725-50, Requisitioning, Receipt and Issue System.
AR 725-501, Engineer Requisitions.
AR 725-950, Local Purchase and Requisitioning of Ordnance Expendable Items (Except for Ammunition and Guided Missiles).
AR 735-5, Property Accountability--General Principles and Policies and Basic Procedures.
AR 735-11, Accounting for Lost, Damaged and Destroyed Property.
AR 735-35, Supply Procedures for TOE Units, Organizations and Non-TOE Activities.
AR 735-7600-1, Library Books.
AR 750-1, Maintenance Concepts.
AR 750-5, Organization, Policies and Responsibilities for Maintenance Operation.
AR 750-6, Maintenance Support Planning.
AR 750-8, Command Maintenance Management Inspections.

AR 750-10, Materiel Readiness (Serviceability of Unit Equipment).
AR 750-22, Maintenance of Supplies and Equipment--Technical Assistance Program.
AR 750-45, Materiel Readiness of Selected Equipment (Reports Control Symbol CSGLD 1042).
AR 750-50, Use of Controlled Cannibalization as a Source of Low Mortality Repair Parts Supply.
AR 756-405, Sale of Quartermaster General Supplies Property.

c. Other applicable CTA.

TA 20-2, Equipment for Training Purposes.
TA 23, Targets and Target Equipment.
TA 23-100, Ammunition, Rockets and Missiles for Training.
TA 23-101, Miscellaneous Ammunition and Explosives.
TA 23-103, Dummy, Drill and Inert Ammunition.
TA 45-8, United States Army Troop Information Activities.
TA 50-901, Clothing and Equipment (PEACE).
TA 50-902, Clothing and Equipment (MOBILIZATION).
TA 50-903, Clothing and Equipment for Army National Guard.
TA 50-905, Clothing and Equipment for Army Reserve.
TA 50-911, Equipment for Food Service Facilities Serving Field Installations, Troop and Hospital Trains and Army Vessels.
TA 50-913, Office Type Furniture and Equipment.
TA 50-914, Individual Safety and Protective Clothing and Equipment.
TA 50-915, Allowances for Flags, Tentage, Sewing Machines and Equipment for Civilian Guards.
TA 50-918, Dayroom Furnishings.
TA 50-919, Furnishings for Government Controlled Nonhousekeeping Personnel Quarters and All Types BOQ.
TA 50-920, Furniture and Furnishings for Government Controlled Personnel Quarters.
TA 50-922, Chaplain and Chapel Facilities.

d. Other publications

DA Pamphlet 310-3, Index of Doctrinal, Training and Organizational Publications.
DA Pamphlet 310-4, Index of Technical Manuals, Technical Bulletins, Supply Manuals (Types 7, 8 and 9), Supply Bulletins, Lubrication Orders and Modification Work Orders.
DA Pamphlet 310-5, Index of Graphic Training Aids and Devices.

DA Pamphlet 750-1, Preventive Maintenance Guide for Commanders.

SB 3-40, Pesticides and Herbicides.

(C) SB 38-26, Ammunition Supply Rates (U).

TM 38-750, Army Equipment Record Procedures.

11. The abbreviations used herein are in accordance with AR 320-50.

12. Unless otherwise indicated, items of equipment authorized herein are the latest adopted type articles. Priorities of issue and/or issue of substitute items, pending availability of later models or in lieu thereof until exhausted, are established by current supply directives.

13. This table contains the minimum essential quantities and types of equipment necessary to accomplish the mission of the unit under each operational level. When additional equipment is required and is not covered by pertinent equipment authorization documents, approval must be obtained in accordance with procedures established by AR 310-31, AR 310-34 and AR 310-48.

14. Allowances of equipment authorized herein may be decreased or omitted at the direction of the commanders of major commands. Units will requisition only the authorized items which they are able to receive, store, maintain, and utilize unless otherwise directed by Headquarters, Department of the Army.

15. When assigned military personnel exceeds that authorized in section II, items of equipment authorized on an individual basis are increased accordingly.

16. All personnel armed with rifle 7.62mm light barrel unless otherwise indicated.

SPECIAL INSTRUCTIONS

17. In accordance with ARs 310-31 and 310-44, recommendations for changes to sections I, II and III may be submitted directly to Headquarters, United States Army Combat Developments Command, through command channels. Emphasis will be placed on recommending changes designed to accomplish the most efficient and economical use of personnel and equipment. Recommended changes to or inquiries on section IV should be addressed to Headquarters, United States Army Materiel Command.

