20. ABSTRACT (Continue on reverse side if necessary and identify by block number)

This project addressed selected logistic support requirements needed to sustain SH-2F helicopters aboard the new class ship, Guided Missile Frigate (FFG-7). The study identified and documented air/ship interface requirements, ground support equipment, test equipment requirements, pack-up kit range and depth, weight and cube of spares and repair parts, Individual Material Readiness List, mooring aids, and equipment (Allowance Equipage List), and recommended additional evaluation of a flight deck

1.0 INTRODUCTION

1.1 OBJECTIVE

The purpose of this study was to identify and document aviation-related logistic support requirements to sustain two Light Airborne Multi-Purpose Systems (LAMPS MK-I) helicopters aboard the Guided Missile Frigate (FFG-7) lead ship. The Naval Aviation Integrated Logistic Support Center (NAILSC) was tasked to identify, describe, and document the supporting air resources in terms of what they are, who is cognizant over them, what effect they have on the ship design, and the scheduling implications involved during the development of the first FFG. The study was also intended to ensure adequate aviation environment planning and equipment delivery scheduling. Appendix A is the pertinent Naval Sea Systems Command (NAVSEA) Work Request (N0002475WR53160).

1.2 BACKGROUND

The Guided Missile Frigate program was established for the design, development, and production of a new class of ships. The ship armament plan includes the LAMPS weapons system. This LAMPS weapons system is basically comprised of a multi-purpose helicopter and a surface Anti-Submarine Warfare (ASW) ship. The LAMPS helicopter, in effect, extends the horizon for the ship's sensor and weapons delivery systems. The basing of helicopters on non-aviation ships (supported with small aviation detachments) presents special situations requiring additional interface planning and coordination (e.g., LAMPS-capable ships must be equipped with general helicopter servicing and operating facilities such as hangars, fueling systems, visual landing aids, and navigational aids).

The LAMPS aircraft is capable of operation from ocean escort, destroyer, and frigate class ships. Its primary missions are ASW and Anti-Ship Missile Defense (ASMD). The LAMPS helicopter associated with this study is designated by the Navy as the SH-2F. The LAMPS MK-I program uses this inservice helicopter, modified by the installation of state-of-the-art airborne sensors, to accomplish the LAMPS mission. The resultant MK-I LAMPS helicopter is configured as illustrated in figure 1.

In view of the limitations of space and crew size on the Guided Missile Frigate, only Organizational-level maintenance will be performed aboard ship. Organizational-level maintenance normally consists of inspecting, servicing,

