Acknowledgments

The Office of People Analytics (OPA) is indebted to numerous people for their assistance making the *2022 Service Academy Gender Relations Survey (2022 SAGR)* possible, which was conducted on behalf of the Office of the Under Secretary of Defense for Personnel and Readiness (OUSD[P&R]). The SAGR program is conducted under the leadership of Dr. Ashlea Klahr, Director of OPA's Health and Resilience (H&R) Research Division. H&R research is conducted under the oversight of Ms. Lisa Davis, Deputy Director. The project director for this effort was Ms. Lisa Davis, Deputy Director of H&R.

Service Academy officials contributing to the development and administration of this survey included Ms. Stacey Rosenberg, Mr. Russ Strand, and Dr. Corrine Wilsey (U.S. Military Academy); CAPT Greg Mendenhall and LCDR Andrew Lingg (U.S. Naval Academy); Ms. Sonja Strickland, Mr. Glen Popejoy, Ms. Heidi Huff, and Capt. Andrew Nelson (U.S. Air Force Academy); and Ms. Shannon Norenberg and Ms. Christina Morabito (U.S. Coast Guard Academy).

Policy officials contributing to the development of this survey include Dr. Nathan Galbreath and Dr. Rachel Breslin (Sexual Assault Prevention and Response Office), Dr. Andra Tharp (Office of Force Resiliency Violence Prevention Cell) and Mr. Cyrus Salazar (Office of Diversity, Equity, and Inclusion).

The lead survey analysts were Mr. W. Xav Klauberg and Dr. Becky Lane of Fors Marsh. TMs. Margaret Coffey, Senior Scientist, Fors Marsh, was responsible for the creation of survey database and archiving standards. The lead operations analysts on this survey were Ms. Kim Hylton and Ms. Margaret Coffey of Fors Marsh.

The *2022 SAGR* would not have been possible without the hard work of the data collection team, headed by Mr. W. Xav Klauberg, Dr. Becky Lane, and Mr. Mark Petusky. Those who assisted in survey administration at the MSAs include Dr. Becky Lane, Mr. Mark Petusky, Mr. Alex Fernandes, Ms. Alycia White, Ms. Alyssa McHoes, Dr. Andrew Pomerville, Dr. Anna Sheveland, Mr. Chris Spar, Mr. DaCota Hollar, Mr. Dom Salomone, Mr. Dwayne Beebe, Ms. Liz Richards, Ms. Jess Tercha, Dr. Kate Elvey, Ms. Kimi Mirani, Ms. Kim Hylton, Ms. Krystyna Poznanski, Ms. Maddi Miles, Ms. Michelle Wheatley, Ms. Nativita Kaminski, Mr. Bobby McClintock, Mr. Sam Fishman, and Dr. Sela Harcey.

OPA's Methods, Analysis, and Systems Support (MASS) team, under the guidance of Mr. David McGrath, Branch Chief, and Ms. Wendy Barboza, Statistical Team Lead, were responsible for all statistical aspects of this survey, including weighting, nonresponse bias analysis, imputation, and the implementation of statistical hypothesis testing used in the survey program. Mr. Marcus Maher and Mr. Nathan Coe, under the supervision of Mr. Stephen Busselberg, all of the Fors Marsh Scientific Techniques and Analysis Team (STAT), were responsible for coordinating, implementing, and documenting the weighting process and developed the statistical weights based on the respondents for this survey.

Introduction and Measurement of Constructs

The Health & Resilience (H&R) Research Division within the Office of People Analytics (OPA) has conducted the congressionally mandated gender relations survey of the military service Academies (MSA) since 2005 as part of a biennial cycle of human relations surveys outlined in Title 10 U.S. Code Section 4361, 6980, and 9361.¹ The chief purpose of these surveys have been to measure, analyze, and report estimated prevalence rates of sexual assault and rates of sex-based military equal opportunity (MEO) violations (sexual harassment and gender discrimination). The survey also serves to assess attitudes and perceptions about programs and policies designed to reduce the occurrence of these unwanted behaviors and improve the climate of gender relations at the Academies. The *2022 Service Academy Gender Relations Survey* (*2022 SAGR*) was conducted to address these purposes and is the most recent of the biennial surveys to be administered.

This report contains results and trends from the *2022 SAGR* conducted from March 21, 2022 through April 22, 2022. As in prior years, the *2022 SAGR* surveyed cadets and midshipmen of the three Department of Defense (DoD) MSAs (US Military Academy [USMA], US Naval Academy [USNA], US Air Force Academy [USAFA]), the Department of Homeland Security (DHS) US Coast Guard Academy (USCGA), and the Department of Transportation (DOT) US Merchant Marine Academy (USMMA). This report focuses on responses from cadets and midshipmen of the DoD MSAs and cadets of the USCGA. Results for USMMA will be published in a separate report.

Measurement of Constructs

Historically, OPA gender relations surveys have been designed to estimate perceived experiences of sexual assault, sexual harassment, and gender discrimination based on self-reported responses from Service Members to provide information on a variety of consequences of these incidents. Before 2014, OPA gender relations surveys captured experiences of sexual assault using a single-item Unwanted Sexual Contact measure and experiences of sexual harassment were derived from the Sexual Experiences Questionnaire (SEQ; Fitzgerald et al., 1988; Fitzgerald, Gelfand, & Drasgow, 1995). The SEQ was adapted for a military population (SEQ-DoD) and, beginning in 2002, it was the DoD-approved data collection method for measuring sexual harassment experiences. The single-item unwanted sexual contact metric and SEQ-DoD were used on surveys of Active component members conducted in 2006, 2010, and 2012 and on surveys of Reserve component members conducted in 2008 and 2012.

Unwanted Sexual Contact

DoD Directive (DoDD) 6495.01 defines sexual assault as any “intentional sexual contact characterized by use of force, threats, intimidation, or abuse of authority or when the victim does not or cannot consent” (Department of Defense, 2021). Under this definition, sexual assault includes rape, aggravated sexual contact, abusive sexual contact, forcible sodomy (forced oral or

¹ As amended by Section 532 of the John Warner National Defense Authorization Act (NDAA) for Fiscal Year 2007.

anal sex), or attempts to commit these acts. In Section 522 of the NDAA for Fiscal Year (FY) 2006, Congress amended the Uniform Code of Military Justice (UCMJ) to consolidate and reorganize the array of military sex offenses. These revised provisions took effect on October 1, 2007. Article 120, UCMJ, was subsequently amended in FY2012. Additional amendments to the UCMJ were made in FY2016.

The term “unwanted sexual contact” used throughout this report refers to a range of activities prohibited by the UCMJ, including uninvited and unwelcome completed or attempted sexual intercourse, sodomy (oral or anal sex), penetration by an object, and the unwanted touching of genitalia and other sexually related areas of the body.² The 2022 *SAGR* measures unwanted sexual contact using a comprehensive, behavioral list of items. The resulting prevalence rate provides an estimated proportion of cadets/midshipmen who experienced any of these behaviors, referred to as unwanted sexual contact, in the past academic program year (APY, i.e., since June 2021).³ The estimated prevalence rates should not be construed as legal crime victimization rates in the absence of an investigation being conducted to determine a verified outcome.