List of Army Regulations Requiring Review
Resulting from Implementation of TARS

<u>Army Regulation</u>	<u>Title</u>
135-301	Ready Reserve Mobilization Reinforcement System
310-10	Orders
320-5	Dictionary of United States Army Terms
600-16	Personnel Service Divisions
600-17	The Division Personnel Support System
601-210	Qualifications and Procedures for Processing Applicants for Enlistment and Reenlistment in the Regular Army
612-105	Personalized Assignments for Officers Selected for Assignment to an Overseas Command
614-185	Requisitions for Officers
614-202	Requisitioning of Enlisted Personnel, U.S. Army Replacement System
614-215	Selection and Reassignment of Enlisted Personnel for Oversea Service
614-245	Reassignment of Surplus Enlisted Personnel

ANNEX F

COST ANALYSIS
FOR
IMPLEMENTATION OF TARS

SECTION

- I General
- II World-Wide Personnel Authorization and
EAM Equipment Costs
- III U.S. Army, Europe/Seventh Army
- IV U.S. Army, Pacific (less Eighth U.S. Army
and U.S. Army, Vietnam)
- V Eighth U.S. Army
- VI U.S. Army, Vietnam
- VII U.S. Army, Alaska
- VIII U.S. Army Forces, Southern Command

SECTION I

GENERAL

1. Historically, the U.S. Army has relied upon hastily erected replacement organizations and procedures to meet expanding personnel needs. Time, skills and numbers of men have been wasted. Fortunately, time has been available and the numbers of skilled men required have not become critical to success. However, as a result of technological advances long lead times are no longer available. Skilled men and equipment required to operate a replacement system are critical to success. Under such conditions the U.S. Army initially will have to rely upon the replacement organizations and procedures in being at that time.

2. One of the purposes of the TARS study is the development of Theater Army Replacement Procedures which are operable under current conditions and are capable of expansion. To accomplish this purpose, it is contemplated placing a replacement organization in each major oversea command. Staffing and equipping these organizations will be based on their current replacement workload. Where the workload is minimal, the replacement organizations will be established and function at the cadre strength level.

3. Personnel authorization shown in the subsequent sections reflect only total TARS, authorized requirements. Personnel within each command, currently involved in replacement operations will, in most commands, satisfy the TARS authorized requirements. However, within U.S. Army, Alaska and U.S. Army Forces, Southern Command some additional personnel and equipment will be required to bring their replacement organizations up to cadre strength level. EAM equipment costs shown in the subsequent sections reflect only the total TARS cost. These costs have not been adjusted to deduct the rental cost of the 17-609 Calculators, 519 Document Originating Machines and 407 Accounting Machines which should become surplus in the last quarter FY 1967 as a result of the introduction of the UNIVAC 1005 into each of the 17 Personnel Service Divisions.

SECTION II

WORLD-WIDE PERSONNEL AUTHORIZATION

AND EAM EQUIPMENT COSTS

Personnel

895

EAM Equipment

\$ 37, 382.00

SECTION III

U.S. ARMY, EUROPE/SEVENTH ARMY PERSONNEL AUTHORIZATION AND EAM EQUIPMENT COSTS

1. Personnel

181

2. Hq U.S. Army, Europe currently forwards approximately 13,000 requisitions a month to the Office of Personnel Operations, Headquarters, Department of the Army. This workload warrants a TYPE E AG Replacement Division at Hq U.S. Army, Europe (Theater Army), at Seventh U.S. Army (Field Army), and at Hq Southern European Task Force (SETAF) (Field Army). However, since a TYPE E organization at a 100% strength level is staffed to process 40,000 replacements per month, the operating strength levels for all replacement organizations have been reduced. The following staffing has been used as a basis for determining required EAM equipment and costs.