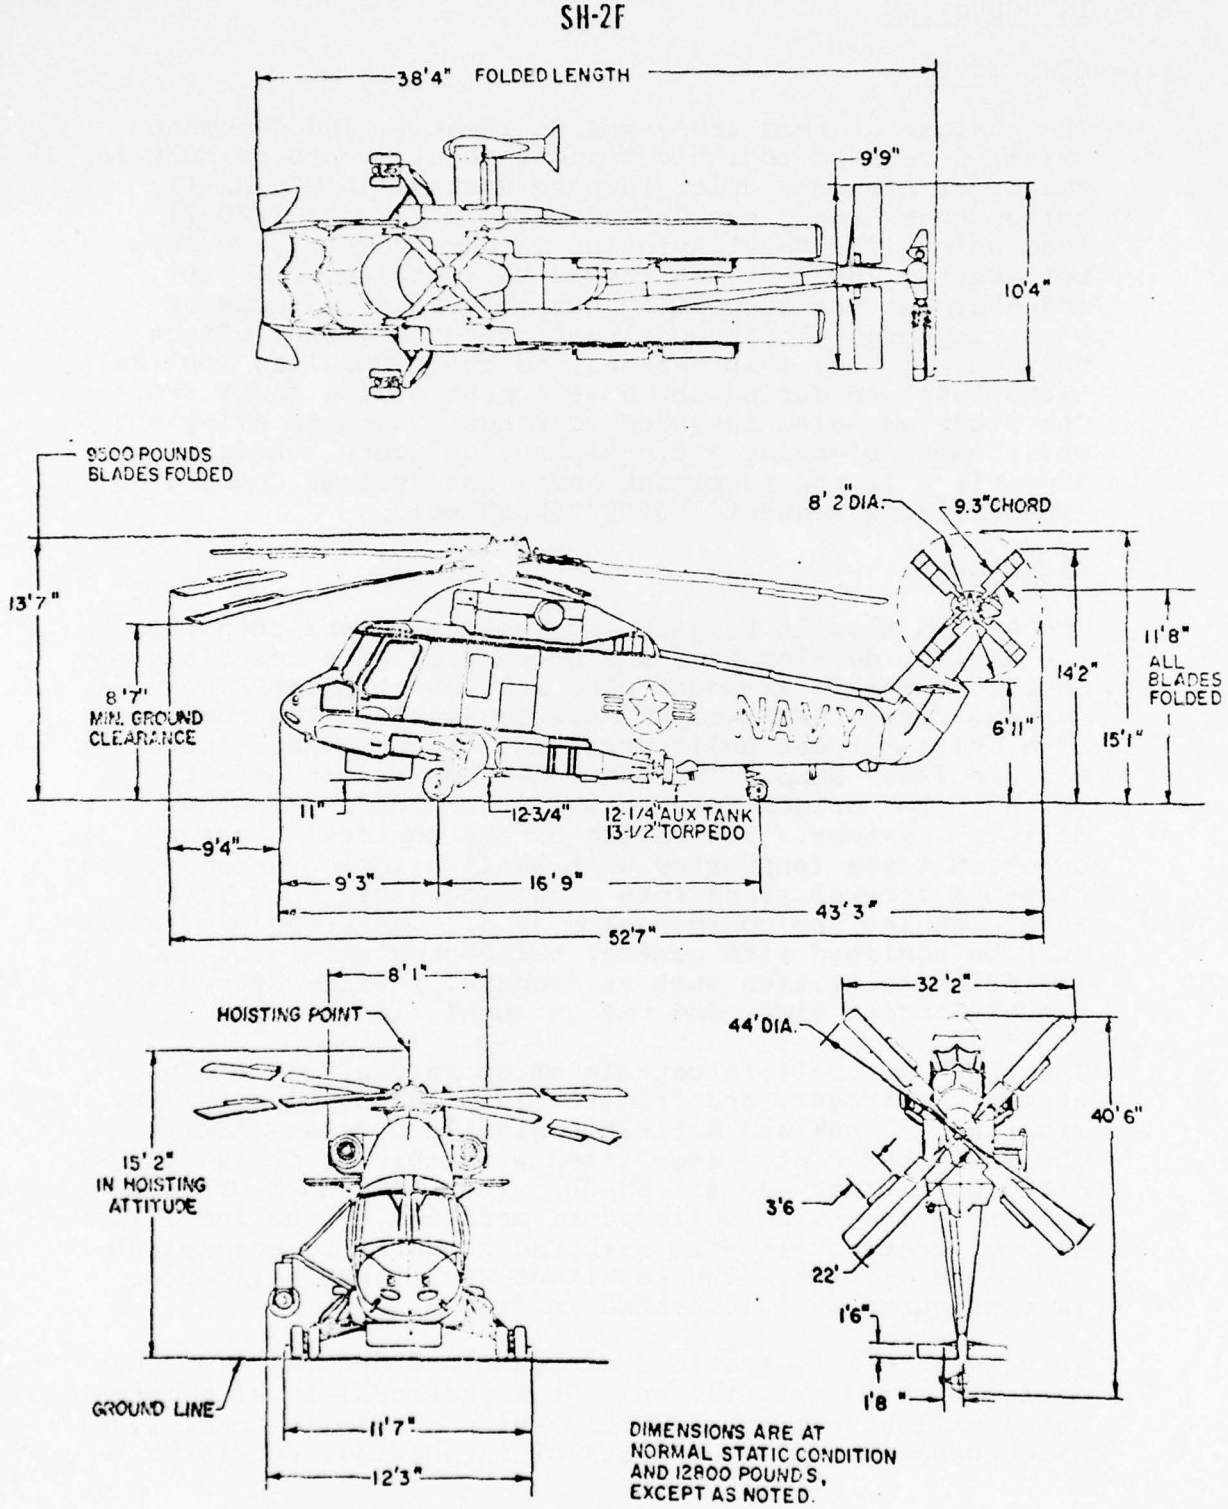

Figure 1. SH-2F LAMPS MK 1

lubricating, adjusting; and removing and replacing parts, minor assemblies, and subassemblies. The squadron air detachment will be responsible for performing this Organizational-level maintenance.

The Guided Missile Frigate (FFG class) will accomodate two LAMPS MK-I aircraft. It will also contain a shipboard helicopter handling system which will guide (with positive connected security) the aircraft from a hover position above the flight deck until final storage in the hangar bay (system name — Recovery, Assist, Secure, and Traverse (RAST)). In addition, this ship will be capable of launching missiles via the HARPOON Ship Command and Launch Subsystem (HSCLS).

1.3 SCOPE

The study task was administered to the NAILSC by NAVSEA. The initial NAVSEA Work Request (appendix A) included broad general objectives and alluded to the development of an air-capable ship activation plan. This engendered various interpretations by both Naval Air Systems Command (NAVAIR) and NAVSEA personnel. As part of the initial NAILSC effort, a Logistic Support Conference was planned and executed which identified the specific areas of concentration, formed a baseline of subtasks, and assigned deadlines for completion of assignments. The conference redefinition eliminated misinterpretations among NAVAIR and NAVSEA personnel. The study effort from this juncture was directed solely toward completion/resolution of the conference action items.

1.4 STUDY APPROACH

The team planning focused on establishing a structure or matrix of those NAVAIR, NAVSEA, and Naval Electronics Systems Command (NAVELEX) codes (and where possible, individual persons) responsible for supplying logistic data (for air vehicle and other Government Furnished Equipment (GFE)), equipment procurement, delivery schedules, and related operating and servicing facilities aboard the ship (see figure 2). The overall planning and requirements were defined by the NAVSEA Ship Project Directive (SPD). Appendix B outlines NAVAIR's responsibility (excerpts from the SPD).

2.0 DISCUSSION

2.1 TASKING DOCUMENTS

Planning of logistics in support of the LAMPS MK-I helicopter/ship system began with the Ship Project Directive issued by the Ship Acquisition Project Manager (SHAPM), code PMS-300.21 to NAVAIR (AIR-537) on 29 November 1973. This directive was prepared to ensure that NAVAIR cognizant equipment and engineering services would be provided in consonance with the construction schedule of the guided missile ship. NAVAIR was requested to take necessary action to provide support for the tasks outlined in the SPD and to effect procurement and delivery of the HSCLS and the LAMPS MK-I installed ship's equipment.

By mutual agreement between NAILSC and NAVSEA, a formal work request was delivered to NAILSC on 11 May 1975. In this work request, NAVSEA PMS-399 requested general logistic air-related-type information such as:

a. Identification of air resources

b. Cognizant technical or managing activity

c. Potential impact to ship design

d. Scheduling implications.

The ultimate role of the NAILSC in providing support to the FFG-7/LAMPS program was documented and authorized by NAVAIR (AIR-04) under Airtask A8044103 0534 6804000000.

2.2 PHASE I

This first phase of the project was oriented toward accumulating information concerning the present organizational structure of functional responsibility, current air/ship interface problems, special problem areas as applied to non-aviation ships, and collection of fleet information, both formal and informal.