Construction of Unwanted Sexual Contact Estimated Prevalence Rates

As originally developed, the goal of the unwanted sexual contact question was to act as a proxy for sexual assault while balancing the emotional burden to the respondent. The intention of the unwanted sexual contact item was not to provide a crime victimization rate but to provide the DoD with information about Service Academy cadets and midshipmen who experienced sex-related behaviors prohibited by the UCMJ that would qualify the individual to receive SAPR support services. This behaviorally based measure captures specific behaviors experienced and does not assume the respondent has expert knowledge of the UCMJ or its definition of sexual assault. The vast majority of respondents would not know the differences among the UCMJ offenses of “sexual assault,” “aggravated sexual contact,” and “forcible sodomy” described in Articles 120 and 125 of the UCMJ. As such, using behaviorally based questions allows for more accurate estimation of prevalence rates (Fisher & Cullen, 2000). The 2022 *SAGR* specifically asks about behaviors that were against the respondent’s consent (either when they did not or could not consent) or against their will, including completed and attempted sexual intercourse, oral sex, anal sex, or penetration by an object or finger, as well as unwanted sexual touching. The latter is specific to unwanted touching of sexual regions of the body (i.e., genitalia, breasts,

² The UCMJ defines unwanted sexual behaviors. For the purposes of this report, “unwanted” is used to clarify the term “sexual contact.”

³ The RAND Corporation developed a measure of sexual assault that incorporates UCMJ-prohibited behaviors and consent factors to derive prevalence rates of crimes committed against military members (Morrall, Gore, & Schell, 2014). RAND fielded both the existing unwanted sexual contact measure and the new measure and found that weighted estimated topline rates from each measure were not statistically significantly different. In October 2015, OPA conducted pretests at the three DoD Academies using RAND’s new sexual assault measure. The pretest included questions after the main survey asking if respondents understood the survey questions, whether they would be comfortable taking the survey, whether they would be comfortable taking the survey in a group setting, whether they would answer honestly, and whether they would have any negative reactions after taking the survey. Pretest results indicated that the measure’s length and graphic language made it inappropriate for administration to students in an in-person group setting. Students who indicated on the pretest that they had experienced sexual assault indicated lower willingness than other students to answer all survey items honestly, particularly during in-person survey administration. For these reasons and to retain the ability to trend unwanted sexual contact results over time, the existing unwanted sexual contact measure was retained.

or buttocks) and does not include unwanted touching of nonsexual regions of the body or behaviors that are harassing in nature. The terms and definitions of unwanted sexual contact have been consistent throughout all of the *SAGR* surveys since 2006 to provide DoD with comparable data points across time. These rates should not be construed as legal crime victimization rates in the absence of an investigation being conducted to determine a verified outcome.

As shown in Figure 1, the unwanted sexual contact measure is constructed from a survey question (Q49) and incorporates three elements: (1) the cadet/midshipman indicates experiencing at least one of the five behaviors consistent with sexual assault, (2) the behavior was done intentionally, and (3) the behavior was done without the cadet's/midshipman's consent. The *SAGR* measures the prevalence of unwanted sexual contact *victimization*, meaning that cadets and midshipmen who experience an unwanted behavior are included in the estimated unwanted sexual contact rate regardless of the status of the alleged offender (i.e., military member or civilian). References to past academic program year (APY) unwanted sexual contact prevalence rates in this report all require the cadets/midshipmen to have indicated that an incident occurred since June of the year prior to survey fielding (between June 2021 and March/April 2022). However, the survey also collects data to estimate the prevalence of lifetime unwanted sexual contact using separate questions about incidents that may have occurred before the prior APY, and prior to entering the MSA.

Figure 1.
2022 *SAGR* Unwanted Sexual Contact Prevalence Rate Metric

Unwanted Sexual Contact	Since June 2021, have you experienced any of the following intentional sexual contacts that were against your will or which occurred when you did not or could not consent in which someone... Mark "Yes" or "No" for each item.
	• Sexually touched you (for example, intentional touching of genitalia, breasts, or buttocks) or made you sexually touch them? • Attempted to make you have sexual intercourse, but was not successful? • Made you have sexual intercourse? • Attempted to make you perform or receive oral sex, anal sex, or penetration by a finger or object, but was not successful? • Made you perform or receive oral sex, anal sex, or penetration by a finger or object?

Using the criteria listed in Figure 2, the 2022 *SAGR* produced estimated prevalence rates for three categories of unwanted sexual contact using a hierarchical system: completed penetration, attempted penetration, and unwanted sexual touching. Penetrative unwanted sexual contact includes cadets/midshipmen who indicated “Yes” to either of the items that assess penetration of the vagina, anus, or mouth. Attempted penetration includes cadets/midshipmen who indicated “Yes” to the item that assesses attempted sexual contact and were *not* previously counted as having experienced penetrative sexual contact. Non-penetrative sexual contact includes cadets/midshipmen who indicated “Yes” to the behavior assessing unwanted sexual touching and were *not* previously counted as penetrative or attempted penetrative unwanted sexual contact.

Figure 2.
Hierarchy of Estimated Unwanted Sexual Contact Prevalence Rates

Time Reference

When surveys ask about experiences within a set timeframe, there is risk that respondents might include experiences that fall outside of that specific timeframe, a bias known as external telescoping. For the *2022 SAGR*, the survey contains an inherent “anchor” via the APY. Students are instructed in a verbal briefing before the survey administration only to consider experiences that have occurred within that APY, beginning in June 2021. This timeframe is reiterated on the survey instrument in the unwanted sexual contact question and sex-based MEO questions as well as the subsequent questions about the “one situation” that had the greatest effect on the respondent. Research and theory on telescoping suggests that timeframes anchored with highly salient events, called landmarks, can be effective in reducing telescoping bias (Gaskell, Wright, & O’Muircheartaigh, 2000). To be maximally effective, landmarks should avoid two potential problems: (1) susceptibility of the landmark itself to telescoping forward in respondents’ memories and (2) inequivalent salience of the landmark for all respondents (Gaskell et al., 2000). The landmark used in the *2022 SAGR* appears resistant to both potential problems. The beginning of the current APY for Academy students marks a number of important changes for students, such as change in class rank, opening of new opportunities, and expansion of privileges. This moment in time is unlikely to be mentally telescoped forward by respondents; moreover, this landmark should be equally salient for all respondents. Given the repeated timeframe instructions and the strong salient landmark given by the APY, the risk of telescoping for the reference period in the *2022 SAGR* is likely to be very small.

