SDCS Event Report No. 116

Novaya Zemlya SSR, 29 September 1976

This event report contains seismic data from the Special Data Collection System (SDCS), and other sources for the above event. Published epicenter information from seismic observations is:

	"P" Arrival	Origin Time	Lat.	Long.	m_b	M_s
NORSAR	03:04:37.0	02:59:57.0	73.4N	055.1E	6.0	N/A
Hagfors	03:04:34.9	03:00:56.0	71N	042E	6.5	5.3

Using SDCS stations, LASA and NORSAR, the epicenter location and magnitudes become

02:59:59.6	73.1N	055.0E	5.6	N/A
------------	-------	--------	-----	-----

All SDCS stations were operational during this time period.

Short-period signals associated with this event were recorded at all SDCS stations, LASA, and NORSAR. All SDCS data were retrieved from the digital field tapes and horizontal channels were rotated. Information for LASA is from the LASA Data Center Teleseismic Report. NORSAR data is from their bulletin.

Long-period signals associated with this event were detected at only one SDCS station, RK-ON. Waveform data for both LASA and NORSAR was unobtainable.

Scaling factors on plots are millimicrons at 1 Hz for SP and 0.04 Hz for LP (not corrected for instrument response).