It became apparent that a current organization which would be responsible for planning and integrating the integrated logistic support for the Guided Missile Frigate did not exist. Contacts were initiated with codes in NAVAIR, NAVSEA, NAVELEX, the Naval Air Development Center (NADC), the Supervisor of Shipbuilding, Conversion and Repair (SUPSHIP), and various fleet helicopter squadrons.

An informal matrix of responsible offices was assembled at NAILSC indicating functional responsibility for subsystems, supply pack-up kits, visual landing aids, communications systems, test equipment, battery chargers/analyzers, etc.

Project personnel attended an Integrated Logistic Support Management Team (ILSMT) conference for the SH-2D/F held at the Kaman Corporation. The ILSMT conference data showed current air/ship interface topics/deficiencies and currently proposed resolutions (as applied to such ships as DD-963 and DE-1052 class ships). It also provided a listing of personnel associated with the various facets of the LAMPS program and their degree of participation.

An on-site visit to the HSL-32 Helicopter Squadron (NAS Norfolk, Virginia) and the Supply Staging Section for Pack-Up Kits provided sample information such as the Individual Material Readiness Listing (IMRL) (appendix C), a sample 90-day pack-up kit listing (appendix D), and a ship-loading (pack-up kit) demonstration. Similar data were obtained from West Coast (HSL-31 and HSL-33) operating squadrons. Appendix E contains a tailored 90-day pack-up kit listing, an IMRL, and an Authorized Consumable Materials Listing (corrosion control program support).

2.3 LOGISTIC SUPPORT CONFERENCE

The main thrust by the project team continued toward positive identification of functional offices, requirements assigned them, and anticipated products. A listing was composed and documented as shown in appendix F. The functions addressed related to such items as helicopter operating requirements, telemetry data receiving equipment, acoustic processing equipment, visual landing aids, battery charger/analyzer, helicopter personnel manning, torpedo handling, aircraft storage, helicopter hauldown system, helicopter-ship communications, spares, and spare parts.

To ensure appropriate action assignments to the various functional elements within NAVAIR, NAVSEA, NAVELEX, and other activities, the study team convened an Integrated Logistic Support Conference. Appendix G outlines the objectives of the conference call. Appendix H (conference minutes) lists action items requiring resolution, the assigned responsible codes, and the established completion dates.

3.0 RESULTS AND RECOMMENDATIONS

3.1 COMPLETED ACTIONS

The essential results of this project encompass the action items prepared during the logistic support conference and subsequent responses. (Action items are included in enclosure (2) of appendix H.)

Actions taken by cognizant codes were documented and forwarded to the NAILSC. Problems and actions are briefly discussed in succeeding paragraphs.

Action Item No. 1 addresses a problem of funding constraints and its impact on use of the Data Link SKR-4. Due to an anticipated lack of funds, a decision for cross-decking this system between ships as required to support deployed helicopter detachments was rendered by the Chief of Naval Operations (CNO) (appendix I). Exception to this action was taken by NAVELEX, NAVSEA, and PMA-266 who subsequently provided OP-353 with funding data required to procure the SKR-4 for all Ship Construction Navy (SCN) ships (appendix I).

Action Item No. 9 addresses the problem of assigning responsibility for ensuring that requirements to integrate shipboard radio communication equipment with the Landing Signal Enlisted (LSE) station, bridge, tower, and aircraft are met. NAILSC and NAVSEA shared this responsibility. A unique system featuring Emission Control (EMCON) communications between helicopter pilots and the helicopter control station has been proposed by NADC. Though not in direct response to a conference assignment, the proposed system has received widespread endorsement for evaluation and application aboard the FFG-7 and other classes of ships. Background and status of the proposed installation are discussed in appendix J.

Action Items No. 5 and No. 16 address the problem of providing required operational and support equipment. The former relates to the battery charger/analyzer and the latter relates to pack-up kits and technical publications. Responsibility for the battery charger/analyzer was assigned to NAVAIR (AIR-534). Responsibility for pack-up kits and technical publications was assigned to NAVAIR (AIR-41251B). Appendices K and L, respectively, are products received in direct response to action items 5 and 16. Appendix K merely states that one battery charger/analyzer has been shipped to Bath Iron Works,

Bath, Maine, to be used on the FFG-7 project. Appendix L paraphrases Action Item No. 16 and requests that supply support procedures for the FFG class be developed and incorporated into chapter 8 of Commander, Naval Surface Force, U.S. Atlantic Fleet (COMNAVSURFLANT) Instruction 4400.1 of 15 June 1975.

Action Item No. 4 identifies as a problem the need-to-know requirements for test equipment on all "SCHEDULE A" equipment. Responsibility for defining these requirements was assigned to the NAILSC. Appendix M is the NAILSC response. In this appendix, requirements are identified for the HARPOON Ship Command and Launch Subsystem, visual landing aids, helicopter facilities test, and the SKR-4 Telemetric Data Receiving Set.

Action Item No. 2 identifies the problem of cross-decking the LAMPS Acoustic Processor SQR-17. NAVSEA (Code 661) was assigned the responsibility of informing and consulting with the Type Commanders about this problem. Appendix N, a message from COMNAVSURFLANT, strongly recommends no cross-decking of this equipment.

Action Item No. 8 identifies as a problem a need to know the allowances of personnel equipage for the helicopter detachment. Responsibility for this item was assigned to the NAILSC. Appendix O represents the NAILSC response to the Allowance Equipage List (AEL) including personnel equipment, mooring aids, and a typical onboard IMRL. Additional information on pack-up kits is included in appendix O.

Action Items No. 10 and No. 11, respectively, address the problems of the need to ensure adequate electric power distribution and to ensure the adequacy of facilities for changing engines/transmissions. The NAILSC coordinated joint arrangements between HSL-32 and PMS-399 to resolve these problems.