Sexual Harassment and Gender Discrimination Violations

DoD Instruction (DoDI) 1020.03, “Harassment Prevention and Response in the Armed Forces”, establishes the Department’s comprehensive prevention and response program and defines sexual harassment as “Conduct that:

- Involves unwelcome sexual advances, requests for sexual favors, and deliberate or repeated offensive comments or gestures of a sexual nature when:

- Submission to such conduct is, either explicitly or implicitly, made a term or condition of a person’s job, pay, or career;
 - Submission to or rejection of such conduct by a person is used as a basis for career or employment decisions affecting that person; or
 - Such conduct has the purpose or effect of unreasonably interfering with an individual’s work performance or creates an intimidating, hostile, or offensive working environment.
- Is so severe or pervasive that a reasonable person would perceive, and the victim does perceive, the environment as hostile or offensive.
 - Any use or condonation, by any person in a supervisory or command position, of any form of sexual behavior to control, influence, or affect the career, pay, or job of a member of the Armed Forces or a civilian employee of the Department of Defense.
 - Any deliberate or repeated unwelcome verbal comments or gesture of a sexual nature by any member of the Armed Forces or a civilian employee of the Department of Defense.

There is no requirement for concrete psychological harm to the complainant for behavior to constitute sexual harassment. Behavior is sufficient to constitute sexual harassment if it is so severe or pervasive that a reasonable person would perceive, and the complainant does perceive, the environment as hostile or offensive.

Sexual harassment can occur through electronic communications, including social media, other forms of communication, and in person.”

Unlawful discrimination is defined in DoDD 1020.02E and includes: “disparate treatment or harassment of an individual or group based on a prohibited factor contrary to federal law or regulation.” Military Equal Opportunity (MEO) refers to “the right of all Service members to serve, advance, and be evaluated based on only individual merit, fitness, capability, and performance in an environment free from unlawful discrimination on the basis of race, color, national origin, religion, sex (including gender identity), or sexual orientation.” The prevalence of gender discrimination based on sex or gender identity is measured on the *SAGR* surveys.

Construction of Sexual Harassment and Gender Discrimination Estimated Prevalence Rates

In accordance with the *2014 RAND Military Workplace Study (2014 RMWS)* approach, the 2022 *SAGR* used a two-step process to determine sexual harassment and gender discrimination rates. First, questions were asked about whether cadets/midshipmen experienced behaviors prohibited by Military Equal Opportunity (MEO) policy by someone from their Academy, and the circumstances of those experiences. Second, the behaviors were categorized into two types of sex-based MEO violations—sexual harassment (defined as either a sexually hostile work environment or sexual *quid pro quo*) and gender discrimination—to produce estimated rates for these two categories.

Two requirements must be met for experiences to be in violation of DoD MEO policy. First, MEO offenses refer to violations specified by DoDI 1350.2 and include experiencing either sexual harassment (sexually hostile work environment or sexual *quid pro quo*) and/or gender discriminatory behaviors by someone from their Academy. The questions related to each of these offenses (Q4–Q40) specifically ask the cadet/midshipman to identify behaviors done by “someone from your Academy,”⁴ defined as “any person you have contact with as part of your Academy life.” This definition is provided in instruction text. Second, for the experience to be in violation of DoD policy, the participant must also indicate “Yes” to one of the follow-up items that assess persistence and severity of the behaviors experienced.

Rates of sexual harassment and gender discrimination were derived from Q4–Q40. The specific behaviors comprising each of these MEO violations are described below, with details on rate construction depicted in Figure 3.

⁴ This differs from the questions asked of Active and Reserve Service members which read “someone from work.” The full definition provided in the survey reads as follows: “*When the questions say “someone from your Academy,” please include any person you have contact with as part of your Academy life. “Someone from your Academy” could be an officer or non-commissioned officer, fellow cadet or midshipman, civilian employee, or contractor. These persons can be Academy leadership, faculty, athletic department personnel, or support service staff.*”

Figure 3.
Sexual Harassment and Gender Discrimination Violation Rate Metrics

Sexual Harassment	① Experienced at Least One Behavior	
	Sexually Hostile Work Environment Behaviors - Repeatedly told sexual “jokes” that made you uncomfortable, angry, or upset - Embarrassed, angered, or upset you by repeatedly suggesting that you do not act like a cadet/midshipman of your gender is supposed to - Displayed, showed, or sent sexually explicit materials like pictures or videos that made you uncomfortable, angry, or upset - Repeatedly told you about their sexual activities or make sexual gestures/body movements (for example, thrusting their pelvis or grabbing their crotch) in a way that made you uncomfortable, angry, or upset - Repeatedly asked you questions about your sex life or sexual interests that made you uncomfortable, angry, or upset - Made repeated sexual comments about your appearance or body that made you uncomfortable, angry, or upset - Took or shared sexually suggestive pictures or videos of you when you did not want them to that made you uncomfortable, angry, or upset* - Made repeated attempts to establish an unwanted romantic or sexual relationship with you that made you uncomfortable, angry, or upset - Repeatedly touched you in a way that made you uncomfortable, angry, or upset Sexual Quid Pro Quo Behaviors - Made you feel as if you would get some benefit in exchange for doing something sexual - Made you feel as if you would get punished or treated unfairly at your Academy if you did NOT do something sexual	
Gender Discrimination	② Met Follow-Up Criteria	
	Sexually Hostile Work Environment Follow-Up Criteria - They continued this unwanted behavior after they knew that you or someone else wanted them to stop, or - This was severe enough that most cadets/midshipmen at your Academy would have been offended Sexual Quid Pro Quo Follow-Up Criteria - The person(s) who did this unwanted behavior were in a position of authority/leadership over you, and - They told you that they would give you a reward or benefit, or would be punished or treated unfairly for doing something sexual, or - They hinted that you would get a reward or benefit for doing something sexual, or would be punished or treated unfairly for NOT doing something sexual or - Someone else told you they got benefits from this person by doing sexual things, or punished or treated unfairly by this person for NOT doing something sexual	
Gender Discrimination	① Experienced at Least One Behavior	② Met Follow-Up Criteria
	- Said that someone of your gender is NOT as good as the opposite gender as a future officer, or that someone of your gender should be prevented from becoming a future officer - Mistreated, ignored, excluded, or insulted you because of your gender	- This treatment/their beliefs about your gender harmed or limited your cadet/midshipman career - The person(s) who did this unwanted behavior were in a position of authority/leadership, or authority/leadership over you

*Only required the criteria of being severe enough that most cadets/midshipmen at the participant's Academy would have been offended

**Did not require any follow-up criteria

Sexual Harassment (Q4–Q35) includes two categories of behaviors:

1. **Sexually Hostile Work Environment (Q4–Q31):** Includes unwelcome sexual conduct or comments that interfere with a person's work performance or creates an intimidating, hostile, or offensive work environment. Additionally, to meet the criteria for inclusion in the rate, these behaviors must either continue after the alleged offender knew to stop or were so severe that most cadets/midshipmen of the Academy would have found them offensive.
2. **Sexual Quid Pro Quo (Q32–Q35):** Includes instances of potential benefits or punishments conditioned on sexual cooperation.

Gender Discrimination (Q36–Q40): Includes comments and behaviors directed at someone because of their gender and when these experiences harmed or limited their cadet/midshipman career.

Changes to the Sexual Harassment and Gender Discrimination Metric. A change to the sexual harassment and gender discrimination metrics implemented on the 2022 *SAGR* merits further discussion.

