Director

INTRODUCTION

↙ This document is an index of all spectrum signature data collected in accordance with the procedures in MIL-STD-449 () and submitted to ECAC. It is published for the purpose of acquainting government agencies and their contractors with the availability of these data. Users desiring any of these documents are requested to requisition them through the Defense Documentation Center (DDC), not from ECAC. For this purpose DDC reference numbers have been included where available. Those spectrum signatures with an "L" after the DDC number are controlled. Requests for these publications must be sent through the indicated service for approval prior to request from DDC. The DDC Technical Abstract Bulletins (TAB) indicate the appropriate military office to which the request should be addressed.

The user is warned that, although MIL-STD-449 () was used as a guide in collecting these data, variations in the equipment, specific requirements of the contracting agency and/or ECAC, or technical difficulties encountered in measuring, have made each report unique. Examination of each report is necessary to determine its usefulness for a particular need.

This document supersedes ECAC I-1M (SS), INDEX OF SPECTRUM SIGNATURE DATA, May 1974.