3.2 SUMMARY OF BENEFITS

The NAILSC was tasked by PMS-399 to identify required supporting air resources and collateral data involving aircraft/ship integration aboard the FFG-7 ship. The evolution of the study (dictated by circumstances, need, and refinement) altered the direction to define functional responsibilities of agencies and to establish communication and coordination among several organizations. The NAILSC endeavor and the resultant actions gave needed

impetus to the FFG-7 Air/Ship Logistic Support Program; and, consequently, averted both construction delays and concomitant contractor cost increases.

3.3 RECOMMENDATIONS

Although a Weapon System Logistic Integration Board (WSLIB) has not been referenced in this report, it is recommended that the procedures and objectives established for such a board (i.e., policy, schedules, milestones, funding, responsibility matrix, etc.) be utilized in support of future LAMPS (or other air vehicles destined for non-aviation ships) weapons systems. A WSLIB would complement the mission of the Ship and Air Systems Integration (SASI) Project Office (PMA-266), which has the responsibility for the overall LAMPS program (including ILS plans) of the various subsystems. Primarily, the WSLIB develops a support master plan; provides a smooth transition through development, pilot production, fleet introduction, and deployment; and ensures timely delivery of the ILS assets. Thus, the coordination of different Systems Command logistic activities is accomplished. The NAILSC should have a continuing active role in the LAMPS Weapons System Program through assignment of studies by the WSLIB. Appropriate early NAILSC participation in the FFG-7 program would have averted the belated coordination effort.

Appendix P (joint NAVAIR/NAVSEA instruction) specifies more fully the SASI overall responsibility and authority. Appendix Q reflects delegation and agencies to coincide with the development and acquisition responsibilities for the LAMPS weapons system.

Work Statement

1. In order to tailor the support requirements for a LAMPS MK-1 air detachment operating from the lead FFG ship and ensure adequate planning and design considerations, the Naval Aviation Integrated Logistic Support Center (NAILSC) will develop an air-capable ship activation plan.

2. This plan will address the identification of the required supporting air resources in terms of what they are, who is cognizant over them, what impact they have on the ship design, and the scheduling implications involved during the development of the first FFG.

3. This task will be assigned to one and one-half man over a six-month period commencing 1 May 1975.

4. Interim problems/progress reports will be issued monthly recommending follow-up action on critical issues.

APPENDIX B

SHIP PROJECT DIRECTIVE
(Selected Areas)

SPD (2 OCT 1973)

ABSTRACT (SELECTED AREAS)

HARPOON and LAMPS MK-1 INSTALLED SHIPS EQUIPMENT

1. MANAGEMENT

RESPONSIBLE NAVAIR Code	ACTION
537	Submit organization chart delineating responsible NAVAIR organization which will participate in equipment - PROCUREMENT and TEST and EVALUATION. Indicate responsible personnel, by name, from top management to "working level" and include fiscal as well as technical areas of responsibility.
537, PMA-258 and PMA-256	Identify baseline documentation (for configuration management purposes and the shipbuilder). Describe the following aspects of all GFE to be developed by the SPD. List of Equipments Technical requirements Design Baselines List of references to specs and dwgs. Design information for logistic support Arrangement constraints
NAVAIR	Assuring that logistic support, such as INCONs ERPs (Equipment Repair Parts) PTDs (Provisioning Technical Documentation), Technical Manuals, Engineering Services, Training, etc., associated with approved changes are provided.

2. DATA MANAGEMENT

RESPONSIBLE NAVAIR CODE	
537, PMA-256, and PMA-258	Supply data required for Ship System Design, Detail Design, Installation, Maintenance, Test and Logistic Support of the equipment being supplied to the LBTS and the PF, along with the schedule for the delivery of this data based upon the overall PF Design and construction schedule. This listing shall include the identification number and stocking location of all GFI. Distribute Technical Data procured to the cognizant government agencies and contracting activities.

RESPONSIBILE NAVAIR CODE	
NAVAIR	Will assist in the periodic review and update of various documents as the Ship Acquisition progresses - items to be reviewed shall include NAVAIR cognizant items documented on drawings, speciations, the NAVSEC design budget, configuration lists, space summary, KW summary, block diagrams, Tech Manuals, Test Documentation and Equipment Units.
537	Provide representative to the PF Combat System Design Working Group. Provide technical information and representation to the PF Test and Evaluation Program. Provide representation to the PF Change Control Board. Names of representative who are authorized to act for NAVAIR shall be provided PMS-399.
410	410 shall provide PF ILS Management Team Members authorized to represent NAVAIR ON Integrated Logistic Support Matters. The project desires continuity in this participation in Project ILS planning. The ILS Management Team will meet on call of the Project. Active participation in such functions as technical manual (or other data) review, training plan conferences, provisioning conferences, design reviews, or other ILS planning functions directed by PMS-399 will be the responsibility of those NAVAIR personnel specifically assigned for these tasks. These efforts should be coordinated by the NAVAIR ILS Management Team representative.
PMA-258 (Harpoon Weapon System)	258- Shall review the PF Configuration BASELINE documents to ascertain that the HWS has been properly accommodated in the PF design. This review will be on at least a quarterly basis. PMS-399 shall be notified immediately if the system/equipments cannot be accommodated within the allocated constraints of space, weight, power, and functional interface parameters allocated in the PF.

RESPONSIBLE NAVAIR CODE

3. INTEGRATED LOGISTICS SUPPORT

410

Prepare and implement a plan for the management of NAVAIR ILS tasks.

Provide PMS-399 with NAVAIR ILS plans 120 days after issuance of this SPD.

ILS ELEMENTS:

Maintenance Planning
Technical Data
Supply Support
Support and Test Equipment
Personnel and Training
Transportation and Handling
Facilities
Logistic Support Resources Funds
Logistic Support Management Information

537, PMA256 and PMA-258

Provide a copy of procurement plans to PMS-399 two months prior to the first required funding for any item in Part II of the SPD.