An additional question was added to the gender discrimination metric in 2022 to identify the alleged offender more clearly as a person with the ability to harm or limit the victim's career. More specifically, cadets or midshipmen who experienced gender discrimination were asked if anyone who did the unwanted behavior was in a position of authority or leadership over them. For the purpose of commensurate statistical comparison to estimates from the 2018 *SAGR* (i.e., to be able to accurately identify statistically significant changes in the prevalence rates), the gender discrimination prevalence rates were calculated in two ways: both with and without the new leadership criteria. The "official" estimates for gender discrimination include the new leadership follow-up criteria. All statistical comparisons made within 2022 (e.g., comparisons between class year) use the official estimates (*include* the new items). However, all statistical comparisons made to estimates from 2018 *exclude* the new items. Within this report, we refer to the estimates generated without the additional items as the "adjusted" estimates.

Negative Outcomes Associated with Reporting Unwanted Sexual Contact

Three forms of retaliatory behaviors have been outlined by the DoD: professional reprisal, ostracism, and other negative outcomes. Professional reprisal, as defined in law and policy, is a personnel action or other unfavorable action taken by the chain of command against an individual for engaging in a protected activity. Ostracism and other negative outcomes, however, can be negative behaviors—such as actions of social exclusion (ostracism) or misconduct against the cadet/midshipman either by peers or an individual in a position of authority (other negative outcomes)—because the cadet/midshipman reported or intends to report a criminal offense.

Construction of the Metric for Retaliatory Behaviors

OPA worked closely with the Services and DoD stakeholders to design behaviorally based questions to best capture perceptions of a range of outcomes associated with reporting sexual assault. The resultant battery of questions was designed to measure negative behaviors a cadet or midshipman may have experienced as a result of making a report of sexual assault and to account for additional motivating factors, as indicated by the student, consistent with prohibited actions of professional reprisal and ostracism in the UCMJ and military policies and regulations. There are also questions regarding other negative behaviors. The questions provide the Department with perceived experiences of the respondents for each of the different types of possible retaliatory behaviors and, consequently, a broader understanding of the issue.

Survey questions are only able to provide a general understanding of the self-reported outcomes that may constitute reprisal, ostracism, or other negative outcomes.⁵ Ultimately, only the results of an investigation (which takes into account all legal aspects, such as the intent of the alleged perpetrator) can determine whether self-reported negative behaviors meet the requirements of

⁵ Because the *SAGR* does not assess the relationship between the alleged perpetrator and the respondent to determine whether the behavior constitutes maltreatment, no definitive conclusions can be made regarding whether these alleged other negative behaviors are retaliatory or constitute maltreatment.

prohibited negative behaviors. The estimates presented in this report reflect the students' perceptions about a negative experience associated with their reporting of sexual assault and not necessarily a reported or legally substantiated incident of retaliatory behavior. Construction of rates of professional reprisal, ostracism, and other negative outcomes are based on general policy prohibitions. These rates should not be construed as legal crime victimization rates in the absence of an investigation being conducted to determine a verified outcome.

Professional Reprisal (Q73-Q76). Under the UCMJ, reprisal is defined as “taking or threatening to take an adverse personnel action or withholding or threatening to withhold a favorable personnel action, with respect to a member of the Armed Forces because the member reported a criminal offense.” Reprisal may occur only if the actions in question were taken by leadership with the intent of having a specific detrimental impact on the career or professional activities of the cadet/midshipman who reported the crime. The rate of professional reprisal is a summary measure reflecting whether respondents experienced unfavorable actions taken by leadership (or an individual with the authority to affect a personnel decision) as a result of reporting sexual assault (not based on conduct or performance) and met the criteria for elements of proof for an investigation to occur. Figure 4 shows the behaviors and two follow-up criteria required to be included in the rate.

Figure 4.
Construction of Professional Reprisal Metric

Professional Reprisal	① Experienced at least one behavior from leadership in line with potential professional reprisal
	• Denied you or removed you from a leadership position • Denied you a training opportunity that could have led to a leadership position • Rated you lower than you deserved on a performance evaluation • Denied you an award or other form of recognition you were previously eligible to receive • Assigned you new duties without doing the same to others • Assigned you to duties that do not match your current class year or position within the company/squadron • Made you perform additional duties that do not match your current class year or position within the company/squadron • Transferred you to a different company/squadron without your request or agreement • Ordered you to one or more mental health evaluations • Disciplined you or ordered other corrective action
	② Belief that the leadership actions experienced were ONLY based on their report of sexual assault (i.e., not based on their conduct or performance)
	③ Belief that leadership took action for one of the following reasons:
	• To get back at you for making a report (unrestricted or restricted) • To discourage you from moving forward with your report • They were mad at you for causing a problem for them

Ostracism (Q77-Q79). Although the interpretation of ostracism varies slightly⁶, in general, ostracism may occur if retaliatory behaviors were taken either by a cadet's/midshipman's military peers, or by leadership for reporting a sexual assault or planning to report a sexual assault. The estimated rate of ostracism is a summary measure reflecting whether, as a result of

⁶ The Military Departments crafted policies that implement the regulation of these prohibitions against ostracism outlined in section 1709(a).

reporting a sexual assault, respondents experienced negative behaviors from military peers and/or coworkers to make them feel excluded or ignored and met the legal criteria for an investigation to occur. Figure 5 shows the behaviors and two follow-up criteria required to be included in the rate.

Figure 5.
Construction of Estimated Ostracism Metric

Ostracism	① Experienced at least one behavior from cadet/midshipman peers or leadership (including those in their cadet/midshipman chain of command) in line with potential ostracism
	• Made insulting or disrespectful remarks or made jokes at your expense in public • Excluded you or threatened to exclude you from social activities or interactions • Ignored you or failed to speak to you despite your attempts to communicate (for example, gave you “the silent treatment”)
	② Belief that at least one individual knew or suspected the respondent made an official sexual assault report (unrestricted or restricted)
	③ Belief that the action was taken to discourage you from moving forward with your report or discourage others from reporting

Other Negative Outcomes (Q80-Q82).⁷ This is a summary measure reflecting whether, as a result of reporting unwanted sexual contact, respondents indicated experiencing negative behaviors from cadet/midshipman peers or leadership that occurred without a valid military purpose, and may have included physical or psychological force, threats, or abusive or unjustified treatment that results in physical or mental harm. To be included in this estimated rate, the student also needed to indicate that at least one person who took the action knew or suspected the student made an official (unrestricted or restricted) sexual assault report and the student believed that the person(s) was (were) trying to discourage him or her from moving forward with his or her report or to discourage others from reporting, or that the person was trying to abuse or humiliate him or her. Figure 6 shows the behaviors and two follow-up criteria required to be included in the rate.

⁷ Because the *SAGR* assessment does not assess the relationship between the alleged perpetrator and the respondent to determine whether the behavior constitutes maltreatment, no definitive conclusions can be made regarding whether these alleged other negative behaviors are retaliatory or constitute maltreatment.

