KOREAN CONFLICT 1950-1953

Introduction

The Korean Conflict was a limited war but not a minor one.

Congress never declared war on the North Koreans and Chinese.

President Truman called it a "police action" and some reporters insist it was the first United Nations War. However it surpasses World War I with respect to the number of Americans engaged (4 744 000 WWI veterans to 5,764 000 Korean War veterans). The number of casualties reported was 157 000 with over 33 000 battle deaths.

The extent of the controversial nature of the Korean Conflict is measured by the remarkable number of books and articles published about it in the few years since it began. Without question it will continue to attract the best efforts of scholars for many years to come.