<u>Organization</u>	<u>Proposed TOE</u>	<u>Strength Level</u>	<u>Personnel Authorization</u>
Hq U.S. Army, Europe	12-500G	80%	53
Hq 7th U.S. Army	12-500G	Cadre	26
1 Replacement Battalion	12-56G	80%	32
1 Replacement Company	12-57G	Cadre	14
Hq SETAF	12-500G	Cadre	26
1 Replacement Battalion	12-56G	Cadre	16
1 Replacement Company	12-57G	Cadre	14
		Total	181

3. EAM Equipment

\$ 8330.50

4. EAM Equipment requirements and costs for the organizations shown in paragraph 2, based on the strength levels indicated, are shown on the next page:

EQUIPMENT		MONTHLY RENTAL COST PER UNIT	ORGANIZATIONS							TOTAL USAREUR	TOTAL COST

SECTION IV

U.S. ARMY PACIFIC - PERSONNEL

AUTHORIZATION AND EAM EQUIPMENT COSTS

1. Personnel

168

2. Hq. U.S. Army, Pacific (less Eighth U.S. Army and U.S. Army, Vietnam) currently forwards approximately 2,000 requisitions a month to the Office of Personnel Operations, Headquarters, Department of the Army. This workload warrants a TYPE E AG Replacement Division at Hq. U.S. Army, Pacific (Theater Army), at Hq. U.S. Army, Japan (Field Army) and at Hq. U.S. Army, Ryukyu Islands (Field Army). Although the actual replacement operations at these Headquarters are minimal, it is essential that standardized replacement organizations be established at cadre strength levels to support these headquarters. The following staffing has been used as a basis for determining required EAM equipment and costs:

<u>Organization</u>	<u>Proposed TOE</u>	<u>Strength Level</u>	<u>Personnel Authorization</u>
Hq. U.S. Army, Pacific	12-500G	Cadre	26
1 Replacement Battalion	12-56G	Cadre	16
1 Replacement Company	12-57G	Cadre	14
Hq. U.S. Army, Japan	12-500G	Cadre	26
1 Replacement Battalion	12-56G	Cadre	16
1 Replacement Company	12-57G	Cadre	14
Hq. U.S. Army, Ryukyu Islands	12-500G	Cadre	26
1 Replacement Battalion	12-56G	Cadre	16
1 Replacement Company	12-57G	Cadre	14
		Total	168

3. EAM Equipment

9,142.50

4. EAM equipment requirements and costs for the organizations shown in paragraph 2, based on the strength levels indicated, are shown on the next page:

EQUIPMENT		MONTHLY RENTAL COST PER UNIT	ORGANIZATIONS									TOTAL USARPAC	TOTAL COST
			HQ USARPAC	1 REPL BN	1 REPL CO	HQ USARJ	1 REPL BN	1 REPL CO	HQ USARYLS	1 REPL BN	1 REPL CO		
PRINTING CARD PUNCH	026	63.00	X			X			X			3	189.00
VERIFIER	056	53.00	X			X			X			3	159.00
SORTER	083	141.00	X	X		X	X		X	X		6	846.00
COLLATOR	088	220.00	X			X			X			3	660.00

CARD-TO-TAPE PUNCH	063	75.00		X			X			X		3	225.00
													TOTAL 9142.50

SECTION V

EIGHTH U.S. ARMY - PERSONNEL

AUTHORIZATION AND EAM EQUIPMENT COSTS

1. Personnel

107

2. Hq Eighth U.S. Army currently forwards approximately 6,200 requisitions a month to the Office of Personnel Operations, Headquarters, Department of the Army. This workload warrants a TYPE E AG Replacement Division at Hq Eighth U.S. Army (Field Army). Since a TYPE E organization at a 100% strength level is staffed to process 40,000 replacements per month, the operating strength levels for all replacement organizations have been reduced. The better capability for managing personnel replacements under TARS obviates the necessity for 2 Replacement Companies under the current Replacement Battalions. The following staffing has been used as a basis for determining required EAM equipment and costs:

<u>Organization</u>	<u>Proposed TOE</u>	<u>Strength Level</u>	<u>Personnel Authorization</u>
Hq Eighth U.S. Army	12-500G	80%	53
1 Replacement Battalion	12-56G	80%	32
1 Replacement Company	12-57G	80%	22
		Total	<u>107</u>

3. EAM Equipment

\$ 3,047.50

4. EAM Equipment requirements and costs for the organizations shown in paragraph 2, based on the strength levels indicated, are shown on the next page:

EQUIPMENT		MONTHLY RENTAL COST PER UNIT	ORGANIZATIONS			TOTAL EUSA	TOTAL COST
			HQ EUSA	1 REPL BN	1 REPL CO		
PRINTING CARD PUNCH	026	63.00	X			1	63.00

CARD-TO-TAPE PUNCH	063	75.00		X		1	75.00
TOTAL							3,047.50

SECTION VI

U.S. ARMY, VIETNAM - PERSONNEL

AUTHORIZATION AND EAM EQUIPMENT COSTS

1. Personnel 271

2. Hq U.S. Army, Vietnam currently forwards approximately 22,000 requisitions a month to the Office of Personnel Operations, Headquarters, Department of the Army. This workload warrants a TYPE E AG Replacement Division at Hq, U.S. Army, Vietnam (Field Army) . However, since a TYPE E organization at 100% strength level is staffed to process 40,000 replacements per month the operating strength levels for all replacement organizations have been reduced. The following staffing has been used as a basis for determining required EAM equipment and costs.

<u>Organization</u>	<u>Proposed TOE</u>	<u>Strength Level</u>	<u>Personnel Authorization</u>
Hq U.S Army, Vietnam	12-500G	80%	53
2 Replacement Battalions	12-56G	80%	64
7 Replacement Companies	12-57G	80%	154
		Total	<u>271</u>

3. EAM Equipment \$ 3,859.50

4. EAM Equipment requirements and costs for the organizations shown in paragraph 2, based on the strength levels indicated, are shown on the next page:

EQUIPMENT		MONTHLY RENTAL COST PER UNIT	ORGANIZATIONS			TOTAL USARV	TOTAL COST
			HQ USARV	2 REPL BN	7 REPL CO

SECTION VII

U.S. ARMY, ALASKA - PERSONNEL

AUTHORIZATION AND EAM EQUIPMENT COSTS

1. Personnel

56

2. Hq U.S. Army, Alaska currently forwards approximately 1,200 requisitions a month to the Office of Personnel Operations, Headquarters, Department of the Army. This workload warrants a TYPE E AG Replacement Division at Hq U.S. Army, Alaska (Theater Army). Although the actual replacement operations at this Headquarters are minimal, it is essential that a standardized replacement organization be established at cadre strength level to support this headquarters. The following staffing has been used as a basis for determining required EAM equipment and costs:

<u>Organization</u>	<u>Proposed TOE</u>	<u>Strength Level</u>	<u>Personnel Authorization</u>
Hq U.S Army, Alaska	12-500G	Cadre	26
1 Replacement Battalion	12-56G	Cadre	16
1 Replacement Company	12-57G	Cadre	14
		Total	56

3. EAM Equipment

\$ 6,907. 00

4. EAM equipment requirements and costs for the organization shown in paragraph 2, based on the strength levels indicated, are shown on the next page:

EQUIPMENT	MONTHLY RENTAL COST PER UNIT	ORGANIZATIONS			TOTAL USARAL	TOTAL COST
		HQ USARAL	1 REPL BN	1 REPL CO		
PRINTING CARD PUNCH 026	63.00	X			1	63.00

TOTAL						6,907.00

SECTION VIII

U.S. ARMY FORCES, SOUTHERN COMMAND

PERSONNEL AUTHORIZATION AND EAM EQUIPMENT COSTS

1. Personnel

112

2. Hq U.S. Army Forces, Southern Command currently forwards approximately 600 requisitions a month to the Office of Personnel Operations, Headquarters, Department of the Army. This workload is so minimal it does not warrant an EAM capability to perform its replacement mission. However, it is essential that a standardized replacement organization be established at cadre strength level to support this headquarters. The replacement organization at this headquarters would be essential in the event of another Cuban crisis. Therefore, a TYPE E AG Replacement Division would be required at Hq U.S. Army Forces, Southern Command (Theater Army) and at Hq U.S. Army, Antilles (Field Army). The following staffing has been used as a basis for determining required EAM equipment and costs:

<u>Organization</u>	<u>Proposed TOE</u>	<u>Strength Level</u>	<u>Personnel Authorization</u>
Hq U.S. Army Forces Southern Command	12-500G	Cadre	26
1 Replacement Battalion	12-56G	Cadre	16