Figure 6.
Construction of Estimated Other Negative Outcomes Metric

Other Negative Outcomes	① Experienced at least one behavior from cadet/midshipman peers (including those in their cadet/midshipman chain of command) in line with potential other negative outcomes
	• Made insulting or disrespectful remarks or made jokes at your expense to you in private • Showed or threatened to show private images, photos, or videos of you to others • Bullied you or made intimidating remarks about the assault • Was physically violent with you or threatened to be physically violent • Damaged or threatened to damage your property
	② Belief that at least one individual knew or suspected the respondent made an official sexual assault report (unrestricted or restricted)
	③ Belief that the action was for one of the following reasons:
	• To discourage you from moving forward with your report or discourage others from reporting • They were trying to abuse or humiliate you

Retaliation (Q73-Q82). This is an overall measure reflecting whether respondents experienced either professional reprisal, ostracism, and/or maltreatment by leadership and/or cadet/midshipman peers for reporting sexual assault. Ultimately, only the results of an investigation (which takes into account all legal aspects, such as the intent of the alleged perpetrator) can determine whether self-reported negative behaviors meet the requirements of prohibited retaliatory behaviors. The estimates presented in this report reflect the cadet's/midshipman's perceptions about a negative experience associated with their reporting of sexual assault and not necessarily a reported or legally substantiated incident of retaliation. Rates should not be construed as a legal crime victimization rate due to slight differences across the Services on the definition of behaviors, requirements of retaliation, and the absence of official information regarding an investigation.

Survey Content

The content of the 2022 *SAGR* questionnaire largely aligns with content from the 2018 *SAGR* but with some notable revisions. The following sections summarize those changes and describes the survey content.

Revisions and Updates to the *SAGR* in 2022

Prior to each survey administration, OPA coordinates a review of questionnaire content with the relevant DoD and Service policy offices to suggest content revisions in support of information requirements. Changes to the *SAGR* surveys are made carefully to ensure integrity of the overall survey purpose and to retain the ability to measure changes from prior years on questions or metrics of critical interest. The addition or revision of items is done to collect data that better support sexual assault, sexual harassment, and gender discrimination prevention and response programs and policy development by DoD policy offices.

As previously discussed, the 2022 *SAGR* included one revision related to the sexual harassment and gender discrimination measures (see the section in this chapter titled "Measurement of Constructs"). The 2022 *SAGR* also includes several items and constructs that are new or revised

since the *2018 SAGR*. In 2022, these changes include additional information or context regarding the respondent's gender identity, racial identity, and additional items related to the impact of COVID-19-related safety measures on behavior.

Until 2018, the *SAGR* included a single question asking respondents to identify as male or female. OPA then used the response to that question as a proxy for gender and reported all estimates for women and men using that response along with record data on gender used to conduct survey administration.⁸ Consistent with the promising practices identified by the Federal Interagency Working Group on Improving Measurement of Sexual Orientation and Gender Identity (SOGI), the *2022 SAGR* measured gender identity using a two-step approach; first, by asking participants to provide their sex on their original birth certificate and second, by asking participants to provide their current gender identity (male, female, transgender, or none of the these).⁹ Except where otherwise stated, this report presents estimates by gender using the historical approach only.

The *2022 SAGR* survey asked questions regarding the past APY, between June 2021 and the day of survey administration in March/April 2022. For ease of reading, the specified time period referenced in these tabulations is "since June 2021."

2022 SAGR Survey Methodology

This section describes the scientific methodology used for the *2022 SAGR*, including the statistical design, survey administration, and analytical procedures. A copy of the *2022 SAGR* survey instrument is provided in the *2022 SAGR Overview Report* (OPA, 2023a).

OPA conducts cross-Service surveys that provide leadership with assessments of attitudes, opinions, and experiences of the entire population of interest using standard scientific methods. OPA's survey methodology meets and often exceeds industry standards that are used by government statistical agencies (i.e., the Census Bureau and Bureau of Labor Statistics), private survey organizations, and well-known polling organizations. OPA adheres to the survey methodology best practices promoted by the American Association for Public Opinion Research (AAPOR).

Statistical Design

The survey methodology used on *SAGR* surveys has remained largely consistent across time, which allows for comparisons across survey administrations. In addition, the scientific methods used by OPA have been validated by independent organizations (e.g., RAND and the Government Accountability Office [GAO]).

Consistent with prior years, the *2022 SAGR* employed a census approach, where all cadets and midshipmen that were US nationals and at least 18 years old were eligible to participate. The methodology used for weighting the respondents to the population is consistent with the *2018 SAGR*. More details about the complex sampling and weighting approach can be found below

⁸ Data for individuals who failed to respond to the gender question were imputed from administrative records used in survey administration.

⁹ Respondents had the option to skip any question they preferred not to answer.

and in the *2022 Service Academy Gender Relations Survey: Statistical Methodology Report (2022 SAGR SMR; OPA, 2023b)*.

Sampling Design

The population of interest for the *2022 SAGR* consisted of all students at USMA, USNA, USAFA, and USCGA.¹⁰ The entire population of male and female students was selected for the survey.¹¹ This census of all students was designed for maximum reliability of results in the sections in which the survey questions applied to only a subset of students, such as those questions asking details of an unwanted sexual contact, especially among men. It should be noted that while all students were invited, the survey was voluntary and thus students were not required to participate.

Survey Administration

The *SAGR* is administered in-person on-site at each of the Academies utilizing an anonymous paper-and-pen survey. Data were collected for the *2022 SAGR* at the Academies in March and April of 2022. The Academies scheduled survey sessions for all students in groups with separate sessions for female and male students at each Academy. After checking in, each student was handed a survey, an envelope, a pen, and an Academy-specific information sheet. The information sheet included details on where students could obtain help if they became upset or distressed while taking the survey or afterward. Students were briefed on the purpose and details of the survey and the importance of participation. Completion of the survey itself was voluntary. If students did not wish to take the survey, they could leave the session at the completion of the mandatory briefing. Students returned completed or blank surveys (depending on whether they chose to participate) in sealed envelopes into a bin as they exited the session; this process was monitored by the survey proctors as an added measure for protecting students' anonymity. The survey procedures were reviewed by a DoD Human Subjects Protection Officer as part of the DoD survey approval and licensing process. OMB reviewed and cleared the data collection in accordance with the Paperwork Reduction Act (PRA).

Data Weighting

The target survey frame consisted of 12,695 students drawn from the student rosters provided to OPA by each of the three MSAs. OPA received a final dataset containing 12,475 returned questionnaires. Surveys were completed by 10,328 students,¹² yielding an overall weighted response rate for respondents at the DoD Academies of 81% (87% for DoD Academy women,

¹⁰ Three groups of students were excluded: visiting students from other Academies, foreign nationals, and those under 18 years old.

¹¹ Starting in 2014, *SAGR* included all female and male Service Academy students to better understand the specific experiences of men who indicate unwanted sexual contact and/or MEO violations. In previous survey years, all women at all Service Academies and a statistically constructed sample of men were included in the study in order to produce reliable results.

¹² "Completed" is defined as answering at least one of the questions asked of all participants, at least one response from the MEO violation questions (Q4, Q7, Q10, Q13, Q16, Q19, Q22, Q25, Q29, Q32, Q34, Q36, or Q39), and a valid response to Q49 on unwanted sexual contact.