The schedules for equipments that will be provided to the Combat Systems Land Based Test Site and Lead Ship Production Contractor included in Schedule "A" of the SHIPS construction contract are provided in Part III of the SPD. All equipments, engineering services, Tech manuals, test documentation and drawings for GFE shall be identified by NAVAIR and provided to meet the line item requirements as they occur.

NAVAIR

NAVAIR shall notify the PF Project as soon as any slippage of the schedules described becomes apparent. A pre determined milestone plan shall be used as a basis for assuring adequate progress and timely corrective action when the need occurs.

NAVAIR will submit copies of all Advanced Procurement Plans (APP) Requests for Authority to Negotiate (RANs) and Determination and Findings (D&F) for shipboard equipment as they become available in order to keep PMS-399 appraised of the current situations. Updates to the issued documents will be submitted to PMS-399 as they are available.

537

537 is requested to appoint one individual from its organization as the point of contact action officer for the Participating Manager, who will be responsible for accomplishment of the tasks outlined in the SPD for the PF Project, and an alternate to act during his absence.

APPENDIX F

STATUS REPORT — FFG-7 PROJECT

C O P Y

DEPARTMENT OF THE NAVY
NAVAL AVIATION INTEGRATED LOGISTIC SUPPORT CENTER
PATUXENT RIVER, MARYLAND 20670

IN REPLY REFER TO
4000
ILS311-660
23 Oct 1975

From: Commander, Naval Aviation Integrated Logistic Support Center
To: Commander, Naval Sea Systems Command (PMS-3993)

Subj: Status Report on FFG-7 Project - First Milestone

Ref: (a) COMNAILSC ltr 4000 ILS311-567 of 17 Sep 1975
(b) Helicopter Operating and Support Facilities Bulletin No. 1B, NAEC-NE of 22 Aug 1973

Encl: (1) COMNAVAIR ltr AIR-41251B:RWH of 30 Sep 1975

1. The NAILSC (Naval Aviation Integrated Logistic Support Center) has identified the procurement responsibilities for the applicable equipment detailed in paragraph 2 of reference (a). The cognizant codes/personnel are listed in paragraph 2 below, with a brief status of the procurement/delivery schedule when known.

2. Schedule "A" Equipment*

a. Harpoon Control and Launch System

PERSONNEL	CODE	AUTOVON NO.
LCDR McLaughlin	PMA-2583	222-3340
Mr. E. James	AIR-41042B	222-9648
Mr. B. Hempel	SEA-04	222-3674
AOCM J. Swart	NAILSC-220F	356-4651
Mr. P. Stevens	NSEC-6161C	436-1176

The ILSP (Integrated Logistic Support Plan) for the Harpoon weapon system is in the process of being rewritten and will be reissued approximately December 1975. This precludes final determination of the delivery of the support equipment/material or the system itself at this time.

*NOTE 1: All SCHEDULE "A" equipment mentioned here for the FFG-7 is being handled by AIR-537. Delays in the delivery of this equipment may be occasioned by the requirement for a "Destination List" which has not yet been released by PMS-399.

C O P Y

C O P Y

4000
ILS311-660

Subj: Status Report on FFG-7 Project - First Milestone

b. VLA (Visual Landing Aids) (LAMPS (Light Airborne Multi-Purpose System) Add-On Package)

PERSONNEL	CODE	AUTOVON NO.
Mr. R. Hager	AIR-53742B	222-3242
Mr. Z. Ziemer	AIR-52742A	222-3242
Mr. M. Kolodner	NAEC-91316	624-2150
Mr. R. Smith	AIR-53722	222-3290
Mr. B. Rosica	NAEC	624-2395

From all indications, the VLA package will be delayed. Delivery to BIW (Bath Iron Works) was originally scheduled to be accomplished by 1 September 1975. The equipment has been delivered to NAEC (Naval Air Engineering Center) but has not been assembled or checked out, which is necessary prior to final delivery. This delivery is contingent upon the "Destination List" as identified in NOTE 1.

c. LAMPS Acoustic Processor AN/SQR-17

PERSONNEL	CODE	AUTOVON NO.
Mr. D. Carlton	PMA-266-12	222-1043
Mr. B. Soderholm	AIR-5330A	222-7150
Mr. H. Burden	PMA-266-1	222-1367
Mr. P. Stevens	NAVSEA-661C	222-1043

Only one SQR-17 has been purchased for the FFG-7 project. Delivery to BIW can be expected on demand (see NOTE 1). However, the "Onboard Repair Parts Kit" and the "Tape Recorder/Time Code Generator" has not been purchased or, apparently, budgeted. These two items cost approximately $100,000.00. The next buy for the FFG-7 of these items will be about October 1977 and lead time is six to eight months. Training, spares, publications, etc., are in existence for the first 52 SQR-17's which have been purchased. The "Tape Recorder/Time Code Generator" is not absolutely necessary for the SQR-17 to function, although it is required for mission completion/training/intelligence analysis. The material support date is scheduled for November 1977.

C O P Y

d. LAMPS Data Link (SKR-4)

PERSONNEL	CODE	AUTOVON NO.
Mr. T. Tijerina	NAVELEX-520C	222-8330

e. RAST (Recovery, Assist, Secure, Traverse) System

PERSONNEL	CODE	AUTOVON NO.
Mr. R. Hager	AIR-53742B	222-3248
Mr. C. Patton	AIR-4103C1	222-0010
CDR R. Brace	AIR-5372	222-3290

The only information available currently on the RAST System is apparently general weight and volume data. It does not seem possible that this equipment will be included in the lead ship.

