FOREWORD

This bibliography is a list of technical publications and papers by personnel of the U. S. Army Natick Laboratories and its contractors for the period July 1973 through June 1974. The arrangement is by organizational elements. In most instances where an article was prepared jointly by personnel of more than one laboratory, the citation is listed fully under the laboratory of the senior author with a "see" reference under the laboratory of the junior authors.

Reprints of journal articles, in some cases, are available from the individual authors. Copies of technical reports may be obtained from (1) The Defense Documentation Center, Cameron Station, Alexandria, Virginia 22314, or (2) the National Technical Information Service, Springfield, Virginia 22151. The "AD" number should be cited when ordering copies of reports. These reports marked with an asterisk (*) are not available for distribution outside the agencies of the U. S. Government. Technical papers refer to presentations for which no printed copies exist.