79% for DoD Academy men) and 83% at USCGA (91% for USCGA women, 77% for USCGA men).

Using an industry-standard process, data were weighted to reflect each Academy's population as of March 2022.¹³ The estimated number of students, the number of respondents, and the portion of total respondents in each reporting group are shown in **Table 1**.

Table 1.
2022 SAGR Counts and Weighted Response Rates

	Population	Survey Respondents	Weighted Response Rate
DoD MSA Total	12,695	10,328	81%
Men	9,266	7,349	79%
Women	3,429	2,979	87%
USMA	4,359	3,995	92%
Men	3,333	3,073	92%
Women	1,026	922	90%
USNA	4,338	3,700	85%
Men	3,097	2,517	81%
Women	1,241	1,183	95%
USAFA	3,998	2,633	66%
Men	2,836	1,759	62%
Women	1,162	874	75%
USCGA	1,013	839	83%
Men	603	466	77%
Women	410	373	91%

Weighting produces survey estimates of population totals, proportions, and means (as well as other statistics) that are representative of their respective populations. Unweighted survey data, in contrast, are likely to produce biased estimates of population statistics. The standard process of weighting consists of the following steps:

- Adjustment for selection probability—OPA typically adjusts for selection probability within scientific sampling procedures. However, in the case of the 2022 SAGR, all students were selected to participate in the survey. Therefore, although adjustment for selection probability is usually performed as the first step in the weighting process, in this instance, the selection probability is 100%, hence the base weights are calculated to be 1.

¹³ For further details, see the 2022 SAGR Statistical Methodology Report

- Adjustments for nonresponse—Although the *2022 SAGR* was a census of all students, some students did not respond to the survey, and others responded or started the survey but did not complete it (i.e., did not provide the minimum number of responses required for the survey to be considered complete). OPA adjusts for this nonresponse by creating population estimates by first calculating the base weights as the reciprocal of the probability of selection (in the *2022 SAGR*, the base weights take on the value 1 since the survey was a census). Next, OPA adjusts the base weights for those who did not respond to the survey, then adjusts for those who started the survey but did not complete it.
- Adjustment to known population values—OPA typically adjusts the weights in the previous step to known population values to account for remaining bias. In the case of the *2022 SAGR*, the weights in the previous step were adjusted to known population values using the three known demographic variables (Academy, class year, and gender). The poststratification adjustments all have the value 1 because the three demographic variables were already accounted for in the previous step.

Although the *2022 SAGR* was a census of students, not everyone responded to the survey; hence, the weighting procedures described above were required to produce population estimates (e.g., percentage female). Because of the weighting, conventional formulas for calculating margins of error overstate the reliability of the estimate. For this report, variance estimates were calculated using SUDAAN PROC DESCRIPT (Research Triangle Institute, Inc., 2013).¹⁴ Variance estimates are used to construct margins of error (i.e., confidence interval half-widths) of percentages and means based on 95% confidence intervals.

Reporting Categories

Results of the *2022 SAGR* are presented by reporting categories within this report. For each section of the report, results are presented in the following order (including a trend back to prior survey administrations, if applicable):

- DoD MSA Total
 - Survey year by gender
 - Survey year by gender and class year
- By Academy¹⁵
 - Survey year by gender
 - Survey year by gender and class year

¹⁴ As a result of differential weighting, only certain statistical software procedures, such as SUDAAN, correctly calculate standard errors, variances, or tests of statistical significance for stratified samples.

¹⁵ Although not a DoD MSA, the data tables for USCGA are included in the tables presented by Academy

Definitions for the reporting categories above are:

- DoD MSA Total: Includes cadets and midshipmen from USMA, USNA, and USAFA.
- Survey year: The current survey year (2022) reflects the year in which the survey fielded. The comparison survey year is 2018. For some variables, an “adjusted” estimate is shown for the current survey year. The adjusted estimate is only provided to show statistical comparisons to 2018. The adjusted estimate is not the official estimate for 2022. For further discussion on adjusted estimates see the section titled “Construction of Unwanted Sexual Contact Estimated Prevalence Rates” in this report.
- Gender: Men or Women.¹⁶
- Class Year: Senior, Junior, Sophomore, Freshman.
- By Academy: USMA, USNA, USAFA, USCGA.

How to Use the Tables

The tables below depict weighted estimates for men and women in the DoD MSAs and in each of the Academies (including USCGA) for the *2022 SAGR*. The tables also highlight two types of statistically significant comparisons: between survey years (comparisons to the *2018 SAGR* where possible) and within the current survey year (comparisons between men and women and by class year for the *2022 SAGR*).

Statistically significant comparisons between survey years are denoted in the 2022 cells with either an arrow pointing “up” or “down.” An arrow pointing “up” indicates that the 2022 estimate is significantly higher than the 2018 estimate, and the reverse is true if the arrow points “down.” Where the item is noted as “adjusted” this means that the estimate was created only for purposes of making comparisons to the prior year. In this case, the official estimate for 2022 is also shown (without the word “adjusted”). For further discussion on adjusted estimates see the section titled “Construction of Unwanted Sexual Contact Estimated Prevalence Rates” in this report.

Within survey year comparisons are made along a single dimension (e.g., gender or class year) at a time. For class year comparisons, the responses for one group are compared to the weighted average of the responses of all other groups in that dimension. For example, estimates for freshman women are compared to the average estimate for *women* in all other class year categories.

¹⁶ Except where otherwise stated, gender throughout this report is based on responses to the historical sex question where “male” or “female” were the only response options. However, the *2022 SAGR* included new questions to allow cadets and midshipmen to specify their gender identity (to include transgender cadets and midshipmen). See the section titled Revisions and Updates on the *2022 SAGR* for additional discussion regarding those questions.

Unless otherwise specified, the numbers presented are percentages. A range of applicable margins of error are shown. For OPA surveys, a rigorous 95% confidence interval standard is used, indicating with 95% confidence that the true value falls within the confidence interval range. For example, if a weighted estimate for a specific survey question is 55% (i.e., 55% of cadets/midshipmen agree with a statement) and the margin of error was $\pm 3\%$, that means we are 95% confident that the unknown “true” population value falls between 52% to 58%. Because the results of the 2022 *SAGR* are weighted, the reader can assume the results generalize to the full denoted population within the margin of error.

Specific results with low reliability are considered not reportable (NR) and annotated with “NR”. Estimates of low reliability are not presented based on criteria defined in terms of nominal number of respondents (fewer than 5), effective number of respondents (fewer than 15), or relative standard error (greater than 0.225). Effective number of respondents takes into account the finite population correction (FPC) and variability in weights. An “NR” presentation protects the Department and the reader from drawing incorrect conclusions, or the report from potentially presenting inaccurate findings due to instability of the estimate. Unstable estimates usually occur when only a small number of respondents contribute to the estimate. Caution should be taken when interpreting significant differences when an estimate is “NR”. Although the result of the statistical comparison is sound, the instability of at least one of the estimates makes it difficult to specify the magnitude of the difference. Likewise, “not applicable” results, presented as “NA,” indicate that a specific result was not applicable for the reporting category (for example, when a group did not meet requirements to answer the question presented) or, in some cases, that trend data are not available for that estimate.