3. Non-Schedule "A" Equipment and Other Areas of Interest

PERSONNEL	CODE	AUTOVON NO.
Mr. B. Hatch	AIR-41251B	222-0028

a. Personnel Equippage

b. Maintenance Facilities

c. Pack-Up Kit

PERSONNEL	CODE	AUTOVON NO.
Mr. C. Patton	AIR-4103C1	222-0010
Mr. P. Catalda	AIR-4103B3	222-0010
Mr. B. Hatch	AIR-41251B	222-0028

d. Special Stowage

e. Helicopter Support

C O P Y

4000
ILS311-660

Subj: Status Report on FFG-7 Project - First Milestone

f. Battery Charger/Analyzer

PERSONNEL	CODE	AUTOVON NO.
Mr. H. Humphrey	AIR-53412	222-3044
Mr. C. Murphy	PMS-399151	222-0984
Mr. T. Amorosa	NAEC-92A41	624-2708
Mr. P. Dougherty	AIRLANT	690-4314
Mr. C. Goddard	AIR-53411G1	222-3044

The Battery Charger/Analyzer is intended to be provided in the ship's IMRL (Individual Material Readiness List). This equipment is not intended to be furnished for the shipbuilder to install. Currently this equipment has not been funded. The funding for this equipment will be provided in the fiscal year 1978 OSIP (Operational and Safety Improvement Program). The charger/analyzer (models 1000C-1/1410) which is planned for use on all SH-2F's for the FFG-7 detachments is considerably smaller than the ones previously used. If the new equipment will not be available for the lead ship, space considerations must be taken into account to ensure capability of accepting the other model.

g. The above and preceeding areas are identified and planned for in enclosure (1) and in reference (b). More details concerning these areas will be forwarded as they develop.

4. It is recommended that a conference be called and chaired by either the NAVAIR LAMPS MK-I APML or the NAVAIR FFG-7 project office for the purpose of bringing the pertinent project officers (VLA, Harpoon, RAST, etc.) together with the Naval Support Activity (Bath Iron Works), NAVAIR, and NAVSEC personnel to identify clearly the anticipated delivery schedules of the Government Furnished Equipment required for the FFG-7.

APPENDIX G

FFG-7 LOGISTIC SUPPORT CONFERENCE
(Call For)

DEPARTMENT OF THE NAVY
NAVAL AVIATION INTEGRATED LOGISTIC SUPPORT CENTER
PATUXENT RIVER, MARYLAND 20670

IN REPLY REFER TO

4000
ILS311 6 8 3

NOV 4 1975

From: Commander, Naval Aviation Integrated Logistic Support Center
To: Commander, Naval Sea Systems Command (PMS-399.33)

Subj: FFG-7 Logistic Support Conference; call for

Ref: (a) Work Request N0002475WR53160 of 11 May 1975

Encl: (1) Conference Action Items with Sample Informational Requirements

1. Reference (a) outlined the general task requirements assigned the Naval Aviation Integrated Logistic Support Center (NAILSC) in planning logistics support of a helicopter detachment aboard a Patrol Frigate (FFG-7) ship. The plan associated with the task described the project scope encompassing such requirements as identifying procurement and maintenance responsibilities and determining technical documentation, weight and space needs, and the equipment delivery schedule.

2. NAILSC personnel have discussed the objectives of this task with a number of persons assigned within the Naval Air Systems Command (NAVAIR) and the Naval Sea Systems Command (NAVSEA), as well as field activity representatives. These efforts to date have uncovered some inconsistencies and discontinuity of responsibility. In order to resolve these differences and effectively support NAVAIR/NAVSEA, a conference focusing on logistics support for the FFG-7 program (air portion) is to be convened. The meeting is scheduled at NAVAIR, Jefferson Plaza 2, Room 436 at 0900 on 12-13 November 1975. Mr. Calvin Patton, AIR-4103C1 (AUTOVON 222-0010) and Mr. Robert Hager, AIR-53711D (AUTOVON 222-3248) will act as co-chairmen. Project officers and other key personnel are invited to attend the meeting. Enclosure (1) is the topical outline for discussion.

CO NAEC (Codes 921A41, 91316)
SUPSHIP Bath, Maine
NAVSECMECHDIV (Code 6831B.4)
COMNAVELEX (Code 520C)

CONFERENCE ACTION ITEMS

A. LIGHT AIRBORNE MULTI-PURPOSE SYSTEM (LAMPS) VISUAL LANDING AIDS (VLA) (Add-On Package)

Current Information

1. VLA package delayed.

2. Originally scheduled for delivery 1 September 1975.

3. Equipment available at NAEC.

4. October shipping instruction (PMS-399.2) "as soon as possible" delivery.

B. HARPOON SHIP COMMAND AND LAUNCH SUBSYSTEM

Current Information

1. Integrated Logistic Support Plan (ILSP) for HARPOON is in preparation (rewrite).

2. Delivery schedule unknown; to be issued approximately December 1975.

3. Delivery of support equipment/material unknown.

C. LAMPS ACOUSTIC PROCESSOR AN/SQR-17

Current Information

1. Only one SQR-17 purchased for FFG-7 project.

2. Onboard repair parts kit and tape recorders/time code generator have not been purchased (not budgeted).

3. Next buy scheduled October 1977 - lead time 6-8 months.

D. LAMPS DATA LINK (SKR-4)

Current Information

None.

E. BATTERY CHARGER/ANALYZER

Current Information

1. Not funded.

2. Not for shipbuilder for installation.

F. RECOVERY, ASSIST, SECURE, AND TRAVERSE (RAST) SYSTEM

Current Information

General weight and volume data.

G. PERSONNEL EQUIPAGE

H. MAINTENANCE FACILITIES

I. PACK-UP KIT

J. SPECIAL STOWAGE

K. HELICOPTER SUPPORT EQUIPMENT (HANGAR/SHOP TYPE)

THE FOLLOWING EXPRESSIONS EXEMPLIFY
THE PROJECT INFORMATIONAL REQUIREMENTS

1. Identification of procurement and technical responsibility for listed conference items.

2. Release schedule of Advanced Procurement Plan (APP) and Cognizant Systems Commands/Inventory Control Points which will furnish material.