Some estimates in this report might be so small as to appear to approach a value of 0. In those cases, an estimate of less than 1 (e.g., “<1%”) is displayed.

DoD Military Service Academies by Class Year

DoD by Class Year: Sexual Harassment, By Behavior (Q6-34)	29
DoD by Class Year: Gender Discrimination, By Behavior (Q36, Q39)	30
DoD by Class Year: Sexual Harassment, By Behavior (Met Follow-Up Criteria) (Q6-35)	31
DoD by Class Year: Gender Discrimination, By Behavior (Met Follow-Up Criteria) (Q36-40)	32
DoD by Class Year: Prevalence Rates (Q6-40)	32
DoD by Class Year: Who was the person(s) in this situation who did this to you? (Q41).....	33
DoD by Class Year: At Least One Offender Affiliated with the Academy (Q41a-h).....	34
DoD by Class Year: At Least One Offender an Academy Student (Q41a-f)	35
DoD by Class Year: How many people did this to you? (Q42).....	35
DoD by Class Year: Was/Were this person(s)...? (Q43).....	35
DoD by Class Year: Gender of Offender(s) (Q43).....	36
DoD by Class Year: Gender of Offender(s) (Q43).....	36
DoD by Class Year: Would you describe this situation as...? (Q44)	36
DoD by Class Year: Situation Was/Were Both Hazing and Bullying (Q44).....	37
DoD by Class Year: Situation Was/Were Hazing and/or Bullying (Q44)	37
DoD by Class Year: Thinking about this upsetting situation, did you discuss it with...? (Q45)	37
DoD by Class Year: Discussed Situation With Anyone (Q45).....	38
DoD by Class Year: Did you make a complaint about this situation with/to any authority or organization? (Q46)	38
DoD by Class Year: What actions were taken in response to your complaint? (Q47).....	39
DoD by Class Year: What were your reasons for not making a complaint about this situation? (Q48).....	40
DoD by Class Year: Unwanted Sexual Contact, By Behavior (Q49)	41
DoD by Class Year: Unwanted Sexual Contact Prevalence Rate (Q49).....	41
DoD by Class Year: Unwanted Sexual Contact Prevalence Rate by Type (Q49).....	42
DoD by Class Year: Please give your best estimate of how many different times you had these unwanted experiences? (Q50).....	42
DoD by Class Year: Multiple Unwanted Sexual Contact Experiences (Q50)	43
DoD by Class Year: Unwanted Sexual Contact Behavior(s) Experienced in the One Situation (Q53)	43

DoD by Class Year: Type of Unwanted Sexual Contact Behavior(s) Experienced in the One Situation (Q53).....	44
DoD by Class Year: How many people did this to you? (Q54).....	44
DoD by Class Year: Was/Were this person(s)...? (Q55).....	45
DoD by Class Year: Gender of Offender(s) (Q55).....	45
DoD by Class Year: Gender of Offender(s) (Q55).....	45
DoD by Class Year: At the time of the situation, was/were the person(s) who did this to you...? (Q56).....	46
DoD by Class Year: At Least One Offender Known (Q56a-d).....	46
DoD by Class Year: At Least One Offender an Intimate Partner (Q56a-b).....	46
DoD by Class Year: At the time of the situation, was/were the person(s) who did this to you...? (Q57).....	47
DoD by Class Year: At Least One Offender Affiliated With the Academy (Q57a-h).....	48
DoD by Class Year: At Least One Offender an Academy Student (Q57a-f).....	49
DoD by Class Year: Have you ever communicated with the person(s) via a dating application or website? (Q58).....	49
DoD by Class Year: Did the unwanted situation occur...? (Q59).....	49
DoD by Class Year: Occurred on Academy Grounds (Q59a-b).....	50
DoD by Class Year: When did the situation occur? (Q60).....	50
DoD by Class Year: Occurred During Academy Time (Q60).....	50
DoD by Class Year: At the time of this unwanted situation...? (Q61).....	51
DoD by Class Year: Would you describe this situation as...? (Q62).....	51
DoD by Class Year: Situation Was/Were Both Hazing and Bullying (Q62).....	51
DoD by Class Year: Situation Was/Were Hazing and/or Bullying (Q62).....	52
DoD by Class Year: Did the person(s) who did this...? (Q63).....	52
DoD by Class Year: Sexual Harassment, Stalking, or Sexual Assault Before the Situation (Q63).....	52
DoD by Class Year: Sexual Harassment, Stalking, or Sexual Assault After the Situation (Q63).....	53
DoD by Class Year: At the time of this unwanted situation had you been drinking alcohol? (Q64).....	53
DoD by Class Year: Just prior to this unwanted situation...? (Q65).....	53
DoD by Class Year: At the time of this unwanted situation, had the person(s) who did it been drinking alcohol? (Q66).....	54

DoD by Class Year: Either the Offender or the Victim Had Been Drinking (Q64, Q66)	54
DoD by Class Year: Alcohol and/or Drugs Used by Either the Victim and/or the Offender (Q64-66).....	54
DoD by Class Year: After this unwanted situation...? (Q67).....	55
DoD by Class Year: Experienced at Least One Negative Reaction After the Situation (Q67)	55
DoD by Class Year: Did you officially report that you were a victim of a sexual assault? (Q68).....	55
DoD by Class Year: What type of report did you make? (Q69).....	56
DoD by Class Year: Final Report Disposition (Q69).....	56
DoD by Class Year: What were your reasons for reporting the situation? (Q70).....	57
DoD by Class Year: What were your reasons for not reporting the situation to an authority? (Q71).....	58
DoD by Class Year: In retrospect, would you make the same decision about reporting if you could do it over? (Q72)	58
DoD by Class Year: Make Same Decision About Reporting (Q72)	59
DoD by Class Year: Experienced Behavior(s) in Line With Professional Reprisal (Q73-76)	59
DoD by Class Year: Professional Reprisal (Q73-76)	59
DoD by Class Year: Experienced Behavior(s) in Line With Ostracism (Q77-79)	60
DoD by Class Year: Ostracism (Q77-79).....	60
DoD by Class Year: Experienced Other Negative Behaviors (Q80-82)	60
DoD by Class Year: Other Negative Behaviors (Q80-82)	61
DoD by Class Year: Experienced Behavior(s) in Line With Retaliation (Q73-82).....	61
DoD by Class Year: Professional Reprisal, Ostracism, Other Negative Behaviors (Q73-82)	62
DoD by Class Year: Prior Unwanted Sexual Contact (USC) Prevalence Rates (Q83)	62
DoD by Class Year: Bystander Intervention: Since June 2021, did you...? (Q84).....	63
DoD by Class Year: Bystander Intervention: Witnessed a Potentially Dangerous Situation (Q84)	63
DoD by Class Year: Bystander Intervention: How did you respond to the situation(s) you observed? (Q85)	64
DoD by Class Year: Bystander Intervention: Response to Potentially Dangerous Situation (Q85a-f).....	64

DoD by Class Year: [USAFA ONLY] Have you participated in any of the following programs at USAFA? (Q86)	65
DoD by Class Year: To what extent are you willing to...? (Q87)	65
DoD by Class Year: Since June 2021, to what extent have you witnessed people in your company/squadron...? (Q88)	66
DoD by Class Year: Have you heard of the CATCH a Serial Offender Program? (Q89)	66
DoD by Class Year: Who can help you make a report in the CATCH a Serial Offender Program? (Q90)	67
DoD by Class Year: How much do you agree or disagree with the following statements regarding your company/squadron? (Q91)	67
DoD by Class Year: Scale: Psychological Climate for Sexual Harassment (PCSH) (Q91)	69
DoD by Class Year: If you were to experience sexual assault in the future, to what extent would you...? (Q92)	69
DoD by Class Year: If you were to experience sexual assault in the future, to what extent would you...? (Q92)	70
DoD by Class Year: Since June 2021, how often have you experienced any of the following behaviors, where peers...? (Q93)	71
DoD by Class Year: Scale: Workplace Hostility (Q93)	71
DoD by Class Year: How many drinks containing alcohol do you have on a typical day when drinking? (Q94)	72
DoD by Class Year: In the past 30 days, how many days did you have 5 or more drinks (4 if woman) on the same occasion? (Q95)	72
DoD by Class Year: During the past year, how often unable to remember what happened night before because of drinking? (Q96)	73
DoD by Class Year: Memory Loss from Drinking At Least Once (Q96)	73
DoD by Class Year: To what extent do they make honest and reasonable efforts to stop sexual harassment/sexual assault? (Q97)	74
DoD by Class Year: Are you a member of an intercollegiate (NCAA/Division I/III) sports team at your Academy? (Q98)	76
DoD by Class Year: At your Academy, to what extent do you think...? (Q99)	76
DoD by Class Year: Perception That Victim-Blaming Occurs (Q99e-f)	78
DoD by Class Year: Perception That Leadership Sets Good Examples (Q99i-j)	78
DoD by Class Year: Do you consider yourself to be...? (Q100)	78
DoD by Class Year: Sexual Orientation (Q100)	79
DoD by Class Year: Sexual Orientation (Q100)	79

DoD by Class Year: What sex were you assigned at birth, on your original birth certificate? (Q101).....	79
DoD by Class Year: Do you currently describe yourself as male, female, or transgender? (Q102)	80
DoD by Class Year: Gender Identity (Q101-102)	80
DoD by Class Year: Gender Identity (Q101-102)	81
DoD by Class Year: Since June 2021, due to the COVID-19 pandemic, to what extent were you personally affected by...? (Q105)	82

DoD by Class Year: Sexual Harassment, By Behavior (Q6-34)

KEY			DoD		Women				Men			
Within Year Differences ■ Higher Response ■ Lower Response	Trend Year Differences ▲ Higher in 2022 ▼ Lower in 2022

14. ABSTRACT The 2022 Service Academy Gender Relations Survey: Department of Defense and Department of Homeland Security Results and Trends report represents findings from the 2022 Service Academy Gender Relations survey (2022 SAGR). The purpose of the 2022 SAGR is to provide the official prevalence estimates for unwanted sexual contact and rates of sex-based military equal opportunity (MEO) violations (sexual harassment and gender discrimination). The survey also serves to assess attitudes and perceptions about programs and policies designed to reduce the occurrence of these unwanted behaviors and improve the climate of gender relations at the Academies.						
15. SUBJECT TERMS Unwanted Sexual Contact, Sexual Assault, Sexual Harassment, Bystander Intervention, Sexual Assault Prevention and Response, Unwanted Gender-Related Experiences, Leadership, Training, Reporting

INSTRUCTIONS FOR COMPLETING SF 298

1. REPORT DATE. Full publication date, including day, month, if available. Must cite at least the year and be Year 2000 compliant, e.g. 30-06-1998; xx-06-1998; xx-xx-1998.

2. REPORT TYPE. State the type of report, such as final, technical, interim, memorandum, master's thesis, progress, quarterly, research, special, group study, etc.

3. DATES COVERED. Indicate the time during which the work was performed and the report was written, e.g., Jun 1997 - Jun 1998; 1-10 Jun 1996; May - Nov 1998; Nov 1998.

4. TITLE. Enter title and subtitle with volume number and part number, if applicable. On classified documents, enter the title classification in parentheses.

5a. CONTRACT NUMBER. Enter all contract numbers as they appear in the report, e.g. F33615-86-C-5169.

5b. GRANT NUMBER. Enter all grant numbers as they appear in the report, e.g. AFOSR-82-1234.

5c. PROGRAM ELEMENT NUMBER. Enter all program element numbers as they appear in the report, e.g. 61101A.

5d. PROJECT NUMBER. Enter all project numbers as they appear in the report, e.g. 1F665702D1257; ILIR.

5e. TASK NUMBER. Enter all task numbers as they appear in the report, e.g. 05; RF0330201; T4112.

5f. WORK UNIT NUMBER. Enter all work unit numbers as they appear in the report, e.g. 001; AFAPL30480105.

6. AUTHOR(S). Enter name(s) of person(s) responsible for writing the report, performing the research, or credited with the content of the report. The form of entry is the last name, first name, middle initial, and additional qualifiers separated by commas, e.g. Smith, Richard, J, Jr.

7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES). Self-explanatory.

8. PERFORMING ORGANIZATION REPORT NUMBER. Enter all unique alphanumeric report numbers assigned by the performing organization, e.g. BRL-1234; AFWL-TR-85-4017-Vol-21-PT-2.

9. SPONSORING/MONITORING AGENCY NAME(S) AND ADDRESS(ES). Enter the name and address of the organization(s) financially responsible for and monitoring the work.

10. SPONSOR/MONITOR'S ACRONYM(S). Enter, if available, e.g. BRL, ARDEC, NADC.

11. SPONSOR/MONITOR'S REPORT NUMBER(S). Enter report number as assigned by the sponsoring/monitoring agency, if available, e.g. BRL-TR-829; -215.

12. DISTRIBUTION/AVAILABILITY STATEMENT. Use agency-mandated availability statements to indicate the public availability or distribution limitations of the report. If additional limitations/ restrictions or special markings are indicated, follow agency authorization procedures, e.g. RD/FRD, PROPIN, ITAR, etc. Include copyright information.

13. SUPPLEMENTARY NOTES. Enter information not included elsewhere such as: prepared in cooperation with; translation of; report supersedes; old edition number, etc.

14. ABSTRACT. A brief (approximately 200 words) factual summary of the most significant information.

15. SUBJECT TERMS. Key words or phrases identifying major concepts in the report.

16. SECURITY CLASSIFICATION. Enter security classification in accordance with security classification regulations, e.g. U, C, S, etc. If this form contains classified information, stamp classification level on the top and bottom of this page.

17. LIMITATION OF ABSTRACT. This block must be completed to assign a distribution limitation to the abstract. Enter UU (Unclassified Unlimited) or SAR (Same as Report). An entry in this block is necessary if the abstract is to be limited.