3. Material delivery dates (ship site or staging point).

4. Identification of required ground support equipment for listed items.

5. Definition of technical manuals associated with the equipment and the designated activity providing initial and subsequent maintenance (changes notices, deletions, additions, etc.).

6. Determination of equipment weight and space considerations.

7. Identification of equipment/gear remaining with the ship without detachment on board.

8. Required specialized training for ship's/air detachment personnel (operations, maintenance, administrative, etc.).

9. Assignment of corrective maintenance responsibilities of aircraft, ship's equipment (avionics, electronics, ordnance, etc.).

APPENDIX H

FFG-7 LOGISTIC SUPPORT CONFERENCE MINUTES

DEPARTMENT OF THE NAVY
NAVAL AVIATION INTEGRATED LOGISTIC SUPPORT CENTER
PATUXENT RIVER, MARYLAND 20670

IN REPLY REFER TO
4000
ILS311 762

2 DEC 1975

From: Commander, Naval Aviation Integrated Logistic Support Center
To: Distribution List

Subj: Joint FFG-7 Logistic Support Conference; minutes of

Ref: (a) COMNAILSC ltr 4000 ILS311-688 of 4 Nov 1975
(b) COMNAILSC ltr 4000 ILS311-704 of 7 Nov 1975

Encl: (1) List of Attendees
(2) List of Action Items

1. References (a) and (b) requested representatives at the subject conference from major commands/activities who are or will be involved in the FFG-7/Light Airborne Multi-Purpose System (LAMPS) MK-I Program.

2. Representatives from the Naval Air Systems Command (NAVAIR Codes 410, 412, 534, and 537), Naval Electronics Systems Command (NAVELEX Code 520), Naval Air Engineering Center (NAEC), Naval Sea Systems Command (NAVSEA Code PMS-399), Supervisor of Shipbuilding, Conversion and Repair (SUPSHIP), and the Naval Aviation Integrated Logistic Support Center (NAILSC) met on 18 November 1975 in response to references (a) and (b) to discuss the support requirements for the LAMPS MK-I detachment aboard the FFG-7.

3. The conference was convened at 0900 by Mr. Calvin Patton (NAVAIR-4103C). The agenda items listed in reference (a) were discussed by the attendees and action items were assigned to appropriate activities.

4. The conference was conducted as an open, informal forum with representatives from the various offices and commands stating known problems in their areas and answering questions from the floor concerning the assignment of responsibilities for the support of the various agenda items. In general, the responsibilities were identified as follows:

a. NAVELEX has total cognizance for the SKR-4 Data Link and will identify the support requirements in terms of spares, test equipment, and technical publications.

Subj: Joint FFG-7 Logistic Support Conference; minutes of

b. NAVAIR-537 accepted the responsibility for determining why the Ship's Project Directive (SPD) and Schedule "A" were inconsistent with respect to the Visual Landing Aids (VLA) package and making the appropriate corrections.

c. NAILSC was appointed to determine the test equipment requirements for Schedule "A" equipments. The requirement to determine weight and volume data for any of the agenda items was removed.

d. NAVSEA assumed responsibility for the HARPOON Command and Launch System and the SQR-17 Acoustic Processor. Support for the SQR-17 will be handled the same as for the SQR-4.

e. NAVAIR-534 agreed to provide a battery charger/analyzer for the lead ship and asserted that this equipment will be provided for follow-on ships by their FY-78 Operations/Safety Improvement Program (OSIP) funding.

f. NAVSEA will be responsible for determining the adequacy of the Battery Shop.

g. NAILSC representatives agreed to accepting the responsibility of evaluating the Dominion Aluminum Fabricating, Limited' (DAF) Integrated Logistic Support Plan (ILSP) for the Recovery, Assist, Secure, and Traverse (RAST) gear. PMS-399 and NAVAIR-4103 representatives agreed that there should be an Integrated Logistic Support Management Team (ILSMT) for the RAST program.

h. NAILSC and HSL-32 agreed to check the adequacy of the electrical power distribution in the hangars and the internal hangar facilities.

i. NAILSC agreed to tailor the "Personnel Equippage" Allowance Equipment List (AEL) to correspond to the helo detachment's needs.

j. NAILSC and NAVSEA will check the on-board communications requirements as regards the helo detachment's operations.

k. NAILSC was assigned to evaluate the adequacy of the aviation storeroom space.

l. NAVAIR-4125 will check on the composition of the "pack-up kit" in regards to composition, prepositioned items, and Maintenance Information Automated Retrieval System (MIARS) equipment.

Copy available to DDC does not permit fully legible reproduction

4000
ILS311 7 6 2

Subj: Joint FFG-7 Logistic Support Conference; minutes of

m. NAVAIR-4125 will ensure identification of the Individual Material Readiness List (IMRL) requirements for the torpedo dolly.

n. PMS-399 will investigate the feasibility of providing lockers for flares and flammable fluids close to the hangars and the possibility of providing a "ready rack" for sonobuoy storage.

5. Enclosure (1) is a list of attendees at this conference. Enclosure (2) details the specific action items, the assigned responsibility, and the completion dates.

6. NAILSC was assigned the responsibility of monitoring and coordinating the action on the assigned areas. When action items have been completed, reports on the actions taken should be forwarded to the NAILSC Code ILS311 for coordination and forwarding to the Program Manager.

W. F. LAVALLEE
By direction

Enclosure (1)

ACTION ITEMS FROM
FFG-7 LOGISTIC SUPPORT CONFERENCE OF 18 NOV 75

ACTION ITEM 1 - LAMPS DATA LINK, SKR-4

Due to funding constraints, the LAMPS Data Link (SKR-4) will be cross-decked between ships as required to support deployed helo detachments. The spares, test equipment, and tech pubs required for support must also be cross-decked at the same time. The total pack-up, equipment and support, will be identified. These items will be assembled in "pack-up kit" form to facilitate handling and inventory control. The TYCOMs should be informed of and consulted with on this subject.

ACTION: NAVELEX (Code 520C)

COMPLETION DATE: 1 February 1976

ACTION ITEM 2 - LAMPS ACOUSTIC PROCESSOR, SQR-17

Installation and management of the SQR-17 will be the same as for the SKR-4. The TYCOMs should be informed of and consulted with on this subject.

ACTION: NAVSEA (Code 661C)

COMPLETION DATE: 1 February 1976

ACTION ITEM 3 - HORIZON BAR

The "horizon bar" which is part of the VLA "Add-On" package is mentioned in the SPD as being applicable to the lead ship and the land-based test site, but it is not mentioned for the ships to follow. This should be corrected. Also, the entire VLA "Add-On" package must be confirmed for accuracy and completeness.

ACTION: NAVAIR (Code 537)

COMPLETION DATE: 1 February 1976

ACTION ITEM 4 - TEST EQUIPMENT REQUIREMENTS

PMS-399 needs to know what the test equipment requirements are for all the SCHEDULE "A" equipment. If possible, SCAT codes (or a similar coding) should be provided.

ACTION ITEM 4 (continued)

ACTION: NAILSC (Code 311)

COMPLETION DATE: 1 February 1976

ACTION ITEM 5 - BATTERY CHARGER/ANALYZER

The Battery Charger/Analyzer (1000C-1/1410 models) will be used on FFG-7. There are currently 25 battery chargers of this type in the fleet. This fitting-out equipment is expected to be funded via FY-78 OSIP. AIR-534 will ensure that one charger and one analyzer will be provided for the lead ship by January 1977.

ACTION: NAVAIR (Code 534)

COMPLETION DATE: January 1977

ACTION ITEM 6 - BATTERY CHARGER ROOM

Adequate ventilation should be provided for the battery locker. Also, it may be that lead/acid and NiCAD batteries require segregated storage facilities. These factors require investigation.

ACTION: NAVSEA (PMS-399)

COMPLETION DATE: 1 February 1976

ACTION ITEM 7 - RAST

The Dominion Aluminum Fabrication ILSP for RAST appears to be deficient in several areas (e.g., maintenance and operator personnel training). NAILSC was asked to evaluate this ILSP and provide appropriate logistics analysis. NAVSEA will provide low-level funding and NAVAIR will submit the effecting airtask.

ACTION: NAILSC (Code 311)
NAVAIR (Code 4103C)
NAVSEA (Code PMS-399)

COMPLETION DATE: Pending

ACTION ITEM 8 - PERSONNEL EQUIPPAGE

PMS-399/SUPSHIP (Bath) needs to know the allowances of personnel equippage (flight deck clothing, etc.) for the helo

ACTION ITEM 8 (continued)

detachment. NAILSC will evaluate the existing AEL pending positive identification of the manning structure.

ACTION: NAILSC (Code 311)

COMPLETION DATE: TBA

ACTION ITEM 9 - COMMUNICATIONS

The requirements for integrated shipboard radio communication with the LSE, Bridge, Tower, and aircraft have been validated. The responsibility for the installed equipment must be determined.

ACTION: NAILSC (Code 311)
NAVSEA (Code PMS-399)

COMPLETION DATE: March 1976

ACTION ITEM 10 - ELECTRIC POWER DISTRIBUTION

The adequacy of the electric power distribution in the hangars must be evaluated and a retractable, spring-loaded cable reel must be provided. (These items should be coordinated with NAVSEA-04922.)

ACTION: NAILSC (Code 311)
HSL-32

COMPLETION DATE: February 1976

ACTION ITEM 11 - HANGAR FACILITIES

The adequacy of the facilities for changing engines/transmissions will be determined. The internal arrangement of the hangars also needs to be reviewed. Perusal of the current engineering drawings by fleet personnel is encouraged.

ACTION: NAILSC (Code 311)
HSL-32

COMPLETION DATE: February 1976

ACTION ITEM 12 - AVIATION STOWAGE FACILITIES

The required volume for aviation stores will be compared to the available storeroom space to determine its adequacy.

ACITON: NAILSC (Code 311)

COMPLETION DATE: February 1976

ACTION ITEM 13 - SUPPLY PERSONNEL

The feasibility of substituting an AK rating for one of the ship's SK ratings in order to adequately support the aviation supply requirements will be investigated.

ACTION: NAVSEA (Code PMS-399)

COMPLETION DATE: March 1976

ACTION ITEM 14 - TORPEDO DOLLY

Responsibility for the torpedo dolly has recently been transferred to NAVSEA; however, the IMRL items to be included in the squadron pack-up need to be determined.

ACTION: NAVAIR (Code 4125)

COMPLETION DATE: March 1976

ACTION ITEM 15 - HARPOON

NAVSEA has assumed total responsibility for HARPOON. No further NAVAIR action is required.

ACTION: NAVSEA

ACTION ITEM 16 - PACK-UP KIT RESPONSIBILITIES

Responsibility for the helo detachment's pack-up kit and its contents must be ascertained. The responsibility for furnishing the technical publications, MIARS cartridges/readers must also be addressed.

ACTION: NAVAIR (Code 41251B)

COMPLETION DATE: March 1976

ACTION ITEM 17 - PYROTECHNICS LOCKER

The possibility of providing a locker for flares/flammable material in the hangar will be explored. Providing a "ready rack" for sonobuoys (to facilitate fast turnaround operations) will be investigated similarly.

ACTION: NAVSEA (Code PMS-399)

COMPLETION DATE: March 1976
